*Program Objectives:* The purposes of the Centralized Services Division are to reduce customer division costs of files maintenance, inventory management, remote data entry, and research support without adversely affecting processing time; to increase utilization of and reduce costs associated with remote data entry terminals and microfilm and associated equipment; and to increase the level of security over taxpayer information. *Abstract:* This agencywide review of Centralized Services recommended that the Internal Revenue Service establish management information systems and controls in order to make more effective and efficient improvements in Centralized Service's work processes by identifying problems and measuring the effect of changes. Management has initiated actions to correct problem areas.

*Program Objectives:* The purpose of Internal Revenue Service Data Processing Operations is to plan, direct, and coordinate the analysis, design, development, maintenance, and operation of data processing applications used in the administration and enforcement of Federal tax laws and regulations. *Abstract:* Implementation of the Information Returns Program (IRP) has significantly improved the Service's ability to identify underreporters and non-filers. Several areas where revisions to the program could result in a more effective and efficient IRP include: improvements in the initial processing of information returns by raising dollar tolerances; followup on underreporters to ensure they understand the reporting requirements and voluntarily file correct returns in future years; and improvement in the quality of information returns filed on magnetic tape. Management will explore the possibility of implementing the program on a nationwide basis.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Return Preparers Program is designed to identify and penalize unscrupulous or fraudulent return preparers. *Abstract:* This review of the tax Return Preparers' Program showed that priorities and specific measurable program goals and objectives have not been established and acceptable levels of compliance have not been determined for preparer returns. Management information currently being gathered is not adequate and cannot be used to evaluate the progress of the program and to assure that the program is achieving its desired results. Penalty provisions have not been applied with consistent emphasis from office to office. Management will request a study to determine the feasibility of measuring preparer compliance and the information necessary to evaluate the progress of the program. Compliance guidelines for Fiscal Year 1981 require adherence to the guidelines in the Manual, the Revenue procedure, and the revenue rulings.

**Authority:** Internal Revenue Code of 1954 (P.L. 83-591; 26 U.S.C. 7802, 7805); Reorganization Plan 1 of 1952.
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The purpose of the Internal Revenue Service's Data Processing Operations is to plan, direct, and coordinate the analysis, design, development, maintenance, and operation of data processing applications used in the administration and enforcement of Federal tax laws and regulations. *Abstract:* It is the desire of the Internal Revenue Service's Taxpayer Service to answer as much of the total demand for tax assistance as possible with the staff and communications resources available. Taxpayer Service toll-free telephone consolidations implemented to date have not yielded the savings estimated. Accurate savings estimates are needed to determine if the Service can expect to recover the substantial costs of implementing the consolidations. The Service should reevaluate its consolidation efforts to determine whether significant cost savings can be realized. The Service's planning process for the consolidations needs improvement. More comprehensive plans which clearly define the overall direction of the consolidation effort are needed. The Service should establish a long range consolidation plan to identify consolidations to be performed, a task force to oversee the plan, aid specific goals stating expected achievements of consolidation and for measuring the achievements. Management is correcting the problems identified during the review.

**Availability:** GAO

**Geographic Relevance:** National

*Program Objectives:* The objectives of this program are to: (1) collect unpaid accounts and secure delinquent returns; (2) develop and implement programs to prevent accounts from becoming delinquent and prevent nonfiling; and (3) determine and analyze the reasons for and types of nonfiling. *Abstract:* The Federal Income Tax System is a pay-as-you-go system and, as such, requires employers to withhold taxes from employees and turn the withholdings over to an authorized financial institution. GAO found that withheld income and social security taxes accounted for $298 billion of the $460 billion that the Internal Revenue Service (IRS) collected in Fiscal Year 1979. An estimated 31% of the employers' accounts involved fictitious deposit claims, and these fictitious deposit claims delayed IRS collection action by an average of 64 days. Although IRS has tried to prosecute employers who fictitiously claimed deposits for filing fraudulent tax returns, IRS abandoned the prosecution program because it was necessary to prove criminal willfulness, and this had become too difficult. Under present procedures, IRS has tried to identify employers who repeatedly claim fictitious deposits. If IRS identifies such a repeater, it notes on the employer's tax file that speedier collection action should be taken on subsequent returns when the claimed deposits do not match those posted at the bank. The identification procedure lacks definitive criteria, however, so there is no assurance that all such employers are identified. Thus, present and proposed procedures are insufficient to resolve the problem. GAO recommended that the Commissioner, IRS, pursue the enactment of legislation to provide a civil penalty on employers who claim fictitious deposits on their employment tax returns. The civil penalty should be possibly as much as 25% of the fictitious deposits.

**Availability:** GAO

**Geographic Relevance:** National

*Program Objectives:* The objectives of this program are to: (1) collect unpaid accounts and secure delinquent returns; (2) develop and implement programs to prevent accounts from becoming delinquent and prevent nonfiling; and (3) determine and analyze the reasons for and the types of nonfiling. *Abstract:* The formula which the Internal Revenue Service (IRS) uses to calculate interest on unpaid taxes fails to reflect the Government's costs for credit administration and borrowing money. GAO estimates that for these reasons in Fiscal Year (FY) 1979, the present formula deprived the Government of about $286 million in interest charges. Conversely, in a period where the cost of Federal borrowing is declining, the present formula could also cause interest to be overassessed to delinquent taxpayers. GAO found that the present interest rate formula does not provide for adjusting the interest rate frequently enough or encourage taxpayers to pay taxes promptly in all instances. The formula should be changed so that the Government is compensated for costs related to unpaid taxes. Adjusting the interest rate semiannually, using the 1-year Treasury bill rate, and redetermining the overhead factor annually would keep the interest rate more in line with the Government's cost of unpaid taxes. The assessed interest of IRS is generally lower than the rate available in commercial money markets. The present interest formula provides for rounding the calculated interest rate to a whole percentage. This procedure cost the Government at least $45 million in FY 1979.

**Program:** Taxpayer Service
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Internal Revenue Code of 1954 (P.L. 83-591; 68 Stat. 915; 26 U.S.C. 7802, 7805); Reorganization Plan 1 of 1952.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives of this program are: (1) to aid voluntary compliance with Federal tax laws on the part of all taxpayers by informing them of their responsibilities and by providing service which will assist them in meeting their obligations; and (2) to protect the confidentiality of tax returns and return information, and the taxpayers' right to privacy, while administering various disclosure provisions. *Abstract:* Each year, millions of taxpayers are required to make estimated tax payments because they have income that is not subject to withholding and/or from which not enough tax is withheld. The forms and instructions individual taxpayers use to comply with the estimated tax requirements are examined as part of a series presented in response to a request by the Joint Committee on Taxation. Millions of taxpayers are penalized each year for not making adequate and/or timely payments of estimated tax because the related forms and instructions are difficult to use and understand. Although the Internal Revenue Service (IRS) has made some recent improvements which should alleviate the problem somewhat, taxpayers could more easily understand the forms and instructions if: (1) a composite listing of pertinent references were available, or if the needed information were not scattered; (2) the instructions better explained the rationale for estimated tax; and (3) the forms and instructions were written more clearly, included more illustrations, and were better designed. Due to the number of taxpayers being affected, IRS should focus on this problem as quickly as possible. A good approach would be to specify these forms and instructions as part of the work to be done under the contract recently awarded to simplify the income tax forms and instructions for individual taxpayers.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives of this program are: (1) to encourage voluntary compliance with the internal revenue laws; (2) to assure evenhanded application of those laws; and (3) to assure adequate enforcement of them through the determination of correct tax liability by the selective examination of tax returns, the correction of errors, and explanation of these corrections to taxpayers. *Abstract:* The Internal Revenue Service (IRS) partnership examination program was set up to address both tax shelter and traditional partnerships. However, this report, which focuses on traditional partnerships, criticizes: (1) IRS' use of income-oriented audit classes for distinguishing between the two types of partnerships for planning purposes; (2) IRS' lack of data on the costs, yields, and levels of voluntary compliance associated with traditional partnership returns; and (3) IRS' lack of an effective discriminant function formula for identifying those traditional partnership returns with the highest potential for change as the result of an audit. These three deficiencies had led to an unacceptably high level of nonproductive audits being performed on traditional partnership returns. The report recommends that IRS reconsider its examination strategy for partnerships. The Commissioner of IRS should first decide whether the partnership program should continue to address traditional partnerships. If the answer is yes, he should better distinguish between traditional and tax shelter partnerships so that respective goals can be set and accomplishments measured with more precision. He should develop the voluntary compliance and cost/yield data necessary for establishing appropriate examination goals for traditional partnerships, and develop a system for more effectively identifying those traditional partnership returns having the greatest potential for change.

*IRS' Handling of Undelivered Income Tax Refund Checks.* (GGD-81-71).
4/10/81; 9 pp.
**OMB Funding Code/Title:** 20-0912-0-1-803 / Taxpayer Service and Return Processing
**Program:** Data Processing Operations (Tax Return Processing: Tax Administration)
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Internal Revenue Code of 1954 (P.L. 83-591; 68 Stat. 915; 26 U.S.C. 7802, 7805).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives of this program are to provide for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of those payments, processing and accounting for revenue collection and Federal Tax Deposits, and verification through an automated master file system of the accuracy of information provided by the taxpayer. It provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible nonfilers for investigation, and assistance in the selection of taxreturns for audit. *Abstract:* The Internal Revenue Service (IRS) is responsible for mailing out tax refunds. IRS does not actively furnish newspapers with lists of individuals due undelivered income tax refunds, and achieves mixed results in getting them published. Although IRS has sought assistance from the Social Security Administration (SSA), it has been unable to determine the usefulness of SSA benefit files in locating individuals due refund checks. SSA has been slow in resolving a privacy issue of how it can provide SSA beneficiary information to IRS. The Commissioner of Internal Revenue should require the routine monitoring of IRS districts' efforts in getting newspapers to publish lists of individuals entitled to undelivered refund checks and measure the effectiveness of these lists in getting checks delivered to the rightful individuals. The Secretary of Health and Human Services should direct the Commissioner of Social Security to assist IRS in determining the feasibility of using the SSA benefit files by: (1) matching as soon as possible IRS computer tapes on undelivered refunds to address information on SSA benefit files, and (2) resolving the disclosure issue as quickly as possible so that taxpayers identified by the computer tape match can be notified, either by an SSA or IRS mailing, that they are entitled to undelivered tax refund checks.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of this program is to ensure enforcement of the criminal statutes relating to violations of internal revenue laws through investigating cases of suspected intent to defraud, recommending prosecution as warranted, and assisting in the preparation and trial of criminal tax cases. *Abstract:* The efficiency and effectiveness of the Federal Government's tax enforcement efforts have been hampered by a time-consuming and duplicative legal review process for criminal tax cases. About 75% of the investigations conducted by the Internal Revenue Service (IRS) do not lead to prosecutive recommendations or convictions. Readily available legal assistance during investigations could reduce staffday expenditures, thus improving IRS productivity in terms of the quality and timeliness of its investigations. However, it routinely does not obtain the assistance until after investigations are completed. Many criminal tax cases are declined for prosecution by IRS or Justice Department attorneys who determine that such cases do not meet certain legal standards. The legal review process clearly needs restructuring, but the best means for doing so is not clear. GAO recommended that Justice and Treasury/IRS jointly develop a streamlined legal review process for criminal tax cases and it presented various alternatives for revising the process. GAO also recommended that the Congress ensure that a streamlined legal review process is developed and that it realizes potential cost savings while safeguarding taxpayers' legal rights.

**Program:** Data Processing Operations
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Internal Revenue Code of 1954 (P.L. 83-591; 68 Stat. 915; 26 U.S.C. 7802, 7805); Reorganization Plan 1 of 1952.
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The purpose of the Oregon program is to collect uncontested delinquent debts due the State by keeping State tax refunds as offsets. GAO has recommended that the Internal Revenue Service (IRS) test a Federal offset program. The purpose of the Federal program would be to collect uncontested delinquent debts due to Federal agencies by keeping individual Federal income tax refunds as offsets. The Federal program would not replace effective agency collection systems but would provide a simple and economical method of collecting debts that are uncollectible by any other means. *Abstract:* The State of Oregon has a very successful program for collecting uncontested delinquent debts by keeping State tax refunds as offsets. Significant amounts of money have been collected that would have otherwise been uncollected. At the same time, the rights of the debtors have been protected. In 1979, the State spent about $200,000 to collect over $2.4 million in delinquent debts by offset. In evaluating this program, the possibility of its applicability to the Federal Government was explored. The procedures operating effectively in Oregon to protect debtors' rights are similar to procedures recommended for the Internal Revenue Service (IRS) test of a Federal offset program. As demonstrated in Oregon, these procedures would fully protect the individual debtor's rights. While offset is a needed and useful tool for collecting delinquent debts, Federal agencies would still be primarily responsible for collecting debts resulting from their operations. The offset program would not supplement nor replace effective agency collection systems. GAO continues to believe that an income tax refund offset program is a logical, simple, and economical method of collecting debts that are uncollectible by any other means. An effective offset program would substantially reduce the over $1 billion the Federal Government loses annually by writing off uncollectible debts. The evidence favoring a test of a Federal offset program is overwhelming. GAO has recommended that Congress provide funding for IRS to test and adopt an offset program.

*Program Objectives:* The Bureau of the Mint assists the Treasury Department in cash management functions by: accurate forecasting and control of cash outlays and receipts; billing, collecting, and depositing money in a timely manner; and paying outstanding bills on their due date but not before. *Abstract:* An evaluation was made of cash management practices at Bureau of the Mint headquarters and field offices, except Fort Knox, for Fiscal Year 1980. Cash management procedures required by Treasury and Mint Regulations were generally complied with at each office. Due to a number of causes which included carelessness, personnel shortages, and the lack of a satisfactory system of internal control at home offices, there was noncompliance with established procedures and inefficient practices in various cash management activities. Recommendations were made for ways to improve cash management practices and to comply with the Treasury Fiscal Requirements Manual.

**Availability:** Agency
**Geographic Relevance:** National; City; County; Congressional District

*Program Objectives:* The U.S. Bullion Depository at West Point manufactures one-cent coins for general circulation, manufactures and distributes the congressionally mandated American Arts Gold Medallion, and provides secure storage of certain Defense Stockpile supplies and United States-owned silver bullion. *Abstract:* This study explores the feasibility of terminating all activities at West Point to reduce the Bureau of the Mint's budget requirements. One-cent coin production alternatives, including extended overtime, scheduled seven-day workweek, and replacing Philadelphia strip production with coining equipment are costly and inefficient and create total dependence on a sole coin strip supplier. Gold Medallion Program alternatives with private manufacture or relocation to the Philadephia Mint are more costly and less secure. Alternatives to storage of strategic/sensitive materials, including General Services Administration facility, another northeast location, or Fort Knox, are more costly, less secure, and/or do not facilitate easy geographic dispersal. The study concludes that since West Point is more cost effective, it should be allowed to continue operations.

**Congressional Relevance:** *House* Committee on Banking, Finance end Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of February 12, 1873 (P.L. 42-131; 17 Stat. 424; 31 U.S.C. 272-277, 317, 324, 324F, 324L).
**Availability:** GAO

*Abstract:* The Bureau of the Mint's data center serves other Treasury bureaus and Federal agencies as well. A review was performed in order to evaluate how well the Bureau's automated data processing resources are managed. Incomplete and inaccurate computer utilization measurements have caused Bureau officials to believe that the data center was functioning at close to full capacity. In fact, the computer can accommodate almost twice its present workload. The Mint should make certain that the necessary performance and utilization measurements are collected and properly interpreted.

## UNITED STATES SAVINGS BONDS DIVISION

**E01208-001**
*United States Savings Bonds Program: A Study Prepared for the Committee on Ways and Means, U.S. House of Representatives.* (RS1-04-81).
1/81; 84 pp.
Steven R. Mead
**OMB Funding Code/Title:** 20-0560-0-1-803 / Administering the Public Debt
**Program:** Promoting the Sale of Savings Bonds
**Congressional Relevance:** *House* Committee on Ways and Means; *Senate* Committee on Finance. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.

**Authority:** Act of September 24, 1917 (P.L. 65-43, § 22; 40 Stat. 291; 31 U.S.C. 757c).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Savings Bonds Division's major mission is to contribute to the cost-effective management of the public debt through the promotion of the sale and retention of U.S. Savings Bonds. An additional mission is to ensure that Savings Bonds are available to as large a percentage of the population as is consistent with sound marketing practice. *Abstract:* The Savings Bonds program makes an important contribution to overall public debt management objectives. Savings Bonds are a much less costly means of financing than the alternative of Treasury marketable securities; they broaden the market for Treasury debt and help to achieve the goal of placing more of the debt in the hands of longer-term savers. The program provides an opportunity for millions of small savers to participate in the financing of their Government and to develop habits of individual thrift which contribute to the broader economic objectives of increasing savings and reducing inflation.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Savings Bonds Division's major mission is to contribute to the cost-effective management of the public debt through the promotion of the sale and retention of U.S. Savings Bonds. An additional mission is to ensure that Savings Bonds are available to as large a percentage of the population as is consistent with sound marketing practice. *Abstract:* Redemptions of U.S. Savings Bonds reached historic peaks in the first quarter of 1980. The Savings Bonds Redemption Survey indicated significant attrition among payroll savers who redeem Savings Bonds to reinvest. A promotional message directed to these persons should make them reconsider redeeming Bonds because of improved yields and tax advantages, make them realize that they were able to save enough with Savings Bonds to reinvest elsewhere, and make them want to continue to participate in this savings program.

An additional mission is to ensure that Savings Bonds are available to as large a percentage of the population as is consistent with sound marketing practice. *Abstract:* The Electronic Data Processing (EDP) Survey was conducted to assess the efficiency of the procedures used in Savings Bonds Division field offices to prepare input transactions for the EDP System. Significant findings included: (1) promotional personnel do not provide clerical staff sufficient information to process EDP forms; (2) clerical staff receive insufficient training in EDP procedures; (3) promotional personnel do not make good use of information available for EDP reports. Changes to forms, procedures, and instructional materials were recommended.

*Program Objectives:* The Savings Bonds Division's (SBD's) major mission is to contribute to the cost-effective management of the public debt through the promotion of the sale and retention of U.S. Savings Bonds. An additional mission is to ensure that Savings Bonds are available to as large a percentage of the population as is consistent with sound marketing practice. *Abstract:* Effective promotion of the payroll-savings program at a large company with branches across the United States depends upon timely arrival of promotional materials and coordinated efforts by SBD field staff nationwide. Although the existing methods of communication are usually adequate, they do not always provide the degree of coordination required to insure effective campaigns at a large multilocation companies. The Payroll Savings Communications Study will determine the severity and extent of problems, estimate the impairment of program effectiveness, identify alternative problem solutions, and recommend one solution for implementation.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The objectives of the program are to minimize the amount of counterfeit obligations and other securities of the United States and foreign governments passed successfully on to the public and to minimize losses resulting from the forging of obligations or other securities of the United States and foreign governments. *Abstract:* In response to the Department of Energy's Standby Gasoline Rationing plan, the U.S. Secret Service undertook a study to examine the implications that a gasoline-rationing program would have on its investigative resources. This was necessary since, should such a program be implemented in the future, the Secret Service would be responsible for investigating counterfeit ration coupons and the forgery of gasoline ration account checks. The study examined the basis for a counterfeiting and forgery threat and the probable level of severity. Based upon this forecast, a projection of investigative resources required to meet the increased workload and associated costs was derived.

**Availability:** GAO

*Abstract:* The Secret Service has computer resources in excess of its requirements. Because the Service did not define its data processing needs beforehand, it has acquired two separate and identical computers when one would have been sufficient for its workload. The Service should perform a cost benefit analysis of its data processing requirements and determine the equipment necessary to support these needs.

**Authority:** Act of September 2, 1789 (P.L. 1-6; 64 Stat. 1280; 5 U.S.C. App.); Reorganization Plan 26 of 1950.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The study aims to provide long-range planning (3 to 5 years) for equipment, resources, operations, and methodology which considers data processing needs from a practical, cost beneficial perspective. It will implement operational and organizational changes within the Automated Data Processing Division which will improve capability to efficiently serve Bureau data processing requirements; install standards for software and documentation to ensure consistent quality and maintainability of developed software; develop a cost-accounting system to keep customers advised of data processing direct/indirect costs; and formalize methods and procedures for determining priorities and selecting candidate systems for development.

**Geographic Relevance:** National

*Abstract:* A special study group found that automated support for Technical Services should result in increased productivity and dollar savings in several areas. Specifically, three areas were identified as having potential for increased efficiency and productivity through automated support: Alcohol and Tobacco Qualifications; Tax Returns, Claims and Reports of Operation; and Firearms and Explosives Applications. The study group recommends that Regulatory Enforcement establish a 2-year Technical Services automation support program for the design and implementation of an automated system. The program should include the design and implementation of: automated support for alcohol and tobacco qualifications; a data processing system for tax returns, claims, and reports of operation; and expanded support for firearms and explosives applications.

*Program Objectives:* The Bureau of Alcohol, Tobacco and Firearms aims to: suppress the nationwide manufacture and distribution of non taxpaid distilled spirits and tobacco through the apprehension and criminal prosecution of the violators; eliminate the availability of firearms for illegal purposes; and protect interstate and foreign commerce against interference and interruption by reducing the hazard to persons and property arising from misuse and unsafe or insecure storage of explosive materials. *Abstract:* The report identifies and discusses the need to establish criteria to evaluate and compare laboratory productivity; procedures to enable consistent accountability for laboratory samples, equipment, and supplies; and specific workload system objectives. Various areas relating to functions and activities that affect laboratory operations are discussed. These include a need for manufacturers of small cigars to submit their products for analysis before marketing and the need to revise budgetary and fund allocation control procedures.

**Geographic Relevance:** National

*Program Objectives:* The purpose is to assure accurate determination and full Federal revenue due from distilled spirits, beer and wine taxes; to assure industry compliance with the pertinent portions of the Internal Revenue Code and to detect and prevent violations by the legal liquor industry; to disclose hidden ownership, suppress commercial bribery, consumer deception, and other unfair trade practices under the Federal Alcohol Administration Act; and to gain compliance with related Federal, State, and local government requirements with respect to health and ecology. *Abstract:* The Internal Revenue Service pays about $100 million annually to manufacturers of nonbeverage products based on Bureau of Alcohol, Tobacco and Firearms approved claims. The report recommends strengthening controls over claims processing and other operating procedures. The report also discusses regulations allowing formulas to be filed within 6 months after the product is manufactured and suggests that Counsel reevaluate this provision in light of the control weaknesses caused by this lengthy time period.

*Abstract:* Although this study disclosed that the percentages of tax adjustments and violations were roughly equal for the various tax categories of alcohol and tobacco excise taxpayers, the bulk of the significant tax adjustments and adverse actions were in the category of those facilities paying over $1 million a year in excise taxes. Revenue protection efforts will be directed at establishments in that category. In addition, based on the findings, the regulatory effort at smaller revenue plants will include an expanded number of consumer protection phase inspections and revenue protection inspections of a "taxpayer service" nature.

**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The Workload Study was designed to enable Bureau of Alcohol, Tobacco and Firearms Regulatory Enforcement to determine equitable Technical Services staffing patterns for each of seven regions. The development of the Technical Services Workload Study has provided the means to apportion current authorized staffing for each regional Technical Services activity. This apportionment will be compatable with each region's workload and the level of complexity of their industry members. The study is designed to establish staffing patterns for each regional Technical Services activity that will be compatible with their related workloads and equitable for regional relationships.

**Authority:** Organized Crime Control Act of 1970 (P.L. 91-452, title XI, § 1102; 84 Stat. 952; 18 U.S.C. 841-848).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The program aims to assist law enforcement and fire officials in their efforts to reduce the number of arson incidents in the United States. The Bureau of Alcohol, Tobacco and Firearms (ATF) directs its efforts toward the reduction of incidents of arson-for-profit schemes through the Arson Task Force approach in 26 cities while conducting individual investigations in non-task force cities. *Abstract:* The arson enforcement program was examined to determine the characteristics associated with an effective enforcement effort. A cooperative approach undertaken by an ATF unit or units of full-time investigators supported by other law enforcement or fire service agencies and Federal or State prosecutors for the purpose of investigating and prosecuting arson cases are three times as likely to have prosecution movement than those locations without these three characteristics. Characteristics which also increase the likelihood of prosecution movement include agents working closely with insurance investigators, agents assigned full-time to arson investigations, Federal or State prosecutor support, and fire department investigators with arrest powers for ATF points of duty in cities under 250,000 population. Recommendations include discontinuing the Bureau policy of having task forces in all Organized Crime Strike Force and satellite city locations, restricting the number of task forces and concentrating agents in teams for arson investigations, and preparing strict guidelines for arson investigation in non-task force locations.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The program aims: to assure eccurate determination and full Federal revenue due from distilled spirits, beer and wine taxes; to assure industry compliance with the pertinent portions of the Internal Revenue Code and to detect and prevent violations by the legal liquor industry; to disclose hidden ownership, suppress commercial bribery, consumer deception, and other unfair trade practices under the Federal Alcohol Administration Act; and to gain compliance with related Federal, State, and local government requirements with respect to health and ecology. *Abstract:* The report recommends the elimination of three domestic in-bond transfer forms. There were approximately 140,000 of these forms processed in 1980. Control over domestic transfers will be maintained by onsite inspections and audits. Losses will be reported to area supervisors when they exceed losses allowable according to regulations. Estimated annual savings amount to about $78,000. The report also recommends the establishment of specific time periods to propose assessments for taxes due on outstanding exports and recommends changes in the requirements for proving that alcohol and tobacco products have been properly exported. Recommended changes will require the export carrier to certify that the alcohol and tobacco products were exported and eliminate the need for U.S. Customs Service certification. The report also recommends that responsibility for monitoring the tax liability on domestic alcohol and tobacco used on international airline flights be transferred to the U.S. Customs Service. Currently, U.S. Customs Service has physical control over such products but refers accountability of shortages and overages to the Bureau of Alcohol, Tobacco and Firearms.

**Availability:** Agency
**Geographic Relevance:** State; City; County

*Program Objectives:* The program aims to safeguard revenue sharing funds distributed by direct deposits and electronic transfers and to encourage more recipients to participate in the security aspects.
*Abstract:* An in-house Task Force established in March 1980 concluded its study of the security aspects of Electronic Fund Transfer (EFT) system of payments to approximately 67% of revenue sharing recipients. A recommendation to eliminate the EFT system was not acceptable to Office of Revenue Sharing (ORS) policy officials. The computer system is being revised to reduce the clerical time to process the EFT Forms. The revised system will require local government officials to verify the financial organization routing code and account number. The data have been sent to the local governments since inception of the ORS/EFT Program. However, the new procedures will stress the need for the local government to verify the data, thus improving the security aspects of the system. Division of responsibility in the clerical process will also improve the security aspects of the system.

**Availability:** National Academy Press
**Geographic Relevance:** National; City; County

*Abstract:* The objective was to study probable methodologies and come up with a usable one for use by Office of Revenue Sharing (ORS) which would reduce the error rate in estimates for small places. A panel found that the methodology used by the Bureau of the Census to produce intercensal estimates of population is generally sound. However, the methods were found to produce directionally biased estimates for some categories of governments and large random errors for other areas. The population for rapidly growing and rapidly declining areas tended to be underestimated and overestimated, respectively. Small subcounty areas (less than 2,500 population) tended to experience large random errors in the estimates. The panel presented proposals for technical modifications of estimating procedures which may improve the accuracy of estimates of large areas to some degree but knew of no feasible procedures for reducing errors for small subcounty areas. Estimates of per capita income were found to be less accurate than population estimates for small places. The panel had no recommendations for improving per capita income estimates.

*Abstract:* GAO found that previously reported problems which hindered the Office of Revenue Sharing's (ORS's) administration of the Revenue Sharing Act's nondiscrimination provisions continue to exist despite actions to improve its operations (e.g., through complaint investigations, achieving changes in recipient governments' employment practices, and delivery of services). The Secretary of the Treasury should direct ORS to modify its compliance tracking system, implement its proposed monitoring system, prepare single document compliance agreements, and establish cooperative agreements with State and Federal agencies which have civil rights enforcement responsibilities.

**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* The program objective is to improve electrical transmission capacity. *Abstract:* GAO found that, in addition to lowering electric rates in the Pacific Northwest and California, an annual average of 4 million barrels of oil could be saved by expanding the intertie system between these areas. A little over half the oil savings would result from the sale of surplus energy from the Northwest, while slightly less than half would come from the sale of additional surplus energy from Canada. However, several issues must be addressed before expansion can occur. Uncertainty exists among some California utilities, which are parties to the proposed expansion, over whether benefits from expansion will in fact materialize. In addition, there are some institutional and legal issues which must be addressed. GAO believes that to achieve this oil savings a closely coordinated effort between industry and the Federal Government will be required. The Secretary of Energy should require the Economic Regulatory Administration (ERA) to: (1) monitor the progress of Bonneville's negotiations with California utilities to ensure all feasible agreements are reached to upgrade the d.c. line; and (2) work with Bonneville and California utilities to facilitate development of the third a.c. line. If, after a reasonable period, the above efforts are unproductive, the Secretary should seek congressional authority which would allow Western and Bonneville to provide impetus for development. In addition, the Secretary should direct Bonneville and Western to study the need for a second d.c. line and ERA to monitor these studies to assure they are conducted on a timely basis.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to procure Department of Energy (DOE) services through controls. *Abstract:* Circumventing the normal procurement cycle will likely continue until the DOE successfully eliminates the causes of unauthorized commitments. There are three major reasons for unauthorized commitments: (1) DOE program officials often fail to plan procurement needs far enough in advance to utilize normal contracting procedures; (2) program officials encounter emergency program requirements and do not believe that enough time is available for normal procurement procedures; and (3) program offices fail to expeditiously review, approve, and transmit procurement requests to the procurement office. In addition, DOE Procurement Regulations do not contain the same restrictions as the Federal Procurement Regulations on ratifying improper commitments. The Secretary of Energy should take action to: (1) eliminate violations of the Antideficiency Act; (2) clearly define in DOE regulations the circumstances under which a formal ratification can be made; (3) require all program offices in DOE to effectively plan procurement actions 1 year in advance and enter them into the existing DOE planning system; (4) amend the DOE Procurement Regulations governing ratifications to make them consistent with the Federal Procurement Regulations; (5) develop a program to educate all agency personnel who are responsible for initiating procurement requests in the proper procedures for emergency procurement situations; (6) develop a procurement request tracking system within each DOE program group to ensure that requests are reviewed and approved in a timely manner; and (7) develop procedures for identifying unauthorized commitments within the Department.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to assist and expedite commercial production of alternative fuels through selective grants. *Abstract:* The work performed by the Department of Energy (DOE) evaluation boards and the oversight provided by the Source Evaluation Boards was reasonably comprehensive and thorough. Evaluation criteria were appropriate and appeared to be applied consistently. However, frequent use of program policy factors such as geographic diversity heightened concern regarding the integrity of the selection process. Policy factors were assigned no priority, and DOE officials could apply any or none of them in choosing among proposals. As a result, the feasibility study projects which the Senior Review Board chose differed substantially from the rankings developed by the evaluation teams and Source Evaluation Board. The application by the Senior Review Board of the geographical diversity and technical mix factors weighed heavily in the final selection of projects and generally accounted for this difference. A need exists for policy judgments and some flexibility in the selection process. The myriad of factors which DOE considered in selecting projects indicates that it did not lose sight of the program objective. However, frequent use of policy considerations is an area requiring special care to avoid any inferences of impropriety in future project selections.

*Program Objectives:* The program objective is to protect against conditions amenable to reduction and environmental and work hazards, and improve health education and promotion. *Abstract:* An independent commission would be the best means to provide a centralized focus on energy health and safety issues. An independent commission would be relatively inexpensive and easy to establish, reorganize, and abolish. In addition, the disadvantages of establishing an independent commission appear to be less severe than those of the other three options. Congress should establish a President's Commission on Energy Health and Safety. It should mandate that: (1) the Commission be established as an independent body free from agency influence; (2) consist of a small number of members appointed by the President; (3) have an executive directorate, a relatively small staff, and an appropriate number of support staff; (4) expire at the end of 5 years if not renewed by Congress; (5) conduct high-level assessments and syntheses of energy health and safety issues inherent in the research, development, and regulation of energy at the Federal level; (6) report to the President and Congress on its findings, conclusions, and recommendations concerning Federal energy health and safety affairs; (7) report on actions that were taken by the appropriate agencies, based on the recommendations that the Commission made, to ensure that significant energy health and safety issues are brought to the attention of officials at the highest level of government; and (8) make recommendations for actions to the President, Congress, and appropriate Federal agencies.

**Availability:** GAO
**Geographic Relevance:** International/Foreign; National; State

*Program Objectives:* The purpose of the program is to develop new (nuclear) energy technologies. *Abstract:* GAO believes that the current strategy of postponing the commercialization date of the Liquid Metal Fast Breeder Reactor (LMFBR) program will not necessarily enable this country to achieve its nonproliferation goals. The projections of the availability of uranium are uncertain. Unanticipated events could increase the future demand for nuclear energy and the need for an early commercialization of breeder reactors. The ultimate economics of the LMFBR program are difficult to accurately project. The LMFBR is no more or less safe than the current generation of light water reactors. The LMFBR program lacks a clear mission. The disagreement between Congress and the Administration has made planning and directing the program difficult for the Department of Energy (DOE). Recent actions by the Administration underscore its desire to kill the Clinch River project and to defer any commitment for a substitute plant. A strong LMFBR program includes constructing and operating a plant, something which has not been done. A backup technology should be available for development in case the LMFBR program fails to meet its objectives. If Congress wishes to maintain a nuclear option or if it wishes to commit nuclear power as a long-term energy source, it should require DOE to demonstrate the viability of the LMFBR technology by mandating the construction of a breeder reactor facility.

**Authority:** Federal Energy Administration Act of 1974 (P.L. 93-275, § 5; 15 U.S.C. 764). Department of Energy Organization Act of 1977 (P.L. 95-91, title III, § 301; 91 Stat. 577; 42 U.S.C. 7151).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to enhance program review and evaluation activities and accelerate introduction of new energy sources. *Abstract:* The Department of Energy (DOE) and the Energy Research Advisory Board has not followed the requirements governing advisory committees in their operation of the Gasohol Study Group. The DOE policy regarding subgroups differed with the position of the General Services Administration and 12 other Federal departments. There was insufficient evidence to support a contention of conflicts of interest. Allegations concerning the technical quality of the report had little merit. An allegation that the report had no basis for claiming that ethylene-derived ethanol was sacrificing the oil savings advantages of ehanol was valid. Allegations concerning excessively high energy consumption and unreasonably low ethanol production potential were partially valid. The Secretary of Energy should conform DOE policy with the position of General Services Administration as to what constitutes an advisory committee under the Federal Advisory Committee Act and require that such subgroups: (1) be chartered, (2) have meetings open to public and announced in the Federal Register, (3) keep detailed minutes, and (4) make documents available for public scrutiny. The Secretary should implement a better method of selecting members to its study groups and require that it report all valid viewpoints on the issues it is addressing and the scope and methodology employed. The Secretary should review all DOE advisory committee activities and implement applicable aforementioned GAO recommendations.

*The United States Exerts Limited Influence on the International Crude Oil Spot Market.* (EMD-80-98).
8/21/80; 29 pp. + 2 app. (4 pp.)
**OMB Funding Code/Title:** 89-0228-0-1-276 / Departmental Administration
**Program:** Policy Analysis and System Studies
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Department of Energy Organization Act of 1977 (P.L. 95-91, title III, § 301; 92 Stat. 577; 42 U.S.C. 7151).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The program objective is to develop plans and programs, create basic conceptual frameworks for the department, and support formulation of international energy policy. *Abstract:* The United States suspended purchases for its Strategic Petroleum Reserve in April 1979, citing the possible effects of crude oil acquisition on the volatile international spot market. In early 1979, the Department of Energy (DOE) also privately advised U.S. oil companies to restrain their crude oil spot purchases. However fearing that imports had been sharply reduced, DOE in May of that year advised companies that spot purchases might be necessary. In late 1979, DOE sold oil from the Elk Hills Naval Petroleum Reserve, accepting bids approaching the highest international spot prices. Some countries then raised their oil and gas prices citing the DOE sale as justification. Additionally, DOE programs can simultaneously encourage and discourage companies from participating in the spot market, and it can affect a company's acquisition costs variously at different times. The Crude Oil Allocation Program was used to provide supplies to small refiners which otherwise have had to compete on the spot market. Crude oil price deregulation, being phased in through September 1981, could have a two-sided effect, either by being a source of upward price pressure or by moderating demand and prices on the international spot market.

**Program:** Compliance
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Emergency Petroleum Allocation Act of 1973, as amended (P.L. 93-159, § 5; 87 Stat. 627; 15 U.S.C. 754). Crude Oil Windfall Profit Tax Act of 1980 (P.L. 96-223; 94 Stat. 229; 26 U.S.C. 4081).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Department of Energy (DOE) has alleged billions of dollars in oil pricing violations by the petroleum industry. In many cases, DOE has attempted to avoid the cost and time involved in litigating civil cases by negotiating settlements with companies. However, less than one-third of the cases had been settled as of January 1981. In addition, DOE has generally been unable to obtain restitution for parties injured by the overcharges due to the inability to identify precisely who has been injured. The Secretary of Energy should: (1) allow refunds to customers only when DOE can assure that such refunds will result in restitution to injured parties; (2) direct appropriate enforcement officials to implement special procedures to identify and make refunds to parties who have suffered injuries because of overcharges; (3) separately identify restitutional provisions in consent orders; and (4) include specific requirements for the documentation a company must provide DOE as evidence of compliance in consent orders. The Secretary of Energy should work with the Attorney General to establish guidelines for the Department of Justice's review of settlement agreements which include companies' withdrawal of civil suits against the Government and to develop appropriate language to resolve current Justice objections to nonlitigative provisions in Office of Special Counsel global settlements for inclusion in pertinent future settlements. The Director of the Office of Management and Budget should assist DOE in developing a plan for the orderly resolution of outstanding violations and litigation. The Commissioner of the Internal Revenue Service should determine the effect that successful legal challenges to DOE regulations could have on enforcement of the Windfall Profit Tax Act. The Congress should consider the reasonableness and appropriateness of DOE carrying out a plan for resolving outstanding violation and litigation cases.

*DOE Light Water Reactor Fuel Utilization Improvement Program.* (EMD-81-51).
3/23/81; 3 pp. + 2 app. (13 pp.)
**OMB Funding Code/Title:** 89-0226-0-1-271 / Uranium Supply and Enrichment Activities
**Program:** Uranium Resource Assessment
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Atomic Energy Act of 1954, as amended (P.L. 79-585, § 31, as amended by; P.L. 83-703, § 1; 68 Stat. 948; 42 U.S.C. 2201(v)).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Although the Department of Energy (DOE) program for light water reactor fuel utilization is still at an early stage and only limited program results are available, GAO found that: (1) the 1988 DOE goal is reasonable, since a large part of the short-term demonstration program consists of proving that existing fuels can be used longer and working on new fuel savings designs and other improvements; (2) many utilities will probably use a major DOE short-term improvement, longer burnup fuel, to accomplish their own economic objectives of minimizing power generation costs at the expense of maximizing fuel savings; (3) how extensively the commercial nuclear industry will implement fuel savings improvements is uncertain at this time; (4) a draft study assessing potential regulatory issues has concluded that there are no regulatory problems which might preclude the widespread use of the DOE short-term improvements; and (5) the program will not foreclose a future option of reprocessing light water reactor spent fuel and recycling recovered uranium and plutonium or of deploying breeder reactors. Additionally, GAO found that, although the key to the success of the program is industry implementation, it is unlikely that DOE will realize its fuel savings goals in an absolute sense if the present trend toward longer intervals between refuelings continues. The Secretary of Energy should: (1) carefully consider the prospects for industry implementation to achieve maximum fuel savings and give priority to those improvements which offer both the highest fuel savings and the best chance of implementation to achieve those savings; and (2) defer spending research and development funds on fuel saving improvements which are at best only marginally attractive with reprocessing and recycling until a final decision is made on reprocessing and recycling.

**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555). Solar Heating and Cooling Demonstration Act of 1974 (P.L. 93-409, § 2-19; 88 Stat. 1069; 42 U.S.C. 5501-5517). Federal Energy Administration Act of 1974 (P.L. 93-275, § 29; 88 Stat. 97; 15 U.S.C. 761 note). Wind Energy Systems Act of 1980 (P.L. 96-345, title I, § 110; 90 Stat. 1139; 42 U.S.C. 9201-9213).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose of the Department of Energy's (DOE's) wind energy program is to accelerate the introduction of wind energy into production. *Abstract:* The utility industry generally agrees with DOE's basic strategy for developing wind energy. The strategy calls for researching, developing, and demonstrating a series of progressively more efficient and reliable machines, methodically studying ways to reduce costs until wind energy reaches a level competitive with conventional fuels, and then providing incentives to stimulate the use of wind energy. The utility companies surveyed are, however, concerned by the pessimistic outlook for DOE attaining its program goals, the need for more emphasis on a successful demonstration and less emphasis on complex machines, the questionable usefulness of the wind energy resource assessment portion of the program, and the need for better information dissemination on wind energy. The program goals may result in the installation of many wind machines which are not market-ready. Credibility of wind energy may be lost by pushing machines which are uneconomical, not reliable, unsuitable for utility use, and otherwise unattractive to potential buyers and users. A successful demonstration of a large wind machine would be the most important step DOE could take to advance the use of wind energy. The utilities believe that funds for the wind resource assessment could be better spent by supporting site specific wind surveys for those utilities that express interest in investigating the potential of wind energy in their respective service areas.

## ENERGY INFORMATION ADMINISTRATION

### E01301-001

*The Department of Energy Could Make Better Use of Existing Data To Monitor the Crude Oil Spot Market.* (EMD-80-95).
8/21/80; 4 pp. + app. (9 pp.)
**OMB Funding Code/Title:** 89-0216-0-1-276 / Energy Information Administration
**Program:** Data Information Services
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Federal Energy Administration Act of 1974 (P.L. 93-275, § 52; 88 Stat. 96; 15 U.S.C. 790a).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The purpose of the program is to collect, analyze, and disseminate energy information including energy consumption, production, and international energy markets. *Abstract:* Four separate Department of Energy (DOE) systems collect valuable information for monitoring and analyzing the crude oil market, including the spot market. However, their reports are not sufficiently current; some important information is lacking concerning the linkages between contract and spot sales, prices, and other conditions relating to the spot market. The Department's most systematic and timely data on U.S. oil company involvement in the spot market is not shared because of the proprietary nature of the raw data. DOE can greatly improve the quality and timeliness of monitoring and analyses by providing for better information sharing among the offices collecting and using the information. The Secretary of Energy should assure timely sharing of data from existing formal and informal information systems between the Office of Special Counsel for Compliance and the Office of International Affairs, while providing adequate protection for that data which is proprietary. He should define the term spot market on the Transfer Pricing Report. The Secretary should require companies to identify information on linkages between contract and spot sales in the Foreign Oil Supply Agreement Report. He should use the data, in properly aggregated form, from the existing crude watch information system to meet U.S. requirements of any future International Energy Agency quick response information system.

**Agency Contact:** General Accounting Office (202) 275-3678.

### E01301-002

*Millions Wasted Trying To Develop Major Energy Information System.* (AFMD-81-40).
5/81; 46 pp. + 4 app.
**OMB Funding Code/Title:** 89-0216-0-1-276 / Energy Information Administration
**Program:** Data Information Services
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Federal Energy Administration Act of 1974 (P.L. 93-275, § 52; 15 U.S.C. 790a).
**Availability:** GAO

*Program Objectives:* The Regulatory Information System was intended to collect, process, and provide financial and operating information reported by hundreds of companies–principally natural gas producers, natural gas pipelines, and electric utilities. *Abstract:* From the early 1970s through 1977, the Federal Power Commission invested millions of dollars in an unsuccessful effort to develop a large computerized system to improve Federal and State effectiveness in regulating the energy industry. After the Department of Energy (DOE) took over the system in 1977, it invested another 2 years and more money, but serious management weaknesses from the beginning kept the system from ever operating. The system failed because management deficiencies existed in all three major stages. In planning, the Federal Power Commission did not clearly define user needs or perform an adequate cost-benefit analysis of the system. In development, the Commission did not: (1) finalize reporting forms to be used by industry, (2) ensure the workability of the computer software, nor (3) define the format in which the reported data would be used. Implementation deficiencies occurred in attempting to use the system prematurely. The management deficiencies were further intensified by such disruptive influences as poor communication among system developers and intended users at Federal and State levels, lack of continuous involvement and support from top Federal management, and disruptions in both organization and personnel. The Secretary of Energy should formally document and communicate to the interested public plans for the future use of the information system. Also, the Secretary should establish procedures for reviewing the development of current and future energy information systems.

**Agency Contact:** General Accounting Office (202) 275-6222.

## ECONOMIC REGULATORY ADMINISTRATION

### E01303-001

*Economic Impact of Closing the Indian Point Nuclear Facility.* (EMD-81-13).
11/7/80; 67 pp. + app. (8 pp.)
**OMB Funding Code/Title:** 89-0217-0-1-276 / Economic Regulation
**Program:** Utility Programs and Regulatory Intervention
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Energy Conservation and Production Act (P.L. 94-385, title II, § 204; 90 Stat. 1142; 42 U.S.C. 6804).
**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* The program objective is to assure reliability and adequacy of the nation's electric power supply. *Abstract:* GAO found that: (1) Indian Point (IP) nuclear power is generated at about one-fourth the cost of that generated by comparable oil-fired units in the Con Edison (CE) system; (2) IP units provide nearly one-third of the electric energy needed for the CE franchise area customers, but currently available non-nuclear generating capacity is sufficient to meet normal demands on the system; (3) continued reliability of service without IP will depend on the successful completion of planned generating facilities and transmission line improvements; (4) the loss of IP could increase residual oil consumption in New York by about 20 million barrels the first year with declining amounts thereafter; (5) use of high cost low-sulfur oil to generate replacement energy could cost Con Edison and Power Authority of New York customers over $600 million during the first year; (6) incremental revenue requirements for CE to cover all costs resulting from closing IP could amount to over $18 billion during the next 15 years and as much as $600 million annually for the Power Authority of New York; and (7) there are few, if any, options available to reduce oil consumtion and costs that are not already being undertaken by the utility companies and included in revenue requirements forecasts.

### E01303-002

*Electricity Planning–Today's Improvements Can Alter Tomorrow's Investment Decisions.* (EMD-80-112).
9/30/80; 57 pp. + 7 app. (117 pp.)
**OMB Funding Code/Title:** 89-0217-0-1-276 / Economic Regulation
**Program:** Utility Programs and Regulatory Intervention
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Energy Conservation and Production Act (P.L. 94-385, title II, § 204; 90 Stat. 1142; 42 U.S.C. 6804).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to assure continued reliability and adequacy of the Nation's electric power supply. *Abstract:* The Department of Energy (DOE) assists States and utilities in their power plans. There are serious problems in demand forecasting, assessment of feasible alternatives, and public involvement, but DOE has not taken an aggressive approach to solve these problems. Federal responsibilities relating to electric power are fragmented and involve several energy agencies. Few of the programs implemented by those agencies are specifically designed to improve electricity planning and are not coordinated through a set of common objectives, policies, or evaluation systems. The Secretary of Energy should: (1) establish a responsibility center in the Economic Regulatory Administration (ERA); (2) identify at State, Federal, and regional levels the energy, regulatory, and economic policies which are currently shaping utility policies and consider policy changes; and (3) direct the Administrator, ERA, to develop a unified electricity program that addresses supply and demand and provide timely public participation in electricity planning and prepare a plan for regulatory interventions when there are indications that the interests of power consumers or the objectives of national energy policy are not being adequately protected. The Nuclear Regulatory Commission should, before issuing permits or licenses for a nuclear facility, review the information developed by the ERA electricity program. The Secretary of Agriculture should, before making financing decisions on electrical generating facilities, review the same ERA information.

**Geographic Relevance:** National

*Program Objectives:* The program objective is to regulate interstate aspects of the hydroelectric industry. *Abstract:* Even though the number of applications has been escalating, the Federal Energy Regulatory Commission (FERC) has been able to reduce its processing time by streamlining the methods used in issuing permits and licenses. However, GAO recently noted that the processing time is beginning to increase again. Two problem areas were identified. The first involves an increasing number of hybrid permit applications. At present, 100 hybrid cases are pending, and FERC has ruled on only one. A review of this area showed that no policy has been developed to handle these permits more expeditiously. The hybrid preliminary permit issue has presented FERC with questions which need to be resolved. The second area deals with staffing. Staffing has remained stable for the past few years while permit and license applications have increased substantially. In addition, the current budget proposals would reduce existing staff which could cause an increase in processing time. The Chairman of FERC should expeditiously develop criteria which would set forth the conditions for awarding preliminary permits under hybrid applications. Before proceeding with the proposed actions concerning staffing levels and license applications exemptions, FERC should: (1) evaluate whether increasing the exemptions will really result in fewer applications; (2) assess the number of preliminary permits which have a high probability of resulting in license applications; and (3) make an assessment of the minimum number of staff to handle the present and projected volume of preliminary permits and licenses.

*Guidance Needed on Use of Natural Gas Price Escalator Clauses.* (EMD-80-53).
7/25/80; 23 pp. + app. (2 pp.)
**OMB Funding Code/Title:** 89-0217-0-1-276 / Economic Regulation
**Program:** Utility Programs and Regulatory Intervention
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Energy Conservation and Production Act (P.L. 94-385, title II, § 204; 90 Stat. 1142; 42 U.S.C. 6804).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to establish and enforce appropriate wellhead prices for natural gas and acceptable wholesale rates. *Abstract:* The examination of the legislation by GAO disclosed that neither the Federal Energy Regulatory Commission (FERC) nor Congress clearly addressed whether price escalator clauses in existing interstate contracts can be used to obtain the maximum prices under the law. In a report to Congress, FERC stated that producers could charge the maximum lawful prices if the language in their contracts so permitted. However, no explanation was given as to what type of language in the contracts would constitute contractual authority. Similarly, the act contained no reference to price escalator clauses in existing intrastate contracts other than to discuss how they would be handled after 1984. Further, GAO found that FERC failed to assess the economic impact of the escalator clauses on natural gas consumers. The controversy over the usage of escalator clauses has led to price increases ranging from a few cents to over $2 per million British thermal units above prices charged prior to the passage of the act. The Congress should amend the Natural Gas Policy Act of 1978 to provide guidance with respect to the price escalator clause issue. The Chairman, FERC, should: (1) establish a system which should be in operation prior to the 1980-81 heating season to monitor the results of its price escalator clause decisions; (2) when appropriate, obtain clarification of congressional intent in future situations involving energy issues of national importance; and (3) conduct accurate economic impact analyses prior to making decisions and establish monitoring systems to determine if intended results are achieved.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to conduct adjudicatory actions against noncompliance with regulations. *Abstract:* The Federal Energy Regulatory Commission (FERC) needs to be more aggressive in expediting case processing in technical analysis, hearings, and Commission decisionmaking. Deficient applications are caused by the FERC lack of clarity in defining the required data. Delays in completing environmental impact statements are attributable to poor interagency coordination and inordinate delays in starting environmental reviews. The Congress should require administrative law judge (ALJ) performance standards and reassign the responsibility for periodic evaluation of ALJ performance. FERC should: (1) impose deadlines on applicant responses; (2) use fines and reject incomplete applications; (3) simplify and clarify applicant data requirements; (4) require environmental impact statements sooner; (5) intensify written interagency coordination agreements; (6) evaluate requests for time extensions more critically and require all parties to file statements prior to hearings; (7) process cases more strictly with rules on interlocutory appeals, impose deadlines on final FERC action, and impose a limit on the total comment period for uncontested settlements; (8) improve legal review procedures; (9) encourage the Director of the Office of Opinions and Reviews (OOR) and the Chief ALJ to meet to resolve their mutual concerns; (10) review OOR review process; (11) revise OOR policy; (12) increase managerial accountability for cases pending final action or reconsideration; (13) increase the delegation of FERC authority for noncritical case decisionmaking; (14) increase the number of staff members designated as project managers; (15) improve the present management information system; (16) increase incentives for expediting case processing and seek new legislation to impose monetary penalties; and (17) expand the use of generic rulemaking to prevent unnecessary relitigation of generic issues.

*Are Hydropower Permits and Licenses Being Issued Quicker Due to FERC's Streamlined Procedures?* (EMD-81-22).
10/24/80; 5 pp.
**OMB Funding Code/Title:** 89-0212-0-1-276 / Federal Energy Regulatory Commission: Salaries and Expenses
**Program:** Hydropower Regulation
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Federal Water Power Act (P.L. 66-280, § 4; 41 Stat. 1065; 16 U.S.C. 797).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to issue permits for hydroelectric projects. *Abstract:* According to Federal Energy Regulatory Commission (FERC) officials, processing time for approving hydropower permits and licenses has decreased. This decrease is attributed to both the streamlined regulations and the changes in internal procedures. It now takes from 4 to 6 months to process a preliminary permit as compared to the previous time of 17 to 19 months. Licenses for small hydropower projects now take 6 to 9 months to process instead of 13 to 16 months. Currently, there are about 90 projects pending before FERC that would qualify for a license exemption. Reductions in processing time have occurred without any increases in FERC staff. As te number of preliminary permits increases and they are processed faster, the number of license applicants will also increase. Therefore, GAO believes, as recommended in it earlier report, that the Chairman of FERC should closely monitor the hydropower licensing process, and if the volume continues to increase, should request additional staff to assure that streamlining efforts will not be impeded.

**Program:** Fuels Conversion
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Energy Supply and Environmental Coordination Act of 1974 (P.L. 93-319, § 2; 88 Stat. 246; 15 U.S.C. 792).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The program objective is to reduce consumption of natural gas through conversion to other fuels. *Abstract:* Some of the States reviewed for natural gas plans had no curtailment policy or controls. Some issued no curtailment guidelines for utility companies under their jurisdiction but approved end-use curtailment plans on a case-by-case basis. One State directed utilities to file curtailment plans and suggested they follow the Federal priority-of-service categories but approved the utilities' plan whether or not such priorities were followed. The other States had developed a single statewide curtailment plan that local utilities were required to adopt and follow. The final use of natural gas did not necessarily conform to the Federal prioritized system of curtailment. Federal authority to control or regulate natural gas did not extend beyond delivery to utility companies. Federal efforts to control the attachment of new customers has been jurisdictionally limited. The Secretary of Energy should take the lead and work with the Chairman of the Federal Energy Regulatory Commission to develop a plan to provide greater assurance that natural gas supplies will be available for high priority and critical uses in the mid and long terms until substitutes are developed or the transition to alternates is feasible.

**OMB Funding Code/Title:** 89-0212-0-1-276 / Federal Energy Regulatory Commission: Salaries and Expenses
**Program:** Electric Power Regulation
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Federal Power Act (P.L. 66-280, § 206; 49 Stat. 852; 16 U.S.C. 824e).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to report Public Utility Regulatory Policies to Congress. *Abstract:* The reports on Title I of PURPA issued so far disclosed that information was 4 months old when submitted from States and nonregulated electric utilities to the Department of Energy (DOE), 10 months old when reported from DOE to the President and Congress, and 18 months old when the statutory completion dates for the consideration process for the ratemaking and regulatory standards were reported. GAO evaluated two options for making the information more timely. The first option was the use of an abbreviated interim report from States and nonregulated utilities. The second option was the advancement of the cut-off date for the information in the reports. DOE, the States, and nonregulated utilities were opposed to the idea of an interim report. GAO found that the cut-off date for information in the annual reports from States and nonregulated utilities could be advanced and not result in more cost or work to the reporting entities. The Secretary of Energy should require States and nonregulated electric utilities to submit their third annual report to DOE by December 31, 1981, with status information through November 9, 1981. Because of the limited staff available, DOE should monitor the development of the report and the staffing level to assure that the report is issued by June 30, 1982.

*Natural Gas Increment Pricing: A Complex Program with Uncertain Results and Impacts.* (EMD-80-96).
9/4/80; 33 pp. + app. (11 pp.)
**OMB Funding Code/Title:** 89-0212-0-1-276 / Federal Energy Regulatory Commission: Salaries and Expenses; 89-0216-0-1-276 / Energy Information Administration
**Program:** Gas Regulation; Data Information Services
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Natural Gas Act, as amended (P.L. 75-688, § 1; 52 Stat. 821; 15 U.S.C. 717 et seq.). Federal Energy Administration Act of 1974 (P.L. 93-275, § 52; 88 Stat. 96; 15 U.S.C. 790a).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program objective is to support (gas) information needs of the Department of Energy. *Abstract:* Problems exist which can impede the implementation of incremental pricing and preclude a meaningful evaluation of whether the program accomplishes its intended purpose. During the time regulations were being written, much of the data the Federal Energy Regulatory Commission (FERC) needed to assess the impact of different incremental pricing options were not available. This hindered FERC in making assessments of expected results of various courses of action and delayed the implementaiton of the three-tier pricing system. Data deficiencies also affected FERC action in areas involving agricultural exemptions and direct sales by interstate pipelines to industrial users. Cost information, needed to assess the administrative costs of the program and to plan procedures for evaluating the program benefits and drawbacks, is lacking. Monitoring procedures have not been established. The Chairman, FERC, should work with the Administrator, Energy Information Administration, to develop an information system that will enable FERC to: (1) make analyses whether to continue, revise, or terminate the incremental pricing program; and (2) evaluate both the positive and negative aspects of the program's operation.

## CONSERVATION AND RENEWABLE ENERGY

**E01306-001**
*Residential Energy Conservation Outreach Activities: A New Federal Approach Needed.* (EMD-81-8).
2/11/81; 31 pp.
**OMB Funding Code/Title:** 89-0215-0-1-272 / Energy Conservation

**Program:** Buildings and Community Systems
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Energy Conservation and Production Act, as amended (P.L. 94-385, title III, § 304; P.L. 95-91, title VII, § 709; 42 U.S.C. 6833).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective is to disseminate energy conservation information. *Abstract:* Consumers need to be aware of their energy conservation opportunities before they can act. The Department of Energy (DOE) does not have an effective outreach strategy and does not evaluate its outreach activities to determine their impact on consumer conservation. It cannot demonstrate how its outreach programs complement the outreach programs being provided by others. The four major DOE outreach efforts have not been integrated into a cohesive program strategy. DOE has devoted inadequate resources to evaluation. In limited cases where evaluations had been performed, either the procedures were questionable or the results were not applied. The Energy Extension Service (EES) does not effectively coordinate Government outreach activities and is carrying out programs similar to ones previously funded. The Secretary of Energy should develop and implement an integrated residential energy conservation outreach strategy which has as its centerpiece encouraging residential consumers to obtain onsite energy audits. DOE should give priority to encouraging consumers to participate in Residential Conservation Service (RCS) and, for those not covered by the RCS program, to obtain an onsite audit through other means. DOE regional representatives will need to review residential outreach activities being proposed under the State Energy Conservation (SEC) program and the EES grants to assure that outreach programs and activities receiving Federal financial assistance are consistent with the newly established focus of residential outreach. DOE should assure that the EES is carried out as envisioned by Congress. DOE should evaluate, on a regular basis, the results of this strategy, to determine the need for additional programs or authority to achieve energy conservation opportunities in the residential sector. The Secretary should evaluate the organizational status of the EES program and should consider the organizational status provided EES in its original legislation.

*The Department of Energy Should Provide Leadership To Assure Near-Term Gasoline Conservation Opportunities Are Realized.* (EMD-81-52).
4/13/81; 25 pp.
**OMB Funding Code/Title:** 89-0215-0-1-272 / Energy Conservation
**Program:** Transportation
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Energy Policy and Conservation Act (P.L. 94-163; 89 Stat. 874; 42 U.S.C. 6201 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to reduce transportation's nearly complete dependence on petroleum. *Abstract:* The Department of Energy (DOE) programs designed to encourage near-term gasoline conservation savings lack overall direction and focus and, while they may individually address appropriate conservation opportunities, together they are not part of any overall strategy. This lack of direction and focus is evidenced by: (1) the DOE programs not supporting the goals DOE has set for near-term gasoline conservation savings; (2) inconsistency between the DOE statements regarding the importance of such savings and the low priority DOE has assigned to the area; and (3) the failure of DOE to perform adequate program evaluations. The Secretary of Energy should systematically assess the DOE role in facilitating and supplementing private sector near-term gasoline conservation efforts. The results of assessment should then be used to create a strategy to guide program development, implementation, and evaluation. In developing the strategy, the Secretary should consider programs and activities carried out by all DOE components having responsibility for near-term gasoline conservation. The strategy should also consider and build upon near-term gasoline conservation efforts of the private sector and other Federal agencies.

*The Energy Conservation Program for Schools and Hospitals Can Be More Effective.* (EMD-81-47).
3/23/81; 21 pp. + 5 app. (11 pp.)
**OMB Funding Code/Title:** 89-0215-0-1-272 / Energy Conservation
**Program:** State and Local
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Energy Policy and Conservation Act (P.L. 94-163, as amended by; P.L. 95-619, title III, § 302; 92 Stat. 3239; 42 U.S.C. 6371).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to assist schools and hospitals to conserve energy. *Abstract:* As currently structured, the Schools and Hospitals Program is not an effective use of Federal funds when compared to other Department of Energy (DOE) conservation programs. It is among the highest in cost but among the lowest in yielding energy savings. The focus of the Program should be directed toward providing more energy audits. However, the funding for phase I energy audits has been used, and the remaining funds are going into the less cost-effective phase II measures of the Program. The Program could be more effective if its assistance were more closely matched to the needs of the institutions it serves. The ability of DOE to evaluate the results of the Program is severely limited by the lack of program performance data. DOE management of the program has also been hampered by the lack of a firm staff and organization. Congress should adjust the Program to provide for additional energy audits so that they are available to all institutions which want and could benefit from them. The Secretary of Energy should: (1) provide information to Congress on how many institutions could benefit from energy audits and how much funding will be required to provide them; (2) provide Congress the results of the DOE ongoing study of alternatives to the 50% cost-sharing arrangement for phase II grants; (3) assess the Schools and Hospitals Program on a continuous basis; and (4) promptly fill key program positions on a permanent basis.

**E01306-004**
*Delays and Uncertain Energy Savings in Programs To Promote State Energy Conservation.* (EMD-80-97).
9/2/80; 54 pp. + 7 app. (15 pp.)
**OMB Funding Code/Title:** 89-0215-0-1-272 / Energy Conservation
**Program:** State and Local
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Energy Policy and Conservation Act (P.L. 94-163, title III, § 362; P.L. 95-619; 89 Stat. 933; 42 U.S.C. 6322).

**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective is to assist states in reducing energy consumption in buildings. *Abstract:* The goal of the State Energy Conservation Program (SECP) is to reduce the energy consumption of each State by about 5% by 1980. However, the program has been hampered by long delays in enacting required State legislation, slippages in milestone dates, and reductions in scope in many State program measures. Although reported energy savings for 1978 were 13% of the goal, GAO did not believe that the goal would be attained by 1980. It believed that the reported savings were overstated and not a valid measure of the actual savings. Deficiencies were identified in the financial and program reporting systems used in the SECP which must be corrected before the States and Department of Energy (DOE) can effectively monitor and manage the program. The Secretary of DOE should: reassess the compliance determinations for those States considered to be in compliance with the mandatory SECP requirements, especially mandatory thermal and lighting standards. In cooperation with the States, the Secretary should reevaluate both mandatory and optional program measures in order to: (1) determine if changes and improvements are needed in their scope to make them attainable, (2) establish program measure goals and milestones that are realistic and attainable, and (3) revise State plans and goals accordingly. The Secretary should provide specific guidance and technical assistance needed by the States to estimate and measure both projected future and actual savings as a result of the program. Based on the reevaluation of the scope and progress of State plans and program measures recommended above, the Secretary should work with the States to revise their energy savings goals. Further, the Secretary should assure that the States implement the DOE monitoring system when approved by the Office of Management and Budget. Finally, the Secretary should review with the States the Federal requirements concerning the use of Federal funds, focusing on letter of credit procedures.

**Agency Contact:** General Accounting Office (202) 275-3678.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to manage energy conservation programs. *Abstract:* The establishment of energy conservation goals and the development of a comprehensive plan is urgently needed for the Department of Energy (DOE) to provide the leadership required to move the Nation toward using energy more efficiently. Although the Department has indicated its agreement with previous GAO recommendations, the Nation still has no clear conservation goals or a comprehensive plan to meet those goals. The lack of such goals and a plan to meet them continues to convey the impression that the Federal Government is taking a leisurely approach to promoting conservation. The development of a comprehensive plan based on long-term goals would send a signal to the public that the Federal Government is seriously committed to energy conservation and that Federal conservation efforts are a part of a well thought-out cohesive national strategy rather than random activities. The Secretary of Energy should use the National Energy Plan III process to develop a long-range national energy policy to provide a framework for the subsequent development of energy conservation goals; establish conservation goals which articulate conservation's contribution in the near, mid, and long-term toward satisfying domestic energy needs, reducing the level of oil imports, and providing for the incremental transition to renewable energy resources; develop a comprehensive national conservation plan which lays out the specific Federal actions required to achieve conservation goals and established milestones, and a system for monitoring progress toward meeting those goals; and spell out the leadership role of DOE for coordinating the actions of other Federal agencies and ensuring the success of the plan. In addition, the Secretary should consider establishing a Domestic Policy Review for energy conservation in order to establish overall goals and develop a meaningful plan.

**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* The objective is to create an effective stockpile of petroleum in the United States. *Abstract:* The Energy Security Act requires the resumption of filling the Strategic Petroleum Reserve (SPR) at an average rate of at least 100,000 barrels a day (bbl/d) for fiscal year 1981 and succeeding years. The Department of Energy (DOE) has taken action to fill the Act's minimum oil fill requirements by soliciting 100,000 bbl/d of oil for the SPR in exchange for Elk Hills oil. This is an assured, high quality source of oil that may adversely affect the small and independent refiners in California. Recently, DOE included a specification in an exchange solicitation which would allow suppliers of Alaskan North Slope oil to respond. However, DOE officials would prefer to store higher quality oil, if possible. DOE has not completed its analysis of oil supply options for the SPR and has not demonstrated that exchange of Elk Hills oil is the most effective means of meeting the minimum requirements of the Act. The current Elk Hills exchange limits potential offerors to those willing to acquire Elk Hills oil and having access to a guaranteed source of crude oil for exchange. The Secretary of Energy should issue an open solicitation for oil for the SPR, which will encourage the availability of a wide range of sources including Elk Hills and the Alaskan North Slope oil, in order to select those sources which most nearly meet the Government's objectives.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to create an effective stockpile of petroleum in the United States. *Abstract:* Since the effective date of the Act, the Administration has taken several steps to resume filling the Strategic Petroleum Reserve (SPR) and to amend the entitlements program. The Economic Regulatory Administration (ERA) issued notice of a proposed amendment to the current mandatory petroleum allocation regulations which would authorize the Department of Energy (DOE) to require certain refiners to provide oil for the SPR. The Defense Fuel Supply Center issued a solicitation for a competitive exchange of up to 100,000 barrels per day of Naval Petroleum Reserve (NPR) oil for an equal amount of oil delivered to the SPR. ERA issued the required amendment to the entitlements program effective August 29, 1980. DOE reached an agreement with a refining company to deliver up to 750,000 barrels of oil to the SPR in exchange for releasing the company from its current contract to buy NPR oil.

*Solar Energy Research Institute and Regional Solar Energy Centers: Impediments to Their Effective Use.* (EMD-80-106).
8/18/80; 33 pp. + app.
**OMB Funding Code/Title:** 89-0224-0-1-271 / Energy Supply, Research and Development Activities, Operating Expenses
**Program:** Solar Energy
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives are to research, develop, and demonstrate solar technology. *Abstract:* The Department of Energy (DOE) has failed to assign to the Solar Energy Research Institute and the Regional Centers the responsibilities necessary to achieve their lead roles, and there have been conflicts between the Institute and the Centers over responsibilities for commercialization efforts. The Secretary of Energy should take actions to ensure that the Institute and the Regional Centers are effectively integrated into the Federal solar program. At a minimum, the Secretary should use the Institute and Regional Centers as its lead institutions for solar energy development and commercialization, as intended. As part of this action, the Secretary should assign tasks and responsibilities to these entities that are consistent with their lead institution roles. Particular attention should be given to the leadership role in solar commercialization in view of the confusion which now exists. The Secretary should improve the planning process for developing the Institute's and the Regional Centers' activities. Improving the process should entail the development of more timely and clear guidance for these organizations which would permit the development of plans by the Institute and Regional Centers which meet established schedules and the needs of DOE. Some flexibility should be incorporated into the planning process to permit the Regional Centers to undertake activities to address specific regional solar commercialization needs. The Secretary should also ensure that multiyear plans are satisfactorily developed this year to provide needed stability to the Institute and the Regional Centers. Finally, the Secretary should monitor the effectiveness of the Department's reorganization of its solar program with regard to integrating the Institute and the Regional Centers into the Federal solar program and using them as lead institutions.

*Department of Energy's Safety and Health Program for Enrichment Plant Workers Is Not Adequately Implemented.* (EMD-80-78).
7/11/80; 33 pp. + app. (4 pp.)
**OMB Funding Code/Title:** 89-0226-0-1-271 / Uranium Supply and Enrichment Activities
**Program:** Uranium Enrichment Activities
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Atomic Energy Act of 1954, as amended (P.L. 83-703, § 1; 42 U.S.C. 2201(v)). Occupational Safety and Health Act of 1970 (P.L. 91-596, § 2; 84 Stat. 1590; 29 U.S.C. 651 et seq.).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective is to maintain health and safety programs for three uranium enrichment activities. *Abstract:* Physical inspections of conditions at each of three uranium enrichment plants are required annually, but the Department of Energy (DOE) has conducted only five inspections at the plants in the past 4 years. Appraisals have not been conducted as often as necessary and have failed to focus on major problem areas. Employees are encouraged to seek resolution of complaints with the operating contractor. Complaints that are not resolved at that level are filed with the Operations Office. In many cases, DOE delegated complete responsibility for handling complaints it received to the contractors. Thus the employee is faced with the same situation for which he previously sought resolution. The Operations Office is not following up on changes recommended as a result of occupational safety and health complaints from employees at enrichment plants. Staff shortages appear to have contributed to the inability to meet safety and health program objectives. Because contractors have no immediate incentive to improve health and safety conditions, the ability of DOE to enforce safety and health standards is handicapped. Its primary enforcement power is the threat of nonrenewal or cancellation of the contract with the operators. The Operations Office's dual responsibilities of production and safety and health limit its ability to administer a safety and health program independently and objectively. Congress should authorize the Secretary of Energy to institute a program of nonreimbursable fines and penalties for safety and health violations. The Secretary of Energy should: make sure that plant inspections and appraisals are performed as required and that all employees' complaints are investigated and followed up by the Oak Ridge Operations Office. Further, the Secretary should provide greater independence and objectivity in the Oak Ridge Operations Office Safety and Health Program through an organizational change to provide insulation between safety and health concerns and production goals and objectives.

**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to manage the projects used to research and develop and improve energy technologies. *Abstract:* Solar energy projects are continuing to experience cost increases, schedule slippages, and scope reductions despite steps taken by the Department of Energy (DOE) to improve Research and Development (R&D) project management. More complete implementation of the DOE management initiatives, as well as strengthened controls over solar energy R&D project selection and administration, are needed to improve project success. Effective project administration has been hampered by weak DOE contractor monitoring and delays caused by the DOE approach to project funding. Secretary of Energy should direct the solar program office to: (1) expeditiously develop, finalize, and implement multiyear program plans for the overall solar program and each solar technology; (2) justify prospective solar projects in terms of their specific potential contribution to achieving the goals set forth in the multiyear plans; and (3) comply more strictly with the DOE unsolicited proposal regulations during the selection and approval of solar projects. To enhance solar energy R&D project management and improve the performance of projects in achieving their costs, schedule, and scope objectives, the Secretary should direct the program office to more effectively implement the project management improvement initiatives that are required to be instituted DOE-wide. The solar energy program office should be directed to: (1) make sure that decentralized project management is carried out in the most complete and effective manner; (2) strive for more timely and complete implementation of the DOE project management system for those projects formally subject to its provisions; (3) explore opportunities for expanding the application of the system to solar projects on which formal application has not already been made; and (4) study the current and potential status of the automated contractor reporting system's application in the solar program. The Secretary should direct the solar program office to reemphasize the need for effective project monitoring and consider expanding the use of long-term, multiyear funding commitments for solar projects, providing for periodic reexaminations to verify each project's merits.

**Program:** Solar Energy
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555). Ocean Thermal Conversion Research, Development, and Demonstration Act (P.L. 96-310; 94 Stat. 941; 42 U.S.C. 9001-9009).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective is to develop new energy technologies. *Abstract:* The Department of Energy (DOE) altered its program approach from researching and developing various possible Ocean Thermal Energy Conversion (OTEC) options to emphasizing development of the most technically advanced systems. A comprehensive plan, currently being developed for submission to Congress, is primarily directed toward accomplishing the specific interim program goals through the year 1999 as detailed in applicable legislation. GAO is concerned that the plan may not adequately address the full impact of the change in program approach on the development of the OTEC potential to the United States. Current DOE efforts emphasize near-term projects directed toward deployment of pilot plants by 1986. With the shift in program approach, DOE is emphasizing the development of the floating-moored plant concept using the closed-cycle system. Also, DOE has reduced its efforts on other OTEC alternatives, which could result in possible harm to the overall goal of gaining significant amounts of energy from OTEC if the floating-moored plant concept is found not to be easily adapted to other locations or applications. While the GAO report was in final preparation, the Administration revised its budget request for fiscal year 1982 to include no funds for the program. DOE justified this proposed program elimination on the basis that OTEC technology has matured sufficiently so that further development can be left to the private sector. This may work for the proposed closed-cycle pilot plant, but alternatives still in the research phase are not likely to receive support from private firms. The Secretary of Energy should address: (1) the DOE strategy for providing or obtaining a definitive worldwide OTEC resource assessment and a corresponding detailed market survey for potential OTEC products, and (2) the recently proposed program elimination and its impact on the development of the OTEC full potential. The plan should address the implications of the DOE shift of emphasis toward pursuing interim program goals including its apparent emphasis on the floating-moored plant concept. Alternate strategies and resources needed for reaching the full potential of OTEC should also be addressed.

*The Department of Energy's Water-Cooled Breeder Program: Should It Continue?* (EMD-81-46).
3/25/81; 37 pp. + 5 app. (11 pp.)
**OMB Funding Code/Title:** 89-0224-0-1-271 / Energy Supply, Research and Development Activities, Operating Expenses
**Program:** Nuclear Fission
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Atomic Energy Act of 1954, as amended (P.L. 83-703, § 1; 42 U.S.C. 2051-2053).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives are to research, develop, and demonstrate the capability to "breed" nuclear fuel. *Abstract:* GAO believes that the water-cooled breeder program should continue. However, the Department of Energy (DOE) should move forward now to prove that the water-cooled breeder does breed rather than pursuing other, secondary objectives which will substantially add to the cost and time required to complete the project. Day-to-day management control is effective but changes could be made to long-term planning efforts. Long-term cost and schedule estimates to allow for more accountability for achieving critical steps in the development process need to be developed. DOE should transfer responsibility for the program to the division responsible for developing other commercial reactor systems. The issues identified by GAO which need to be resolved before the water-cooled breeder can become commercially viable are the: (1) future role of nuclear power in meeting the energy needs of the Nation; (2) potential role of the water-cooled breeder versus other breeder technologies; (3) apparent lack of substantial electric utility and nuclear vendor interest; (4) need to develop a thorium fuel cycle capability; and (5) need for nuclear fuel reprocessing. The Secretary of Energy should: (1) discontinue reactor operation at Shippingport by January 1982 and initiate the proof-of-breeding experiment at that time; (2) establish fixed milestones and cost projections for all major activities so that the performance of the program can be better measured, accountability over achieving critical steps in the development process can be better established, and congressional oversight over program progress can be improved; and (3) transfer responsibility for any further development of the water-cooled breeder to the Deputy Assistant Secretary for Nuclear Reactor Programs if such development is warranted.

*Small Business Participation in the Department of Energy's Solar Energy Programs.* (EMD-80-119).
9/29/80; 11 pp. + 4 app. (5 pp.)
**OMB Funding Code/Title:** 89-0224-0-1-271 / Energy Supply, Research and Development Activities, Operating Expenses
**Program:** Solar Energy
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555). Small Business Act (P.L. 85-536; 72 Stat. 395; 15 U.S.C. 644).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to consider participation of small businesses in awarding contracts for solar development. *Abstract:* The Department of Energy (DOE) estimates the small businesses' share of solar program funding for fiscal year 1980 to be about 14.5%. Direct funding of small businesses for carrying out Federal programs has been relatively low, but small businesses have been much more involved in the solar energy programs by becoming subcontractors to those organizations directly funded by DOE. Although DOE-wide goals have been established, solar-wide goals have not. Some individual solar energy program managers, however, have established goals for their respective programs. The inclusion of small businesses in these programs requires close monitoring, but GAO found that the DOE Integrated Procurement Management Information System (IPMIS) was not delivering adequate information on small businesses. DOE has two programs which are intended to encourage innovations by small businesses, but neither was designed especially for encouraging solar-related ideas, and both are relatively small. However, individual solar program managers have used various funding approaches to encourage innovativeness by small businesses within their respective programs. The prior work experience of 14 key DOE officials associated with the solar energy programs indicated only limited small business experience. In addition, none had received any apparent training aimed at understanding the difficulties that small businesses face. The Secretary of Energy should: (1) direct that goals be established for using small businesses in the solar energy programs, as a whole, and for individual solar energy programs, and that such goals be considered in formulating the DOE overall procurement goals for small businesses; (2) give priority attention to correcting existing problems surrounding the use of the IPMIS and to monitoring the continuing development of the system to ensure adherence to the present schedule for incorporating summary data on subcontracts; and (3) emphasize the need for solar program officials to obtain training to become more sensitive and aware of small business problems.

*Concern over Efforts To Put in Place a Permanent Facility for Solar Energy Research Institute.* (EMD-81-68).
4/27/81; 12 pp.
**OMB Funding Code/Title:** 89-0225-0-1-271 / Energy Supply, Research and Development Activities, Plant and Capital Equipment
**Program:** Solar Energy
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective is to provide research and development technical facilities for solar energy development. *Abstract:* GAO found that about $3 million has been spent over a 2-year period on designing the Solar Energy Research Institute (SERI) facility without the benefit of a clearly defined role for SERI in the national solar program or long-range requirements for the use of the SERI facility. DOE took needed actions to defer design work on the permanent facility pending its reassessment of the role and mission of SERI and a determination of the size and cost of the project. These actions should help ensure that DOE puts in place a facility which meets its needs. However, there are two matters which need immediate attention. First, the future design efforts may not take into consideration, to the extent practicable, the requirements for the use of the facility over its estimated life. Second, its associated support facilities should not proceed without adequate justification. The Secretary of Energy should direct that further efforts aimed at putting such a facility in place are not undertaken, with the exception of the experiment test area and support facilities, until the role of SERI in the national solar program is clearly defined and the best information available is considered in identifying the long-range requirements for the use of that facility over its estimated life. In addition, the Secretary should: (1) monitor the Office of Field Operations and International Programs' assessment of the role and mission of SERI to ensure that it is done in a timely manner and results in a clear definition of the role of SERI; (2) identify, to the extent practicable, the research, development, and demonstration and administrative requirements for the facility over its estimated useful life and incorporate those requirements in a long-range plan for the facility's use; (3) defer related design and construction until such efforts are justified; and (4) give priority to ensuring that this justification is prepared and approved in a timely manner.

*Concerns over the Department of Energy's Program and Organization for Developing and Promoting the Use of Alcohol Fuels.* (EMD-80-88).
7/22/80; 13 pp.
**OMB Funding Code/Title:** 89-0224-0-1-271 / Energy Supply, Research and Development Activities, Operating Expenses
**Program:** Solar Energy
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Solar Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-473, § 6; 88 Stat. 1433; 42 U.S.C. 5555). Energy Security Act (P.L. 92-294; 94 Stat. 611; 42 U.S.C. 8701 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives are to research, develop and demonstrate alcohol fuels. *Abstract:* The Department of Energy (DOE) has not developed a comprehensive program for alcohol fuels. The effectiveness of the recently created DOE Office of Alcohol Fuels may be impaired due to limitations on its span of authority and responsibility and, relatedly, on the level to which the Office reports. While ethanol is currently being produced, the potential of methane from coal is not being considered by this Office. The technology to produce both fuels is available. Both fuels can have a significant role in resolving the Nation's liquid fuels shortage. The Secretary, DOE, should establish a comprehensive and balanced program for alcohol fuels and develop a definitive program plan setting forth appropriate commercialization goals, milestones, and strategies for both ethanol and methanol. He should also ensure that from an organizational standpoint, methanol from coal is brought into the mainstream of those activities aimed at promoting the development and use of alochol fuels. This can be accomplished by establishing an integrating mechanism, such as a standing committee chaired by the director of the Office of Alcohol Fuels and assigned responsibility for coordinating those alcohol fuels activities that currently do not come within the purview of that Office. Regardless of the integrating mechanism used, the Office should be required to report directly to the Secretary or the Under Secretary of DOE.

## FOSSIL ENERGY

### E01317-001

*Oil and Natural Gas from Alaska, Canada, and Mexico: Only Limited Help for U.S.* (EMD-80-72).
9/11/80; 85 pp.
**OMB Funding Code/Title:** 89-0219-0-1-271 / Energy Production, Demonstration, and Distribution
**Program:** Domestic Energy Supply
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Federal Energy Administration Act of 1974 (P.L. 93-275, § 5; 88 Stat. 98; 15 U.S.C. 764).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* Supplemental gas from Canada will not significantly help meet U.S. demand and may eventually be cut off because Canada is committed to energy self-reliance and will make every effort to use or reserve its oil and gas for internal use. Canadian oil and gas will be subject to contracts of 6 years or less and will be priced at or above world levels. Mexico will probably be one of the primary sources of oil before the year 2000. The Mexican government has indicated a preference for a conservative production policy based on the perceived ability of the Mexican economy to absorb oil and gas revenues without causing excessive inflation. Also, the contract between the government owned petroleum monopoly and six U.S. gas companies requires the construction of new pipeline facilities if increased import quantity is to be negotiated. U.S. policy makers should give careful consideration to the domestic energy policies of Mexico and Canada. Concentrated effort should be made to increase domestic production, including the development of synthetic fuels and unconventional oil and gas resources. The United States also has to conserve, and to utilize as efficiently as possible, its domestic supplies in order to get through the 1980s and 1990s. The decline in domestic production cannot be offset by synfuels development during the 1980s and 1990s because of lead times and other constraints, but uncoventional gas appears to offer more promise, because several technologies are already operational on a commercial basis.

### E01317-002

*Liquefying Coal for Future Energy Needs.* (EMD-80-84).
8/12/80; 33 pp.
**OMB Funding Code/Title:** 89-0213-0-1-271 / Fossil Energy Research and Development
**Program:** Coal
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Federal Non-Nuclear Energy Research and Development Act of 1974 (P.L. 93-577, § 6; 88 Stat. 1881; 42 U.S.C. 5905).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program accelerates the development of environmentally acceptable technologies for the conversion of coal to fuel. *Abstract:* Because the basic technology for all four direct liquefaction processes is similar, the sharing of information and experience could benefit the development of each of the processes. If the plants operate successfully and information is shared, a commercial plant using any of the four processes could be constructed. Further research and development in direct liquefaction processes is needed. It is unlikely that any commercial direct liquefaction plant will be operating in the 1980s. The bulk of the production is likely to come from indirect liquefaction processes, which are commercially available. Successful operations in larger-scale plants are needed to reduce technical, health, and environmental uncertainty before commercialization is viable. Potential problems of direct liquefaction, such as disposal of hazardous wastes and carcinogenic and toxic material, may also apply to the indirect processes. It is too early to tell how the incentives of the Energy Security Act will affect coal liquefaction. Even though indirect processes are technically proven, the Department of Energy has done little to promote their commercialization, because they are less efficient than the direct processes under development; they are more costly than the direct processes; and the commercially available gasifiers needed for the indirect processes can only operate on certain coals. Private industry, however, is willing to accept the shortcomings and, if given financial assistance, is ready to build commercial-size indirect plants.

**Agency Contact:** General Accounting Office (202) 275-3678.

### E01317-003

*Controlling Federal Costs for Coal Liquefaction Program Hinges on Management and Contracting Improvements.* (PSAD-81-19).
2/4/81; 78 pp.
**OMB Funding Code/Title:** 89-0214-0-1-271 / Fossil Energy Construction
**Program:** Coal
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Federal Non-Nuclear Energy Research and Development Act of 1974 (P.L. 93-577, § 6; 88 Stat. 1881; 42 U.S.C. 5905).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The review involved looking into the management of coal liquefaction processes being developed by the Department of Energy (DOE) and private industry with emphasis on two pilot plants–H-Coal and Exxon Donor Solvent. A review of the two pilot projects revealed inadequacies in DOE contracting practices and a failure by DOE to plan, manage, and monitor. On one of the projects, DOE contractual agreements with prime contractors were made before the design scheme for the plant was complete. Problems were experienced in the construction of this plant due to poor judgment and lack of management over the project. The initial agreements lacked sufficient investments from private sponsors. DOE staffing was inadequate to make timely decisions. The Secretary of DOE should: (1) assure that projects are properly planned and designed sufficiently before they are started to avoid disruptions and to hold design changes to a minimum; (2) provide adequate DOE support staff to monitor the various phases of its projects and to assure that management tasks, such as property control, inventories, and subcontracting, assigned to private industry, are done within regulations and with adequate management controls; (3) establish a format for existing monthly project reports (prepared by contractors) to provide data needed by DOE to effectively monitor the projects; and (4) encourage the use of fixed-price contracts when it becomes practical for the contractors to define their remaining efforts and quantities required. The Secretary should obtain a more equitable cost sharing commitment from private sponsors for all phases of energy projects to assure they share in the risks and fully apply their expertise toward assuring sound management, including adequate controls over cost and schedule. The Secretary should also provide to Congress an assessment of the effect of escalating costs of the solvent-refined coal plants and the risks involved in scaling up.

## POWER ADMINISTRATION

### E01321-001

*Federal Power Marketing Agencies Could Do More in Conservation and Renewable Resource Areas.* (EMD-80-85).
7/8/80; 2 pp.
**OMB Funding Code/Title:** 89-4045-0-3-271 / Bonneville Power Administration Fund; 89-5068-0-2-271 / Construction, Rehabilitation, Operation and Maintenance, Western Area Power Administration
**Program:** Operation and Maintenance; Systems Operation and Maintenance
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Energy and Natural Resources. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Bonneville Project Act, as amended (P.L. 75-329; 50 Stat. 720; 16 U.S.C. 832 et seq.). Flood Control Act of 1944 (P.L. 78-534, § 5; 58 Stat. 890; 16 U.S.C. 825s).
**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* Legislation is far along in assigning the Bonneville Power Administration (BPA) additional authority in conservation and renewable resources. A recent report has shown that the Pacific Northwest has considerable potential for conservation savings and development of renewable resources. BPA is seen as a major force in achieving regional potential. With the support of the Department of Energy for an expanded role of BPA, it would seem logical that the Western Area Power Administration (WAPA) and other power marketing agencies should also be assigned expanded leadership roles. However, none of these agencies have received similar legislative attention aimed at gaining additional authority. Although the agencies are smaller than BPA, GAO believes they could play a significant role in achieving conservation savings and demonstrating and developing renewable resources. The Secretary of the Department of Energy should seek to expand the role for WAPA programs. He should consider the use of the other power marketing agencies for carrying out these programs in their respective regions.

**Availability:** Agency

*Abstract:* The purpose of the Travel Voucher Project was to describe the current system of processing travel vouchers within the Executive Office and Finance Office. The project also was to collect and analyze data relative to voucher processing for the purpose of determining the number and types of errors, the location and reason for their occurrence, and the time and effort required to correct them. This project detected that there were errors and that these errors contributed to the time delays. As a result of this initial study, a more in-depth analysis is being undertaken.

**Availability:** Agency
**Geographic Relevance:** Departmental

*Abstract:* The audit was designed to examine the following factors related to contracts awarded during the fourth quarter of Fiscal Year (FY) 1980: (1) Was there adequate lead time? (2) Were competitive practices followed? (3) Were contract files properly documented? (4) Were fund certifications obtained? and (5) Were the services needed? The review disclosed no major deficiencies in year-end spending when compared to established deadlines. Contracts awarded in the fourth quarter of FY 80 generally had adequate lead time, allowed for competitive practices, were properly documented and justified, and had correct certification. No recommendations were made since established cut-off dates for submission of procurement requests prevented deficiencies.

**Geographic Relevance:** Departmental

*Abstract:* The purpose of the study was a survey of operations of small purchases administered by the Administrative Contracts Section of the Office of Procurement Assistance Management as well as the Resource Control Center, Office of Administrative Resources Management, and Administrative Payments Section of the Finance Division. The survey identified potential deficiencies in clearance of requisitions, order placement and invoice payment. It was recommended that other Departmental reviewers consider the need for: regular submission of workload status reports; use of Imprest Fund to purchase items more quickly; additional training for administrative contracts staff; eliminating the review of requisitions for routine items; and streamline procedures for equipment repair requests.

**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 416; 88 Stat. 563; 20 U.S.C. 1226b).
**Availability:** Agency
**Geographic Relevance:** Departmental

*Abstract:* The audit was intended to determine the adequacy of controls over disbursements. Areas reviewed included proper authorization and support of disbursements, prompt and accurate recording of disbursements, accounting and reconciliation of disbursements, and separation of responsibilities and duties. The audit identified internal control deficiencies such as overpayments to grantees, weak control of appropriation balances, potential for fraud losses, and automated accounting records weaknesses. Recommendations include better overall internal controls, separation of payment process tasks, more frequent reports, better physical security over documents, establishment of general ledger accounts comparable to those of U.S. Treasury, monthly reconciliation of general ledger balances with Treasury appropriation accounts, and quarterly reports to management on problem reconciliations.

**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 416; 88 Stat. 563; 20 U.S.C. 1226b).
**Availability:** Agency
**Geographic Relevance:** Departmental

*Abstract:* The purpose of the audit was to review operations of the Department of Education's Office of Management Telecommunications Systems Branch (TSB). The scope included interviews with officials of TSB, Facilities Management, and Finance Division regarding staffing workload, regulations, procedures, economy measures and known problems. Two areas of potential cost reduction were noted: (1) eliminating unnecessary telephones within the Department could result in savings of $285,000; and (2) consistent use of the Federal Telecommunications System (FTS) rather than commercial network for long distance calls could save $50,000. It was recommended that the Department mount an intensive campaign to reduce commercial long distance calls and strengthen controls over such calls. Management was advised to strengthen controls, particularly in the five component organizations which incurred over 75% of the commercial charges.

**Availability:** Agency
**Geographic Relevance:** Departmental

*Abstract:* The audit was intended to determine whether conference services were obtained in a manner consistent with Federal and Departmental regulations governing procurement of services and fund obligation. The audit of procedures used to procure conference services for the Office for Handicapped Individuals (OHI) was in accord with the standards for governmental audits and included interviews with appropriate officials and the examination of available documents at a private, postsecondary institution, the Department of Health and Human Services and the Department of Education. OHI employees without contracting authority were arranging procurement of conference services. However, these employees had no financial interest which conflicted with their duties and responsibilities. It was recommended that the OHI program office provide information to determine: (1) whether OHI employees could have requisitioned the conferences through normal procurement process; and (2) whether the use of salary and expense funds to pay the travel and per diem costs of non-Federal employees attending the conference was appropriate. It was also recommended that these unauthorized procurement actions and Standards of Conduct violations be discussed with OHI employees and Department representatives; that report remedies be considered and suitable actions be taken, including disciplinary action; and that an outside institution be admonished for doing business with an individual who lacked the authority to act as an agent for the Federal government.

## MANAGEMENT AND BUDGET

**E01403-001**
*Service Delivery Assessment on Refugee Resettlement.*
4/81; 15 pp.
Norm Zimlich
**OMB Funding Code/Title:** 91-0800-0-1-503 / Salaries and Expenses
**Program:** Program Administration: General Administration
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 416; 88 Stat. 563; 20 U.S.C. 1226b).
**Availability:** Agency
**Geographic Relevance:** State; City; County

*Program Objectives:* There is not one all-inclusive Federal program aimed at resettlement of refugees and entrants, but rather a number of programs which address some part of the resettlement process. The Department of State funds efforts of private, voluntary agencies; the Department of Health and Human Services funds social services, income maintenance, and public medical assistance; and the Department of Education funds efforts by the public schools to absorb refugee children. *Abstract:* The recent, unexpected influx of refugees and entrants in the United States (more than 350,000 in Fiscal Year 1980) has caused a deterioration in resettlement efforts. Not only the numbers, however, have put a strain on services. The newer refugees have significantly lower literacy and skill levels, and newcomers are increasingly being sponsored by fellow refugees who are only marginally resettled themselves. Providers of services are critical of the Federal government for poor planning and coordination of resettlement resources in relation to the refugee influx. Also, Federal expectations are unclear regarding refugee self-sufficiency–i.e. income maintenance versus social services and on whom the burdens should fall (voluntary agencies, State or local government). There is now a 3-year limitation on full Federal funding of resettlement services but no provision for assuring that resettlement is complete after three years. The major barrier to refugee self-sufficiency is lack of

English. School districts in cities of major resettlement are inundated by the influx of refugee children. Their major problems are inability to predict the number and types of refugees, uncertainty and poor timing of support funding, and shortages of bilingual and language instruction staff.

**Authority:** Rehabilitation Act of 1973, as amended (P.L. 93-112, title VII, § 701; 29 U.S.C. 796).
**Availability:** Agency

*Program Objectives:* Program objectives were: (1) establish Independent Living (IL) Centers providing necessary services and activities; (2) involve the severely handicapped in policy, management, and operation of the Centers; and (3) assist IL Centers to obtain non-Federal funding so as to assure continuation after grant expirations. *Abstract:* This study is an analysis of the program of comprehensive services for the handicapped to determine if the program was evaluable. Through detailed analysis, using logic and function models, consensus building, plausibility determination, and feasibility determination, the IL Program was found to be evaluable. Management options were: (1) increase conceptual and policy development and decentralize operations; (2) offer increased technical assistance in selected areas; and (3) establish a routine data collection system. Evaluation options were: collect extent data, put measurement system in place, and conduct a rapid feedback evaluation, if possible.

**Availability:** Agency

*Program Objectives:* The program objectives were to: (1) encourage the identification of disadvantaged gifted and talented (G&T) children; (2) increase public support of and committment to G&T programs; (3) increase the capability of professionals in the field of G&T education; (4) promote effective G&T education practices; (5) improve dissemination about good G&T approaches; and (6) encourage coordination of G&T programs with other programs at the State, local and Federal levels. *Abstract:* The study established objectives for the program and indicators through which their achievement could be measured. All six objectives were found to be plausible, given the program's current resources and activities. Evidence of this was found on site visits in which actual achievement of the objectives was observed. A number of options for improving management and evaluating the program were offered to policy makers.

*Service Delivery Assessment of Educational Services to Students with Limited English Proficiency.*
11/80; 13 pp.
Robert L. King; Leonor Rosales
**OMB Funding Code/Title:** 91-0800-0-1-501 / Salaries and Expenses
**Program:** Program and Management Evaluation
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 416; 20 U.S.C. 1226b).
**Availability:** Agency

*Abstract:* The focus of this study was not on one program, or even a combination of programs. Rather, it sought to understand the total array of services being provided to limited English proficient (LEP) students in actual school settings, whether there was Federal assistance or not. The study encountered bilingual education projects, applications of the "Lau Remedy" guidelines, assistance provided under the Refugee Act of 1980, and issuance of the proposed regulations to take the place of the Lau Remedy guidelines. The scope was, however, across the board, covering all services provided to all LEP students. In one East Coast Middle Atlantic metropolitan area, the methods used by elementary and secondary public schools for identification, placement, and instruction of LEP students varied widely from school district to school district. In all cases, however, the objective is to prepare the students to perform effectively in the classroom, and later in life. Whether bilingual instruction is given or not, the goal is mainstreaming LEP students. The only factor clearly associated with success in educating these students was not methodological; it was, simply, excellence of teachers and principals, along with a refusal to lower expectations. No records were kept on students exited from LEP services, and followup was spotty. Parental involvement was minimal, attributable to economics, language, and cultural traits. Most LEP students spent the major part of the day with regular classroom teachers, who were not prepared technically or attitudinally for the demands placed upon them. A need was expressed widely for more foreign language teaching materials and test instruments, particularly in the less commercially feasible languages. Very emphatically, school districts opposed any imposition by the Department of Education of rules which prescribe methodology or approach, insisting that local conditions determine which method is appropriate. Provision of ancillary services such as counseling, family services, survival skills, and orientation was seen as essential to a positive learning experience. Paraprofessional, bilingual workers serving as liaison between school and home were seen as a valuable resource, but also as an additional cost which local school budgets cannot readily accommodate. Services to handicapped LEP students were also deficient.

*Cooperative Education Program.*
5/80; 31 pp.
**Contractor:** Applied Management Sciences
**OMB Funding Code/Title:** 91-0201-0-1-502 / Higher and Continuing Education

**Program:** Program Development: Cooperative Education
**CFDA NO.:** 84.055
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Higher Education Act of 1965, as amended (P.L. 89-329, title VIII, § 803; 20 U.S.C. 1133b).
**Availability:** Agency

*Program Objectives:* The objectives of the Cooperative (Co-op) Education program are: (1) Research Grants–to provide program operators with the objective research findings about the efficacy of the Co-op Education model and alternative methods for operating a Co-op program and to improve the quality of Co-op programs by increasing the operators' information base; (2) Training Grants–to foster a committment to the implementation of the Co-op model in Institutions of Higher Education (IHE), to provide Co-op personnel at IHEs with information and skills needed to plan, operate and monitor a Co-op Education program, and to improve the quality of Co-op Education programs through strengthening the skills of program operators; (3) Demonstration Grants–to establish comprehensive, institution-wide Co-op Education programs at a limited number of IHEs, and to increase the number of students enrolled in Co-op Education programs; and (4) Administrative Grants–to stimulate the development and expansion of Co-op programs at IHEs, to make Co-op accessible to students throughout the United States, to foster experiential learning as an alternative educational model, and to develop high quality Co-op Education programs. *Abstract:* Findings from the study relate to the specification of program objectives, the likelihood that objectives can be achieved, and the feasibility of measuring program accomplishments. A series of management and evaluation options related to the development of a regular planning component for the program, the specification of measurable long-range objectives and annual priorities based on an assessment of community needs, revisions to the grant award process to provide more Federal direction to the program, and the establishment of more systematic monitoring of grant recipients. Functional reorganization was presented as an alternative method for meeting the various functional responsibilities of the program staff.

**Authority:** Career Education Incentive Act, as amended (P.L. 95-207; 20 U.S.C. 2602-2614).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The Evaluability Assessment (EA) of this Program was carried out under the direction of the Department of Education's Office of Evaluation and Dissemination through a contract awarded to the American Institutes for Research. Work began in October 1979. A description of the intended program was constructed. An extensive list of possible performance measures was prepared, but since this is a State grant program, both the objectives and the measures had to be separated into those appropriate for the Federal level and those for the State level. An interim report on the EA was produced. Since the Evaluability Assessment found most of the Program to be evaluable, a Rapid-Feedback Evaluation was begun in September 1980. In this evaluation the focus was on the extent of career education implementation which could be attributed to the Incentive Act, the activities and objectives considered most crucial for implementing the program by its managers, and information most readily obtained for use in Fiscal Year 1981 Congressional hearings. It is apparent that P.L. 95-207 funds are serving the purposes envisioned by Congress when it passed the Incentive Act. Notable by their general absence at this early stage of implementation are the following: (1) coordinated State or local level plans for evaluating and reporting on the impact of career education; (2) investments in pre-service training designed to prepare new education personnel for using career education concepts; (3) active involvement of organized labor, especially the National Education Association and the American Federation of Teachers State and local affiliates; and (4) active involvement or organizations representing the handicapped and other special needs populations.

**Program:** School Improvement Programs: Women's Educational Equity
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Elementary and Secondary Education Act of 1965, as amended (P.L. 89-10, title IV, § 932; 20 U.S.C. 3342).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The program objectives are to: develop diverse, tested model products and change strategies; produce and market the best of these model products and strategies to potential users nationwide; and demonstrate that these model products and strategies are usable, useful, valuable, beneficial, and adaptable. Specifically, the program will demonstate that use of the model products and strategies: produces positive changes in participant's behavior, attitudes, aspirations, and awareness and in educational policy and practice; fosters a conducive environment for equitable change; and enhances the capability of the educational system to work for and to achieve educational equity. *Abstract:* Phase I of this study developed measurable program objectives and assessed these objectives as plausible after documenting program logic and reviewing actual operations in the field and at headquarters. Recommendations included improved procedures for selecting grantees for monitoring grantee performance. Indicators for measuring efficiency of internal processes and effectiveness of field operations were developed. Phase II is a rapid feedback evaluation which will collect and analyze data on effectiveness of operations.

*Process Improvement and Quality Control Studies.*
3/81; 54 pp.
Robert Caccia

**OMB Funding Code/Title:** 91-0800-0-1-503 / Salaries and Expenses
**Program:** Program and Management Evaluation
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 416; 88 Stat. 563; 20 U.S.C. 1226b).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* The objectives of the Process Improvement and Quality Control Studies are: (1) the determination of the acceptability of the products produced by the process; (2) the description of the actual process; (3) the determination of where changes can be made for improvements; (4) the introduction of changes and the determination of the results; and (5) the establishment of a control system to assure that quality (acceptability) and productivity levels are maintained (after improvements have been made which result in an acceptable product with concurrent productivity increases). *Abstract:* Findings in all Process Improvement and Quality Control Studies completed or being conducted demonstrated that most process inefficiencies in breakdowns of good management practices occur when the process (line of work) crosses functional areas of organizational lines. The conclusion was that each Process Improvement and Quality Control Study would address the entire line of work in which the process was involved from the initiating action or document to the concluding output of the process regardless of functional areas or organizational lines. Recommendations addressed the following: (1) processing and policy procedures; (2) defined and documented responsibilities; (3) process behavioral documentation (logs, feedback mechanisms, pert charts, etc.); (4) process analyzations (lapse time, error analysis, error correction); (5) quality control checkpoints; (6) quality and productivity measurement techniques; and (7) techniques to measure the impact of changes to process.

*Discretionary Grant Field Readers Study.*
3/24/81
Joseph G. Teresa
**OMB Funding Code/Title:** 91-0800-0-1-501 / Salaries and Expenses
**Program:** Program Administration: General Administration
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 403, 421A; 20 U.S.C. 1221c, 1231).
**Availability:** Agency

*Abstract:* The purpose of the study was to gather baseline information on the Department's use of field readers in the discretionary grant application review process. The findings concluded: (1) the Office of Postsecondary Education had the largest number of field readers (853) and spent the most money ($760,800); (2) the Office of Special Education and Rehabilitative Services had the fewest number of field readers (71) yet spent $596,400; (3) the Office of Vocational and Adult Education had the smallest obligated cost ($97,600) but had 479 readers; and (4) the total number of field readers was 2290. The major recommendation of the project was modification of the field reader process by greater use of government employees as readers (utilizing a pool of Federal employees) and establishment of a pre-application proposal process. The Discretionary Grant Field Readers Study was used by the Secretary in his budget constraints memo to use in-house employees to evaluate grants. In addition, GAO requested a copy of the report for their own research and study efforts. The data from the study were used to answer congressional questions about field readers in the Department.

**E01404-003**
*Personnel Complaints Survey.*
1/16/81
William Renahan
**OMB Funding Code/Title:** 91-0800-0-1-503 / Salaries and Expenses
**Program:** Program Administration: General Administration
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 403, 421A; 20 U.S.C. 1221c, 1231).
**Availability:** Agency

*Abstract:* The purpose of examining complaints from the Personnel Office is to promote consumer satisfaction with personnel services by increasing the efficiency and timeliness of the processing of personnel actions. The survey need is based on management's perception of consumer (employee) dissatisfaction with the time and error rate involved in processing personnel action requests. The findings conclude that the Personnel Office received few actual complaints. The majority of communication from employees concerned either routine inquires or requests for assistance. Major recommendations include: (1) restructuring the study with emphasis on tracking personnel action requests through the system from initiation to completion; (2) identifying each individual or office involved in the process, their responsibilities, and how long it takes to accomplish those responsibilities; and (3) identifying delays and the reasons for these delays. The Personnel Complaints Survey was well received by the personnel office and management and, as a result, a more in-depth study is currently being conducted.

*Program Objectives:* Title I of the Elementary and Secondary Education Act (Public Law 95-561, as amended) is a major program of Federal assistance to State and local education agencies to sponsor programs designed to improve the achievement of educationally deprived children living in areas with high proportions of low income families. *Abstract:* Title I programs serving children below the second grade have been influenced both by programatic requirements and by early childhood educational theory. However, because there is little consensus on a practical definition of "educational deficit" for very young children, greater direction is needed to help program administrators select appropriate children for services. This task is compounded in difficulty by tests that are limited in number and scope and are technically poor. In general, Title I early childhood (prekindergarten, kindergarten, and first grade) programs are quite diverse, with a multitude of curricula encompassing wide ranges of goals and objectives. Parental involvement, heavily stressed in the prekindergarten programs, declines steadily as one moves up through the grades. Although early childhood programs show great diversity and are often difficult to evaluate properly, many of these programs have been identified as exemplary, often on the basis of systematic evaluation.

**Availability:** Agency; ERIC
**Geographic Relevance:** National

*Program Objectives:* The major purposes of the program are to: (1) meet special needs incident to the elimination of minority group segregation and discrimination among students and faculty in the schools; (2) encourage voluntary elimination, reduction, or prevention of minority isolation in elementary schools with substantial proportions of minority students; and (3) aid school children in overcoming the educational disadvantages of minority group isolation. *Abstract:* The aim of the Emergency School Aid Act (ESAA) Human Relations study is to: determine the nature and extent of human relations activities funded by the ESAA Basic Grants Program; the effectiveness of different kinds of services provided; and the stability of the effective services identified. The current phase of the study documents the conditions that lead to success and produces a handbook of strategies for use by local schools in implementing human relations services. The study finds that ESAA districts with human relations services were larger, more recently desegregated, and had a lower percentage of minority students. Services provided are found to be related to improvement in intergroup attitudes, behavior, and self concept of minority students. In addition, teachers made conscious efforts to further Equal Employment Opportunity in their behavior toward students and in their grouping practices.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* Title I of the Elementary and Secondary Education Act (ESEA) of 1965, as amended by the Education Amendments of 1978 (Public Law 95-561) provides financial assistance to local education agencies that have concentrations of children from low income families in order to expand and improve education programs for educationally deprived children. Each State educational agency must interpret the statute to its districts, disseminate information, provide technical assistance monitor and enforce the statute and its regulations, and report to the Secretary of Education. *Abstract:* Phase I of the study focuses on the documentation and review of past and current State management practices in ESEA, Title I. The study examines how States have implemented the requirements of the Title I law as amended by the Education Amendments of 1978; what changes States have made to their Title I management practices as a result of the Education Amendments; and what successes and problems have been encountered by Federal, State, and District managers in their administration of Title I programs. Phase I efforts culminate in a report to the Department of Education (ED) that will assist staff in deciding if the provisions of the Title I legislation are being carried out by States, in understanding the management changes States have made to implement the law, and in determining problems that have arisen in State administration of the Title I program. The study findings will be used in the ED 1982 Report to Congress. Phase II will focus on the development of a package of exemplary management procedures and documents and will end in June 1982.

**Geographic Relevance:** National

*Program Objectives:* The Emergency School Aid Act (ESAA) specifies two purposes: (1) to meet the special needs incident to the elimination of minority group segregation and discrimination among students and faculty in elementary and secondary schools; and (2) to encourage the voluntary elimination, reduction, or prevention of minority group isolation in elementary and secondary schools with substantial proportions of minority group students. *Abstract:* This study describes a sample of 15 ESAA projects (target and nontarget schools) designed to combat disproportionate disciplinary actions against minority students, identifies some of the attributes of the more successful projects, and examines the reliability and validity of disciplinary data collected at the local level. Pre-service or related in-service training on the project was provided for staff in 40% of the study sites. Direct services such as individual counseling and tutoring to students and support services such as consultation and home-school liaison to teachers and parents were provided by all of the ESAA projects. The most successful projects operated under a central administrative structure, stated project objectives clearly and precisely, and used a planning process that included needs assessment and participation among administrative staff, regular instructional staff, and parents. Three of the 15 projects visited documented a reduction in disproportionate disciplinary actions such as suspension, expulsion, and corporal punishment in target schools.

**Authority:** Economic Opportunity Act of 1964, as amended (P.L. 88-452, title II, V, § 222, 551; 42 U.S.C. 2809, 2929).
**Availability:** Agency; ERIC
**Geographic Relevance:** National

*Program Objectives:* Supplementary Training is the academic subsection of the Career Development component of Follow Through. Supplementary Training programs are generally funded to, and carried out by, local education agencies working in conjunction with local schools and universities. Supplementary Training provides academic programs leading to a college degree (or high school equivalency). Services include career development planning, guidance and counseling, and pre-service and in-service training. *Abstract:* Parents of Follow Through children who participated in the Supplementary Training program through election of college courses effectively improved their socioeconomic status through upward job mobility. They experienced a higher rate of employment after enrollment in Supplementary Training and significantly increased their average personal income. Estimates of graduation rates ranged from 14% to 46%. Ninety-eight percent were female, and over 60% had been out of school for 10 or more years. The median age of participants was 42 years and over half of the respondents had been enrolled in the program for more than 10 years. Seventy-two percent had two or more children and, prior to enrollment, 83% had incomes under 10,000. Although the study design did not permit direct attribution of upward mobility solely to this program, it did provide an opportunity for older students to attend colleges–an opportunity they probably would not otherwise have had.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* Title I of the Elementary and Secondary Education Act (Public Law 95-561, as amended) is a major program of Federal assistance to State and local education agencies in order to sponsor programs designed to improve the achievement of educationally-deprived children living in areas with high proportions of low income families. *Abstract:* Of 500 school districts contacted to determine their interest in participating in this congressionally mandated study, only 44 responded favorably. Sixty-five percent of the 500 indicated no problems with current comparability provisions. Ninety-five percent of the participants identified at least one comparability task as burdensome, but only 16% spent over 60 days on comparability. In general, districts perceived that problems with comparability were dependent upon several factors, e.g. district size, declining enrollment, desegregation plan in effect, and/or student mobility. Implementing alternative comparability provisions would reduce the burden associated with comparability in some districts. Therefore, some tested and approved optional methods for computing comparability should be made available to school districts.

**Availability:** Agency; ERIC
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide services to disadvantaged youngsters in poor districts to meet their special educational needs. *Abstract:* In 1976, 68% of the Nation's public elementary schools were offering Title I programs, including 90% of those with half or more of their students from poor families, and 84% of those with half or more of their students reading a year or more below their peers. Of the appproximately 5 million children in grades 1-6 scoring in the bottom quartile of achievement distribution nationwide, about 1.6 million, or 32%, were participating in Title I. Students receiving Title I instruction in reading number about 82% of the total program participants; about 34% receive instruction in mathematics. Instructional resources devoted to a Title I child's educational program are about 1 1/2 times as great as those devoted to noncompensatory students. Of the 214 Title I districts in the Sustaining Effects Study, 114 or 53% were providing services to nonpublic students in 1976-77 with a per-pupil Title I expenditure comparable to that for the public school students. Over one school year, Title I students in grades 1-3 progressed more than they would have in reading (but there were small or no effects in grade 4-6), and students in all grades 1-6 showed math progress greater than would be expected without Title I. Information about program effectiveness over three school years is still being analyzed.

*Program Objectives:* The program was intended to support Special Emphasis Reading projects. These are characterized by the teaching of reading by reading specialists in the first six grades and the use of the vacation reading program for problem readers in those grades. *Abstract:* The project reported a 3 year experiment at seven sites with matched experimental and control schools. The purpose was to determine the efficacy of reading specialists in improving reading competency at experimental sites versus results at nearby control schools (without reading specialists). Of the seven sites, only three were found to have followed the "Special Emphasis Reading" mode; of these three, two showed significant reading superiority among the experimental students, particularly among second and fifth grade students.

**Availability:** Agency; ERIC

**Geographic Relevance:** National; participating communities

*Program Objectives:* The objective of the program is to authorize alcohol and drug abuse education demonstration projects in schools, communities, and institutions of higher education and their validation and dissemination throughout the country. It is also to provide leadership training for educational personnel, community personnel, and parents. *Abstract:* The project analyzed the impacts of the trained cluster teams on modifying alcohol and drug abuse in their respective schools. The general findings were that teams were viable and useful entities for the schools' programs of substance control depending upon the degree of team cohesion, team building (to compensate for attrition), and acceptance by administration and faculty. Impacts were positive, based on impressions of the team members, rather than on direct measurement of student substance abuse.

**Availability:** ERIC
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide services to educationally disadvantaged youngsters in State institutions for the neglected or delinquent in order to meet their special educational needs. *Abstract:* Of slightly over 51,000 students eligible for services in the Fall of 1976, almost 27,000 participated in the program. Title I students are similar to the general institutional population in terms of background and offense but tend to be younger and more educationally disadvantaged. Per-pupil expenditures in education for these students averaged about $1,358, of which about $456 was from Title I. State and institutional administrators cited the program's emphasis on basic skills and individualized instruction as strengths; restrictive guidelines and insufficient funds were cited as weaknesses. Student receipt of Title I services was found to be irregular in many cases. There were no significant changes nationwide in the achievement levels or attitudes of Title I or non-Title I students over a 12- or 16-week period. Student gains in basic skills achievement were positively correlated with the amount of time they were exposed to instruction and even more highly correlated with the amount of time they were task-engaged. Such task-engagement in the classroom was highest where teachers spent more time in direct instruction and feedback. Over one-half of the time schedule for instruction was consumed by noninstructional activities. The use of audio-visual and programed learning materials often served to disengage teachers from direct instructional activities and were found to be negatively correlated to student gains.

**Availability:** Agency

*Abstract:* The legislative requirements for evaluating Title VII projects, and the stipulation that the Secretary of Education provide procedures and models for gathering data and evaluating Title VII projects reflect, at a minimum, Congressional concern with objective demonstration of project effectiveness. The Bilingual Models study attempts: (1) to develop the evaluation and data gathering models as required by the Educational Amendments of 1978; and (2) to develop evaluation handbooks which describe these models and which include guidelines for use by project directors and evaluators.

**Authority:** Elementary and Secondary Education Act of 1965, as amended (P.L. 89-10, title VII, § 721, 723; 20 U.S.C. 3231, 3233). Education Amendments of 1978 (P.L. 95-561; 20 U.S.C. 880b).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide for the training of bilingual education teachers, administrators, counselors, paraprofessionals, teacher aides, parents, and other personnel to conduct bilingual education programs. *Abstract:* Increasing the amount of funds available for stipends would result in higher levels of enrollment at most institutions of higher education. Conversely, if student stipends were terminated, the result would be a significant decrease in enrollment in many institutions. Graduates of bilingual education programs located in States with bilingual education certification requirements not only meet State qualification standards but also meet and exceed the definition of qualified bilingual personnel contained in the Title VII regulations; however, program improvements could be made that would further enhance teacher qualifications. Where bilingual education program personnel had success in increasing the curricular involvement of relevant faculty, the curriculum tended to be both broader and more closely tailored to the needs of bilingual education students. Institutions that address more than one target language often have difficulty in achieving the same level of preparation for all ethnolinguistic groups represented in the program.

*An Evaluation of Title I of the Library Services and Construction Act.*
1/81; 310 pp.
Joseph Casey
**Contractor:** Applied Management Sciences; 262 Wayne Avenue, Silver Spring, MD 20910
**OMB Funding Code/Title:** 75-0212-0-1-503 / Library Resources
**Program:** Public Libraries
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Library Services and Construction Act, as amended (P.L. 84-597, title I, § 101; 70 Stat. 293; 20 U.S.C. 352).
**Availability:** Agency; ERIC
**Geographic Relevance:** National; State

*Program Objectives:* The objectives of the program are to: extend public library services to areas without service or with inadequate service; establish and expand State institutional library service; extend library service to the physically handicapped; expand service to the disadvantaged; strengthen metropolitan public libraries serving as resource centers; and provide programs and projects to areas with high concentrations of limited English speaking. *Abstract:* In recent periods of scarce resources for libraries, States have been moving away from demonstration programs and are increasingly spending money for long-term activities (such as regional libraries) that should result in long-term cost efficiencies by consolidating duplicative activities. Major changes have occurred in the areas of new technology, community outreach, introduction of audiovisual materials to respond to the needs of nontraditional clients, and continuing education for librarians. Findings indicate that libraries have responded to the various priorities of the Library Services and Construction Act in serving the blind (40%); aged (37.9%); and improvement of services in areas where they are inadequate (32.7%). The Act has had a major impact on establishing new services to unserved areas, particularly rural areas and high poverty States. Many State agencies now report that areas without service are either unable or unwilling to provide funds to support locally based services. Adequacy of public library service represents the current and dominant focus of most State efforts to improve public libraries; the upgrading of existing services, however, is complicated by the cost involved. Continuing needs identified were support for regional systems and for target populations such as the handicapped and institutionalized.

**Program:** Dissemination and Professional Development: National Diffusion Program
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Elementary and Secondary Education Act of 1965, as amended (P.L. 89-10, title III, § 302-303; 20 U.S.C. 2942, 2943).
**Availability:** Agency; ERIC
**Geographic Relevance:** National; State; LEA

*Abstract:* The study examines the process of school improvement and the disseminiation strategies at the Federal, State, and local levels to determine what effect various strategies initiated at each level have in the process and to determine the ways in which school improvement activities should be conducted. The report(s) will describe what has been learned about school improvement strategies supported by the Federal Government as they are interpreted by the States and implemented by local schools; the role of external technical assisters providing training and support to school practitioners implementing exemplary projects; and what activities are being undertaken in State departments of education.

**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 405; 20 U.S.C. 1221e).
**Availability:** ERIC
**Geographic Relevance:** National; State

*Program Objectives:* The State Dissemination Grants program was initiated in Fiscal Year 1975 to improve educational practice by encouraging State education agencies to help educators locate and use current knowledge about educational research, new products, and improved practices. The purpose of the program is to strengthen one set of systems within the nationwide dissemination configuration by focusing on State education agencies. *Abstract:* The findings are summarized under three major areas of research questions: (1) Is dissemination capacity being built? (2) What are the factors affecting the building of capacity and what factors help or hinder achievement of program objectives? and (3) What program management and program design factors affect the building of capacity? The primary effect sought from the program–increased capacity of State education agencies for dissemination–is being achieved. The process of increasing capacity follows several different patterns depending on State history and context and reflects the flexibility allowed by the program guidelines. The study demonstrated that dissemination capacity is being built and identifies a number of State, program design, and management factors that are enhancing and limiting the capacity building effort. Based on its findings, NTS recommended stregthening collaborative State and Federal planning in the use of current dissemination resources, in the identification of priorities for developing new resources, and in providing for linker training.

**Availability:** Agency; ERIC

*Program Objectives:* The research and development utilization program was an action-research program designed to test whether school practices could be improved by making external resources available to the schools. Overall, the program was designed to: (1) organize a linkage system whereby national, State, and other external resources would be made available to school personnel; (2) apply research-based products or ideas to school problems; and (3) develop a problem-solving process whereby schools would systematically identify such problems and select and implement new ideas. *Abstract:* This study examined the strengths and contributions of a number of dissemination/improvement strategies that were combined to form the research and development utilization (RDU) program model. These strategies included screening products for quality and transportability, reliance on a local problem solving teams; use of external resource persons (Linkers) to help stimulate and sustain local problems solving processes and to locate relevant, high quality products; and small amounts of seed money to help catalyze the effort. The study found that each of the strategies contributed to the complementary or synergistic effect of combining the strategies into a single comprehensive program approach. These findings provide a basis for further strengthening the RDU model and other dissemination/school improvement efforts.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This program evaluation was done to assess what role mediation could play in the resolution of complaints filed with the Office of Civil Rights (OCR). Interviews were conducted in the Federal, State, and local civil rights agencies that used mediation to determine what the most effective methods of mediation would be. The findings of the evaluation fall into six categories: (1) how the OCR mediation process compares to standard OCR procedures and to mediation in other agencies including how OCR has traditionally handled complaints, how other agencies use mediation, and how OCR mediation procedures compare with other agencies; (2) how mediation has worked in practice at OCR and views on mediation at OCR, including background on the experiment, the OCR mediator's role in settlement negotiations, disparities between policy and practice, and view of parties to cases mediated by OCR; (3) the advantages, disadvantages and risks of mediation including those for the complainant, respondent, and agency; (4) the element of a successful mediation process including that it be simple, prompt, fair, and assist agency management; (5) the rights of individuals, OCR's obligations, and the legality of mediation under Title VI, Title IX, and Section 504 and an analysis of OCR, Equal Employment Opportunity Commission, and 706 agency case files; and (6) suggestions for improving early complaint resolution including keeping the process simple, making certain that parties are well informed, and improving agency management.

**Geographic Relevance:** National; State; School District

*Abstract:* The purpose of the study is to determine if various kinds of alternative programs school districts operate were, in fact, nondiscriminatory. Very few school districts have established voluntary alternative programs for pregnant students. Twelve special programs were examined, and three model programs were described. Each model has strengths and weaknesses and is attuned to a particular type of community. Furthermore, none fits the needs of all students. The recommendations are for more monitoring and counseling of pregnant and parenting students by all relevant staff members. Further recommendations are that superintendents establish new and support existing programs and State education agencies provide more technical assistance.

*Abstract:* The objective of this study is to help the Department of Education's Office for Civil Rights to develop sound policies to avoid discrimination against minority and/or male students when selecting students for placement in programs for the mentally retarded. This study will determine the variables which are associated with disproportional assignment of minorities and males to programs for the mentally retarded; determine the variables associated with educationally valid placements in such programs; and suggest alternative practices which lead to educationally valid placements and which, hopefully, would result in less disproportion.

*Abstract:* The basic purpose of this study was to evaluate the usefulness of Technical Assistance (TA) as perceived by elementary and secondary school systems. Two major objectives were: (1) to identify and describe the TA efforts addressing civil rights issues offered to local education agencies (LEAs) through government and private sources, and (2) to produce a comprehensive catalogue of existing civil rights TA which categorizes and describes types of available TA. Recommendations included: (1) a system should be developed for organizing and coordinating TA resources so that information is available to the LEA; (2) clarification is needed of the State education agency's own role in the delivery of technical assistance; and (3) methods should be developed to identify the appropriate recipients for TA and to target the delivery of TA to their specific needs and concerns. To do this, the Office of Civil Rights' TA program should develop procedures to identify the appropriate school personnel who should receive the TA.

*Program Objectives:* The objective of the Office of Civil Rights' (OCR's) program operations is to ensure that beneficiaries are not treated in a discriminatory manner by recipient institutions. *Abstract:* The specific aspects of OCR's operations potentially affected by this study's findings were the procedures through which protected group members must file complaints and the methods by which OCR selected compliance review issues. The purpose of this study was to describe the perception of minority, women, and handicapped persons regarding certain types of discrimination in specified education areas and to identify problem-solving techniques that would eliminate bias in school settings. Some of the more significant findings for both elementary, secondary and higher education respondents include: (1) all respondents perceived discrimination in the delivery of services and felt that the issue they identified was either prevalent or had a severe impact; (2) all respondents had two major concerns–faculty issues (attitudes and underrepresentation) and lack of courses, materials and extra-curricular activities pertinent to their interests and experience; and (3) all protected groups felt that a failure to develop a positive self-image was a manifestation of discriminatory treatment. Conclusions and recommendations state that OCR should focus on areas or issues of discrimination perceived by its constituency as highly prevalent and should do more to familiarize beneficiaries with methods of redress available to them.

*Abstract:* The purpose of this study is to evaluate and enhance the effectiveness of the four mechanisms the Office of Civil Rights (OCR) uses to secure compliance with civil rights laws. This study examined how the mechanisms of assurances, self-evaluations, coordinators and grievance procedures help local education agencies and Institutions of Higher Education come into compliance with three civil rights laws. Nearly all agencies studied had implemented the mechanisms, but few people knew about them. Therefore, their impact was minimal. There were recommendations of ways to increase their effectiveness, primarily throuqh local action. Some Federal clarification of the mechanisms is also necessary.

*Program Objectives:* Although efforts have been made to improve the organization and effectiveness of the Office of Civil Rights' (OCR's) national and regional office operations, little had been done to study the utilization of State agencies with similar or overlapping civil rights missions. This study was designed to determine whether OCR could expand a working relationship with some or all State agencies. *Abstract:* This program evaluation was conducted by interviewing State officials to determine how state agencies could be used to help lighten OCR's complaint backload and to conduct compliance review. Specific findings include: (1) the willingness and capacity of State agencies to work with OCR varies; (2) several State education agencies operate strong civil rights programs; and (3) many State human rights agencies are sophisticated and have operations similar to OCR's. In general, it seems that relationships with some State agencies could be profitably expanded to include investigating complaints and conducting compliance reviews.

*Program Objectives:* The objectives of the Office of Civil Rights programs are to monitor desegregation and to provide technical assistance to districts with compliance problems. *Abstract:* Observation of districts under a desegregation plan and discussion with experts in the field of desegregation led to recommendations for effective desegregation. These are that desegregation should: (1) begin in the early grade, with no phase-in; (2) include mandatory controls when voluntary choices are ineffective; (3) improve schools in minority neighborhoods; (4) include a special office charged with implementation and monitoring; (5) maintain contact with parents of children who have withdrawn; (6) focus on smaller schools; and (7) avoid grouping practices which result in within-school resegregation. Unfortunately, few districts presently follow these recommendations.

*Abstract:* This study focused on ways to improve the Office of Civil Rights' (OCR's) negotiations for and monitoring of compliance activities. This study observed four different types of monitoring committees including statutory, political, educational and social. The mandates for them covered race, sex and handicap civil rights. Based on the experience of 12 committees, the major recommendations for effective monitoring were: (1) integration of the monitoring committee into the compliance plan before its issuance; (2) a clear mandate with some flexibility and provision for clarification; (3) an advisory role for the committee with leverage supplied by sponsor; (4) sponsor and chairperson decide on structure and membership of groups before starting; (5) careful choice of members embracing varied interests; (6) provision of resources; (7) review of drafts by schools before release; and (8) the establishment of standard operating procedures.

**Availability:** Agency; ERIC
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide assistance to local educational agencies for activities that will improve the educational practices of those agencies. *Abstract:* The purpose of the study is to present information collected from a sample of States across the nation on seven measures of program impact relevant to the purpose and requirements of the Elementary and Secondary Education Act (ESEA) Title IV-C program. The measures include: (1) examples of student performance improvement; (2) evidence of the rate of local project continuation at the end of program funding; (3) evidence of project induced administrative or instuctional change in local school districts; (4) evidence of successful completion of developmental efforts by local projects; (5) evidence of the cost effectiveness of the adoption rather than recreation of project activities; (6) evidence of program impact on State level policies, administrative procedures, or other State administered programs; and (7) evidence of programatic resource allocation in reference to statutory purposes.

### E01406-002

*Evaluation of the Basic Skills Improvement Program.*
9/30/81
Morris Peterson
**Contractor:** Kirschner, Inc.; 110 17th Street NW, Washington, DC 20036
**OMB Funding Code/Title:** 91-1200-0-1-501 / Educational Improvement
**Program:** School Improvement Programs: Basic Skills Improvement (State Activities)
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Elementary and Secondary Education Act of 1965, as amended (P.L. 89-10, title III, § 222, 224; 92 Stat. 2202; 20 U.S.C. 2881-2904).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The study will develop a descriptive model of Part A projects which include in-school, out-of-school, and parent participation programs. Data gathered will be analyzed to determine whether or not the Basic Skills Program is meeting legislated goals. A predictive model of success will be developed and applied to 25 Part A projects. Data gathered under this model will be analyzed to determine which components of a project contribute to project success. The study will then carry out seven case studies on seven selected Part B, State Basic Skills projects.

**Agency Contact:** Elementary and Secondary Education. (202) 245-8537.

### E01406-003

*Use of Vacant Schools Could Provide Savings to Federal Construction Programs.* (HRD-81-28).
1/19/81; 19 pp. + 3 app.
**OMB Funding Code/Title:** 91-0102-0-1-501 / School Assistance in Federally Affected Areas
**Program:** Construction
**CFDA NO.:** 84.040
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Act of September 23, 1950 (P.L. 81-815; 20 U.S.C. 631 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to reduce cost by using vacant public school facilities in lieu of new construction under Federal grant construction programs. *Abstract:* Use of public school facilities, closed due to declining enrollments, may be a source of savings for new construction projects financed by the Federal Government. For the 1978-79 school year, there were nearly 2500 vacant schools in 19 States. Over one-third of them were in good condition and located in areas that made them suitable for continued use. State and local authorities are not required to consider using vacant schools in lieu of new construction when requesting grant funds. However, projects that include converting vacant schools may be funded under their programs as long as the projects meet the various Federal requirements. Because there may be opportunities for substantial cost savings by using more vacant schools, GAO believes that an evaluation of the feasibility of using such schools should be required before construction funds are awarded to grantees. Since the opportunity spans many Federal programs, there should be a Federal policy requiring Federal agencies with grant construction programs to consider using vacant schools in lieu of new construction. GAO recommended that the Director of the Office of Management and Budget should require Federal agencies that provide grants for construction projects to make sure that adequate consideration is given to the use of vacant schools before funds for constructing new facilities are authorized.

## POSTSECONDARY EDUCATION

**E01407-001**
*BEOG Quality Control Project (BEOG/Campus Based Program Ongoing Quality Control System, Stages II and III).*
12/81
**Contractor:** ADTECH; 7923 Branch, Suite 500, McLean, VA 22102
**OMB Funding Code/Title:** 91-0200-0-1-502 / Student Financial Assistance: Pell Grants.
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Higher Education Act of 1965, as amended (P.L. 89-329, title IV, § 411; 86 Stat. 273; 20 U.S.C. 1070a).
**Availability:** Agency; Contractor
**Geographic Relevance:** National

*Abstract:* The purpose of this project during Stage I was to identify the magnitude, types, and sources of errors in the Basic Educational Opportunity Grant (BEOG) and Campus Based programs. Stage II, based on Stage I findings, will design and test an ongoing Quality Control (QC) system which the contractor will install within the Office of Student Financial Aid (OSFA); evaluate corrective action implemented as a result of Stage I; and replicate Stage I data collection and analysis as an option. Finally, during Stage III, OSFA staff will be trained in the maintenance of an ongoing QC system with the phasing in of OSFA staff and phasing out of the contractor as well as installing an ongoing QC system within OSFA.

*Integrated Delivery System.*
In process
**OMB Funding Code/Title:** 91-0200-0-1-502 / Student Financial Assistance
**Program:** Contract Management Assistance
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 421A; 84 Stat. 166; 20 U.S.C. 1231).
**Availability:** Agency; Contractor
**Geographic Relevance:** National

*Abstract:* The purpose of this project is to design, implement, and evaluate an integrated delivery system for student aid programs. In addition to the above, this project will also include a complete requirements analysis and study of the integration of the total student aid delivery process including an assessment of the feasibility of changing the current paper-based system to an electronic technology. Based on the results of the requirements phase, an integrated system will be designed and implemented. The following accomplishments are expected to be achieved: substantial cost savings, less error-prone award calculations, reduction in paperwork; and more timely awards and service delivery.

**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 421A; 84 Stat. 166; 20 U.S.C. 1231).
**Geographic Relevance:** National

*Abstract:* The purpose of this project is to ensure the integrity of the payment and accounting function of the interest billing system as well as in other transaction activities. Within the Guaranteed Student Loan (GSL) program, the project will include the following phases: Phase I–Design; Phase II–Data Collection; Phase III–Analysis; and Phase Phase IV–Corrective Action. Once the review has been completed, the following will be determined: accuracy of lender computation, in-house and system processing, nature and scope of error, and corrective action program-wide to address errors surfaced by the case reviews.

**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Higher Education Act of 1965, as amended (P.L. 89-329, title IV, § 401; 20 U.S.C. 1070, 1087).
**Availability:** Agency
**Geographic Relevance:** National; State

*Program Objectives:* Objectives of the Office of Student Financial Assistance (OSFA) Umbrella Model Project are to analyze existing relevant data sources and model efforts; to design and develop an integrated cost and recipient projection and simulation model; to review, revise, and upgrade the model data base on a periodic basis; and to initiate primary data collection (if necessary) to enhance the model data base. *Abstract:* The OSFA Umbrella Model Project is a analysis and development effort which ultimately will lead to the first unified computer-based mathematical forecasting and simulation model for the five major programs administered by OSFA. Once an efficient, accurate, and usable forecasting tool has been developed and implemented, subsequent activity will generally be restricted to data base refinement and enhancement, either through updating or replacing existing data base sources or through a primary data collection effort. Programs to be covered under the model are the Guaranteed Student Loan Program, the College Work-Study Program, the National Direct Student Loan Program, the Supplemental Educational Opportunity Grant Program, and the Pell Grant Program. Each of these programs have critical needs to provide decisionmakers with the cost and student implications of potential legislative, regulatory, and/or socioeconomic changes to the programs. The Umbrella Model will provide management with the first opportunity to forecast an accurate budget and programatic changes and their related cost/student impacts, both at the individual program level and for the five programs as a whole.

*A Study of Research Dissemination Utilization Program (RDU).*
6/81; 416 pp.
Karen S. Louis; Sheila Rosenblum
**Contractor:** Abt Associates, Inc.; 55 Wheeler Street, Cambridge, MA 02136
**OMB Funding Code/Title:** 75-1296-0-1-503 / National Institute of Education; 91-0501-0-1-503 / Research and Related Activities
**Program:** Research and Development; Improvement of Post Secondary Education
**CFDA NO.:** 84.117
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** General Education Provisions Act, as amended (P.L. 90-247, title IV, § 405; 86 Stat. 328; 20 U.S.C. 1221e).
**Availability:** Agency; ERIC
**Geographic Relevance:** National

*Program Objectives:* The Research Dissemination Utilization (RDU) program was an action-research program designed to test whether school practices could be improved by making external resources available to the schools overall. The program was designed to: (1) organize a linkage system whereby national, State, and other external resources would be made available to school personnel; (2) apply research-based products or ideas to school problems; and (3) develop a problem-solving process whereby schools would systematically identify such problems and select and implement new ideas. *Abstract:* The study examined the strength and contribution of a number of dissemination/improvement strategies that were combined to form the RDU program model–products screened for quality and transportability, reliance on a local problem-solving team, use of external resource persons (linkers) to help stimulate and sustain local problem-solving processes and locate relevant, high quality products, and small amounts of seed money to help catalyze the effort. Each of the strategies contributed to achieving desired school improvements, but the strength and uniqueness of RDU is in the complementary or synergistic effect of combining the strategies into a single comprehensive program approach. The findings provide a basis for further strengthening the RDU model and other dissemination/school improvement efforts.

**Availability:** ERIC

**Geographic Relevance:** National; State

*Program Objectives:* The State Dissemination Grants Program was initiated in Fiscal Year 1975 with the mission to improve educational practice by encouraging State education agencies to help educators locate and use current knowledge about educational research, new products, and improved practices. The purpose of the program is to strengthen one set of systems within the nationwide dissemination configuration by focusing on State education agencies. *Abstract:* The findings are summarized under three major areas of research questions: (1) Is dissemination capacity being built? (2) What are the factors affecting the building of capacity? What factors help or hinder achievement of program objectives? and (3) What program management and program design factors affect the building of capacity? The primary effect sought from the program–increased capacity of State education agencies for dissemination–is being achieved. The process of increasing capacity follows several different patterns depending on State history and context and reflects the flexibility allowed by the program guidelines. The study demonstrated that dissemination capacity is being built and identifies a number of State, program design, and management factors that are enhancing and limiting the capacity building effort. Based on its findings, NTS Research Corporation recommended strengthening collaborative State and Federal planning in the use of current dissemination resources, in the identification of priorities for developing new resources, and in providing for linker training.

*Program Objectives:* It is the purpose of this program to assist States in improving planning in the use of all resources available to them for vocational education and manpower training by involving a wide range of agencies and individuals concerned with education and training within the State in the development of the vocational education plans. It is also the purpose of the program to authorize Federal grants to states to assist them with their vocational education programs. *Abstract:* A study will be conducted of vocational education programs, including such programs conducted by the States, those programs conducted under the Vocational Education Act of 1963, and other related programs conducted under the Comprehensive Employment and Training Act of 1973 and by the State Post-Secondary Commissions authorized by the Education Amendments of 1972. The study will include: (1) distribution of occupational development funds in terms of services, occupations, target populations, enrollment, and educational and governmental levels and what such distributions should be to meet resources needs over the next 10 years; (2) examination of how to achieve compliance with applicable laws; (3) analysis of means of assessing program quality effectiveness; (4) experimental studies; and (5) findings and recommendations for changes in the present act as well as new legislation. Recommendations for changes in the present act will be determined, as will new legislation, and a review of consumer and homemaking programs will be performed.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide greater opportunities for minorities and women to participate in National Institute of Education (NIE) programs. *Abstract:* The NIE equal employment opportunity (EEO) profile has improved since 1973. Its minority and female workforce is generally representative or, in some cases, overrepresentative of the general U.S. population. The unsolicited proposal program has not significantly increased the number of NIE-funded minority and women-managed projects. NIE has initiated steps to increase minority and female participation in its programs. Although some of these efforts have started to show improvements, the effectiveness of these measures depends largely on how much attention and funding are devoted to them. The NIE Director should develop, in conjunction with the laboratories and centers, specific goals and timetables for the adequate representation of minorities and women at each institution; monitor laboratory and center progress in achieving these goals; enforce EEO and equity conditions of the long-term agreements; and direct the EEO office to ensure that the laboratories and centers are aware of, and exercise, their EEO responsibilities. It is recommended, too, that the Director finalize the actions proposed to modify the evaluation criteria and process and try to increase the number of qualified minority and women applicants to the unsolicited proposal program. He should establish goals for the number of minorities and women to participate in the program. The Director should also allocate additional resources to the small and disadvantaged business utilization program, so that its outreach, advocacy, and monitoring functions can be effectively implemented. He should reemphasize NIE support for its outreach efforts to increase minorities' and women's participation in NIE activities.

## VOCATIONAL AND ADULT EDUCATION

**E01409-001**
*Assessment of the State-Administered Programs of the Adult Education Act.*
Malcolm Yound
**Contractor:** Development Associates, Inc.; 2924 Columbia Pike, Arlington, VA
**OMB Funding Code/Title:** 91-0400-0-1-501 / Vocational and Adult Education
**Program:** Adult Education: Grants to States
**CFDA NO.:** 84.002
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Adult Education Act of 1966, as amended (P.L. 89-750, title III, § 315; 80 Stat. 1217; 20 U.S.C. 1203).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Although much information on the adult education program exists, there is little coherent data (that is national in scope) on local program operations. As a result, in 1978 the Office of Evaluation and Dissemination in the Office of Education commissioned a national assessment of the operation of the Adult Education Act State Administered Program. The purposes of the study were: to provide an analytic description of the program, with particular emphasis on program participants, and to identify a set of impact measures that can be studied in a longitudinal design. The study was conceived in part as an opportunity to gather baseline information reflecting the nature of the program just as the first effects of the 1978 legislation would be felt. In many respects, the data gathered and reported can be viewed as a partial test of some critical assumptions of the 1978 amendments, as well as a point of comparison for future studies which may have interest in the impact of the amendments and actions taken as a result.

*Abstract:* It was determined that the most appropriate way to evaluate a formula grant program in 84 State agencies was to capture the essential elements of the program longitudinally, in order to profile them. The Rehabilitation Services Administration (RSA) has had a management information system, but this system design did not permit the capturing of the appropriate elements. Under the auspices of the evaluation unit within RSA, a new system design was begun in 1978 that would include components for policy, management, planning, and compliance activities. The preliminary system design is now complete. The information data requirements and statistical analysis procedures are fully described. The software will be completed by October 1981 and the system implemented in Fiscal Year 1982. The system promises to make it possible for RSA managers to make data-based decisions at all levels. The system will be constructed "open" so that it can remain a flexible planning and evaluation tool.

*Abstract:* The Standards Analysis Project was conducted to develop improved methods of utilizing data from State vocational rehabilitation agencies. The project resulted in: (1) the development of a management paradigm which emphasizes methods of utilizing standards information by program recipients; (2) review and refinement of methods and approaches for data analysis, including the analysis of time trends for use in developing graphic presentations for administrative use; (3) development of a revised report format which permits presentation of a comprehensive, overall picture of agency functioning through the use of multivariate statistical analyses; and (4) the development of procedures for improving and refining data validity.

*Abstract:* The basic objective of this study is to analyze Fiscal Year 1979 and 1980 data submitted in response to the Vocational Rehabilitation Evaluation Standards that are currently in use. The contractor will develop guidelines and plans for utilizing the results of the analysis of the standards data and provide consultation, technical assistance, and guidance to State agencies, regional offices, and the Rehabilitation Services Administration (RSA) central office, on a systematic basis, in the analysis and interpretation of vocational rehabilitation standards, as well as the utilization of findings from standard's data. In addition, the contractor will coordinate with the revised standards pretest contractor, for analyzing the overall ramifications of RSA's switchover from the current standards to revised standards.

*Abstract:* State vocational rehabilitation agencies have varied capacity to conduct program evaluation. To strengthen the ability and capacity of each State, the Rehabilitation Services Administration (RSA) funded States to develop model evaluation units. The states funded were Mississippi, Pennsylvania, Oregon, Virginia, Michigan, and Delaware. The objectives of the model evaluation systems for State vocational rehabilitation agencies are to: (1) develop a model in which comprehensive program and policy systems are linked by appropriate evaluative data; (2) field test and evaluate the effectiveness of the revised standards for evaluation and the facilities reporting system for vocational rehabilitation agency management; (3) build new evaluation capacity which can be generalized to other States; and (4) develop linkages for a within State's and between State's agency network for communication, dissemination, and utilization of evaluation topics, with special emphasis on developing and testing the model evaluation units.

*Abstract:* The purpose of this project is to coordinate leadership to most activities established for the six model evaluation units in vocational rehabilitation. Coordination occurs across the following boundaries: developing evaluation plans, managing an advisory committee, dissemination on issues and programs within the model systems, analyzing State reports, pretesting standards and facilities information systems, reviewing progress, and providing technical assistance. Begun in September 1979, this project will run for three years–two over the duration of the model units and one after the units are terminated. The last year will be devoted to analyzing findings from the model unit studies, replicating these findings in other States, and preparing training materials.

*Abstract:* The purpose is to conduct a detailed pretest and refinement of the vocational rehabilitation standards which have been developed for the Rehabilitatioan Services Administration (RSA) over the past 2 years. The objectives of the project are to: (1) pretest and revise the vocational rehabilitation program evaluation standards; (2) pretest and revise the vocational rehabilitation project evaluation standards; (3) develop an implementation plan for the program standards; (4) develop an implementation plan for the project standards; (5) develop and demonstrate an analytic paradigm for the program standards; and (6) develop and demonstrate an analytic paradigm for the project standards. The pretest of the standards is to be accomplished through the model evaluation projects which are being funded by RSA at six State vocational rehabilitation agencies. At the end of the one-year pretest, the contractor will make necessary revisions to the standards, prepare guidance material for the States to use to implement them on a full-scale basis, and develop and demonstrate an analytic paradigm for management use of the standard's information base by State and Federal program staff.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This study has two components. The assessment component investigated three processes that influence the timeliness with which school systems conduct evaluations for students identified as potentially handicapped: referral screening, case coordination, and quality control. For each process, an examination was made of the resources available to the school, the basic structure of the process, division of responsibility, and the deployment of personnel. The secondary component has been conducted in two phases. The first phase examined class schedules of handicapped students for information concerning the number and type of students who received services in integrated settings, and the extent to which they received services comparable to those of nonhandicapped students. The second phase involves the identification and documentation of promising strategies for serving secondary handicapped students. Strategies are grouped into the following topics: personnel utilization, special education curriculum development, internal special education strategies, regular education teacher preparation/support, special education student preparation/support, and vocational options.

### E01411-017

*Evaluation of the Impact of the Integration of Severely Handicapped Children and Youth.*
12/81; 56 pp.
Dr. Richard Brinker
**Contractor:** Education Testing Service; Princeton, NJ
**OMB Funding Code/Title:** 91-0300-0-1-501 / Education for the Handicapped, Gifted and Talented
**Program:** Education for the Handicapped: Special Population Programs: Severely Handicapped Projects
**CFDA NO.:** 84.086
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Education of the Handicapped Act, as amended (P.L. 91-230, title VI, § 624; 20 U.S.C. 1424).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The project has as its objectives the identification of factors in the educational environment which affect integration of severely handicapped students and a description of the effects varying degrees of integration will have on student educational progress and attitudes. This information is needed to: (1) assist the States to further the integration of the severely handicapped in a cost-effective manner; (2) track the impact of Office of Special Education (OSE) projects for integration, as compared with non-OSE funded projects; and (3) assist OSE Division of Innovation and Development in prioritizing the expenditure of discretionary funds in subsequent funding periods. *Abstract:* This study will determine those factors which predict the degree and quality of integration of the severely handicapped at 14 sites. Sites are selected to represent differences in administrative and educational practices for achieving integration in regular education settings. Differences in the level of integration achieved will be used to predict educational progress of the severely handicapped and changes in the attitudes toward the handicapped by nonhandicapped students. Data will be collected and analyzed and findings will be disseminated by the OSE to provide significant information to State and local educational agencies and to professionals who are decisionmakers in establishing more effective and innovative integration efforts on behalf of the severely handicapped.

**OMB Funding Code/Title:** 91-0301-0-1-506 / Rehabilitation Services and Handicapped Research
**Program:** Rehabilitation Services: Training
**CFDA NO.:** 84.129
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Rehabilitation Act of 1973, as amended (P.L. 93-112, title III, § 304; 29 U.S.C. 774).

**Availability:** Agency
**Geographic Relevance:** National; State

*Abstract:* The purposes of this evaluation are to assist the Rehabilitation Services Administration to determine the dollars recouped, determine time flow and efficiency of information on individual educational preparation, determine the scope of supportive services provided, determine the impact on vocational rehabilitation for tuition-only cases, develop a set of policy considerations each State should follow in developing financial aid agreements, develop a set of evaluative criteria to determine how well similar benefits are received and utilized, and determine how financial resources and similar benefits affect the vocational rehabilitation program. A full report of the approaches taken, the problems encountered, and the recommendations made will be submitted. These reports will be made available to Federal, regional, and State agencies and to national rehabilitation organizations. The report could result in better-tailored resources for case services and in more of the required interagency planning in the funding of vocational rehabilitation services.

**Agency Contact:** Special Education and Rehabilitative Services.

*Needs Assessment of Services to Deaf/Blind Individuals.*
In process
**OMB Funding Code/Title:** 91-0301-0-1-506 / Rehabilitation Services and Handicapped Research
**Program:** Rehabilitation Services: Training (Vocational Training Services)
**CFDA NO.:** 84.126
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Rehabilitation Act of 1973, as amended (P.L. 93-112, title III, § 302; 29 U.S.C. 772).
**Availability:** Agency
**Geographic Relevance:** National; State

*Abstract:* The specific objectives of the evaluations are to: (1) provide information on the demographic nature of the deaf/blind population; (2) identify the array of services currently available for deaf/blind children, youths, and adults; (3) determine the adequacy of the array of services available to meet the needs of the deaf/blind population currently being served by Bureau of Education for the Handicapped programs, to identify the gaps in services available to them, and to determine the service needs (present and future) of rubella deaf/blind population; (4) specify the multiple resources required to meet the educational and rehabilitation services needed; and (5) provide a plan of multiple program options to achieve the needed services to meet the lifetime needs of the deaf/blind population. The Office of Special Education and the Rehabilitation Services Administration will utilize the findings from this project to recommend appropriate changes in programs being provided for deaf-blind youths and adults. It is intended that by matching the anticipated needs of the rubella population age group with the existing services available, gaps in the services available will be identified. There is currently limited information about the rubella population and the services available in the rehabilitation community for this group. This evaluation is necessary in order to institute program changes as soon as possible.

**CFDA NO.:** 84.126; 84.128
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Rehabilitation Act of 1973, as amended (P.L. 93-112, § 12(a); 29 U.S.C. 711).
**Availability:** Agency
**Geographic Relevance:** National; State

*Abstract:* The purpose of this evaluation is to design and implement a technical assistance program to promote systematic use of management information by State vocational rehabilitation (VR) agencies. These agencies will use management information data to support the processes of management policy and decision making, budgeting, program planning and development, and program operations through direct linkages with the VR units responsible for those functions. These goals will be accomplished by meeting the more specific objectives of developing additional capacity in the State agency to go beyond traditional reporting, particularly with regard to financial reporting based upon program change, and the capacity to respond, through development of relevant processes and projects, including revisions to information systems, to evaluation needs particular to the State agency. The project is expected to demonstrate that State agencies can effectively integrate management information into their evaluation and policy making and financial processes.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* In the United States, vocational rehabilitation as a public State and Federal program of services to disabled individuals is 61 years old in 1981. Services and the disabled population have changed over the years. About one-fourth of the clients rehabilitated annually are minorities. Some public and private authorities hold that more minority persons should be found in agencies' caseloads and that those minorities served do not receive quality services comparable to nonminority clients. This evaluation will compare the range of vocational rehabilitation services available, offered, and provided to all agency clients with a select group of clients; determine differences in service by race; determine the relation of agency management to client outcome; develop improved service techniques, and develop policy recommendations and a management plan. Information will be obtained from the RSA-300 data system and supplemented with data obtained through the formal survey of clients, counselors, and agency administrators. It is estimated that over 7,000 potential subjects will comprise the client sample in up to 20 States. Policy recommendations will be forthcoming from this extensive study. Those anticipated policies will be accompanied by a management plan for instituting them on a practical and timely basis.

### E01411-031

*Unanswered Questions on Educating Handicapped Children in Local Public Schools.* (HRD-81-43).
2/5/81; 102 pp. + 2 app. (20 pp.)
**OMB Funding Code/Title:** 91-0300-0-1-501 / Education for the Handicapped, Gifted and Talented
**Program:** Education for the Handicapped: Special Studies
**CFDA NO.:** 84.009
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Education of the Handicapped Act, as amended (P.L. 91-230, title VI, § 618; 20 U.S.C. 1418).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to assure compliance with the legislative requirement for making a free appropriate education available to all handicapped children. *Abstract:* The Education for Handicapped Children Act set a goal that, by September 1, 1978, all handicapped children would have available a free appropriate public education. The law requires an individualized education program (IEP) for each handicapped child. The goals probably will not be achieved until at least the mid-1980s. IEPs lacked required information or were late in preparation and many did not show needed services. The most cited reason for delays in providing services was a shortage of funds. Additional problems were: (1) insufficient staff at the State level; (2) delays by the Department in issuing regulations, providing guidance, and approving State plans; and (3) a lack of evaluations of the State's compliance. Congress should consider the problems of education agencies and should provide incentives to stimulate increased State and local funding or increased Federal funding or it should modify the Act's timetable or scope of coverage. The Secretary should require States' plans to document ability to meet commitments. The Secretary should evaluate States' compliance, should take actions needed to assure that States are effectively implementing the Act, and emphasize the importance of issuing regulations timely, reviewing State plans, and making monitoring visits.

*Child Care and Equal Opportunity for Women.*
6/81; 51 pp.
James A. Levine
**Contractor:** Wellesley College Center for Research on Women; Wellesley, MA 02181
**OMB Funding Code/Title:** 95-1900-0-1-751 / Salaries and Expenses
**Program:** Federal Program Evaluation
**Congressional Relevance:** *House* Committee on the Judiciary; *House* Committee on Ways and Means; *Senate* Committee on the Judiciary; *Senate* Committee on Finance. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** Civil Rights Act of 1957, as amended (P.L. 85-315, § 104(a)(3); 71 Stat. 635; 42 U.S.C. 1975c(a)(3)); 41 C.F.R. § 60.2; 29 C.F.R. § 1604. Social Security Act, as amended (P.L. 93-647, § 2; 88 Stat. 2337; 42 U.S.C. 1397).
**Availability:** Agency; GPO
**Geographic Relevance:** National; State

*Abstract:* The report scrutinizes systematically the relationship between Federal government's policies and programs applicable to child care and the Federal goal of equal opportunity for women. Federal programs examined encompass areas of social services, child development, taxation, employment and training, education, leave, affirmative action plans, and flexitime and part-time work for Federal employees. Some programs act as disincentives to women to progress at work by cutting off child care subsidies when families reach marginal income levels. Others do not take into account relative expense of child care to low income families as opposed to those of middle and upper incomes. Some programs aren't specifically for child care but could be so. Federal contractors do not have to take child care into account as a means of achieving affirmative action, although this is suggested by Revised Order #4. There is a need for choice in type of care and for greater availability. Laws against sex discrimination will not be effective until Federal policy and law address this issue comprehensively.

**Geographic Relevance:** National; State; City; County; School districts

*Abstract:* The report assesses the Department of Health, Education and Welfare (HEW) Office for Civil Rights (OCR) Title IX enforcement effort for the new Department of Education. It is based on questionnaire results, analysis of materials, and interviews provided by HEW staff and other Federal agency officials, and interested private groups' representatives. Among areas covered by the report are: OCR organization, staffing and training, data collection and analysis, complaint processing, compliance review, enforcement procedures, and technical assistance and public information. Recommendations are made covering these areas, following conclusions that OCR has been slow to issue important guidelines and process complaints.

**Availability:** Agency; GPO
**Geographic Relevance:** International/Foreign; National

*Abstract:* This report examines hiring and promotion of minorities and women at the Department of State in the Foreign Service and equivalent positions at the Agency for International Development and International Communication Agency. Although some progress has been made since 1970, much more effort needs to be devoted to recruitment and testing, as well as to providing opportunity for advancement for those already in the Foreign Service. Recommendations address the better implementation of affirmative action.

**Availability:** Agency; GPO

**Geographic Relevance:** National; Congressional District

*Abstract:* The study was conducted pursuant to a congressional request made during the Commission's authorization hearings in Fall, 1979. It analyzes the legal issues arising from the possible elimination of present exemption of Congress from Federal equal employment opportunity laws. It examines whether Congress may constitutionally choose to bring itself within the scope of Title VII of the 1964 Civil Rights Act which bans discrimination, based on race, color, religion, sex, and national origin, in employment. Included in the study are discussions of separation of powers doctrine, constitutional prerequisites to judicial and administrative enforcement, and present congressional employment practices. The Commission concludes the Constitution does not preclude enactment of an equal employment opportunity statute covering legislative branch employees and recommends a new provision in Title VII to do so. The Commission also believes principal staff involved in legislative policy formulation may need to be subject to additional rules. Also, defendants in any proceeding under recommended new provision would be an individual member of Congress or head of legislative unit having control over terms of employment.

**Availability:** Agency; GPO

**Geographic Relevance:** National

*Abstract:* The report evaluates the adequacy of Department of Labor's (DoL's) efforts (specifically, Bureau of Census as agent and Bureau of Labor Statistics) to comply with applicable sections of Public Law 94-311 mandating improvement and expansion of collection, analysis, and publication of unemployment data on Hispanics. Although the commission found DoL's awareness of need for this data and its publication of such statistics increased, it holds that DoL's efforts could be greatly improved. Recommendations include: more frequent publication by DoL of greater amounts of data on Hispanic unemployment, that DoL ensure that its units dealing with unemployment data are responsive to Hispanic unemployment in the United States, and that DoL take steps necessary to be informed about the need for this data from data users, such as those distributing Federal financial assistance under laws such as CETA and the Public Works and Economic Development Act, and the Hispanic community.

**Availability:** Agency; GAO

**Geographic Relevance:** National; State; County; Indian reservations

*Abstract:* This report is based on Commission hearings in Washington State, South Dakota, and Washington, DC, held in 1977-1979, as well as research conducted during that period. It examines roles of State, tribal, and Federal governments in some of the major conflicts between Indian tribes and non-Indians, such as fishing rights, reservation criminal law enforcement, and eastern land claims. Generally, the report concludes that the present system for protecting Indian rights has significant limitations, coherent mechanisms for determining and implementing Indian policy are lacking, and conflicts over Indian rights exacerbate pre-existing problems Indians face regarding denials of equal protection of laws. Recommendations address specifics of Federal and State enforcement of law as well as general issues such as tribal self-determination, mediation and conciliation in intergovernmental disputes, and cultural preservation.

*Abstract:* This report was mandated by the Congress in the Older Americans Amendments of 1975. It investigated unreasonable age discrimination in federally-assisted programs. Part I of the report contains findings and recommendations regarding the barriers public and private administrators have erected between needy elderly people and children and federally financed services, barriers that are discriminatory and adversely affect persons based on age. These barriers should be prohibited by law, exceptions being made only by Congress with concurrence of the President. Specifics related to various programs and implementation of The Age Discrimination Act of 1975 are contained in the recommendations. [Part II contains program descriptions and analyses and methodology.].

**Geographic Relevance:** National; State

*Abstract:* The report is an examination of the Department of Health, Education and Welfare's "Revise Criteria in Specifying the Ingredients of Acceptable Plans to Desegregate State Systems of Public Higher Education" and their potential to aid States in desegregating their systems of higher education. The purposes were: (1) to clarify the purpose of higher education desegregation; (2) to show the need for the Department of Education to vigorously enforce criteria; (3) to show how strengthened criteria would help States achieve unitary systems which are effective; and (4) to stress need for Federal desegregation policy to recognize the role of black public colleges, past and present. Also included in the report is a historical overview of higher education desegregation. The Adams cases are discussed, as they lead to issuance of the above-mentioned criteria covering States of Arkansas, Florida, Georgia, North Carolina, Oklahoma, and Virginia.

**Availability:** Agency; GPO
**Geographic Relevance:** National; City; County

*Abstract:* This report assesses activities of Federal agencies to ensure fair housing. It is more extensive than "To Provide. . .For Fair Housing," the 1974 report to which it is a sequel. The Commission concluded that progress in this area has been sporadic and isolated. There is no comprehensive or coordinated Federal strategy to secure fair housing. Title VIII is a weak law which Department of Housing and Urban Development (HUD) lacks even the power to enforce. The Federal agencies with equal housing responsibilities have not carried them out. The Government's appropriations in support of fair housing have been inadequate. Recommendations include: coordination of enforcement between HUD and other agencies, Congressional amendment of Title VIII granting cease and desist authority to HUD, and White House and Congressional action to provide HUD with a budget sufficient to vigorously enforce the drive to end housing discrimination.

**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Consumer Product Safety Act, as amended (P.L. 92-573; 86 Stat. 1207; 15 U.S.C. 2051 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the State contract program is to promote Federal-State cooperation to protect consumers from unreasonable risks of injuries and deaths associated with consumer products. *Abstract:* This report evaluated the 1979 State contract program conducted by Consumer Product Safety Commission (CPSC) in terms of State participation, performance, cost-effectiveness, contributions of the program to CPSC objectives, and potential program changes. The study found that if additional funds were available to support the program, State participation would increase; that in the compliance and enforcement areas, the States' efforts were legally sufficient; that the information and education program was considered excellent; that the program was very cost effective; that more consumers were warned about product related hazards and compliance with CPSC regulations has increased as a result of State activities; and that suggested changes were associated with increased funding and less rigid reporting requirements.

**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Consumer Product Safety Act, as amended (P.L. 92-573; 86 Stat. 1207; 15 U.S.C. 2051 et seq.). Federal Hazardous Substances Act (P.L. 86-613; 15 U.S.C. 2051 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the Fire/Thermal Burn Program is to protect consumers from fire related deaths and injuries associated with mattresses, carpets, and rugs while not placing unnecessary burdens upon industry. *Abstract:* A questionnaire was used to survey 85 manufacturers of mattresses, carpets, and rugs. The results indicated that the standards for mattresses increased the costs of labor and materials and that the testing and recordkeeping requirements were burdensome. The standards for carpets and rugs increased the costs of the materials and labor and caused industry to add quality control measures. Testing of the carpets and rugs seemed to pose a moderate burden, but industry did not appear to be heavily burdened by recordkeeping requirements. It must be noted that responses to the questionnaire, while representative, were few, and therefore it is impossible to determine if the survey characterizes industry as a whole.

*Evaluation of the Impact of the Communications Antenna Labeling Rule.*
12/80; 95 pp.
**Contractor:** Public Sector Research Market Group, Market Facts, Washington, DC; 1750 K Street NW, Suite 1240, Washington, DC 20006
**OMB Funding Code/Title:** 61-0100-0-1-554 / Salaries and Expenses
**Program:** Product Safety and Enforcement (Electrical Hazards)
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Consumer Product Safety Act, as amended (P.L. 92-573; 86 Stat. 1207; 15 U.S.C. 2051 et seq.). Federal Hazardous Substances Act (P.L. 86-613; 15 U.S.C. 2051 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the Communications Antenna Labeling Rule is to protect consumers from unreasonable risks of electrical shock injuries and deaths associated with outdoor television (TV) and citizen band (CB) radio base station antenna equipment. *Abstract:* This report, compiled from a survey of consumers, provided data concerning the nature of outdoor TV and CB base station antenna equipment currently installed at consumer residences, as well as patterns of installation and removal. The data serve as a foundation to guide future decisions regarding the regulation of outdoor communications antenna products. The report indicated that consumers do not recognize the potential for electrical shock death or injury associated with antenna installation and removal. It showed that consumers would be willing to pay $5 to $10 more for an antenna that would protect them from accidental electrical shock. However, despite the fact that most recent purchasers paid attention to the installation instructions, the hazard warnings did not seem to influence long term attitudes and beliefs of consumers related to installation safety.

## DISTRICT OF COLUMBIA

### E02200-001

*The Federal Payment to the District of Columbia: Experience Since Home Rule, Analysis of Proposals For Change.* (GGD-81-67).
4/23/81; 61 pp. + 3 app. (20 pp.)
**OMB Funding Code/Title:** 20-1700-0-1-852 / Federal Payment to the District of Columbia
**Program:** Payment to the District of Columbia General Fund
**Congressional Relevance:** *House* Committee on District of Columbia; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: District of Columbia Subcommittee; *Senate* Committee on Appropriations: District of Columbia Subcommittee.
**Authority:** District of Columbia Self-Government and Governmental Reorganization Act, as amended (P.L. 93-198, § 450; 40 U.S.C. 71).
**Availability:** GAO
**Geographic Relevance:** City; District of Columbia

*Program Objectives:* The purpose of the District of Columbia General Fund is to reimburse the District of Columbia for costs incurred because of the Federal Government's presence in the City. *Abstract:* The issues associated with a Federal formula payment would be easier to resolve if: (1) there were an explicit effort to establish service goals for the District's population and service groups in an inflationary environment; (2) the informative content and reliability of budget information provided by the District government to the City Council, the public, and Congress were improved; and (3) the District government demonstrated improvements in program and financial management. GAO recommended that the Mayor comply with the Self-Government Act provisions by presenting consistent budget information for the current year and 3 years before and 4 years after the current year; present meaningful comparisons of past trends and assumptions about the future; and specifically show the relationship between each year's appropriations, actual obligations, and actual revenue and cash position.

### E02200-002

*Improved Collections Can Reduce Federal and District Government Food Stamp Program Costs.* (GGD-81-31).
4/3/81; 30 pp. + 2 app. (11 pp.)
**OMB Funding Code/Title:** 20-1700-0-1-852 / Federal Payment to the District of Columbia
**Program:** Payment to the District of Columbia General Fund
**Congressional Relevance:** *House* Committee on District of Columbia; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: District of Columbia Subcommittee; *Senate* Committee on Appropriations: District of Columbia Subcommittee.
**Authority:** District of Columbia Self-Government and Governmental Reorganization Act, as amended (P.L. 93-198, § 450; 40 U.S.C. 71). Food Stamp Act of 1964, as amended (P.L. 88-525, § 2; 78 Stat. 703; 7 U.S.C. 2011 et seq.).
**Availability:** GAO
**Geographic Relevance:** District of Columbia

*Abstract:* This report discusses the problems encountered by the District of Columbia Government in collecting amounts due from food stamp recipients because of overissuances and from vendors because of their inability to account for food stamps. The District has collected a minimal amount due from food stamp vendors and recipients. Inadequate collection efforts, lack of systems for identifying improper issuances and for monitoring collection efforts, and poor controls over recipient participation cards contributed to the problem. As a result, District and Department of Agriculture costs were unnecessarily increased. The District was not claiming all reimbursable costs incurred in administering the program. The District has not identified and attempted to collect overissuances resulting from duplicate redemptions or from redemptions of expired, altered, and unsigned participation cards. The District's participation card system does not provide control over the cards to prevent unauthorized use. Transaction cards which have been returned by vendors were improperly filed and stored without adequate physical control to prevent reintroducing the cards into the system. The report contains recommendations to improve collections of amounts owed to the District. The District's Department of Human Services generally agreed with the recommendations and indicated the corrective actions planned or taken.

### E02200-003

*Action Needed To Bring Minority Business Awards into Compliance with 1980 Amendment.* (GGD-81-38).
12/31/80; 3 pp.
**OMB Funding Code/Title:** 20-1700-0-1-852 / Federal Payment to the District of Columbia
**Program:** Payment to the District of Columbia General Fund
**Congressional Relevance:** *House* Committee on District of Columbia; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: District of Columbia Subcommittee; *Senate* Committee on Appropriations: District of Columbia Subcommittee.
**Authority:** District of Columbia Self-Government and Governmental Reorganization Act, as amended (P.L. 93-198, § 450; 31 U.S.C. 61). District of Columbia Law 1-95.
**Availability:** GAO
**Geographic Relevance:** District of Columbia

*Program Objectives:* The District of Columbia's (D.C.'s) Minority Contracting Program, established in 1977, is designed to expose qualified minority firms to increased business opportunities and to aid them in overcoming barriers in their attainment of professional and financial independence. *Abstract:* The D.C. Minority Contracting Act was amended in 1980 to strengthen the minority business program in the District. One of the provisions of the amendments was that a minority business awarded a contract must perform at least 50% of the contracted work (excluding the cost of materials, goods, and supplies) with its own organization and resources, and that, if subcontracting occurred, 50% of that effort would be performed by a certified minority business enterprise. This would limit awards to minority businesses who merely serve as middlemen. Contracts now in effect in the District did not take the new amendments into consideration. Pertinent contracting officers had not been informed of the new regulations until brought to their attention. GAO recommended that the Director of the Department of General Services should take prompt action to provide guidance implementing the new provision of the Act and to bring all future awards, including those in process, into compliance with District law.

### E02200-004

*Review of the District of Columbia's Automatic Data Processing Operations.* (GGD-80-103).
9/9/80; 4 pp.
**OMB Funding Code/Title:** 21-1700-0-1-852 / Federal Payment to the District of Columbia
**Program:** Payment to the District of Columbia General Fund
**Congressional Relevance:** *House* Committee on District of Columbia; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: District of Columbia Subcommittee; *Senate* Committee on Appropriations: District of Columbia Subcommittee.
**Authority:** District of Columbia Self-Government and Governmental Reorganization Act, as amended (P.L. 93-198, § 450; 40 U.S.C. 71).
**Availability:** GAO
**Geographic Relevance:** District of Columbia

*Abstract:* GAO reviewed the District of Columbia's data processing personnel and training processes as a part of its effort to assess the overall effectiveness of the District's management of its automatic data processing resources and to recommend improvements. The report discusses the problem the District was experiencing attracting and retaining employees and keeping them abreast of the ever-changing technology of data processing. The District of Columbia does not have formal career development programs and training programs for automatic data processing personnel. In the agencies which GAO visited, there were no formal data processing career development programs to identify and define computer personnel positions and salaries, specific skills and knowledge needed at each stage of the career ladder, alternate career paths available for each type of data processing personnel, and the types of training and experience required for career advancement. The lack of formal career development programs has limited the agencies' ability to attract and retain highly qualified individuals.

**Availability:** GAO
**Geographic Relevance:** National; State; City; Congressional District

*Program Objectives:* The Safe Drinking Water Act was passed in 1974 to safeguard drinking water supplies and to protect the public health. The Act directed the Environmental Protection Agency (EPA) to establish national drinking water regulations which set priority standards for drinking water. It also authorized EPA to grant States primary responsibility, or primacy, for enforcing the regulations and standards. *Abstract:* Millions of dollars in savings and improved program operations would result from implementing the GAO recommendations on the water pollution control and hazardous and solid waste program. The recommendations that would produce the most substantial savings affect the water pollution control program and would require changes to the Clean Water Act. In view of the continuing emphasis on reducing the budget deficit, controlling inflation, and improving the benefits from Federal expenditures, Congress needs to give strong consideration to the recommendations. Congress should amend the Clean Water Act to: (1) eliminate the mandatory requirement for secondary treatment of discharges to fresh water and to permit the EPA Administrator to grant waivers, deferrals, or modifications to this requirement when the dischargers can demonstrate that the environmental impact of secondary treatment will be minimal or insignificant; (2) permit exception from the national goal of swimmable waters to recognize those situations in which waters are determined to be unswimmable because of other factors, such as heavy barge traffic, cold seasons of the year, and general appearance; (3) allow for increased flexibility in meeting water quality goals in those cases where it is determined that the cost to achieve such goals is prohibitive; (4) allow EPA to fund lower cost, nonstuctural, or limited structural techniques that cannot be funded under current legislation and that are not normally considered operating and maintenance costs; and (5) permit Federal funding of flood projects when the flooding is caused by combined sewer systems and the solution is part of a total approach designed to minimize both pollution and flooding in the combined system. In addition, Congress should consider several alternatives that would give EPA the flexibility to consider costs more closely in justifying advanced waste treatment projects.

**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* Congress intended that the Environmental Protection Agency (EPA) and the States should act in partnership to implement federally mandated environmental programs. Generally, the States have implemented these programs, enacted enabling legislation, and provided part of the funding. However, the States believe many obstacles impede their implementation and are beginning to consider these obstacles when deciding whether to assume more program responsibilities. According to State environmental officials, late issuance of regulations has resulted in erratic, confused, and slow implementation of State programs. Lack of flexibility to adapt State programs or unique characteristics to national regulations has wasted State resources, stifled initiative, and unnecessarily increased costs for environmental control. Other more subtle EPA control mechanisms which State officials believe also impede program implementation included detailed grant conditions and mandatory policy guidance. The root cause of staffing problems across all environmental programs was low State salaries. Consistently late annual program grants resulted in termination or threatened termination of State employees or delays in filling badly needed positions. Moreover, paperwork requirements taxed already limited staff by diverting employees from program operations. Poor communication has strained the EPA-State relationship. Because a majority of the State officials believed that the EPA headquarters staff did not understand the obstacles States face in implementing EPA directives, hostility permeated much of the relationship between the States and EPA.

However, States generally had good relationships with EPA regional staffs. The EPA Administrator should establish, as a high priority and in conjunction with State representatives, a formal program to improve the EPA-State partnership. This should include establishing procedures to ensure that early State agency inputs is solicited before any action is taken having a direct bearing on State program implementation and establishing joint EPA-State committees for each program to review its various aspects, identify implementation problems, and advise the EPA Administrator.

**Availability:** Agency
**Geographic Relevance:** National; State; City; County

*Program Objectives:* The objective of the program is to ensure that sources comply continuously with applicable limits on air pollution emissions. *Abstract:* The report reviews data for 119 sources on the causes of excess emissions of air pollution. It analyzes this data by source size, source type, control device type, and control device size in order to suggest areas where further work in developing better control procedures should focus. While rankings are tentative because of a small sample size, the results suggest a need to focus attention on certain industrial categories and on very large pollution sources and controls.

**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Water Pollution Control Act, as amended (P.L. 80-845, title I, § 104, as amended by; P.L. 95-217; 33 U.S.C. 1254).
**Availability:** NTIS
**Geographic Relevance:** National; State; City; County

*Abstract:* The report provides both a broad picture on a national basis and a detailed picture on a specific geographic basis of the effect of pollution on the Nation's estuaries. It examines the effect of such specific potential pollutants as sedimentation, exploitation of mineral resources, and industrial development. The first several sections of the report discuss the geomorphology and physical chemistry of estuaries and the effect that various forms of pollution can have on estuarine systems. The next sections of the report examine in detail the effect that specific pollutants have had on four separate estuarine ecosystems. The final sections provide recommendations for future actions.

**Availability:** GAO
**Geographic Relevance:** National; State; City; County

*Abstract:* Wastewater treatment plants are considered to be the frontline of the Nation's battle to eliminate water pollution and restore water quality to the thousands of miles of contaminated rivers, lakes, streams, and ocean shorelines throughout the country. GAO found that over $25 billion in Federal funds and several billion in State and local moneys have been spent to construct new wastewater treatment plants or to significantly modify existing plants. The Environmental Protection Agency (EPA) estimates that through the year 2000 an additional $35.6 billion in Federal funds alone will be needed to construct additional treatment plants. GAO found that many of the plants, in operation for several years, have seldom or never met the performance standards they were designed to achieve. Failure of treatment plants to meet performance expectations may not only have an adverse impact on the Nation's ability to meet its clean water goals, but may also represent the potential waste of tens of millions of dollars in Federal, State, and local moneys. Congress should require the Administrator of EPA to: (1) report to Congress annually on the number of both major and minor municipal wastewater treatment plants that already have received Federal grant funding to meet the 1977 secondary treatment requirements but are in serious violation of their permit conditions; (2) report to Congress annually on what is being proposed and done to ensure that the necessary repairs to the facilities will be made; and (3) advise Congress annually of the progress being made to repair the identified facilities and who is being held financially accountable/responsible for making repairs. In view of the billions of dollars yet to be spent for wastewater treatment plants, Congress should require the Administrator of EPA to test various alternatives to the current construction grants funding program.

**Program:** Waste Treatment Works Construction
**CFDA NO.:** 66.418
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Water Pollution Control Act, as amended (P.L. 92-500, § 2, as amended by; P.L. 95-217; 86 Stat. 816; 33 U.S.C. 1251, 1281).
**Availability:** GAO
**Geographic Relevance:** National; State; City; Coastal Communities

*Abstract:* The Clean Water Act limited some communities from requesting waivers by providing a prohibitive time limit for initiating such requests. It also provided that communities without existing marine outfalls were ineligible for the waivers. The Environmental Protection Agency (EPA) restricted the issuance of waivers through complex waiver regulations and extensive information requirements. The costs involved in submitting a completed application for waiver were excessive. In addition, Federal funding was not provided for waiver studies. The scientists that GAO consulted believed that the standardized application and review process which EPA uses for all communities, irrespective of size and type of discharge, is not well suited to the waiver provision. A stratified approach was suggested which would take size and type of discharge into consideration. This would focus more attention on dischargers that have the most potential to harm the environment while allowing others to receive the waivers promptly. Immediate action by EPA and Congress would save billions of dollars in unnecessary expenditures. Congress should amend the Clean Water Act of 1977 to allow for a continuous secondary discharge waiver process for all coastal communities where the communities have shown that the risk of all environmental damage is minimal.

**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XIV, § 1411, 1421, 1441, as amended by; P.L. 93-523; 42 U.S.C. 300g, 300h, 300j).
**Availability:** GAO
**Geographic Relevance:** State; City; County

*Program Objectives:* The Safe Drinking Water Act was passed in 1974 to safeguard public drinking water supplies and to protect the public health. The Act directed the Environmental Protection Agency (EPA) to establish national drinking water regulations which set purity standards for drinking water. It also authorized EPA to grant States primary responsibility, or primacy, for enforcing the regulations and standards. *Abstract:* A comparison of resources available for program implementation and operation in primacy States versus nonprimacy States revealed a significant disparity. This disparity raised questions about equity and whether people living in nonprimacy States were as well protected as those living in primacy States. Another indication that EPA may not have sufficient resources available for nonprimacy state program activities was the disparity between the resources EPA has spent and those resources nonprimacy States estimate are needed to effectively implement a drinking water program. In a prior report GAO stated that, in nonprimacy States, the coverage by EPA may be severely limited as a result of resource constraints and may not meet the same standards that EPA requires for primacy States. It is the opinion of GAO that the Act does not clearly authorize EPA to carry out the day-to-day operations of a drinking water program in States unwilling or unable to assume primacy. Rather, the EPA rule under the act should be one of supervision, oversight, and encouragement of States to assume primacy. EPA feels that the act authorized and requires it to establish such programs in nonprimacy States. Because of conflicting regulations, GAO was unable to definitely state that the EPA assumption is unwarranted or legally objectionable. The House Committee on Energy and Commerce and the Senate Committee on Environment and Public Works should consider proposing amendments to the Act that would clarify EPA authority.

*Many Water Quality Standard Violations May Not Be Significant Enough To Justify Costly Preventive Actions.* (CED-80-86).
7/2/80; 74 pp. + 2 app. (4 pp.)
**OMB Funding Code/Title:** 68-0103-0-1-304 / Construction Grants
**Program:** Waste Treatment Works Construction
**CFDA NO.:** 66.418
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Water Pollution Control Act, as amended (P.L. 92-500, § 2; 33 U.S.C. 1158).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The Environmental Protection Agency (EPA) administers a Construction Grants Program under the Water Pollution Control Act to restore and maintain the quality of the Nation's waters. Each State has developed water quality standards to protect its waterways and their uses. The standards help determine the type of wastewater treatment needed to protect waters for those uses. *Abstract:* In many instances, municipalities are constructing treatment facilities which are more sophisticated than necessary to prevent predicted water quality standard violations. An agency analysis of nine projects did not show the significance of the projects' advanced treatment portion to the environment, effect on public health, significance of the advanced waste treatment portion on established waterway uses, or social significance or benefits of the projects. GAO found that the water quality standard setting process is questionable, modeling to determine violations is often imprecise and inexact, Federal funding is insufficient to achieve water quality standards for all waterways within a reasonable period of time, obtaining downward reclassification from EPA is very difficult, and relating the impact of various treatment levels on water uses is difficult. GAO believes that advanced waste treatment, with few exceptions, may not be justified at this time. GAO concludes that funding of advanced waste treatment projects should be curtailed. Federal funds should not be spent to provide a level of treatment that produces such uncertain results. These factors affect billions of dollars that have been or will be spent under the EPA Construction Grants Program. The standard setting process places too much emphasis on preventing all types of water quality standard violations rather than just significant violations.

**E02303-008**
*EPA Needs To Improve the Navajo Indian Safe Drinking Water Program.* (CED-80-124).
9/10/80; 52 pp. + 8 app. (41 pp.)
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training
**CFDA NO.:** 66.425
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Public Health Service Act, as amended (P.L. 78-410, title XIV, § 1411, 1421, 1441, as amended by; P.L. 93-523; 42 U.S.C. 300g, 300h, 300j)
**Availability:** GAO
**Geographic Relevance:** State; Congressional District

*Abstract:* Because there is no overall plan or supervision by the Environmental Protection Agency (EPA), confusion and misunderstandings have resulted over the roles and responsibilities of water suppliers and organizations in carrying out the Navajo Indian safe drinking water program. Poor records and inconsistent or nonexistent identification systems make it difficult to inventory and locate water sources. Few water suppliers maintain records and make reports as required by EPA. Consequently, EPA has little assurance that required activities, such as periodic sampling and analysis, customer notification of violations, and corrective action on violations, are performed and that drinking water standards are met. Reservation sampling procedures have not been standardized and actual procedures used are often inconsistent with those recommended by authoritative sources. In addition, some large variances were found in analyses between and within laboratories that analyzed GAO samples. GAO found levels of radionuclide contamination in some wells to be in excess of allowable EPA levels. The Administrator, EPA, should direct region IX to: (1) develop a drinking water program plan for the Navajo Reservation which clearly identifies the roles and responsibilities of each organization involved in water supply activities, includes provisions for developing an accurate water supply inventory, and is developed in cooperation with Navajo Tribal Reservation officials; (2) develop a followup system for the Navajo Reservation to insure that the water suppliers comply with the recordkeeping, sampling, reporting, consumer notification, and corrective action requirements; (3) develop and mandate the use of standardized field sampling procedures for the reservation, taking into consideration the unique reservation circumstances, such as long transportation times; and (4) establish minimum training standards for reservation water sampling technicians and support such standards with training programs, materials, and technical assistance.

## OFFICE OF THE ASSISTANT ADMINISTRATOR FOR AIR, NOISE AND RADIATION

### E02304-001

*Evaluation of an Operational Inspection-Maintenance Program for Motor Vehicles: Portland, Oregon.*
1982
**Contractor:** Hamiltion Test Systems, Inc.; Windsor Locks, CT 06096
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance, and Training (Air Quality)
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Clean Air Act, as amended (P.L. 84-159, title I, § 113, as amended by; P.L. 95-95; 42 U.S.C. 7413).
**Availability:** Agency
**Geographic Relevance:** National; City; County; Standard Metro. Stat. Area (SMSA)

*Abstract:* The purpose of the evaluation is to determine what reductions in emissions from in-use motor vehicles can be achieved through periodic inspection and maintenance. Test results show motor vehicle inspection-maintenance programs to be effective and efficient means of identifying high-polluting vehicles. Vehicles failing inspection and undergoing subsequent maintenance appear to achieve reduction in emissions of hydrocarbons and carbon monoxide of between 40% and 50%. Fuel economy benefits are possible with proper training.

**Agency Contact:** Office of the Assistant Administrator for Air, Noise and Radiation. (FTS)8-374-8324.

### E02304-002

*Indoor Air Pollution: An Emerging Health Problem.* (CED-80-111).
9/24/80; 24 pp. + 3 app. (10 pp.)
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Clean Air Act, as amended (P.L. 84-159, title I, § 103, 110; 42 U.S.C. 7403, 7410). Clean Air Act Amendments of 1977 (P.L. 95-95, title III, § 327; 91 Stat. 685; 42 U.S.C. 7626). Toxic Substances Control Act (P.L. 94-469, § 29; 15 U.S.C. 2628).
**Availability:** Ohter GAO
**Geographic Relevance:** National; State; City; County

*Abstract:* While Government and industry have concentrated on cleaning up the Nation's outdoor air, they have paid little attention to the quality of indoor air in the nonworkplace. Harmful pollutants have been found in various indoor environments in greater concentrations than in the surrounding outdoor air. In some cases, indoor pollution exceeds the national standards set for exposure outdoors. Some measures intended to reduce energy use in buildings contribute to the buildup of indoor air pollution. While Federal officials agree that indoor air pollution poses a potentially serious health problem, they have been reluctant to study it because they lack a clear responsibility for doing so. Agencies also find themselves assuming adversarial roles when assessing Federal actions on indoor air quality. Environmentalists and those concerned with energy conservation disagree about programs. There are low-cost ways to minimize indoor air pollution, including proper ventilation and use of ventilating equipment and filtering devices. A massive new Federal program is not necessary now, but the Environmental Protection Agency (EPA) could develop a comprehensive, coordinated program using existing resources in both the public and private sectors. Congress should amend the Clean Air Act to provide EPA with the authority and responsibility for the quality of air in the nonworkplace. The administrator of EPA should establish a task force which will identify research activities of other Federal agencies and private institutions relating to indoor air pollution so that the EPA activities can be coordinated with them. It should compile available data on indoor air pollution and use this data to inform the public and other governmental organizations of the problem and available actions. The taskforce should provide advice to the Administrator on what EPA research and development efforts are needed to deal with the indoor air pollution problem.

**Agency Contact:** General Accounting Office (202) 755-9100.

## OFFICE OF THE ASSISTANT ADMINISTRATOR FOR RESEARCH AND DEVELOPMENT

### E02305-001

*Promising Changes Improve EPA's Extramural Research: More Changes Needed.* (CED-81-6).
10/28/80; 72 pp. + 3 app. (15 pp.)
**OMB Funding Code/Title:** 68-0107-0-1-304 / Research and Development
**Program:** Research and Development
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 5 U.S.C. App.); Reorganization Plan 3 of 1970.
**Availability:** GAO

*Abstract:* The Environmental Protection Agency (EPA) has made a number of changes to the planning and management of its research activities. If properly implemented, they should improve the EPA research program. GAO discussed some problems which require further attention and factors and weaknesses, which, unless corrected, could continue to seriously hamper the EPA ability to meet its research needs. GAO found that: (1) the offices responsible for implementing EPA programs do not always participate with its research office in determining the size and scope of projects, possibly resulting in research that does not meet EPA program office needs; (2) the EPA research office has not yet fully implemented review of its research programs, projects, and results by experts inside and outside of EPA to determine their scientific and technical merit and validity; (3) project offices could not adequately monitor researchers' technical progress in conducting projects outside of EPA because of heavy workloads and travel limitations; (4) contracts generally take substantially longer to award than EPA standard acquisition leadtimes, thereby unduly delaying the start of needed research; and (5) EPA lacks information on past performances of outside researchers. The EPA Administrator should have the Assistant Administrator for Research and Development: (1) establish procedures that require regulatory offices and laboratories to agree, before work is started, that the approach and timing of research projects are reasonable to meet intended needs; (2) require research committees to obtain peer review of their multiyear strategies; (3) seek sufficient appropriations for project officers to make necessary site visits to observe extramural research and instruct laboratory directors to make sure that such visits receive high priority in the use of available travel funds; and (4) train project officers to properly contract with extramural researchers and require them to complete technical evaluations of contract proposals within established timeframes.

**Agency Contact:** General Accounting Office (202) 755-9100.

## *OFFICE OF THE ASSISTANT ADMINISTRATOR FOR PESTICIDES AND TOXIC SUBSTANCES*

**E02306-001**
*Premanufacture Notification Process Paperflow Study.*
12/10/80; 160 pp.
Mary K. Vavasour
**Contractor:** American Management Systems, Inc.
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training (Toxic Substances)
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committtee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Toxic Substances Control Act (P.L. 94-469, § 5; 90 Stat. 2012; 15 U.S.C. 2604).
**Availability:** Not Publicly Available (Internal Use Only)

*Program Objectives:* Under section 5 of the Toxic Substances Control Act (TSCA), a manufacturer of a new chemical substance is to submit notice 90 days prior to commencement of manufacture of a new chemical substance under TSCA. The premanufacturing notification (PMN) process is a process in which these PMN notices are evaluated by the agency. *Abstract:* The Paperflow Study evaluated paperwork and information flow related to the Office of Toxic Substances PMN review process. The study developed a comprehensive set of recommendations to improve the efficiency and cost-effectiveness of the process.

**Agency Contact:** Office of the Assistant Administrator for Pesticides and Toxic Substances. (202) 755-0920.

**E02306-002**
*Evaluation of Project Manager Mode of Operation for Accelerated Standards.*
9/80; 24 pp.
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training (Pesticides)
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Insecticide, Fungicide, and Rodenticide Act, as amended (P.L. 80-104, § 2, as amended by; P.L. 92-516, § 2; 7 U.S.C. 136).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* Office of Pesticide Programs (OPP) conducted the study to learn about the strengths and weaknesses of the project manager mode of operation in the accelerated standards development for use in the design of future OPP projects. OPP was looking for pitfalls and ways to overcome them in establishing and conducting future projects. Principles of practice need to be developed to provide adequate criteria for selection of project managers, staff operating procedures, etc. According to interim report findings, participants were positive in their impressions of the impact of employing the fast track mode of developing standards. Recommendations were that project managers should provide clear guidance to team members and hold meetings with other project managers to better coordinate work activities and that the Policy Committee for Registration Standards should continue to meet and provide guidance to the project managers.

**Agency Contact:** Office of the Assistant Administrator for Pesticides and Toxic Substances. (703) 557-5720.

**E02306-003**
*EPA Is Slow To Carry Out Its Responsibility To Control Harmful Chemicals.* (CED-81-1).
10/28/80; 46 pp. + 3 app. (7 pp.)
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Toxic Substances Control Act, as amended (P.L. 94-469, § 6; 90 Stat. 2020; 15 U.S.C. 2605).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO made a review to determine the problems the Environmental Protection Agency (EPA) has faced in implementing the Toxic Substances Control Act and the corrective actions which have been or are being taken. The Act gave EPA broad new authority to control chemicals which present an unreasonable risk to health and environment. Almost 4 years after the enactment of the Act, neither the public nor the environment are much better protected. EPA was not prepared to fulfill its new responsibilities when the law was enacted, and the program has had development and staffing problems. The program lacks an articulated plan of action, an effective organizational sturcture, and formal strategy. EPA has recognized the need for changes and has taken action. It agreed on a basic framework for guiding program activities and proposed a major reorganization which would consolidate responsibility for the program under one deputy assistant administrator. EPA progress has been slow in gatering information about the chemicals now in commercial use, identifying those which are harmful, and controlling those which present an unreasonable risk. EPA needs a system to set priorities for chemicals so that those presenting the greatest risk are evaluated first. EPA has not yet developed the operational criteria to identify and control chemicals which may cause cancer, gene mutations, or birth defects. EPA has not required the testing of any of the 38 chemicals recommended thus far and has not issued any final testing standards. Premanufacture notice to EPA for new chemicals is mandatory under the Act. Operating under interim policy guidance, many manufacturers are not submitting the data needed to effectively assess a chemical's risk. The Administrator of EPA should resume work on projects to develop a strategy to obtain needed information on new chemicals, using all of the Act's authorities, and establish evaluation criteria for each decision point in the premanufacture notice review process.

**Agency Contact:** General Accounting Office (202) 755-9100.

**E02306-004**
*Need for Comprehensive Pesticide Use Data.* (CED-80-145).
9/30/80; 12 pp.
**OMB Funding Code/Title:** 68-0107-0-1-304 / Research and Development
**Program:** Research and Development
**Congressional Relevance:** *House* Committee on Science and Technology; *House* Committee on Agriculture; *Senate* Committee on Environment and Public Works; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Insecticide, Fungicide and Rodenticide Act, as amended (P.L. 80-104, § 20, as amended by; P.L. 95-396; 7 U.S.C. 136r). Federal Environmental Pesticide Control Act of 1972 (P.L. 92-516, § 2; 86 Stat. 973; 7 U.S.C. 136r).

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Environmental Protection Agency (EPA) needs to have accurate and comprehensive information on pesticide usage to assess a pesticide's potential risks and benefits to humans and the environment and to improve the overall management of its pesticide programs. GAO examined sources of pesticide usage information at EPA, other Federal and State agencies, and private organizations. EPA does not have comprehensive information on where and in what quantities pesticides are used. Its current pesticide usage information is not sufficiently comprehensive or accurate to be used in risk/benefit analyses or for establishing priorities for major pesticide regulatory programs. Requiring pesticide producers to provide estimates of pesticide use data would give EPA much more comprehensive information upon which to base pesticide program decisions, when such information is used in combination with other sources of pesticide use information. The Administrator, EPA, should direct pesticide program officials to obtain comprehensive pesticide use data. The Administrator should also direct enforcement officials to work with pesticide program officials to modify current reporting requirements under section 7 of the Federal Insecticide, Fungicide and Rodenticide Act to require pesticide producers to submit data on pesticide usage. Further, EPA should develop collection methods and scope of producer reporting requirements in cooperation with the pesticide industry and assure the industry of safeguards to protect confidential information from public disclosure.

**Agency Contact:** General Accounting Office (202) 755-9100.

## *OFFICE OF THE ASSISTANT ADMINISTRATOR FOR SOLID WASTE AND EMERGENCY RESPONSE*

**E02307-001**
*A Review of Key Aspects of the RCRA "Interim Status" Program.*
In process
**Contractor:** Performance Development Institute; 600 Maryland Avenue SW, Washington, DC 20024
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training (Solid Waste)
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Solid Waste Disposal Act, as amended (P.L. 89-272, title II, § 1002, as amended by; P.L. 94-580; 42 U.S.C. 6901 et seq.).
**Availability:** Agency
**Geographic Relevance:** National; State

*Program Objectives:* The objective is to ensure effective operation of the Resource Conservation and Recovery Act Program while in the "Interim Status" mode. *Abstract:* The review seeks to find how well the interim status program is operating by determining: the impact of the manifest system to what extent is it actually being used; and the level of compliance with interim status standards, factors contributing to noncompliance, and the degree of enforceability of interim status given any such problems.

**Agency Contact:** Office of the Assistant Administrator for Solid Waste and Emergency Response. (202) 755-9157.

**E02307-002**
*Evaluation of President's Urban Policy Program.*
3/80; 8/80; 8/82; 2 vols./113 pp.
**Contractor:** Mitre Corp.; Boston, MA
**OMB Funding Code/Title:** 68-0108-0-1-304 / Abatement, Control, and Compliance
**Program:** Standards Setting, Planning, Assistance and Training (Solid Waste)
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Solid Waste Disposal Act, as amended (P.L. 89-272, title II, § 1002, as amended by; P.L. 94-580; 42 U.S.C. 6901 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The evaluation seeks to: assess costs and benefits of the program and establish the impact of government grant funds in implementing resource recovery facilities, provide information for future effectiveness of similar programs, and evaluate the grantee selection process and determine its effectiveness in meeting program objectives. The preliminary report-grant has meant a more thorough study of alternatives available in technology, markets and sites, waste stream analyses, environmental impact, and public participation. The management model was shown to be an effective project management tool. Urban grant workshops were useful for guidance and peer contacts as well as enhanced understanding of resources recovery. Eighty-nine percent showed measurable progress since the workshops.

**Agency Contact:** Office of the Assistant Administrator for Solid Waste and Emergency Response. (202) 755-9140.

**Authority:** Solid Waste Disposal Act, as amended (P.L. 89-272, title II, § 2006(c); 42 U.S.C. 6916). Resource Conservation and Recovery Act of 1976 (P.L. 94-580; 90 Stat. 2806; 42 U.S.C. 6921 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO was asked to study alternative methods of disposal and cleanup of hazardous wastes. Specifically, the study looked into the: (1) environmental and cost effectiveness of hazardous waste disposal on the land, by deep well injection, and by high temperature incineration and the need for additional research and development in these areas; (2) establishment of facilities on a regional or areawide basis as opposed to an individual company basis; and (3) hazardous waste regulations recently promulgated by the Environmental Protection Agency (EPA). For the long-term interests of the country, the on-the-land disposal method needs to be drastically reduced. There was little evidence of any environmental problem resulting from the deep well disposal of hazardous wastes. However, the method should be applied only in geologically selective areas below aquifers where the wastes cannot migrate and pollute surface or ground water and reclaimable minerals. Burning of hazardous wastes in incinerators, at temperatures generally over 1,000 degrees centigrade with a specific retention period in the incinerator, may be one solution to the hazardous waste disposal problem. However, the process has had only limited application because few facilities have been built and the cost is estimated at about three times the cost of deep well injection. For land disposal, deep well injection, and high temperature incineration, research on how to develop facilities has been essentially completed. However, additional research on specific substances and site locations will continue to be needed for the long term. Disposal facilities providing services on a regional basis offer economic and environmental advantage. To date, the national problem of what to do about closed and abandoned hazardous waste sites has not been fully confronted. More time will be needed before the hazardous waste regulations are fully promulgated and implemented.

**Program:** Standards Setting, Planning, Assistance and Training
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Solid Waste Disposal Act, as amended (P.L. 89-272, title II, § 2006(c); 42 U.S.C. 6916). Resource Conservation and Recovery Act of 1976 (P.L. 94-580; 90 Stat. 2806; 42 U.S.C. 6921 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Environmental Protection Agency (EPA) has had difficulty in fulfilling its mandate because: (1) site investigation and evaluation activities lag behind an ever-increasing number of potential sites requiring investigation and evaluation; (2) the capabilities to identify and analyze hazardous waste and to understand the real or potential risk are limited by both cost and scientific knowledge; and (3) Federal enforcement efforts have been limited both by the resources available to demonstrate potential harm in a case and by the need to identify potentially viable defendants to pay for remedial measures or cleanup costs. The Administrator, EPA, should provide an estimate of the total EPA resources needed to investigate and evaluate potential hazardous waste sites and of the amount of resources needed to clean up and respond to hazardous waste sites. The Administrator should also assess how the Federal Government can expand its enforcement efforts at uncontrolled hazardous waste sites. If additional resources or increased legislative authority are among the alternatives, the Administrator should provide such information to Congress for its consideration. The Administrator should also direct the Assistant Administrator for Research and Development to evaluate ongoing EPA hazardous waste research programs in the biological testing, health effects, and transport areas.

**Program:** Executive Direction, Staff and Administrative Support
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 5 U.S.C. App.); Reorganization Plan 3 of 1970.
**Availability:** Agency

*Abstract:* The purpose was to assess a new cradle-to-grave management mode of operations as well as identify potential areas for improvement in this style of management and determine causes of some morale problems. Findings were that the new cradle-to-grave philosophy works well and provides better for accountability and tracking, and that certain tasks can be shifted to clerical and paraprofessionals away from grant specialists. The morale problem was related to these clerical tasks and unevenness of workload.

## EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

### E02400-001

*Implementation of Affirmative Action Planning.* (FPCD-81-25).
12/30/80; 4 pp. + app. (16 pp.)
**OMB Funding Code/Title:** 45-0100-0-1-751 / Salaries and Expenses
**Program:** Policy and Executive Direction
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Civil Rights Act of 1964, as amended (P.L. 88-352, title VII, § 705; 78 Stat. 241; 42 U.S.C. 2000e-4). Equal Employment Opportunity Act of 1972 (P.L. 92-261; 86 Stat. 103; 42 U.S.C. 2000e).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose of Affirmative Action Plans is to enhance equal employment opportunity in the Federal sector. *Abstract:* GAO: (1) reviewed the status of the Equal Employment Opportunity Commission's implementation of its instructions for preparing Federal affirmative action plans; (2) contacted selected agencies and obtained views on the instructions from officials responsible for preparing affirmative action plans; and (3) obtained information on the Commission's plans for monitoring Federal agencies' compliance. While most Federal agencies submitted affirmative action plans to the Commission during Fiscal Year 1980, few met the required reporting date. As of October 9, 1980, 11 agencies and 5 major operating components had not submitted affirmative action plans. Agency officials noted the following problems: (1) the lead time allowed by the Commission for developing and submitting an affirmative action plan was not adequate; (2) the organizational level for which plans should be developed did not necessarily correspond to agency lines of authority; (3) more training on preparing and implementing affirmative action plans was needed; (4) the hiring goals that resulted from the Commission's required methodology for computing goals were not realistic; and (5) the detail required for the plan was too extensive. The Commission is currently addressing some of the problems raised by agency officials through an interagency task force. The Commission has not implemented an onsite compliance review program. GAO believes the steps being taken by the Commission to address some of the problems that agencies encountered in developing affirmative action plans during Fiscal Year 1980 are beneficial in that agencies will be aware that the issues they raised are being considered.

**Agency Contact:** General Accounting Office (202) 275-4068.

### E02400-002

*Equal Employment Opportunity Commission Needs To Improve Its Administrative Activities.* (HRD-81-74).
4/21/81; 2 pp. + 1 app. (17 pp.)
**OMB Funding Code/Title:** 45-0100-0-1-751 / Salaries and Expenses
**Program:** Program Support and Administration
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Civil Rights Act of 1964, as amended (P.L. 88-352, title VII, § 705; 78 Stat. 241; 42 U.S.C. 2000e-4).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The operations services units in the Indianapolis and Cleveland district offices of the Equal Employment Opportunity Commission (EEOC) were not fully carrying out their administrative functions. This was partly attributable to inexperienced staff, insufficient training, and key personnel concentrating on only certain tasks. EEOC headquarters authorized district offices to acquire certain office equipment, such as word processing and micrographic equipment. The equipment has not been used enough to justify its purchase or continued lease. The two district offices lacked controls over the accountability for office furniture and equipment. They neither required receipts when portable equipment was issued to employees nor maintained adequate inventory records for property or affixed required Federal ownership tags to all furniture or equipment. The imprest funds in the two district offices were not administered in accordance with the Department of the Treasury requirements. Fund levels exceeded needs, and quarterly cash verifications were not made. These conditions may also exist at other district offices. The EEOC Acting Chairman should direct the Executive Director to: (1) ensure that, in the reorganized operations services units, qualified persons are assigned to key positions, adequate training is provided to the staff, all required tasks are performed by the assigned staff, and the performance is monitored by the Office of Administration; (2) reassess district office legal units' resource allocations and potential workload and adjust their staffs as appropriate; (3) have unneeded leased word processing equipment and other equipment returned to the lessors, expedite the completion of audiovisual training materials, and institute controls to ensure that equipment is purchased only after needs have been assessed and alternatives considered; (4) ensure that accurate property inventory records are established, maintained, and monitored at its offices as soon as possible; and (5) ensure that district offices administer their imprest funds in accordance with Treasury regulations by reviewing all of the offices' imprest fund use, reducing their fund levels to the amount needed for 2 months, and emphasizing to office directors the need for quarterly cash verifications.

**Agency Contact:** General Accounting Office (202) 523-9131.

### E02400-003

*Further Improvements Needed in EEOC Enforcement Activities.* (HRD-81-29).
4/9/81; 43 pp. + 7 app.
**OMB Funding Code/Title:** 45-0100-0-1-751 / Salaries and Expenses
**Program:** Enforcement
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Civil Rights Act of 1964, as amended (P.L. 88-352, title VII, § 706; 78 Stat. 241; 42 U.S.C. 2000e-5). Age Discrimination in Employment Act of 1967 (P.L. 90-202, § 2; 81 Stat. 602; 29 U.S.C. 621 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Equal Employment Opportunity Commission (EEOC) is responsible for enforcing title VII of the Civil Rights Act, which prohibits discrimination in employment on the basis of race, color, religion, sex, or national origin. ***Abstract:*** The Equal Employment Opportunity Commission (EEOC) has made many changes to correct its problems in handling individual charges of employment discrimination and in developing and investigating self-initiated charges. Howerver, many of these improvements represent only the potential for success, because they are still relatively new and in their implementation stages. Additional matters need to be considered to help ensure that EEOC reforms fulfill their potential, such as: (1) not settling charges that lack reasonable cause under the rapid charge process; (2) authorizing EEOC to sue State and local governments under title VII; and (3) improving the collection of employment data from private employers and aggressively monitoring conciliation agreements and consent decrees. Congress should amend title VII of the Civil Rights Act of 1964 to provide that EEOC may initiate litigation on a charge against a State or local government if the Department of Justice decides not to sue within a specified time. The Acting Chairman of EEOC should direct the Executive Director to: (1) discontinue negotiating settlements on charges lacking reasonable cause and close them with a no-cause decision or advise the charging parties to withdraw them; (2) consider revising the criteria for contracting with State and local fair employment practices agencies to include agencies presently excluded; and (3) consider using alternatives to the present contracting procedures, such as contracting on a nonreimbursable basis. The Acting Chairman should direct the General Counsel to file suits more timely and to adopt a standard that suits should be filed within a certain time, such as 90 days after a decision is made to litigate. The Acting Chairman should also expedite revising the EEO-1 report to provide improved data, including employee wage and salary data, emphasize the importance of compliance monitoring, and establish procedures to ensure that monitoring is performed promptly and that onsite visits are made to verify reports, as appropriate. The Director of the Office of Management and Budget should advise the President that the contract compliance function under Executive Order 11246 should be transferred from the Office of Federal Contract Compliance Programs to EEOC.

**Agency Contact:** General Accounting Office (202) 523-9131.

## FARM CREDIT ADMINISTRATION

### E02600-001

*How the Farm Credit Administration Can Improve Its Use of Auditing.* (GGD-81-22).
1/28/81; 26 pp.
**OMB Funding Code/Title:** 78-4131-0-3-351 / Revolving Fund for Administrative Expenses
**Program:** Operating Costs, Funded: Administrative Expenses
**Congressional Relevance:** *House* Committee on Agriculture; *Senate* Committee on Agriculture, Nutrition, and Forestry. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Farm Credit Act of 1971 (P.L. 92-181, title V; 85 Stat. 620; 12 U.S.C. 2249).
**Availability:** GAO

*Program Objectives:* Internal Audit is responsible for assessing the economy, efficiency, and effectiveness of the Farm Credit Administration's (FCA's) operations and programs. ***Abstract:*** Although FCA has recognized the need for an independent internal review of its management activities, it has not done enough to encourage the development of internal audit activities throughout the System. Specifically, FCA has not: (1) provided leadership for the development of System-wide internal auditing standards; (2) furnished active, consistent support to the System's Internal Auditors Conference; and (3) consistently reported on the progress and problems of internal auditing activities in its reviews of bank operations. The Federal Farm Credit Board should direct the Governor of FCA to establish a permanent, independent internal auditing unit within FCA consistent with professional internal auditing standards. This unit should be organizationally independent of agency line-management functions and should report to the highest practicable level within the management structure. The Board should also direct the Governor to: (1) provide leadership to the Farm Credit System in developing a set of professional internal auditing standards, which will provide a basis for a more thorough evaluation of the internal audit function, as well as encourage professionalism within bank internal audit units; (2) furnish active, consistent support for the System's Internal Auditors' Conference; (3) require that Office of Examination reports to a bank's board of directors comment on the quality of the internal auditing system; (4) monitor the implementation of the revised System internal control policy to insure that independent bank internal audit functions are maintained; and (5) augment the financial examinations of the System by using external auditors to ensure that the financial examination procedures used are in conformance with generally accepted auditing standards.

**Agency Contact:** General Accounting Office (202) 389-4254.

## FEDERAL HOME LOAN BANK BOARD

### E03000-001

*Federal Home Loan Bank Board's Management of Its Procurement Activities Should Be Improved.* (PLRD-81-18).
5/13/81; 37 pp. + 2 app. (8 pp.)
**OMB Funding Code/Title:** 82-4035-0-3-371 / Limitation on Administrative and Nonadministrative Expenses, Federal Home Loan Bank Board
**Program:** Analysis of Operations
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Home Loan Bank Act of 1932 (P.L. 72-304, § 18; 12 U.S.C. 1438(c)).
**Availability:** GAO

*Abstract:* The acquisition and management of the new Federal Home Loan Bank Board Building was reviewed by GAO. In connection with deficiencies and irregularities found by internal auditors, GAO concluded that the settlement paid on the terminated interior construction and finishing contract included claims which were not substantiated, resulting in unnecessary costs to the Board. The Board did not adhere to good procurement practices when designating members to the settlement review board and did not request an audit before the settlement claim was paid. Building inspections have not been completed and the building is not fully accessible to the handicapped. The Chairman of the Board should direct appropriate Board officials to: (1) adopt and comply with Federal procurement regulations, (2) take action to bring current contracts into compliance with the regulations, (3) require building inspections, and (4) correct any deficiencies found.

**Agency Contact:** General Accounting Office (202) 566-1314.

### E03000-002

*Opportunities to Further Improve Internal Auditing in the Federal Home Loan Bank Board.* (GGD-80-90).
7/16/80; 9 pp.
**OMB Funding Code/Title:** 82-4035-0-3-371 / Limitation on Administrative and Nonadministrative Expenses, Federal Home Loan Bank Board
**Program:** Analysis of Operations
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Home Loan Bank Act of 1932, as amended (P.L. 72-304, § 17-19; 12 U.S.C. 1437-1439).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives.* The Internal Review Office's current responsibilities include providing guidance for the effective performance of internal auditing at the Federal Home Loan Banks; coordinating the annual financial audits of each Bank performed by certified public accounting firms; performing financial control, economy and efficiency, and program results audits of Federal Home Loan Bank Board Activities; and acting as a liaison with GAO. *Abstract:* In its review of internal audit operations, GAO found that improvements are needed in the area of data processing audits. Currently, data processing activities are not included in the 1980 audit plan and data processing audit responsibilities will not be consolidated under a specific audit manager. Moreover, the Internal Review Office has not conducted an operational survey of data processing activities to determine if audits are warranted as it has done for other Bank Board operations. GAO also feels that, in line with other supervisory responsibilities, the Internal Review Office should provide additional guidance to Bank internal audit units in the areas of audit charters, program planning, and report recommendation followup. Revisions to the annual program plan should not be made by the Internal Review Office without first submitting the reasons for those changes in writing. A number of changes were made to the audit plans for 1979, and the status of the audit work was presented orally to the Board each quarter. The results of these practices were that 10 of the 25 audits originally planned were not initiated. Also, 8 reviews experienced delays ranging from 4 to 10 months. The Chairman of the Federal Home Loan Bank Board should instruct the Director of the Internal Review Office to: (1) reconsider his view that data processing activities should not be included in the audit plan and request a fulltime data processing auditor position, if appropriate; (2) complete and present to the Bank Board the Bank audit charters being considered to correct the problems identified in the surveys of Federal Home Loan Bank internal audit practices; and (3) provide the Bank Board with a written status report, as a part of the Internal Review Office's quarterly reporting, listing the initial estimated completion dates of each planned review, the current status of each review, and any changes to the annual audit plan which may have occurred.

**Agency Contact:** General Accounting Office (202) 389-4254.

## FEDERAL MEDIATION AND CONCILIATION SERVICE

### E03200-001

*The Federal Mediation and Conciliation Service Should Strive To Avoid Mediating Minor Disputes.* (HRD-81-14).
10/30/80; 28 pp. + 2 app. (6 pp.)
**OMB Funding Code/Title:** 93-0100-0-1-505 / Salaries and Expenses
**Program:** Dispute Mediation and Technical Assistance/Public Information and Educational Activities
**CFDA NO.:** 34.001
**Congressional Relevance:** *House* Committee on Education and Labor; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee; *Senate* Committee on Appropriations: Labor, Health and Human Services, and Education Subcommittee.
**Authority:** National Labor Relations Act of 1935, as amended (P.L. 74-198, title II, § 203; 29 U.S.C. 173). Civil Service Reform Act of 1978 (P.L. 95-454, title VII, § 701; 92 Stat. 1192; 5 U.S.C. 7101).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the Federal Mediation and Conciliation Service's activities to determine whether they were within the authority of enabling legislation and to evaluate the adequacy of the Service's management practices for determining jurisdiction in a labor dispute and for reporting on resources used. GAO focused its analysis on the 19 States which have mediation services. GAO found that the Service has not followed the criteria provided by statute. The Service's involvement in many labor disputes is questionable. Although the Taft-Hartley Act directs the Service to avoid mediating minor disputes when State services are available, it has not done so and it has not established cooperative agreements with States that have mediation services. As a result, the Service has mediated many disputes that did not pose a threat to substantially interrupt commerce. Even though the act specifically excludes State and local government disputes from its coverage, the Service has mediated such disputes, and its involvement in them is increasing. The Service does not have adequate information on the use of staff resources. The

Service's Director should ensure that criteria for determining the need for the Service's involvement in disputes are properly applied and that the Director obtain information on how mediators' time is used. The Congress should determine whether the Service's involvement in State and local public employee disputes is appropriate. The Congress also should consider the desirability of continued Service involvement in minor disputes in States without mediation services.

## FEDERAL RESERVE SYSTEM

### *BOARD OF GOVERNORS*

**E03401-001**
*Internal Auditing Can Be Strengthened in the Federal Reserve System.* (GGD-80-59).
8/8/80; 35 pp. + 2 app. (13 pp.)
**OMB Funding Code/Title:** 99-0000-9-9-000 / Board of Governors of the Federal Reserve System
**Program:** System Policy Direction and Support
**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs.
**Authority:** Federal Reserve Act, as amended (P.L. 63-43, § 10, 11; 12 U.S.C. 248).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Federal Reserve System's Operations Review Program has encountered problems. It is staffed entirely with part-time personnel detailed from other organizations who may be associated with the activities examined. Followup on report recommendations has been inconsistent and incomplete. The Board has rejected the idea of establishing a permanent, independent internal audit group primarily because of lack of funds and positions. A new permanent audit function has been recently established in the Office of the Controller; however, it lacks the necessary organizational independence. The Reserve Bank General Auditors have concentrated nearly exclusively on financial and compliance audits. These General Auditors are all organizationally independent, aligned to report to the highest practicable level, and staffed with professionally qualified auditors. They have established a system-wide set of auditing standards which are generally consistent with professional internal auditing standards. Each General Auditor unit is examined periodically by a review team. Although they have debated their audit role in the bank supervision and regulation and economic research areas, no collective approach toward auditing these areas has been formally adopted. Uncertainty continues as to what their role should be regarding these activities. Recently, it was proposed that they be excluded from reviewing areas involving bank examiners' judgments. The Chairman of the Board of Governors of the Federal Reserve System should: (1) establish a permanent, independent internal audit group at the Board of Governors, consistent with professional internal auditing standards; (2) require that Reserve Bank General Auditors review the efficiency and effectiveness of bank supervision and regulation and economic research activities; and (3) instruct the Conference of General Auditors to amend their "Audit Standards and Levels of Audit Attention for Federal Reserve Banks" to include a system-wide approach toward reviewing bank supervision and regulation and economic research activities, and a specific operational policy statement requiring the General Auditors to follow up Board of Governor's reviews.

**Congressional Relevance:** *House* Committee on Banking, Finance and Urban Affairs; *Senate* Committee on Banking, Housing and Urban Affairs.
**Authority:** Federal Reserve Act, as amended (P.L. 63-43, § 11; 12 U.S.C. 248).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Federal Reserve System has the general responsibility for distributing and circulating U.S. currency. This includes the delivery of newly printed currency to the Reserve Banks and the continuing circulation of currency and coin between the Reserve Banks and member commercial banks. *Abstract:* GAO found that, although security specifications throughout the Federal Reserve System have changed over the last 10 years, there has been no wholesale deterioration. Most security specifications have become more precise in recent years. GAO also found that the system-wide total number of armored carrier incidents has increased over the last 10 years. However, GAO does not believe that changes in the Federal Reserve security specifications have influenced the number or type of incidents that have occurred. It is unlikely that a single factor is responsible for the rise in the number of armored carrier incidents. A possible factor that would help explain the increase is simply the increase in the amount of currency transported. However, GAO believes that monitoring incidents is useful in evaluating carrier performance. Finally, GAO found no evidence that the Federal Reserve's security standards influence other users in the type of security specifications they require in armored car contracts. Other users rely on the carrier's expertise in the security area and the existence of insurance as ultimate protection. The Board of Governors of the Federal Reserve System should strongly encourage its offices to utilize the services of the System Transportation Service and should record and monitor incidents that occur under currency transportation contracts. Further, the System Transportation Service should accumulate historical performance data on Federal Reserve transportation carriers.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Holder-In-Due-Course (HDC) Rule preserves consumers legal rights when purchasing goods and services on credit. Those rights which the consumer has against the seller for breach of contract, breach of warranty, fraud, or misrepresentation are also preserved against a creditor to whom the seller negotiates the credit agreement. Before the HDC Rule, it was possible for the seller and creditor to immunize the seller from the consequences of bad sales practices. *Abstract:* This is a pilot study to determine the technical and financial feasibility of conducting an expanded study in the future to retrospectively evaluate HDC I and provide a baseline for HDC II and the Credit Practices Rule. A mail survey of 5000 consumers was conducted to identify the incidence of experiences with merchants covered by HDC I, as well as consumer experiences with the delinquent debt collection practices covered by the Credit Practices Rule.

*Abstract:* The purpose of the investigation is to examine the relative ability of opticians in fitting contact lenses in order to determine what steps, if any, the Federal Trade Commission should take with regard to restrictions in many states on the right of opticians to fit contact lenses. This study examined quality differences in contact lens fitting among opticians, optometrists, and ophthalmologists. A sample of consumers who had recently bought contact lens in 19 cities was examined by experts to determine the quality of fit of the lenses. The original fitter was also surveyed. The data are being analyzed to determine whether quality differences exist across the three provider groups.

**Authority:** Federal Trade Commission Act, as amended (P.L. 63-203, § 5, 18; 38 Stat. 717; 15 U.S.C. 45, 52). Magnuson-Moss Warranty Act (P.L. 93-637, § 102-112; 88 Stat. 2185-2192; 15 U.S.C. 2302-2312).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Magnuson-Moss Warranty Act imposes specific duties on manufacturers of consumer products who offer written warranties. Warranties which specify a level of performance must also relate that performance to a specified period of time and the warranties may not be written in a manner that may deceive consumers as to their enforcability under the Act. *Abstract:* This is a combination baseline and prospective study. The study determined what assumptions consumers make about warranty protection when given varying degrees of information about the warranty coverage offered. Mall-intercept interviews with 450 consumers were conducted to determine their comprehension of warranty information in print ads. The data are now being analyzed to determine the degree of differences by product and amount of warranty information. The results will be used to determine appropriate follow-up studies.

*Program Objectives:* The two primary objectives of the housing program are to provide incentives to builders to build higher quality homes and to provide consumers with information to assist them in purchase-making decisions. *Abstract:* Approximately 1800 consumers who had purchased a new home within the past 20 months were interviewed. Data were collected on the nature, severity, and extent of defects in those homes and to what extent builders repaired defects. In addition, 300 field inspections were conducted on a sample of the 1800 hours to validate the telephone interview results. This study determined the current level of new home defects and served as a baseline for determining the impact of Federal Trade Commission activity in this area.

**Authority:** Federal Trade Commission Act, as amended (P.L. 63-203, § 5, 13, 18; 38 Stat. 717; 15 U.S.C. 45, 52).
**Availability:** Not Publicly Available (Internal Use Only)

**Geographic Relevance:** National

*Program Objectives:* The Vocational Schools Rule is designed to prevent unfair and deceptive sales practices used to induce students to sign up for courses that do little to improve their employment opportunities. To deter these practices, the Rule requires schools to include certain provisions in their enrollment contracts which require disclosure of certain material information and the right to a pro rata refund upon cancellation. These contracts provisions are intended to give students a self-help remedy for use when they believe that the school has misrepresented the employment potential for graduates of the course or are otherwise dissatisfied with the course. *Abstract:* This study gathered baseline data from vocational schools as the first phase of a pre-post promulgation comparison. A mail survey, with a telephone follow-up, was conducted to measure the enrollments, dropout rates, promotion strategies, and placement success rates of vocational schools. Response rate was only 24%; a new study is being planned with a revised methodology to overcome the response rate problems.

**OMB Funding Code/Title:** 47-0500-0-1-804 / Federal Supply Service, Operating Expenses
**Program:** Supply
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 201; 63 Stat. 383; 40 U.S.C. 481).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO has completed a study of the receipt, storage, and issue of material at selected General Services Administration (GSA) supply distributing facilities. While the logistical functions were generally well managed, GAO found that improvements were needed in the accuracy of stock locator systems, management controls over shelf life material, and security and housekeeping controls. Locator error rates at the Franconia and Kansas City depots exceeded the 2% accuracy level desired by GSA. At the Franconia depot, the error rate exceeded 15.1% at one point. Failure to mark correct expiration dates on cartons, test material for expiration dates, and issue material within the shelf life period contributed to weaknesses in the GSA shelf life program. GSA security and housekeeping controls at the depots should be emphasized. The Administrator should reemphasize to depot personnel the importance of accurate stock locator records in avoiding unnecessary procurements and in satisfying customer requests. Receipt storage personnel, stock selectors, locator clerks, supervisors, and checkers should receive periodic training on locator procedures. The Administrator should ensure that depot mangement gives increased attention to following established shelf life procedures. This would include updating expiration dates and testing material for possible extensions.

*Problems Overwhelm GSA's Systems Furniture Test Program.* (PSAD-80-62).
7/28/80; 22 pp. + app. (5 pp.)
**OMB Funding Code/Title:** 47-0500-0-1-804 / Federal Supply Service, Operating Expenses
**Program:** Programs and Requirements
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 201, 206; 63 Stat. 383, 390; 40 U.S.C. 481, 487).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The General Services Administration (GSA) launched its Systems Furniture Test (SFT) Program in 1978 to demonstrate that modular-type furniture saved space and was cost effective. The objectives of the GSA systems furniture program would be carried out through: (1) placing systems furniture in Government space; (2) maximizing the chances of successful installations; (3) minimizing problems by use of specific review, strict qualifications, and tight process controls; and (4) demonstrating space savings and cost effectiveness over the life of each project. Except for placing systems furniture in Government space, the GSA program has been a failure. Its management of the program has also been poor. GSA embarked on a major expansion of the program during the second year without establishing a ceiling on the number of projects or evaluating the costs incurred under the test program. Also, this expansion was undertaken before GSA received even preliminary data from a consultant employed to evaluate the program. Further, GSA did not consider any alternatives to systems furniture or require agencies to provide sufficient data to make cost-benefit analyses. In addition to these problems, the SFT program failed to demonstrate space savings or cost effectiveness and did not address the effect on employee morale and productivity. GSA lacked effective direction and control; its review of applications was superficial; and its approval of a recent project showed a continuation of past trends. In this case, the space savings were greatly exaggerated; the cost-benefit analysis contained erroneous and incomplete data; and GSA review overlooked significant questionable data items which should have raised serious questions about the project.

**E03702-003**

*Evaluation of GSA Efforts To Implement Life Cycle Costing for Procurement of Commercial Products.* (PSAD-81-14).
11/19/80; 6 pp. app. (9 pp.)
**OMB Funding Code/Title:** 47-0500-0-1-804 / Federal Supply Service, Operating Expenses
**Program:** Contracts
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 201; 63 Stat. 383; 40 U.S.C. 481).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO evaluated the actions the General Services Administration (GSA) has taken to implement life cycle costing (LCC) in the procurement process. Because of the substantial savings attributable to LCC procurements, the accelerated development of LCC techniques for additional items is warranted. GSA could improve its leadership role regarding Government-wide implementation of LCC and could expand the use of LCC to include the procurement of its own needs. One of the impediments to the expanded use of LCC is tha lack of Government-wide guidelines to provide uniform application of data that are used in LCC calculations. LCC requires top-management support, because the procurements depart from traditional practices and require more time to prepare and evaluate. The Administrator of GSA should give higher priority to LCC efforts and commit the staff needed to: (1) develop LCC policy and procedural guidance for inclusion in applicable procurement regulations; (2) develop a mechanism to coordinate and publicize Government-wide LCC efforts; (3) resume LCC workshops for procurement personnel; and (4) expand the use of LCC for procurements of commercial products.

*Poor Management of GSA Self-Service Stores Leads to Needless Duplication and Potential for Fraud.* (PSAD-80-64).
**OMB Funding Code/Title:** 47-0500-0-1-804 / Federal Supply Service, Operating Expenses
**Program:** Supply
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 201; 63 Stat. 383; 40 U.S.C. 481).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO evaluated the effectiveness of the General Services Administration's (GSA's) Self-Service Stores (SSS) Program. GAO found that SSS does not competently support agencies' retail needs nor eliminate unnecessary agency stores and stockrooms. GSA lacks effectiveness in control over store inventories, management oversight of store operations, and control over shopping plates issued to Federal activities. SSS fails to fulfill the intent of the Federal Property and Administrative Services Act, as amended. The GSA lack of adherence to its policies and procedures contributed to problems within the system. The Administrator of GSA should: (1) review each GSA store and its customers to determine if the store can survive as a retail outlet and discontinue support to other agency retail outlets; (2) determine the retail supply needs of Federal activities within a reasonable vicinity of the GSA stores and meet these needs on a consistent basis; (3) provide management control over program operations, including a commercial inventory and accounting system, regular unannounced audits, management surveillance reports, and the identification of shopping plates maintained by Federal activities; (4) improve the operations of the GSA stores by assuring that out-of-stock items are reordered, defective supplies are not sold, store items are priced according to procedures, and security is maintained over store merchandise; (5) maintain the exclusion of special order drop shipments from the stores' activities; and (6) work closely with the Office of Management and Budget to develop criteria for a cost-benefit analysis to be applied consistently to eliminate unnecessary agency stores and stockrooms.

Treasury, Postal Service, General Government Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 201; 63 Stat. 383; 40 U.S.C. 481).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO evaluated actions taken by the General Services Administration (GSA) to improve the Federal Supply Schedule Program. GSA only recently addressed the crucial issues of reducing the number of schedules and improving the multiple award contracting process. The schedules continue in force and still represent major source of supply for Federal agencies. Few procedures to implement GSA plans for improvement have been developed, and GSA has not yet solved the schedule program's basic deficiencies identified in prior GAO reports. Congressional oversight continues to be necessary to ensure that GSA completes needed program reforms in a timely manner. The Chairman of the Senate Subcommittee on Treasury, Postal Service, General Government, Committee on Appropriations should place GSA under a mandatory schedule to comply with the timeframes stipulated in the GSA Office of Acquisition Policy statement for improving the multiple award schedule program and should require GSA to report the status of its improvement actions by submitting copies of its quarterly progress reports made to GSA's Office of Acquisition Policy. The Administrator of GSA should intensify efforts to complete action on the recommendations contained in the May 1979 GAO report, strengthen procedures to assure compliance with the policy statement establishing firm cutoff dates for receipt of offers, eliminate vendor marketing catagories as a basis of bid evaluation and consider price together with discount when evaluating offers, and establish procedures to assure that methods used in setting the maximum order limitation are applied consistently and that procurement regulations are followed.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The need for the General Services Administration (GSA) to make small dollar purchases in the nonstores program was assessed. The administrative cost to centrally purchase these items frequently exceeds the value of the items. Most Federal agencies can purchase these items at reduced administrative cost. Historically, executive agencies were required to submit all requisitions for nonstores items in excess of $15 to GSA for procurement action. An August 1980 change provides that GSA is a nonmandatory source of supply when the total line item value is less than $100. Raising the dollar level of nonstock centrally procured items was necassary because of the higher cost of preparing and processing requisitions. However, without a means of enforcement, this regulation will not decrease the large number of GSA procurements under $100 in value. GAO found that the cost to locally purchase low dollar items is frequently less than the cost to GSA to accomplish the same procurement through the nonstock central procurement process. Agencies incur less administrative cost because they can quickly and accurately determine that the item is needed. The process of identifying exactly what is needed is the largest portion of the administrative cost of GSA. GAO believes that the low dollar, low demand nonstores central procurements as currently operated should be discontinued. Some agencies have remote activities which may not be able to purchase some items; however, these should be infrequent and subject to careful review. The Administrator of GSA should direct the Commissioner of the Federal Supply Service to review the current practice and policy of centrally procuring low dollar nonstores items and take action to eliminate those GSA procurements which are not cost effective.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* By law the General Services Administration (GSA) charges agencies for space it provides. The rental fee, or standard level user charges (SLUC), should approximate the commercial charges for comparable space or services. The law, however, has no guidance on how the comparable commercial charge should be computed. GSA contracts with independent appraisers to estimate the SLUC, but the appraisers are not told at what level protection services are to be included in the estimated rates. After receiving the appraiser's estimate, GSA adds anticipated inflation and a surcharge for protection services to the beginning of the first fiscal year in which the rates are to be charged to the agencies. A review of GSA management of reimbursable services in two of the ten GSA regions showed that GSA had been overcharging some agencies for protection services. It was suggested that GSA determine the amounts appraisers included for protection services in the rates for fiscal years 1980 and 1981 and reduce future billing by this amount GSA did not agree, saying it has really been undercharging because it has been including lower than actual inflation factors in the SLUC. GAO believed that overcharging for protection to offset inadequate inflation factors was not equitable. GAO recommended that GSA issue guidance to appraisers which eliminates consideration of protection costs in estimating rental rates, since these costs are included in the GSA protection surcharge. Also, future billings should be reduced for those agencies for which appraisers previously included protection costs.

Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 210; 63 Stat. 393; 40 U.S.C. 490). Occupational Safety and Health Act of 1970 (P.L. 91-596, § 2; 84 Stat. 1590; 29 U.S.C. 651); 29 C.F.R. § 1910; 29 C.F.R. § 1960. Executive Order 12196; Executive Order 12223.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Federal Property Management Regulations require the General Services Administration (GSA) to provide workspace that meets the accident and fire prevention standards in the Occupational Safety and Health Act of 1970. The regulations also require that Federal agencies be responsible, along with GSA, for maintaining a sound fire prevention program. GAO's review in three GSA regions showed that buildings with leased space contained numerous fire safety deficiencies, according to GSA criteria. Federal employees were working in leased space that did not meet the minimum fire safety protection required. The process for evaluating fire safety conditions contained serious flaws. Fire safety inspectors did not realize that they needed to apply the requirements of local codes, Schedule B of leases, and GSA national fire safety criteria or that it was necessary to cite specific violations in reports to establish liability for corrective action. GAO recommended that GSA take action to have lessors correct all fire safety deficiencies in leased space; enforce the GSA requirement to include a Schedule B in leases; require that the current GSA policy for deviating from fire safety requirements be followed; and establish procedures to control the prompt correction of fire safety deficinecies. These procedures should include defining the responsibilities and duties for personnel of the cognizant branches and monitoring the reports and actions taken by the cognizant branches. These procedures should be explained to the personnel involved. To further improve the process, GSA should clarify and consolidate existing policies and procedures, establish a program to instruct fire safety inspectors on their duties and responsibilities, and ensure that necessary information on leased space is sent to the cognizant branches so that required fire safety surveys and inspections can be made. GSA should determine whether there are similar problems in the GSA fire safety program for Government-owned space and take appropriate action.

## *TRANSPORTATION AND PUBLIC UTILITIES SERVICE*

**E03707-001**
*Increased Productivity in Processing Travel Claims Can Cut Administrative Costs Significantly.* (AFMD-81-18).
1/19/81; 39 pp.
**OMB Funding Code/Title:** 47-4542-0-4-804 / Federal Buildings Fund
**Program:** Program Direction
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 210, as amended by; P.L. 92-313; 63 Stat. 393; 40 U.S.C. 490).
**Availability:** GAO

*Abstract:* This evaluation of General Services Administration processing of claims for Federal travel expenses showed that claims processing is costing the Government millions more annually than necessary. Productivity could be increased and costs could be cut significantly by replacing the reimbursement method used for high cost areas with a lodging plus flat fee for meals and miscellaneous formula, by eliminating redundant detailed reviews and voucher typing, and by improving auditing activities at payment centers.

## INTERSTATE COMMERCE COMMISSION

**E04000-001**
*ICC Needs To Eliminate Improper Leasing Practices by Certificated Motor Carriers.* (CED-81-24).
12/31/80; 34 pp. + 7 app. (38 pp.)
**OMB Funding Code/Title:** 30-0100-0-1-401 / Salaries and Expenses
**Program:** Compliance and Consumer Assistance
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Interstate Commerce Act, as amended (P.L. 95-473; 92 Stat. 1361; 49 U.S.C. 10521-10562). Motor Carrier Act of 1980 (P.L. 96-296, § 15; 49 U.S.C. 11101).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* "Leasing" in the trucking industry is an arrangement under which a carrier with an Interstate Commerce Commission (ICC) certificate contracts with an independent, noncertificated trucker (owner-operator) to haul regulated freight on routes which only the certificated carrier may legally serve. In return for allowing owner-operators to use their certificates, the certificated carrier retains a percentage of the gross revenue generated by the particular haul, often amounting to 25-35%. ICC is responsible for monitoring leasing practices by collecting and analyzing the industry data. *Abstract:* GAO found that the data collected by ICC were not detailed enough to separate certificated carriers' leasing operations from their other activities, and neither truck brokers nor certificated carriers could provide the cost information needed. GAO confirmed that owner-operators received a higher percentage of a shipment's total carriers. Certificated Carriers claimed they kept a greater percentage of the revenue because they provided the owner-operator with more services and incurred more costs due to regulation. Without reliable cost data, GAO could not determine whether these additional services and costs justified all of the difference between the fees charged by certificated carriers and truck brokers. The Chairman of ICC should monitor leasing practices by collecting and analyzing the industry data necessary to determine whether improper leasing practices are continuing under the Motor Carrier Act of 1980.

## *RAIL SERVICES PLANNING OFFICE*

**E04008-001**
*Problems in Implementing Regulatory Accounting and Costing Systems for Railroads.*
7/80; 35 pp. + app.
**OMB Funding Code/Title:** 30-0100-0-1-401 / Salaries and Expenses
**Program:** Proceedings
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Interstate Commerce Act, as amended (P.L. 95-473; 49 U.S.C. 10501-10505, 10306 et seq.). Railroad Revitalization and Regulatory Reform Act of 1976 (P.L. 94-210, title III, § 310; 90 Stat.

60; 49 U.S.C. 1).
**Availability:** GAO

*Abstract:* The Interstate Commerce Commission's (ICC) actions and decisions can bear heavily on whether the railroad's financial viability improves. Until recently, the Uniform System of Accounts for railroads had remained essentially unchanged since 1907. Effective January 1, 1978, ICC prescribed a revised and expanded system which resulted from several years of developmental efforts and was required by the Railroad Revitalization and Regulatory Reform Act of 1976 (4-R Act). The 4-R Act also required ICC to develop a revised costing system for estimating the cost of service. Although railroads have begun reporting under the new accounting system, ICC has not assured itself that the information being reported is reliable and consistent. Furthermore, the revised costing system needed to develop estimates of railroad costs for regulatory and other purposes is not yet operational. ICC is considering additional changes to its regulatory accounting and costing systems for railroads. However, if new major accounting and costing requirements are introduced too soon, the railroad industry could be burdened with complex and difficult reporting requirements which do not necessarily serve Federal regulatory needs. ICC should: (1) expeditiously review and evaluate the railroads' implementation of the new system; (2) communicate to those outside ICC the importance of the new costing system; (3) provide appropriate technical guidance to assist non-ICC users; and (4) delay implementation of a cost center accounting system.

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### *ASSOCIATE ADMINISTRATOR FOR SPACE SCIENCE*

**E04105-001**
*Implementing a Data Handling Policy for Space Science Flight Investigations.* (MASAD-81-34).
5/29/81; 3 pp.
**OMB Funding Code/Title:** 80-0108-0-1-254 / Research and Development
**Program:** Space Research and Technology
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Aeronautics and Space Act of 1958, as amended (P.L. 85-568, title II, § 203; 72 Stat. 429; 42 U.S.C. 2473).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* National Aeronautics and Space Administration (NASA) management instructions and handbooks related to the acquisition and management of space science data were reviewed, and the implementation of the new policy was tested by GAO on four NASA projects. Because none of the projects being managed under the new policy has been launched, GAO was not able to determine whether the policy is effective in enhancing the timely submission of data to the National Space Science Data Center. The data handling policy is not being implemented in a consistent manner. Under the new policy, each program scientist is responsible for insuring that the letter notifying investigators that they have been selected to participate in a space science investigation stipulates that he or she will contribute to the writing of a Project Data Management Plan before receipt of flight data. Only one of the projects used notification letters containing the required language. GAO believes that the letter of notification should specify the data handling obligations of all parties participating in a space science investigation as an essential first step in assuring effectiveness of the NASA May 1978 data handling policy. The Administrator, NASA, should instruct all Office of Space Science program scientists that they must strictly adhere to the principles and responsibilities that are set forth in NMI 8030.3A to assure more effective handling of data acquired from the space science projects.

**Program:** Energy Technology
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Aeronautics and Space Act of 1958, as amended (P.L. 85-568, title II, § 203; 72 Stat. 429; 42 U.S.C. 2473).
**Availability:** GAO
**Geographic Relevance:** Congressional District

*Abstract:* An economical and serviceable wind turbine rotor blade has yet to be delivered to the Lewis Research Center by any contractor. The blades delivered thus far have experienced problems in design, fabrication, or testing. GAO reviewed the technical aspects of soliciting, evaluating, and selecting blade contractors by the Center. Although GAO noted some deficiencies in the procurement process for blade contracts, Lewis Research Center's procurement policies and practices have not impeded the development of the blades for the Wind Energy Program. Rather, the problems in blade development seem to center on: (1) the relatively slow advancement in the state-of-the-art for windmill blade technology; (2) insufficient analytical tools and facilities to accurately predict blade performance in real-life environments; and (3) the rush to build machines before blade technology has been adequately advanced.

### *ASSOCIATE ADMINISTRATOR FOR MANAGEMENT OPERATIONS*

**E04107-001**
*First Look at Senior Executive Service Performance Awards/NASA.* (FPCD-80-85).
9/19/80; 4 pp.
**OMB Funding Code/Title:** 80-0103-0-1-402 / Research and Program Management
**Program:** Supporting Activity
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Aeronautics and Space Act of 1958, as amended (P.L. 85-568, title II, § 203; 72 Stat. 429; 42 U.S.C. 2473). Civil Service Reform Act of 1978 (P.L. 95-454, title IV, § 402(a); 5 U.S.C. 3131-3138; 5 U.S.C. 5384).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Senior Executive Service (SES), established by the Civil Service Reform Act of 1978, went into effect in July 1979 and with it a system of performance awards (bonuses and ranks). *Abstract:* Procedural difficulties have been experienced by the National Aeronautics and Space Administration (NASA) in administering SES performance awards. The percentage of executives receiving bonuses or rank nominations is skewed to the top of the NASA organizational hierarchy. While there was no evidence of abuse of the bonus system, NASA could add credibility and objectivity to its bonus decisions if it had impartial members from outside the agency participate in Performance Review Board (PRB) decisions. NASA delegated the initial decisions for ratings and bonuses to the EPMs. The PRB reviewed the recommendations of the EPMs and accepted them as submitted. This caused NASA ratings and award distribution to vary considerably from one EPM organization to another. Senior executives receiving outstanding ratings in one EPM organization did not receive bonuses, while individuals receiving successful ratings in another EPM organization did. This occurred because NASA officials believe that performance ratings should not be the sole basis for determining eligibility for bonuses. NASA should allow lower level SES executives as well as impartial outside members to participate in PRB decisions, and also include outside members as participants on special PRBs. NASA should also: (1) keep senior executives aware of factors considered in the decision process for awards; (2) incorporate bonus decision factors into the performance plans; and (3) make bonus decisions consistent with ratings within and between each EPM organization.

*Support Service Contracting at Johnson Space Center Needs Strengthening.* (PSAD-81-2).
10/21/80; 23 pp. + app. (2 pp.)
**OMB Funding Code/Title:** 80-0103-0-1-253 / Research and Program Management
**Program:** Supporting Activity
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Aeronautics and Space Act of 1958, as amended (P.L. 85-568, title II, § 203; 72 Stat. 429; 42 U.S.C. 2473).
**Availability:** GAO

*Program Objectives:* The objective is to provide for research in Government laboratories, management of programs, and other expenses for the operation of National Aeronautics and Space Administration (NASA) installations. *Abstract:* GAO reviewed six contracts as a test of how the Johnson Space Center (JSC) procurement system operates. It found that work, under work orders written on one contract, had been started or completed without proper authorization from JSC officials. Government-furnished equipment valued at about $35,600 was unaccounted for and written off without adequate investigation. For 3 years, a contractor who did not have an accounting system was being reimbursed for incurred costs under a cost-type contract. On two other contracts, additional money was made available before a need for the funds had been established. JSC spends about $1 million annually for health services from a private firm, although a U.S. Public Health Service hospital opened near JSC in 1978. The basic reasons for inadequate contract administration include: (1) an unawareness on the part of some contracting officers of their responsibilities, (2) the general attitude that small dollar value contracts are not worthy of attention, and (3) inadequate resources for administering cost-type contracts. The Administrator, NASA, should assure that the Director, JSC, directs that the work orders be authorized before, not after, contractors actually perform work; makes a physical inventory of Government-furnished equipment in the possession of contractors and does not write off equipment without appropriate investigation; recovers any inappropriate payments made to contractors; avoids contracting with contractors who do not adequately support their claims for reimbursement under cost-type contracts; ceases funding contracts before needs have been established; and determines the feasibility of providing all, or a portion of, medical service needs at the nearby Public Health Service Hospital facilities rather than continuing contractor-operated facilities. Also, the Administrator, NASA, should have the Inspector General determine whether these problems exist at other NASA installations.

**E04107-003**

*NASA's Standard Parts Program: Are the Objectives Being Accomplished?* (PSAD-81-18).
1/8/81; 55 pp. + app. (18 pp.)
**OMB Funding Code/Title:** 80-0103-0-1-402 / Research and Program Management
**Program:** Supporting Activity
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Aeronautics and Space Act of 1958, as amended (P.L. 85-568, title II, § 203; 72 Stat. 429; 42 U.S.C. 2473).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* While there has been notable progress recently in planning for and implementing the National Aeronautics and Space Administration's (NASA's) Standard Parts Program, improvements are needed in monitoring and evaluating the program, justifying the use of nonstandard parts, and developing and implementing policies and procedures to help assure that maximum benefits are achieved from consolidated procurements of electronic parts. The Administrator of NASA should: (1) have the annual effectiveness evaluations of the Standard Parts Program performed addressing the compliance of the field centers with requirements to adequately justify the use of nonstandard parts, development of a system for collecting standard and nonstandard parts usage data, the degree of standardization being achieved on projects, and the adequacy of funds devoted to the program; (2) issue policy and implementing guidelines for program or project wide consolidated procurement of electronic parts and establish the needed mechanism to monitor and evaluate the action of NASA managers in achieving consolidated procurements; (3) investigate, on a test basis, a NASA-directed consolidated procurement and stocking program for projects or developments where program- or project-wide consolidated procurements are not feasible; and (4) amend the contract with the Jet Propulsion Laboratory to formally include it in the Standard Parts Program.

**Agency Contact:** General Accounting Office (202) 275-3470.

**E04107-004**

*Need for NASA To Provide the Congress More Complete Cost Information on Its Projects.* (PSAD-81-7).
11/26/80; 9 pp. + 2 app. (4 pp.)

**Program:** Space and Terrestrial Applications
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Aeronautics and Space Act of 1958, as amended (P.L. 85-568, title II, § 203; 72 Stat. 429; 42 U.S.C. 2473).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* For three projects included in the study, GAO found no major problems regarding those costs which the National Aeronautics and Space Administration (NASA) included in its project estimates. However, NASA did not include certain major categories of costs in its estimates. Also, the justification that NASA provides Congress in support of its projects still does not identify the total NASA resources which will be required for the projects. Civil service salaries of personnel directly assigned to the projects were not included in the cost estimates for the projects. The budget justifications did not provide or compare a project's planning or development estimate with the current cost estimate. The budget justifications showed only the funding requirements for the budget year and the current and immediately prior year, with no date showing funds used in other prior years or estimates of funding requirements through the completion of a project. NASA should be required to include in its cost estimates the cost associated with the direct civil service personnel requirements. NASA should also be required to include in its budget justification documents: (1) a project cost history that includes all project-related cost and a comparison of each project's planning or development estimate with the current estimate and an explanation of the difference between the two estimates for those projects for which no project status report is prepared; and (2) an expanded format to show the total funds used on a project, as well as projected funding requirements through completion of a project.

**E04600-003**
*National Science Foundation Conflict of Interest Problems with Grants to Short Term Employees.* (PAD-81-16).
1/15/81; 24 pp. + 3 app. (33 pp.)
**OMB Funding Code/Title:** 49-0100-0-1-251 / Research and Related Activities
**Program:** Program Development and Management
**Congressional Relevance:** *House* Committee on Science and Technology; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** National Science Foundation Act of 1950, as amended (F.L. 81-507, § 3; 64 Stat. 149; 42 U.S.C. 1862). Executive Order 11222; NSF Circular 54; NSF Circular 139.
**Availability:** GAO

*Program Objectives:* The purpose of the National Science Foundation's (NSF's) conflict of interest policies, directives, and procedures is to guide NSF employees in the proper conduct of their official duties. In particular, they are directed not to act for the Government when their private economic interests are involved. *Abstract:* GAO reviewed NSF's policies and procedures for precluding conflicts of interest in its grant award process when NSF's short-term employees are involved. A significant number of problem cases were identified. NSF officials have made decisions on grant proposals which create an appearance of impropriety under applicable Federal guidelines and regulations. Questionable activities include officials awarding new grants, renewals, extensions, and supplemental funds to short-term employees in the same unit or to researchers planning to join that unit; overriding negative peer reviews; peer reviewing of proposals in one researcher's name but awarding the grant to someone else; and submission of proposals by persons currently employed at NSF. GAO found instances of concurrent grant processing and employment negotiation, questionable grant actions during employment, questionable post-employment grant actions, and questionable use of waivers of post-employment restriction on submitting new proposals. The Director of NSF should: (1) require that the Office of Audit and Oversight refer to the NSF General Counsel for prompt resolution of all conflict of interest matters that it finds while monitoring the grant activity associated with scientists who are being considered for, are serving on, or have recently completed short-term NSF appointments and (2) take appropriate action, remedial or disciplinary action, when people fail to report conflict of interest situations or otherwise violate prescribed standards of conduct.

**Geographic Relevance:** National

*Program Objectives:* Congress enacted the Foreign Corrupt Practices Act in response to widespread questionable corporate payments. The law, which makes offering payments to foreign officials to obtain or influence business illegal, also contains significant internal accounting control objectives and recordkeeping requirements. *Abstract:* GAO solicited information from 250 corporations regarding the Act's impact on corporate activities. The Act has brought about efforts to strengthen corporate codes of conduct and systems of internal accounting controls. However, many corporations believe that the cost of complying with the Act exceeds the benefits derived. More than 30% of the corporations engaged in foreign business reported that they had lost overseas business as a result of the Act. There is also extensive dissatisfaction with the clarity of the Act's accounting provisions. Increasing the uncertainty over what constitutes compliance with the Act is the controversy over whether the provisions include a materiality standard. The Act's antibribery provisions have also been criticized as being ambiguous. In addition, many corporations believe that they are suffering a competitive disadvantage due to the lack of an international antibribery agreement. The Chairman of the Securities and Exchange Commission (SEC), with input from the Departments of Justice and Commerce, the corporate community, and the accounting profession, should provide guidance to business on the factors and criteria that will be considered in assessing reasonableness. The Chairman should also report to the cognizant congressional committees on efforts to provide guidance by June 30, 1981. The Attorney General and the Chairman of SEC should jointly develop alternative ways to address the ambiguities in the antibribery provisions. These alternatives should be reported to the cognizant congressional committees by June 30, 1981.

**Authority:** Securities Exchange Act of 1934, as amended (P.L. 73-291, § 1, as amended by; P.L. 94-29; 48 Stat. 881; 15 U.S.C. 78a et seq.). Investment Advisers Act of 1940 (P.L. 76-768, title i, § 1; 15 U.S.C. 78a et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* As part of the continuing effort to achieve greater economy in contracting for Government goods and services, GAO reviewed the procurement practices used by the Securities and Exchange Commission (SEC) to obtain an automated market surveillance system. The computerized system will be used to support SEC market surveillance efforts which detect trading practices that may violate securities laws and regulations. GAO found that the procurement practices of SEC may have permitted one firm to gain an advantage over other firms since: (1) top SEC officials discussed market surveillance problems at great length with representatives of the firm 3 months before the public request for proposals was made; (2) SEC subsequently awarded a contract to the firm to define and design its market surveillance system on the basis that the firm's proposal was considered to be the most responsive to the needs of SEC; (3) SEC did not use appropriate contract provisions to avoid the creation of an organizational conflict of interest, which could restrict competition for follow-on contracts; and (4) SEC failed to issue a required public notice of its intention to award the firm a noncompetitive contract to test the system's operations. To insure compliance with Federal regulations in future contract awards, the Chairman, SEC, should strengthen SEC procurement practices so that: (1) all interested parties are given the same opportunity to obtain SEC contracts; (2) contract provisions do not permit an organizational conflict of interest which could limit competition for follow-on contracts; and (3) public notice detailing SEC needs is given before a noncompetitive contract is awarded.

**Program:** Mobilization Readiness
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 5 U.S.C. 4101-4118).
**Availability:** GAO

*Abstract:* The completeness and accuracy of the recent draft registration conducted by the Selective Service System has been challenged by a variety of critics and organizations. The issue has been compounded by court actions on the registration of women and the questioned use of social security numbers in the registration process. No major problems were found with the manner in which the Selective Service System organized or conducted the registration. Some errors and discrepancies were found in keypunching registration cards, postal service operations, and followup procedures to verify data accuracy. The errors represented only a small percentage of the registrants and were predominantly caused by illegible data on the registration cards. The System corrected or was in the process of correcting most of these errors, so that a final accuracy level of 98% did not appear unreasonable.

**Program:** Executive Direction and Field Administration
**Congressional Relevance:** *House* Committee on Small Business; *Senate* Committee on Small Business. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agen-

cies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Small Business Act, as amended (P.L. 85-536; 15 U.S.C. 631 et seq.). Civil Service Reform Act of 1978 (P.L. 95-454, title V, § 503; 92 Stat. 1183; 5 U.S.C. 4501).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Senior Executive Service (SES), established by the Civil Service Reform Act of 1978, went into effect in July 1979, and a system of performance awards (bonuses and ranks) was initiated. GAO reviewed the SES bonus payments at the Small Business Administration (SBA) and concluded that the performance awards were within the requirements of the Civil Service Reform Act and the guidance of the Office of Personnel Management (OPM). SBA paid bonuses for performance in the first 6 months of Fiscal Year (FY) 1980 and planned to again pay bonuses for the second half of FY 80 performance, in the fall of 1980, with FY 80 money. Although the plan is within the legal limits of the Reform Act, it allows SBA to pay bonuses to a higher percentage of its executives than other agencies do for the same FY 80 performance period. SBA will need to be careful about the manner in which it pays bonuses in the fall to avoid perceived misuse of the 25% limit set by Federal law. GAO recommended that SBA work closely with OPM to determine an equitable plan for paying bonuses for the remaining FY 80 performance. All eligible members of the SBA Performance Review Board (PRB) were awarded bonuses, and some were also nominated for distinguished executive and meritorious executive ranks. GAO believes that SBA could add credibility and objectivity to its SES award decisions if the PRB included an impartial member, or members, from outside the Agency to participate in PRB decisions. The SBA performance appraisal process does not include a requirement for a central review of executives' performance standards early in the performance cycle. GAO recommended that a central review of executives' performance plans at the beginning of the ration period should be made a requirement of the SBA performance process.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to emphasize the use of subcontracting as a method of promoting the long-term viability of small and minority businesses. *Abstract:* The Small Business Administration (SBA) is authorized to provide financial assistance to large businesses for the purpose of training and upgrading potential small and small minority contractors. This authority generally has not been used. SBA reviews subcontracting plans on construction contracts in excess of $1 million and other contracts in excess of $500,000 for the purpose of determining whether maximum practicable opportunity has been afforded to small and minority businesses. The subcontracting program of the SBA is intended to provide small and small minority businesses with a maximum practicable opportunity to participate in contracts let by Federal agencies. The program functions with the assistance of a Presidentially approved advisory committee. Delays in establishing the advisory committee, lack of specific committee functions and goals, and the exclusive focus of the committee on Federal subcontracting have impeded progress in implementing the program. A clear understanding of the committee's role and relationship with SBA has yet to be resolved. A major problem has been the lack of a clear definition of the intent of the amendments. The primary objective is to encourage large businesses in the private sector, as a general and voluntary subcontracting practice, to make greater use of small and minority businesses. GAO believes the relationship between SBA and the committee should focus primarily on exploring ways to promote subcontracting opportunities for small and minority businesses outside of Federal procurements. A major cause for the delay in implementing the surety bond waiver provision appears to be misunderstanding between two SBA offices, the Office for Minority Small Business and Capital Ownership Development (OMSB), and the Office of Special Guarantees. GAO recommended action for improving the program, including a suggestion that the Administration of SBA, together with the Advisory Committee, should develop a specific plan for promoting private sector procurements from small and small minority businesses.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Small Business Administration (SBA) awards 8(a) procurement contracts to help socially and economically disadvantaged small businesses to become competitive. The objective of the pilot program is to seek procurement opportunities which were not offered by Army under the regular 8(a) program and provides SBA exclusive authority to designate procurement requirements. SBA has not met this objective. The three initial contracts awarded under the pilot program could have been handled under the regular 8(a) program, and GAO questioned the contribution the contracts would make to the firms that received them. Additional program testing is necessary in an agency that has not yet demonstrated its complete support for the 8(a) program. The Army, historically, has fully supported the program. In 1980, the President designated three other agencies to participate, but GAO saw no basis for these designations in the authorizing legislation. Congress should amend the authorizing legislation to allow for further participation of an additional Federal agency that has yet to demonstrate its complete support for the 8(a) program. GAO also made recommendations to the Administrator of SBA to improve program administration.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives in the pilot programs are to expedite the loan application process and simplify the application documents. *Abstract:* The 7(a) business loan program is the principal activity of the Small Business Administration (SBA) for providing financial assistance to small businesses. The major cause of dissatisfaction with the program is that it takes too long to obtain a guaranty loan because of the number and complexity of the documents required to apply for a loan and the time required for a SBA review of those documents. SBA has been testing two pilot programs to expedite the process. The bank certification program aims to shorten the time required for SBA to review and approve guaranty loan applications. The operation effectiveness program is designed to reduce the number and complexity of the application documents. Both programs appear promising in shortening the time and simplifying the paperwork required to obtain a guaranteed loan. The certification program does little to broaden the participation of banks and other lenders in the program. SBA has yet to develop and implement a system to provide audit and oversight of the certified banks' loan portfolios. The use of the simplified application documents of the operation effectiveness program has shortened the loan application and review time in the one SBA region where it has been tested. However, the revised documents have not been adopted agencywide nor have they been used for loan applications in the bank certification program. The SBA Administrator should: (1) require that the simplified loan application forms and processing procedures be adopted agency-wide; (2) inform banks of the efforts of SBA to reduce loan processing time and to simplify loan application documents; and (3) monitor the activities of the banks operating under the bank certification program to assure compliance with program rules, regulations, and guidelines.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The purpose of the program is to help socially and economically disadvantaged people create and maintain small businesses. *Abstract:* The Small Business Administration (SBA) Economic Opportunity Loan Program has been a means for sustained economic progress for relatively few borrowers. Borrowers sampled by GAO were inexperienced, had low personal investments, and operated in disadvantageous locations. The program's ability to improve the conomic condition of low-income and disadvantaged people could be improved if SBA corrected deficiencies in management and operation and employed new techniques to overcome borrowers' inexperience and low capital investment. The program produced few lasting businesses because: loan officers did not adequately examine loan applicatants' qualifications and needs; SBA focused efforts on lending in quantity but not lending effectiveness; SBA was inattentive to program results; and there are long waiting periods for loans and less qualified applicants may receive loans at the expense of better qualified applicants. SBA has tried special assistance but without much success; borrowers have not usually accepted the management assistance offered, and it was of too limited scope and came too late. GAO recommended actions to the Congress including that Congress determine whether the higher interest paid by borrowers of direct Economic Opportunity Loans is justified by the greater risk associated with these loans or whether, in fairness to disadvantaged borrowers, the rates for the two programs should be the same. GAO also made recommendations to the SBA Administrator to improve the program; one suggestion was that there be a requirement for better assessment of loan applicants' prospects for establishing successful businesses and the loan amounts most likely to help them reach this objective.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of this program is to strengthen women's business enterprise. *Abstract:* The Small Business Administration and the Interagency Committee on Women's Business Enterprise have not given enough attention to using existing SBA and other Federal resources to meet the needs of women entrepreneurs. Their attention has been directed to designing new programs rather than to determine whether existing Federal programs are or could be made responsible to women business owners. An Executive Order requires that Federal departments take affirmative action in support of women's business enterprise through management, financial, and procurement assistance programs. GAO found that the Interagency Committee has not provided adequate guidance to Federal agencies for implementing the Executive Order. GAO recommended that the Administrator of SBA should direct the Associate Administrator for the Women's Business Enterprise Division to evaluate whether existing SBA programs are or can be made responsive to women entrepreneurs' needs and provide the Interagency Committee with the staff support necessary to revise the interagency guidelines and to develop an improved reporting system to facilitate coordination of Federal agency activities.

*Program Objectives:* The 8(a) Procurement Program of the Small Business Administration (SBA) is designed to channel noncompetitive Federal contracts to disadvantaged small businesses to help them to become self-sufficient. The program also provides management, technical, marketing, and financial aid. *Abstract:* The 8(a) Procurement Program has had some benefits but has fallen short of its intended goal. Only 166 of the participating firms have graduated from the program as competitive businesses. More than half of the participants that GAO interviewed were dissatisfied with or did not need the provided management, technical, and marketing aid. Removing inappropriate 8(a) firms from the program would give other disadvantaged firms an opportunity to participate. Often assessments as to whether 8(a) contract awards will have an impact on other small businesses were not always made or were superficial. Several interrelated factors have limited the program's effectiveness: the President's yearly 8(a) contract goal imposed on SBA, vague program graduation criteria, missing business plan and financial statement data, and limited staff resources. Redirecting the program could free the limited staff to better serve program participants, provide an opportunity for other disadvantaged firms to participate, and enhance the program's credibility within the business community. GAO recommended the SBA Administrator take steps to improve program administration, such as removing inappropriate 8(a) firms by assuring that the graduation criteria being developed are aggressively implemented and that termination requirements set forth in SBA procedures are followed.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to ensure adherence to merit practices in Federal employment. *Abstract:* The Small Business Administration (SBA) has been criticized in recent years for allowing illegal personnel actions based on considerations of political support. The Civil Service Commission recommended, and the SBA Administrator agreed to develop and implement, a merit plan for filling SBA district director position vacancies and a review and revision as necessary, of internal SBA policies on recruiting and staffing. Nonetheless, implementation of a periodic rotation policy for SBA district directors was widely criticized and raised new charges of political intrusion in personnel management at SBA. SBA rotation policy does not violate any law or regulation, and a number of Federal agencies also have rotation policies requiring periodic reassignment of certain employees. While the rotation policy does not violate any law or regulation, the policy was not adequately developed as implemented. SBA district directors were not formally consulted on the need for such a policy nor given an opportunity to provide input into its development. Alternative arrangements were not considered nor explored with directors who might refuse to accept a reassignment. After a separate investigation, the Special Counsel of the Merit Systems Protection Board (MSPB) found that violations of the Civil Service Reform Act and Federal regulations had occurred in selecting district directors for rotation. He recommended that SBA cancel the directed reassignments and restore the affected district directors to their former positions. He filed a formal complaint before the MSPB against SBA Associate Deputy Administrator of Support Services, recommending that he be removed, fined $1,000, and barred from the Federal service for a period of 5 years.

**Authority:** Small Business Act, as amended (P.L. 85-536; 72 Stat. 384; 15 U.S.C. 631 note); Executive Order 11625.
**Availability:** GAO

*Program Objectives:* Section 8(a) of the Small Business Act gives the Small Business Administration (SBA) the authority to enter into contracts for goods and services with Federal agencies. SBA then subcontracts this work to selected small businesses. The purpose of this process, known as the 8(a) program, is to help socially and economically disadvantaged small businesses achieve a competitive position in the marketplace. *Abstract:* GAO reviewed allegations made by the BDM Corporation against Arcata Associates and the SBA to determine whether SBA's management of the 8(a) program was deficient. It was found that several of BDM's allegations had merit, and GAO concluded that SBA's management of Arcata's participation in the 8(a) program had been deficient. It was recommended that the Administrator of SBA review the Arcata case with his Inspector General to determine whether contract termination and/or program removal was warranted, develop more specific economic eligibility criteria, and take action to ensure compliance with statutory and regulatory authority.

*Review of SBA Certificate of Competency Program.*
11/24/80; 3 pp.
**OMB Funding Code/Title:** 73-0100-0-1-376 / Salaries and Expenses
**Program:** Procurement Assistance
**CFDA NO.:** 59.009
**Congressional Relevance:** *House* Committee on Small Business; *Senate* Committee on Small Business. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State,

Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Small Business Act, as amended (P.L. 85-536, § 2; 72 Stat. 389; 15 U.S.C. 638).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Small Business Administration (SBA) is authorized to issue Certificates of Competency (COC) for small businesses whose bids or proposals have been rejected by Government contracting officers because of lack of responsibility for any reason. A COC is a written instrument, issued to a Government contracting officer certifying that the small company has the capability to perform a specific Government contract. The Government officer is required to accept such certification and must award the contract to the firm. *Abstract:* The GAO review of COCs indicated that: (1) COC cases were processed in a timely manner and the decisions were adequately documented; (2) operating procedures for processing COC cases were comprehensive and were being complied with; (3) small businesses that were issued COCs performed as well as small businesses without COCs; and (4) the General Services Administration and Department of Defense officials generally viewed the COC program favorably. A potential weakness exists in the reporting by SBA on the status of contractor performance. Procedures require the regional offices to follow up and report monthly on the performance and financial status of active COC cases. In at least two instances, a review of the monthly reports on these cases showed that contracts were not progressing on schedule, but the contracts were classified as on schedule because the contractors were determined not to be responsible for the delays. SBA needs to accurately report the status of all active contracts that were awarded after the issuance of COCs. The Contract Progress Report does not now provide a category for classifying contracts that were delinquent when the delinquency was caused by the Government or for other excusable reasons. The report should be revised to include a category or categories for classifying such contracts.

*Study of the Duplicating Branch.*
5/8/81; 18 pp.
Richard Bursch
**OMB Funding Code/Title:** 33-0100-0-1-503 / Salaries and Expenses
**Program:** Administrative and Support Activities
**Congressional Relevance:** *House* Committee on *House* Administration; *Senate* Committee on Rules and Administration. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Smithsonian Institution Act of 1846, as amended (P.L. 29-178; 20 U.S.C. 41-70); Revised Statute 5579-5594. Smithsonian Institution Act of 1949 (P.L. 81-259; 20 U.S.C. 41).
**Availability:** Agency

*Program Objectives:* The duplicating Branch is responsible for producing duplicated materials in an efficient and timely manner. *Abstract:* This review of the Duplicating Branch was conducted to determine user satisfaction, effectiveness of printing and distribution services, workloads, expected demand, and plans to meet future needs. The report recommended that management of this function improve documentation of production to permit expanded analysis and reporting of workload, response time, equipment use, and level of demand and to serve as a basis for improved justification of any additions to, or changes in, staffing, space, and/or equipment. Production standards and goals should be established for printing and distribution operations. The Branch management should also identify a position for production control or administrative assistant, conduct annual user surveys, develop a 5-year plan for equipment acquisition, and provide a users' guide.

**Congressional Relevance:** *House* Committee on *House* Administration; *Senate* Committee on Rules and Administration. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Smithsonian Institution Act of 1846, as amended (P.L. 29-178; 20 U.S.C. 41-70); Revised Statute 5579-5594. Smithsonian Institution Act of 1949 (P.L. 81-259; 20 U.S.C. 41).
**Availability:** Agency

*Program Objectives:* Public education is a basic museum purpose fulfilled in large measure through the exhibition of representative objects and the presentation of knowledge derived from their study. Formal review of visitor response and concepts learned provide a means to assess the effectiveness of exhibitions developed and serve as a guide for the planning of new education programs. *Abstract:* The purpose of a teaching hall must be clearly stated to maximize its learning potential. The purpose of each display area within the Exhibit should also be made clear. The interrelationships between the display areas should be apparent to the average visitor. Each major concept requiring emphasis must be strategically positioned by an artifact, specimen, object, or display area that has sufficient appeal to attract visitor interest and attention. Labels that convey important conceptual information must be stated succinctly to insure that they will be read and also contain enough detail to help visitors comprehend the subtle messages being conveyed. Conceptual labels must be cross-referenced with each other throughout the Exhibit to help visitors comprehend conceptual relationships. Highly detailed and technical information designed specifically for the exceptionally interested and/or sophisticated visitor should be presented through some kind of optional format. Mediated presentations within the Exhibit deserve more careful consideration.

## TENNESSEE VALLEY AUTHORITY

**E05700-001**
*Productivity Reporting in TVA.* (IE 80-1).
2/81; 30 pp.
Woody S. Byars
**OMB Funding Code/Title:** 64-4110-0-3-452 / Payment to Tennessee Valley Authority Fund
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 16 U.S.C. 831 et seq.).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The objective of this study is to evaluate the productivity reporting indices used in various organizational elements and to make improvements where applicable to create indicators which are more meaningful to the Tennessee Valley Authority (TVA). Some productivity indices were regrouped to better align with the current TVA organization. Better accountability should result.

**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 16 U.S.C. 831 et seq.).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The program consisted of a review of opportunities to streamline procedures for dealing with the public. The scope of the study included: (1) identification of all areas within the Tennessee Valley Authority (TVA) where public contracts occur on a routine basis; (2) a preliminary analysis of existing procedures for processing requests for services, information, authorizations (permits), and the like; and (3) recommendations of specific improvements or of priorities for further study leading to specific recommendations. The report provides a comprehensive summary of public interfaces within TVA and the relative importance of these interfaces. In addition, 14 major efforts for improving responsiveness in interactions with the public are described. Subsequent status updates performed in March and September 1981 document the actual results achieved from these efforts.

**Program:** Power Program: Power Supply and Use
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 67; 16 U.S.C. 831).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This study was undertaken to define the space, equipment, and other support facilities needed to provide support services for the 2- and 3-unit nuclear plant maintenance function and to prepare a functional layout of the revised maintenance facility at the Tennessee Valley Authority's (TVA's) Browns Ferry Nuclear Plant. The study concluded that the maintenance facilities at TVA's existing nuclear plants should be approximately doubled.

*Short-Interval Scheduling.* (IE 79-5).
3/81; 25 pp.
Suzanne W. Piercy
**OMB Funding Code/Title:** 64-4110-0-3-271 / Payment to Tennessee Valley Authority Fund
**Program:** Power Program: Power Supply and Use
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 67; 16 U.S.C. 831).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The feasibility of developing and implementing short-interval scheduling techniques in a nuclear plant construction environment is addressed. The process followed in preparing a trial detailed short-term schedule for a selected construction activity, a comparison of the trial schedule to actual performance, and guidelines for implementation on a pilot basis are presented. This project specifically addresses the part of a work force performance management system associated with planning, scheduling, and control of work at the craft level. The project is aimed at helping the assistant craft superintendent translate project control defined activities and tasks into workable short-interval schedules with emphasis being placed on work instruction formats given to the hourly foremen. It stresses setting attainable work goals, estimating work requirements, increasing productivity, and identifying and implementing corrective actions necessary to maximize project schedule compliance.

*Review of Office of Engineering Design and Construction Implementation Progress.*
3/81; 57 pp.
James O. Love
**Contractor:** Theodore Barry and Associates; 135 South LaSalle Street, Chicago, IL 60603
**OMB Funding Code/Title:** 64-4110-0-3-271 / Payment to Tennessee Valley Authority Fund
**Program:** Power Program: Power Supply and Use
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 67; 16 U.S.C. 831).

**Availability:** Agency

*Abstract:* This study was conducted to assess the continuing efforts on the part of the Tennessee Valley Authority (TVA) to implement the recommendations resulting from a review of the Office of Engineering Design and Construction completed in February 1980 and to provide appropriate guidance and/or redirection to these implementation efforts in order to maximize the benefits resulting from the recommendations. The report cites significant progress on all major recommendations and concludes that implementation actions are now at a "fine tuning" stage where further improvement possibilities are primarily related to consolidation and maintenance of current benefits. The most important achievements during the past year were: (1) introduction of improved project management and budget control systems; (2) implementation of more effective "tough-minded" quality assurance procedures; (3) the use of short-interval scheduling and work sampling to improve work force utilization by more than 10%; and (4) the initial implementation of a major control system to reduce costs by improving construction material and equipment control.

*Management Review of Services Provided by the Office of Natural Resources in Support of Office of Power Missions.* (MR 80-8).
2/81; 81 pp.
Roland L. Dupont
**OMB Funding Code/Title:** 64-4110-0-3-452 / Payment to Tennessee Valley Authority Fund
**Program:** Natural Resources
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 67; 16 U.S.C. 831).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The purpose of this study is to review and document all Office of Natural Resources activities that are accomplished to support Office of Power missions in order to identify potential improvements in efficiency and effectiveness. The study involves evaluating duplication and overlap of natural resources services and environmental activities throughout the Tennessee Valley Authority (TVA) and developing recommendations for organizational, management, and procedural changes to provide the appropriate levels of required services at the lowest possible cost. This report provides a comprehensive management description and analysis of activities performed by TVA's Office of Natural Resources. It contains 24 major recommendations for improving efficiency and effectiveness and for achieving better decisionmaking by TVA managers of environmental compliance matters. The major finding is that TVA's current level of technical proficiency in environmental matters is excellent, but that better management control and coordination of related activities could reduce the total cost of environmental compliance by several million dollars per year.

**Program:** Natural Resources
**CFDA NO.:** 62.005
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 67; 16 U.S.C. 831).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This study was conducted to evaluate the organizational, staffing, and management requirements needed to perform administrative functions in a newly consolidated field operations division for natural resource operations and to make recommendations to resolve management problem areas and reduce costs. The report concluded that significant reductions in cost could be achieved by developing standard administrative methods and consolidating fragmented functions. Recommendations are provided for the organization structure and staffing of these services in all central office and field locations and for specific improvements in administrative methods and procedures.

**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 67; 16 U.S.C. 831).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* This report is a followup on the implementation status of recommendations made in June 1980 for management improvements in the TVA health physics function at nuclear plants. The report cites significant accomplishments by management in responding to and implementing the changes recommended in the earlier report. Two areas where continuing effort is necessary are the budget coordination process for staffing the health physics function at nuclear plants and retraining of first level supervisors in a more proactive problem-solving role. The report includes the results of an employee morale survey for this function.

### E05700-010

*Review of the Tennessee Valley Authority's Procurements of Automatic Data Processing Equipment.* (EMD-81-20).
11/8/70; 9 pp. + app. (1 pp.)
**OMB Funding Code/Title:** 64-4110-0-3-452 / Payment to Tennessee Valley Authority Fund
**Program:** General Services
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 48 Stat. 60; 16 U.S.C. 831c).
**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* The objective of the program is to administer Tennessee Valley Authority (TVA) power programs. *Abstract:* With full practical use of its Automated Data Processing (ADP) resources, TVA could have avoided substantial expenditures in supplementing the processing capacity of its central computing system. TVA policies and procedures for ADP management did not result in the full practical use of its computing resources. TVA progress toward a full competitive procurement of ADP equipment to replace its central computing system has been hampered by numerous delays. Although the agency has received contractor proposals, the specifications for the procurement have tended to limit competition. The Chairman of the TVA Board of Directors should require that responsible agency officials validate TVA existing and future ADP requirements and develop and implement policies and procedures for assuring the full practical use of ADP equipment. To ensure that ADP acquisitions are economical, he should also direct that a contract for replacing TVA large-scale ADP equipment not be consummated until the agency has validated its ADP requirements and is efficiently using its existing ADP equipment.

### E05700-011

*Triennial Assessment of the Tennessee Valley Authority: Fiscal Years 1977-1979.* (EMD-80-91).
8/13/80; 40 pp. + 2 app. (15 pp.)
**OMB Funding Code/Title:** 64-4110-0-3-452 / Payment to Tennessee Valley Authority Fund
**Program:** Power Supply and Use
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 16 U.S.C. 831).
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to manage power supply and demand in seven Tennessee Valley States. *Abstract:* The Tennessee Valley Authority (TVA) has not acted very rapidly in developing joint solar projects with the Department of Energy (DOE). TVA could achieve greater co-generation potential and serve the people of both the region and the Nation by developing innovative co-generation demonstrations that use other less-proven fuels and modes of co-generation. Agency officials have implemented neither a Valley-wide program to control water heaters nor a system to periodically reevaluate its hydroelectric projects. TVA employees are still exempt from labor relations legislation affecting private and other public employees. Congress should revise the TVA charter to better reflect current national energy priorities by directing TVA to: (1) take the lead in developing electricity management plans and programs, (2) promote energy conservation and the most efficient production and use of energy, (3) encourage the use of renewable resources, and (4) assure adequate public involvement in energy planning and policy making. Congress should act favorably on TVA requests for funding of energy-supply demonstration projects meeting the criteria GAO recommended and should include TVA employees under statutory labor-relations procedures applicable to private or other Federal employees. TVA should increase its coordination and cooperation with the DOE and accelerate the development of joint projects. When funding for a demonstration having national benefits exceeds TVA incremental cost, agency officials should request Federal funding. TVA should undertake co-generation applications and demonstrations that use less-proven fuels and technologies, in addition to its program for fuel cell and coal gasification development, while actively pursuing development of co-generation that uses already existing technologies. TVA should implement a water-heater control program, develop a system to periodically reevaluate its hydroelectric projects to insure prompt action on energy-efficient and economical improvements, and take action to enhance employee influence over the bargaining process.

### E05700-012

*Tennessee Valley Authority Needs a Written Policy on the Use of Power System Revenues for Research, Development, and Demonstration.* (EMD-81-16).
11/25/80; 2 pp.
**OMB Funding Code/Title:** 64-4110-0-3-452 / Payment to Tennessee Valley Authority Fund / National Energy Demonstrations.
**Congressional Relevance:** *House* Committee on Public Works and Transportation; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 16 U.S.C. 831).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to conduct research and development activities for the national energy program. *Abstract:* The Tennessee Valley Authority (TVA) has an informal policy that limits expenditures of power funds for research and development to no more than 2% of annual gross power system revenues. That level of expenditures would place TVA among the utility industry leaders in research and development spending. At the time of the GAO review, TVA officials were uncertain about the criteria for identifying all expenditures that are subject to the 2% ceiling. It does not appear that the 2% ceiling has been exceeded, but TVA needs to establish a formal policy on what level of expenditures will be made for research and development and what constitutes those expenditures.

### E05700-013

*Tennessee Valley Authority Needs to Improve Security and Inventory Controls at Power Sites.* (EMD-81-60).
3/10/81; 14 pp. + App. (3 PP.)
**OMB Funding Code/Title:** 64-4110-0-3-452 / Payment to Tennessee Valley Authority Fund
**Program:** Power Program: Power Supply and Use
**Congressional Relevance:** *House* Committee on Small Business; *Senate* Committee on Small Business. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.

**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 16 U.S.C. 831).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to maintain appropriate security procedures for Tennessee Valley Authority (TVA) assets. *Abstract:* Because no central authority exists for overall security at TVA facilities, major offices of divisions have essentially developed their own security programs, with the Public Safety Service acting in an advisory capacity. Many of the policies and plans for security measures have not been implemented. Consequently, the number of thefts continues to rise, and TVA facilities remain vulnerable to vandalism and potential sabotage. Losses of both tagged and untagged equipment at TVA construction projects and powerplants are excessive, as evidenced by the large number of theft reports being generated from construction projects and by the substantial number of tagged equipment items not located during physical inventories at TVA fossil plants. The TVA Board of Directors should: (1) establish standard accountability procedures for small tools at all construction projects and power production plants; (2) develop a system for conducting tagged equipment inventories at TVA construction projects at acceptable intervals; (3) standardize TVA theft reporting practices at all its projects and powerplants and require that missing items be reported to the Public Safety Service for investigation; (4) appoint an official at General Manager staff level to be responsible to the General Manager for overall TVA security; (5) place the Power Security Section, the Public Safety Service, and any other office involved in security under the direction of the TVA Security Official; (6) ensure that the Internal Review Branch continues to make periodic reviews and follows up on previous recommendations; and (7) require periodic progress reports to the General Manager and Board of Directors concerning results in reducing thefts and vandalism and in improving control over TVA tools, equipment, and inventories.

**Program:** General Services
**Congressional Relevance:** *House* Committee on Small Business; *Senate* Committee on Small Business. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Tennessee Valley Authority Act of 1933, as amended (P.L. 73-17, § 4; 16 U.S.C. 831c).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to monitor operating results and financial conditions. *Abstract:* Several significant organizational changes occurred within TVA in Fiscal Years (FYs) 1979 and 1980, including a reduction from 16 to 9 major offices. Additionally, administrative and general expenses of about $8 million in 1978, $11 million in FY 79, and $17 million in FY 80 were capitalized by TVA for allocation to production costs in future periods. Although some of the increases were related to the organizational changes, they were primarily attributable to higher personnel and related costs resulting from workload growth and from new and expanded functions and programs. Administrative and general expenses, as well as overall operating costs of the three offices tested, had a negligible effect on power-production costs because of their relative insignificance in comparison with other production costs.

## OFFICE OF PERSONNEL MANAGEMENT

**E05900-001**
*Civil Service Disability Retirement Program.* (FPCD-81-18).
12/15/80; 2 pp. + app. (10 pp.)
**OMB Funding Code/Title:** 24-8135-0-7-602 / Civil Service Retirement and Disability Fund
**Program:** Annuities
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 584; 5 U.S.C. 8348). Civil Service Reform Act of 1978 (P.L. 95-454, title IX, § 906; 92 Stat. 1186; 5 U.S.C. 8348).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* In addition to reviewing the Office of Personnel Management's (OPM's) actions on the previous recommendations, GAO examined the processes used by OPM to adjudicate disability retirement claims and monitor the disability rolls. Benefits may have been paid unnecessarily to many retirees. Some disability applications were approved without sufficient medical evidence. Some disability retirees were probably capable of performing other types of work at the time of retirement; some were receiving disability benefits while performing jobs similar to their Government jobs; and some were able to earn more than the pay for their prior Government jobs but continued to receive disability benefits. The Director of OPM should: (1) amend the proposed regulatory revisions to establish the same placement rights for disabled employees as those available to recovered disability retirees, include reassignment of disabled employees across agency lines, and discontinue advising employees to reduce their sick leave balance to 60 days before filing for disability retirement; (2) include, as part of the placement policy, the downgrading of potential disability retirees to jobs with duties they can perform, and seek a statutory change, if necessary, to enable this action; (3) develop procedures which will establish complete and timely earnings and medical reviews of disability annuitants; and (4) develop disability case review procedures which provide for medical reviews of annuitants classified as permanently disabled but who display strong individual annual earnings.

*Changes Needed in Calculation of Reduction in Civil Service Annuities for Survivor Benefits.* (FPCD-81-35).
2/26/81; 8 pp. + app. (1 pp.)
**OMB Funding Code/Title:** 24-8135-0-7-602 / Civil Service Retirement and Disability Fund
**Program:** Annuities
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 584; 5 U.S.C. 8348). Civil Service Reform Act of 1978 (P.L. 95-454, title IX, § 906; 92 Stat. 1186; 5 U.S.C. 8339).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the method used by the Office of Personnel Management (OPM) to reduce the civil service annuities of retired Federal employees who have elected survivor benefits for their spouses. OPM calculates the reduced annuity only once for an individual at the time he or she retires and elects survivor coverage. Thereafter, the reduced annuity is adjusted by semiannual cost-of-living increases. GAO believes that a more equitable method would be to recalculate the annuity reduction each time there is a cost-of-living increase. If a marriage ends, OPM recomputes and restores the full annuity. In addition, it maintains a record from that time forward of the adjusted reduced annuity and survivor benefits payable in case the retiree remarries. This procedure preserves the potential for inequity among single retirees in the event of their subsequent remarriage and should be changed. The Acting Director, OPM, should: (1) determine reduced annuities for survivor coverage by first adjusting the full annuities for cost-of-living increases and then applying the reduction formula; (2) propose a change to section 5 U.S.C. 8339 so that, upon remarriage, a retiree's survivor reduction would be determined according to the reduction formula applicable to other retirees; and (3) change the method of reestablishing full annuities in cases of marriage dissolution to the method described in this report.

*Abstract:* Federal employees are participating in a nationwide voluntary experiment to determine the effects of alternative work schedules and to determine whether the Federal Government can successfully use them. Congress authorized the use of alternative work schedules with the intent that the Office of Personnel Management (OPM) carefully design, control, and evaluate an experimental program. OPM has not carried out the Congressional mandate. For Fiscal Year 1980, Congress funded less than one-half of the OPM budget request for the project. Because OPM did not receive the funding requested and did not internally reallocate the additional funds necessary, it eliminated some tasks and reduced the scope of others. OPM should develop accurate and reliable statistics on the number and type of work schedule experiments, and the number of work units and employees actually using them. It should review a representative sample of work schedule plans to determine their technical accuracy, compliance with the Act and OPM regulations, and effects on the evaluation results. OPM should also work with Congress in assessing the adequacy of the current master plan for evaluating the alternative work schedules experiment. Congress should hold oversight hearings to assess the adequacy of the OPM master plan. In conducting this oversight, Congress should consider: (1) the need for, and cost and benefits associated with, modifying the existing master plan or developing a new one; (2) the necessity for extending the experiment; and (3) the desirability of establishing a joint executive agency task force to redesign and execute the master plan and to provide the needed experimental control.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* In an examination of the economic protection provided to widows or widowers and divorced spouses of Federal employees, GAO evaluated the equity of the current law, its administration by the Office of Personnel Management (OPM), and possible alternative methods of providing retirement income to former spouses. The law requires OPM to comply with State court orders or decrees that divide civil service retirement benefits in divorce actions. As of March 1980, OPM had received 261 court orders requesting apportionment of retirement benefits; only 30 of them were not honored. In general, GAO believes that the current provisions in the civil service and Foreign Service retirement systems allowing the courts to decide, on a case-by-case basis, whether and in what amounts retirement benefits should be apportioned between Federal retirees and their former spouses are preferable to automatic apportionment of these benefits as has been proposed in legislation before Congress. Except for garnishment, the uniformed services retirement system does not allow direct payment of retirement benefits to former spouses in compliance with court orders. Under Social Security, divorced spouses are entitled to an amount equal to 50% of the retired worker's benefit if the marriage lasted at least 10 years; the retiree's benefit is not reduced, and a second spouse may also receive benefits. Full survivor benefits are also guaranteed to divorced spouses after 10 years of marriage. The extension of social security to all Federal retirement systems to supplement social security where necessary is an alternative approach.

**Geographic Relevance:** National

*Abstract:* GAO observed the Office of Personnel Management's (OPM's) initial attempts to encourage and evaluate proposals for demonstration projects authorized by Title VI of the Civil Service Reform Act of 1978. These projects are intended to determine whether changes in personnel management policies and procedures would result in improved Federal personnel management. The results of OPM efforts to solicit demonstration projects were disappointing. Procedures for evaluating proposals were inefficient and not based on a the demonstration concept. Moreover, the initial projects may have limited potential for application beyond the demonstration sites and, in one case, may have difficulty demonstrating successful results. Federal law requires agencies to consult with employees before including them in a demonstration project. But the objectives of consultation and the extent to which it should occur are not specified by law, and OPM has not provided additional guidance in this area. The Director of OPM should: (1) develop a framework for evaluating the proposals as a means of directing resources into the most significant areas; (2) require that proposals contain provisions for testing results beyond the demonstration project's environment; (3) assert the leadership of OPM in establishing project objectives which meet the needs of OPM and in assembling and coordinating the resources to insure these objectives are met; and (4) establish criteria and objectives for the employee consultations which make the process effective.

**Geographic Relevance:** National

*Abstract:* Despite a 5.5% salary increase in October 1979, the adverse effects of limiting or denying these increases to Federal executives have worsened. The Senior Executive Service (SES) was created to provide monetary rewards to many top executives on the basis of performance. Changes in pay-setting for Federal executives are critically needed if: (1) the problem executives face due to diminishing real salaries is to be alleviated; (2) pay distinctions are to accurately reflect differences between levels of responsibility and performance; and (3) agencies are to avoid serious recruitment and retention problems. SES success also depends on the granting of annual adjustments to the Executive Schedule and granting performance awards within already established guideleines. Restricting these essential incentives could exacerbate current problems, foster Government inefficiency, and increase Government expenditures to a level that would far exceed the costs of regular pay raises and performance bonuses. The congressional salaries' link to the Executive Schedule has adversely affected top executives at times when the Congress has, for a variety of reasons, held its own pay down. This has also helped to hold down the Level 5 ceiling on General Schedule pay, compromising legislative mandates for pay comparability and pay distinctions to match work and performance distinctions. The congressional salaries link to Executive Level 2 salaries has no legal foundation. Congress should improve the pay-setting process for Federal executives by: (1) allowing the annual adjustments for executives under Public Law 94-82 to take effect; (2) discontinuing the practice of linking congressional and Executive level 2 salaries; and (3) allowing SES performance and rank awards to take effect.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Civil Service Reform Act of 1978 created the Senior Executive Service (SES) which covers managerial/supervisory positions in the executive branch. SES has two types of positions: general and career reserved. The general position is the norm for executives with career, noncareer, or limited status. Only a career appointee can occupy a career-reserved position. The Office of Personnel Management (OPM) did a creditable job as the focal point for conversion into the SES, but some concerns remain. The Director, OPM, should: develop criteria for agencies to request future allocations of SES positions and establish criteria to aid OPM personnel in their review of these requests; consider adding occupational disciplines requiring impartiality or the public's confidence in Government; review general positions to insure proper designation; propose a corrective amendment to the Reform Act to require substantial career-oriented service for conversion to career-type positions; verify the incumbency requirement for executives who converted from noncareer to career status and who make similar future conversions; propose an amendment to clarify the "repealer provision" of the Reform Act regarding special agency authorizations; propose changes to achieve consistency among agencies as to the maximum percentage of career executives eligible for bonuses in any 1 year; increase OPM onsite compliance reviews of agencies' SES activities; consider separating organizational responsibility for compliance reviews from technical assistance; and prohibit appointments of officals responsible for auditing executives under P.L. 95-82 to take effect; discontinue the practice of linking congressional and Executive Level II salaries; and allow the bonus and rank positions of the Reform Act to take effect.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The loss in Federal productivity because of mental health problems, such as alcoholism, can be considerable. Information was obtained on what mental health programs a sample of Federal agencies are providing their employees and, where possible, on the success of these programs. The primary mental health program available to Federal employees is counseling services for alcohol and drug abuse problems. In addition, most agencies provide some counseling for a wide range of emotional problems. The Office of Personnel Management (OPM) has recommended that agencies implement a broad-based counseling program for emotional, marital, financial, and legal problems, as well as for alcohol and drug abuse. Many of the agencies visited had not formally adopted the recommended broad-based program. OPM has not published standards or set goals that can serve as indicators of a successful agency mental health counseling program. In addition, recent OPM evaluations and a prior GAO report have revealed management problems in various aspects of mental health program implementation. However, many agencies have reported to OPM that the mental health counseling services they provide are helping employees resolve their problems and return to an acceptable level of performance on the job.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO studied the concept of reward systems based on productivity standards to identify ways by which Federal workforce productivity can be improved. GAO found that: (1) productivity-based reward systems have had positive effects on productivity in certain work situations, and there seems to be potential for greater use of the concept in the Federal Government; (2) current Office of Personnel Management (OPM) guidance on incentive awards for Federal employees does not adequately cover productivity-based reward systems; and (3) some of the Federal agency initiatives do not include key features of well designed productivity-based reward systems, while others include features or have had experience that could be helpful to the design and operation of other agencies' systems. The Director, OPM, should: (1) develop additional Federal Personnel Manual incentive award guidance specifically for productivity-based reward systems so Federal agencies will be aware of the opportunity to establish these systems and the limitations on their use; (2) prepare a handbook of instructions describing key steps, principles, and features of productivity-based reward systems to help Federal agencies design, implement, and manage their initiatives; and (3) identify and analyze ongoing Federal agency productivity-based reward systems in order to be able to provide assistance where needed and to highlight useful features and experiences.

**Authority:** Act of September 6, 1966 (P.L. 89-554, as amended by; P.L. 95-454; 5 U.S.C. 5101 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO reviewed the Administration's proposed total compensation comparability plan for civilian employees in the Federal Government. Some benefits received by many private sector employees were not included in the formal benefit models of the Office of Personnel Management (OPM). The failure to consider these benefits in determining total compensation comparability could result in an understatement of the value of private sector compensation. GAO also found that many benefits are complex and difficult to measure. The Congressional Budget Office estimates that Federal fringe benefits may range anywhere from the equivalent of 2.8% of pay behind private sector programs to 7.4% of pay ahead of the private sector, depending on what benefits are included and how they are measured. OPM has many decisions to make in implementing its pension model. On a few of these decisions, GAO favors choices other than the ones made by OPM in its full-scale test. Inequities will result unless differences in benefits between white- and blue-collar workers are recognized. GAO found that the benefits differ on a locality basis. Surveys in five localities showed that benefits varied by almost 10 percentage points of pay. A plan being considered by OPM would utilize locality pay and national benefits to adjust compensation in a specific locality. This could create serious inequities.

**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 584; 5 U.S.C. 8348). Civil Service Reform Act of 1978 (P.L. 95-454, title IX, § 906; 92 Stat. 1186; 5 U.S.C. 8348).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Under the civil service retirement system, employees with 30 years' service can elect to retire at age 55. In certain circumstances, they can voluntarily retire earlier. Early retirements were meant to open up jobs for younger employees who would otherwise be dismissed during agency reductions or reorganizations. The Office of Personnel Management (OPM) is permitting too many employees to retire earlier than they normally could. Such retirements may be appropriate if they prevent younger employees from being laid off, but usually this is not the case. GAO found that: (1) agencies are not considering and exhausting other management techniques for solving staffing problems before turning to the early retirement program; (2) early retirements are not restrictive enough to insure a high probability of job savings; and (3) under the current program, employees can retire early even though none of an agency's employees are facing involuntary separation. In some cases, agencies' estimates of the impact of reductions were poorly documented and proved to far exceed the eventual outcome. Early retirements in these agencies resulted primarily in new hiring, not job savings. GAO found a tendency for agencies to overstate the benefits derived from early retirement authorizations. GAO estimates that early retirements cost at least $109 million in fiscal year 1980. OPM has begun to examine more closely agency requests for early retirement authorizations. However, its basic criteria for approval remain unchanged. Congress should repeal the early retirement provisions included in the Civil Service Reform Act and mandate that OPM establish controls necessary to assure itself, before an early retirement authorization is granted, that it would: (1) correct staffing difficulties which could otherwise only be corrected by a reduction in force; and (2) save other employees' jobs.

**Program:** Compensation
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554, as amended by; P.L. 95-454, title IX, § 906; 5 U.S.C. 5301-5385).
**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* The purpose of a cost-of-living allowance is to enable a Federal employee in a nonforeign area to maintain purchasing power similar to that of a comparable Federal employee in Washington, D.C. *Abstract:* President Reagan's pay reform proposal would empower the President to designate pay areas, establish locality rates of pay for General Schedule employees, and eliminate the nonforeign area cost-of-living allowance program. As long as the nonforeign cost-of-living allowance remains in effect, GAO believes it should be based on spendable income rather than base pay. This change would make the cost-of-living allowance consistent with cost-of-living programs administered by the Departments of Defense and State, eliminate allowances for expenses which are not related to place of employment, and save at least $23.2 million annually. The Director, Office of Personnel Management, should base cost-of-living allowance payments on a percentage of spendable income, recognizing the number of dependents and salary level of the employees affected.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Many Federal agencies may not be prepared by the October deadline to make determinations concerning merit pay as set out in the Civil Service Reform Act of 1978. Most Federal officials have not had any previous merit pay experience, and agencies have not developed methods to measure how much it is costing to implement merit pay or whether merit pay will improve agency performance. If these problems are not considered, the Federal Merit Pay Program will be no more successful than previous attempts to base pay on performance. Many Federal agencies do not plan to pretest their systems, and those who do plan only limited pretesting. Also, many agencies will not have sufficient time to conduct thorough training sessions. The Director, Office of Personnel Management, should: (1) establish minimum pretest criteria which agencies must meet before making initial merit pay determinations; (2) take a stronger role in encouraging agencies to develop additional training courses and other programs designed to increase managerial skills and gain employee acceptance of pay-for-performance systems; (3) require agencies to define the objective of their merit pay systems more specifically and to develop evaluation strategies; (4) require agencies to prepare more detailed information on merit pay costs; and (5) define more clearly which employees are intended to be included in the merit pay system.

**Availability:** GAO

*Program Objectives:* Medical necessity programs were developed to help contain health care costs and promote good health care. *Abstract:* Improved care and cost reduction benefits of medical necessity programs can be realized more fully if the Office of Personnel Management (OPM) keeps abreast of program developments and makes sure they are adopted promptly. Medical necessity programs are relatively new; benefits realized so far have been limited. However, these programs enjoy widespread physician acceptance, and benefits appear likely to increase as the programs are expanded and more widely used. The Director of OPM should systematically monitor developments in these programs in both the private and public sectors; evaluate these programs to determine how Federal Employees Health Benefits Program plans might use them to foster better health care and lower health insurance costs; and require the Federal Employees Health Benefits Program plans to use aspects of these programs that are proven beneficial.

## OFFICE OF PLANNING AND EVALUATION

**E05913-001**
*Interagency Advisory Group for Personnel Policy and Operations.* (FPCD-80-77).
9/15/80; 5 pp.
**OMB Funding Code/Title:** 24-0100-0-1-805 / Salaries and Expenses
**Program:** Work Force Management (Agency Compliance, Evaluation, and Work Force Information)
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 524; 5 U.S.C. 7301); Reorganization Plan 2 of 1978.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Since implementation of the Civil Service Reform Act in 1978, the relationship between the new Office of Personnel Management (OPM) and agency personnel offices has been fundamentally altered. Accordingly, the Interagency Advisory Group (IAG) was restructured to reflect this changed relationship. IAG is a forum for regular communication between the agency personnel directors and OPM. The current structure attempts to provide a forum for personnel directors to discuss: (1) areas of broad significance relating to work force productivity, effectiveness, and accountability; (2)

proposed legislation and executive initiatives; and (3) program improvements. IAG should be relocated from the Office of Planning and Evaluation (OPE), where it is housed, to the Agency Relations Group. OPE could continue providing the necessary white papers to IAG. By locating IAG in the Agency Relations Group, the policy development functions would not be lost; rather, IAG would be unified with its mission subgroup directors and the agency officers who have daily contact with agencies. This would achieve a better functional fit. The IAG Executive Committee should include the Associate Director for Agency Relations and the four Assistant Directors of the community of interest groups as ex-officio members. This would help communication and coordination and provide incentives for more active involvement of the Assistant Directors. Further, the Executive Committee should review the current IAG organizational structure, specifically, alternative methods of organizing the personnel directors. IAG should also consider setting an annual policy agenda in conjunction with the OPM policy agenda, which could then be used as the basis for planning quarterly conferences.

**Authority:** Act of September 6, 1966 (P.L. 89-554, as amended by; P.L. 95-454, title IX, § 906; 80 Stat. 584; 5 U.S.C. 8347, 8348).
**Availability:** GAO

*Abstract:* The question of intended versus actual use of the Office of Personnel Management's (OPM's) Honeywell computer system in Macon, Georgia, arose during oversight hearings on delays in processing retirement claims. The Subcommittee on Compensation and Employee Benefits requested a study to determine whether the system is being used for the purpose originally planned and whether it can support additional processing. GAO's review showed that in 1975 OPM acquired a Honeywell 66/80 computer system to satisfy the data processing needs of the entire agency. This system was to replace obsolete RCA Spectra series computers. Due to problems in converting applications to the Honeywell system, the Spectra computers remained in place much longer than intended and service suffered. The Honeywell system is being used in the manner originally intended, but not to the extent intended. Some OPM elements have established their own computer installations and outside users have become a significant part of the Honeywell user community. The system can support additional processing. Workload growth trends, however, indicate that residual capacity will soon be exhausted.

*Program Objectives:* The purpose of the Senior Executive Service (SES) is to establish a comprehensive personnel system for senior managers and supervisors in the Federal Government in positions immediately below the executive level. *Abstract:* The results of a survey of 171 executives (86 responses) at General Schedule (GS) grades 16 through 18 or the equivalent who left the Federal service between October 1978 and July 1979, when the SES came into existence, are reported. The survey is intended to provide baseline data to help evaluate the effectiveness of the SES in retaining senior personnel. The possibility of a continued ceiling on executive salaries and less than full comparability pay raises were the two most commonly cited reasons for which executives left the government during the survey period.

*Program Objectives:* The Presidential Management Intern Program is designed to attract to the Federal Service exceptional graduates of advanced degree programs in the field of management. Each year, up to 250 individuals are selected to serve two year internships with participating agencies. *Abstract:* The Presidential Management Intern Program, required to function under the different approaches of more than 40 different Federal agencies and departments, has been very successful in attracting to the Federal service men and women interested in pursuing a career in manaqement. The report's major finding is that participating agencies need to do a better job in communicating the program's goals and objectives to supervisors, mentors, and interns.

**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 477; 5 U.S.C. 5509). Civil Service Reform Act of 1978 (P.L. 95-454, title II, § 203(a); 92 Stat. 1134; 5 U.S.C. 4304).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this evaluation is to determine the effectiveness of the Department of Energy (DOE) in managing its direct hire and contract employees to achieve the mission objectives of Section 102 of the DOE Organization Act and the extent to which personnel administration contributes to mission accomplishment. The report covers defense programs, environment and appeals, conservation and solar grants, and miscellaneous other programs. The study found that research and development missions are generally meeting technical objectives, but that 25 of the 107 projects reviewed were over cost ($6.7 billion) and behind schedule. Ten percent of the fossil fuel projects were not meeting technical objectives, and 34 were over cost and 33 behind schedule. The Energy Resources Administration's allocation fund was beset by inconsistent decisions, ambiguous regulations, erroneous decisions, and inadequate emergency planning. Enforcement offices were found to be accomplishing their missions. The offices of Regional Representatives were largely ineffective, and the grants program was poorly directed and managed.

**Program:** Federal Staffing Services
**CFDA NO.:** 27.001
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; 80 Stat. 523; 5 U.S.C. 7201 et seq.). Civil Rights Act of 1964 (P.L. 88-352, title IX, § 901; 78 Stat. 241; 28 U.S.C. 1447).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The study reviewed the Office of Personnel Management's system for measuring program performance at headquarters and field office levels for the Affirmative Employment Program. The primary conclusion was that there is an absence of a consensus between the central office and the regional staff on program expectations and activities. The report suggests ways in which a consensus could be developed and suggests ways to measure program performance.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The Office of Personnel Management (OPM) conducts background investigations on applicants for Federal positions and on current Federal employees to ensure that the employment and retention of each person is clearly consistent with the interests of national security and that the character, reputation, and fitness of each person is suitable. *Abstract:* The study found that Federal agencies view the quality and utility of OPM investigations to be high. Over 70% of background investigation reports contain no derogatory information. Summarization of OPM reports could significantly reduce their cost. The report recommended that OPM modify its system for processing investigation reports, adopt a summary report format, and modify its agency security appraisal function.

**Program:** Federal Staffing Services
**CFDA NO.:** 27.001
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Act of September 6, 1966 (P.L. 89-554; P.L. 95-454; 80 Stat. 524; 5 U.S.C. 7301-7352).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purposes of this report are to measure the ability, quality, and timeliness of Central Personnel Data File (CPDF) agents for the Office of Personnel Management (OPM); to review priorities used to process CPDF work and ascertain whether those priorities reflect the needs of OPM client agencies; and to assist in the development of a system for measurement of CPDF effectiveness in meeting agency objectives. The DPDF was found to be a vital source of Federal work force information. Limitations on the number of CPDF clients served and the type of service are needed to improve timeliness, but not quality, or reports. The accuracy level of CPDF data is a significant concern of the clients of the system. A user-oriented software could improve productivity and responsiveness. Better communications are needed between analysts and clients.

**Authority:** U.S. Information and Educational Exchange Act of 1948 (P.L. 80-402, title II, § 201-203; 62 Stat. 6; 22 U.S.C. 1431 et seq.); Reorganization Plan 2 of 1977. Mutual Educational and Cultural Exchange Act of 1961 (P.L. 87-256, § 101; 75 Stat. 527; 22 U.S.C. 2451 et seq.).
**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The purpose of the International Student Exchange Program (ISEP) is to provide worldwide person-for-person exchanges of students. The ISEP concept is a network rather than a bureaucratic structure. As such it centralizes those activities which can be most efficiently carried out in a central location, has no line authority, decentralizes and personalizes those functions which are crucial to the learning process, encourages innovation on the individual and local institutional level to work within their constraints, and allows for flexibility in the academic growth area. *Abstract:* The study contains findings and recommendations of Dr. Ruth Hill Useem and Dr. Ivan Putnam, Jr. resulting from their evaluation of ISEP administered by Georgetown University. It provides an overview of planning and starting the ISEP operations. ISEP promises to become very significant in the international interchange of students, bypassing many of the problems that are currently inhibiting the study abroad programs of individual U.S. institutions. At the same time, the study does not foresee ISEP competing seriously with or eliminating study abroad programs sponsored by individual institutions.

*Program Objectives:* The International Writing Program brings accomplished writers to the United States to experience life in the United States, write or translate new works, present profiles of the literary scene in their own countries, and interact with other writers of the world and with the American intellectual community. The 1980 Program brought 34 creative writers from 29 countries representing every major geographical area of the world and providing diversity of culture, ethnic, racial, religious, and political perspectives. *Abstract:* This evaluation of the 1980 International Writing Program, sponsored jointly by the University of Iowa, the International Communication Agency, and private contributors, examined the program as presently constituted in organizational, operational, and programmatic aspects to seek views of the originators, managers, and participants as to whether the goals were being realized. The evaluation is centered upon the 1980 program activities. Results proved to be revealing, useful, and rewarding. The overall estimate of the International Writing Program, its founders, and staff is that the program is unique in the particular blend of personal and professional elements woven into the Iowa City experience. The Program was described as outstanding, difficult to duplicate, and reflecting to a high degree the goals of the International Communication Agency.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* As part of the 1977 Presidential Reorganization Plan and the Executive Order implementing it, the International Communication Agency (USICA) is responsible for coordinating the international information, educational, cultural, and exchange programs of the U.S. Government. *Abstract:* Both Japan and India have large programs involving several Federal departments and agencies, as well as private organizations and institutions. GAO evaluated the efforts of USICA missions in Japan and India to coordinate all Government sponsored international exchange programs. GAO found that USICA missions in the two countries were not coordinating the exchange programs of all U.S. Government agencies and that coordination activities in the two countries remained essentially unchanged from those operating prior to the issuance of the Presidential mandate. Although officials at the missions are involved with programs falling under USICA responsibility, GAO found that they had little information on, or knowledge of, many of the Government exchange programs operating out of the missions. The missions follow an informal ad hoc approach in monitoring and sharing information on selected Government exchange programs. GAO believes it essential that USICA define the limits of the Executive Order. The Director of USICA should draw up and implement a plan designed to achieve coordination in U.S. Government exchange programs as called for in the President's directive.

## NUCLEAR REGULATORY COMMISSION

**E06200-001**

*Three Mile Island: The Most Studied Nuclear Accident in History.* (EMD-80-109).
9/9/80; 55 pp. + 2 app. (17 pp.)
**OMB Funding Code/Title:** 31-0200-0-1-276 / Salaries and Expenses
**Program:** Nuclear Reactor Regulation
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Energy and Water Development Subcommittee; *Senate* Committee on Appropriations: Energy and Water Development Subcommittee.
**Authority:** Energy Reorganization Act of 1974 (P.L. 93-438, title II, § 203; 88 Stat. 1244; 42 U.S.C. 5843).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The Nuclear Regulatory Commission (NRC) is responsible for protecting public health and safety and the environment in the design, siting, construction, and operation of nuclear power reactors. *Abstract:* GAO reviewed eight investigations of the Three Mile Island accident. The investigations varied in depth and comprehensiveness but were generally consistent. GAO endorses the President's reorganization plan, which would greatly expand the management role and authority of the Chairman, but leave the Commissioners responsible for setting policy and providing the operational framework. NRC has taken or planned action on the recommendations, which included establishing safety goals, making powerplant standardization mandatory, improving the role of the Advisory Committee on Reactor Safeguards, and providing funding and legal counsel to public groups or individuals intervening in licensing proceedings. However, little progress has been made on establishing goals and criteria which describe what level of safety and nuclear regulation is enough. GAO endorses a provision in the 1981 authorizing legislation which directs NRC to develop a proposed safety goal for nuclear reactor regulation. NRC needs to develop some systematic way to increase its participation in important licensing and regulatory decisions. GAO favors options that increase the Commissioners' role in the licensing and adjudication process, while retaining the Atomic Safety and Licensing Appeal Board and its basic agency responsibilities. Many long-term and important actions to improve specific design and operation problems are yet to be completed by the NRC. GAO endorses the proposed creation of a special Nuclear Safety Oversight Committee and believes that NRC should submit annual reports to Congress on its progress in implementing action plans.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Express Mail Paperwork Reduction Task Force was created to minimize the number of forms used for the processing of Express Mail and to thereby increase the administrative effectiveness and operational efficiency of the Express Mail program. *Abstract:* The Task Force report contained the results of the Task Forces review and evaluation of the paperwork involved in the processing of Express Mail, recommendations for the elimination of 13 items, and an implementation time schedule. The Task Force reviewed 27 Express Mail Service forms, labels, and envelopes, and recommended that 8 forms, 4 labels and 1 envelope be eliminated, resulting in a net loss of 10 items. The elimination of these items would result in an estimated annual savings of 7,193,000 items and a minimum of 50,345,000 paperwork handlings. All recommendations have been accepted and are being implemented according to the schedule contained in the report.

**Program:** Postal Field Operations
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Postal Reorganization Act of 1970 (P.L. 91-375, § 2; 84 Stat. 739; 39 U.S.C. 2003).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* This study was conducted to determine whether the Customer Service Representative (CSR) Program is providing services which improve service for mailers and is cost effective for the Postal Service; whether CSRs are technically qualified to assist mailers with postal services available; whether the staffing criteria for CSRs are realistic; and whether instructions regarding CSR duties are adequate and being followed. The study found that CSRs are used to perform a variety of duties not directly related to their primary function of sales and service. The present system for compiling customer profiles, scheduling of customer contacts, identifying programs presented, and evaluating CSR performance needs to be improved.

*Computer Timeshare Contracts.* (513-110-0-0001-AO).
9/80; 23 pp.
**OMB Funding Code/Title:** 18-4020-0-3-372 / Postal Service Fund
**Program:** Postal Field Operations
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Postal Reorganization Act of 1970 (P.L. 91-375, § 2; 84 Stat. 739; 39 U.S.C. 2003).
**Availability:** Not Publicly Available (Internal Use Only)

*Abstract:* The objectives of this study of the U.S. Postal Service (USPS) computer timeshare contracts were to evaluate the effectiveness of plans to bring all major timesharing applications in-house; to determine whether procurement procedures and practices are in compliance with the Postal Contracting Manual; to evaluate billing charges under contract specifications; to examine security procedures; and to review program requirements. The study found that the MISD had no organized direction to convert commercial timesharing activities to applications run on USPS equipment. In addition, timesharing activities were not being administered to assure that payments were made only for those services actually received and that only approved programs were run.

**Geographic Relevance:** National

*Abstract:* The objectives of the audit were to evaluate policies and procedures for deploying and managing small computers to determine if nationally developed systems had the excess capability to accommodate additional applications. The audit concluded that the Interim Small Computer Policy provided much needed direction. Locally acquired computers were not widespread. The Computer Forwarding System had excess resources which could be utilized.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of electronic mail is to provide the communication of messages more quickly and efficiently through the application of modern electronic telecommunications technology. The program has nationwide application. *Abstract:* Electronic mail, an emerging development in telecommunications, could significantly reduce the U.S. Postal Service's labor force over the next 20 years. Although the speed with which it is implemented depends primarily on customer acceptance, substantial workyear losses will occur even if the Service participates fully in the electronic communications market. GAO projects potential workyear reductions of about 200,000 by the year 2000. Thus, the Postal Service would have to lose about 10,000 full-time equivalent employees annually. With proper planning, GAO believes the Postal Service could achieve the estimated reduction with little or no adverse impact on employees unless unforeseen technological advancements occur.

**Availability:** GAO

*Abstract:* A review was undertaken on the restrictive conditions and specifications in Postal Service solicitations and their impact on Postal Service relationships with private industry, competition, and cost. Specifically, GAO reviewed the Service's current procurement of electronic scales and its procurement strategy of competition by specification. GAO found that the Service has contracted for electronic scales, which will serve as the standard electronic scale for the future. The first article delivery of these scales was delayed and did not pass the required quality control tests. A second scale experienced problems but received conditional approval on the basis of independent environmental and National Bureau of Standards tests. However, further testing at research and development facilities showed that the scale still does not meet the Service's specifications. GAO found that the procurement strategy for the electronic scales has been to standardize program needs using Service specifications. This static picture of program needs can have negative results for a technologically advanced item in a rapidly evolving field. Both Postal Service needs and commercial product cost and capability can be expected to change with additional user experience and product advancements. In such circumstances, the preferred procurement strategy is to select from existing commercial products those which most nearly meet the Service's needs. The Postal Service should: (1) allow its regions to gain more experience with commercially available electronic scales (further defining user needs); (2) assemble a team to assess (at the earliest possible date) whether the current contract should be continued or terminated; and (3) limit scales acquired under the current contract, if continued, to the number needed for comparison with commercially available scales.

**Authority:** Postal Reorganization Act of 1970, as amended (P.L. 91-375, § 2401(b), as amended by; P.L. 94-421; 84 Stat. 719; 39 U.S.C. 2401(b)).
**Availability:** GAO

*Abstract:* GAO addressed the restrictive conditions and specifications in U.S. Postal Service solicitations and contracts and their impact on Postal Service relationships with private industry, competition, and cost. The review discussed the Postal Service's formally advertised fixed-price contract for corrugated mail trays and sleeves to cover them in transit. GAO found that: (1) the solicitation permitted bidding only by firms which could furnish all production requirements to all postal regions located throughout the United States; (2) the contract currently requires the tray and sleeve be made from a very strong corrugated product. The Postal Service should get together with private sector groups and interested firms to develop a solicitation without any unnecessary restrictive conditions or specifications. This process should at least resolve current restrictions by: (1) allowing multiple awards for different geographical areas; (2) deleting the requirement for any specific type of cutter; and (3) permitting material which provides the best tradeoff between strength, durability, weight, and cost. In addition to the current test program, industry should be asked to propose other new materials/-configurations which meet Postal Service needs.

*Abstract:* The objectives of the audit were to determine whether the Postal Service provides equal opportunities to all employees and potential employees and whether the related procedures permit an efficient administration of these policies. The audit concluded that equal employment opportunity (EEO) is provided employees and employee applicants except for the handicapped. An organized special emphasis Affirmative Action Program for handicapped persons has not been implemented and maintained. It was also found that EEO program procedures could be improved in several areas, such as Headquarters program direction, statistical reporting, and supervision of Management Sectional Center level EEO Counselors.

*Abstract:* The objectives of the audit were to determine if Postal Employee Development Centers (PEDCs) are meeting their mission to help improve job performance and whether training activities are accomplished efficiently, effectively, and in accordance with prescribed procedures. The audit concluded that the concept of the PEDC system provides an effective method for implementing the training required to meet the mission of the U.S. Postal Service. However, PEDCs are not completing training activities in an efficient and effective manner. Field managers have not been furnished adequate guidelines and a reliable management information system to effectively manage their operation. PEDC managers are operating under conflicting instructions that affect their activities.

**Geographic Relevance:** National

*Program Objectives:* The objective of the Postal Service's merit program is to stimulate improved productivity by replacing the old, almost guaranteed, salary step increase system with one which evaluates employees and makes raises contingent on performance. It applies to employees throughout the Nation. *Abstract:* GAO reviewed the Postal Service's merit program and found several weaknesses. Appraisals and ratings were not always accurate and fair assessments of employee performance, and the merit program was not as effective as possible in rewarding and improving performance. GAO criticized the Service for awarding merit increases to low performers and cited long time periods between merit increases and the performance for which they were awarded. GAO made 15 recommendations for improvement to the Postmaster General, including requiring supervisors to tie performance evaluations more closely to an employee's duties and responsibilities, developing performance assessment criteria that can be used to depict performance results more accurately, discouraging the use of peer comparisons as a primary basis of evaluating performance, and changing the merit program procedures so that merit increases are received close to the performance that is rewarded.

*Program Objectives:* Postal Service management seeks to provide mail service efficiently, effectively, and economically while providing employees challenging work in a motivational environment. *Abstract:* GAO reviewed management/employee relations problems at the Evansville, Indiana, Post Office and found evidence of unfair labor practices and harassment. GAO felt employees were also partially responsible for the less than desirable work environment, but reported that conditions were improving. GAO recommended that the Regional Postmaster General direct the Evansville Postmaster to implement controls over the discipline and grievance procedures, develop a system to record and monitor disciplinary actions so that supervisors and managers can be evaluated on their labor relations performance, and abide by the sick leave call-in policy set forth by the local labor contract. GAO further recommended that events at the Evansville Post Office be closely monitored by the District Office to ensure that the situation did not recur.

*Program Objectives:* The objective of the Postal Service's system for examining and grading applicants for employment is to select the best qualified people in the most efficient, effective, and economical way possible. *Abstract:* GAO reviewed the U.S. Postal Service's system for examining, grading, and selecting applicants for employment at the Chicago Post Office and at the National Test Administration Center. Many more applicants were examined and graded than were needed to fill anticipated vacancies. This resulted in examinations not being given within the required timeframe of 30 days and created a grading backlog. It was estimated that the cost of examining and grading approximately 54,000 applicants was nearly $95,000, a cost GAO said should be reduced considerably. GAO recommended that the Postal Service explore the possibility of changing its hiring procedures to: (1) allow applicants to file applications at any time, (2) examine applicants in the order applications are received, and (3) examine only the number of applicants needed to fill anticipated vacancies.

**Geographic Relevance:** National

*Abstract:* The objective of the audit was to determine the effectiveness of the Stamp Stock Destruction Program following the consolidation of those functions at Management Sectional Centers

(MSCs) in January 1979. The audit concluded that improvements to the Stamp Stock Destruction Program were needed. It was disclosed that over $500,000 in stock, supposedly destroyed at public incinerators, was stolen by non-postal people. The audit recommended that shredders be purchased for in-house destruction of stock, greatly reducing the loss risk and saving $35,000 annually (in Central Region only) in travel costs for Destruction Committee members. Increased security for stock awaiting destruction was provided in the recommendation that separate storage facilities be provided at MSCs for such stock. Also, the elimination of excessive counts was recommended and adopted, with resultant costs savings computed at $410,000 annually.

**Authority:** Postal Reorganization Act of 1970 (P.L. 91-375, § 2; 84 Stat. 739; 39 U.S.C. 2003).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The objectives of this audit were to determine if Bulk Mail Center (BMC) acceptance adequately serves the financial and service interests of the U.S. Postal Service (USPS) and its customers; whether acceptance functions are being performed effectively and efficiently; and whether all revenue due the USPS is being collected. The audit concluded that the program has not, in all instances, been effectively administered. Improvements were recommended in the following areas: (1) mail preparations; (2) verification of second-class and controlled circulation publications; and (3) independent review of plant-loaded mail. The lack of effective administration in these areas has created the potential for significant revenue loss.

*Abstract:* The audit objectives were to assure that travel paid for by the Postal Service was needed, economical, and effectively controlled. The audit concluded that postal managers make necessary efforts to assure that travel performed is justified. However, internal controls can be strengthened to assure proper processing and payment of travel vouchers. In addition, travel costs could be reduced through centralized coordination of travelers' plans and needs.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* This study was designed to determine whether supplies and services are provided to all U.S. Postal Service elements at the lowest practical cost consistent with quality, service, timeliness, and reliability. It was concluded that, with certain exceptions, the procurement of supplies, services, and equipment has generally been performed efficiently, economically, and in accordance with the Postal Contracting Manual (PCM). The exceptions relate to the manner in which BPAs have been controlled and administered to postal units throughout the Central Region and to the need to give specific instructions to vehicle maintenance facilities concerning the acquisition of vehicle repair parts and the transportation afforded these parts when sent from the supplier.

**Authority:** Postal Reorganization Act of 1970 (P.L. 91-375, § 2; 84 Stat. 739; 39 U.S.C. 2003).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* This study was conducted to evaluate field management's perception of the Consumer Service Card (CSC) Program; to determine the support given the program by functional area managers; to determine whether complaint trend and profile reports are fully used by all levels of management; and to determine the effectiveness of program controls to ensure consumer complaints are responded to in a timely manner. Managers at the post office level are not aware of the benefits the CSC Program can provide. Some managers are using the program as a basis for evaluating local offices. There is a complete lack of oversight responsibility at the regional and district levels. Current use of the "Unresolved Card Report" by Headquarters does not ensure that complaints registered on a Consumer Service Card are dealt with in a timely manner.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The overall objective of this audit was to review the effectiveness, economy, and efficiency of printing and duplicating services procured by the Postal Service. Some of the printing, copying, and duplicating operations are not effectively controlled and monitored. Opportunities exist to improve the economy and efficiency of these operations and to reduce costs. A comprehensive review of requirements for, and the leasing of, copying machines would reduce costs. An effective system of monitoring duplicating operations in field units would provide a more efficient and economical operation.

## *SENIOR ASSISTANT POSTMASTER GENERAL OPERATIONS*

**E06305-001**
*First-Class Presort System.* (312-103-9-0003-AO).
11/80; 10 pp.
**OMB Funding Code/Title:** 18-4020-0-3-372 / Postal Service Fund
**Program:** Postal Field Operations
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Postal Reorganization Act of 1970 (P.L. 91-375, § 2; 84 Stat. 739; 39 U.S.C. 2003).
**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* Through discount incentives, qualifying mailers are encouraged to present first-class mail presorted which reduces U.S. Postal Service (USPS) handling and can expedite mail.
*Abstract:* The first-class presort program has grown substantially; however, postal procedures requiring quality control personnel to monitor the make-up of first-class mail were not always being followed. To the extent that such mail was accepted without proper separation, the USPS did not obtain the revenue to which it was entitled. Internal controls were not adequate to assure proper separation.

**Agency Contact:** Senior Assistant Postmaster General, Operations. (202) 245-5445.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The objectives of this study were to determine the accuracy and promptness of payments to the air carriers derived from the weight of mail and whether the 95% partial payment to air carriers for service of international mail is a sound methodology. The audit concluded that payments made to airlines based on data as reported by air stop points are reasonably accurate. Payments were delayed as long as 10 months for service of international mail. The 95% partial payment is practical for the Postal Service.

**Geographic Relevance:** National

*Abstract:* The objectives of this study were to evaluate the effectiveness, timeliness, and responsiveness of U.S. Postal Service policies, plans, and practices to conserve fuel and to remain operational in case of fuel shortages. The Postal Service has made significant efforts over the past 3 years to conserve fuel. These controls can be strengthened by greater awareness of the conservation program on the part of postal employees. This can best be accomplished by establishing more precise criteria, improving existing controls, and holding managers accountable within their respective areas.

*Abstract:* With the merger of Air Mail into the First-Class Mail system, it was decided that a separate rate structure should apply to "heavy pieces" (over 9 ounces) and to "priority mail" (over 13 ounces, including air parcel post). The result was First-Class, zone rated mail. This study will evaluate the effectiveness of this rate structure system.

**Availability:** GAO
**Geographic Relevance:** National; City

*Program Objectives:* Mail processing involves all operations applied to mail matter in the postal facility where it is mailed, at intermediate facilities, and at the post office of destination and includes such things as sorting, stamp cancellation, counting, and weighing. *Abstract:* This report discusses the implications of a management decision to move a mail processing operation from York to Lancaster, Pennsylvania. Recommendations for improvement could affect relocations throughout the nation. GAO found Postal officials did not adequately inform York employees about the transfer and made public disclosures which were misleading. Employees were confused and not fully informed about their rights and options at the time of the transfer. The number of trained personnel at both locations was insufficient to perform necessary postal functions, hampering postal operations at both York and Lancaster. Also, the Postal Service's economic feasibility study significantly overestimated the projected annual savings resulting from the transfer, underestimated manpower requirements, and did not consider startup costs. GAO recommended the Postal Service revise its guidelines for future relocations of mail processing functions to alleviate these problems.

*Program Objectives:* The objective of U.S. Postal Service local purchasing programs is to procure, store, and dispense parts and supplies for postal facilities in the most efficient, effective, and economical way possible. Operations are nationwide. *Abstract:* GAO found that the Postal Service needs to strengthen controls over local postal facilities' purchasing of parts, supplies, and services. The Service could not rely on its inventory control systems because they were maintained by the same employees who were authorized to determine needs, order and receive parts and supplies, and certify invoices for payment. In addition, the payment of invoices was based on certifications that supplies and services were received, although the certifying employees rarely saw the items and often did not obtain documentation signed by employees who actually received the supplies and services.

**Availability:** GAO
**Geographic Relevance:** National; Postal Subdivisions of States

*Program Objectives:* The objective of the fuel procurement program is to procure, store, and dispense fuel for the operation of Postal Service vehicles in the most efficient, effective, and economical way possible. Operations are nationwide. *Abstract:* GAO found the Service's controls over bulk fuel receipts and disbursements, purchases of fuel from commercial service stations, and the use of fuel by Service employees were inadequate. Employees often did not verify the quantity of bulk fuel received, and records of fuel purchased from commercial service stations were incomplete and subject to error. GAO could not determine whether fuel was being used for nonpostal activities because insufficient data were maintained. Among GAO's major recommendations to the Postmaster General were that he vigorously enforce procedures for verifying fuel deliveries; initiate a program to test the quality of fuel received; insure that guidelines for bulk tank security are followed at all facilities; and insure that all fuel dispensed from bulk fuel tanks is accounted for.

**Authority:** Act of September 2, 1958, as amended (P.L. 85-857; 72 Stat. 1105; 38 U.S.C. 201 et seq.).
**Availability:** Agency

*Abstract:* The Austin Data Processing Center equipment is technologically obsolete. The Office of Data Management and Telecommunications, in fulfilling its mission to the Veterans Administration's Automated Data Processing (ADP) users, must keep pace with ADP technology and is, therefore, upgrading the obsolete equipment. The system life of the replacement system is 8 years. The software conversion study report will contain an inventory of hardware, software (system and application), data files, and job control language associated with the Austin DPC IBM 5360/370 triplex system. Conversion costs will be developed and documented for two alternative target replacement systems–a code-compatible system and a non-compatible system. The study will conclude which alternative should be pursued for replacing the Austin DPC equipment.

**Agency Contact:** (202) 389-5371.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The purchasing practices of the Veterans Administration (VA) Marketing Center were evaluated. The VA Marketing Center purchases items that are stored and distributed through supply depots and manages supply schedule contracts for certain medical and food items. These centralized procurement programs give VA medical centers the opportunity to obtain supplies and equipment without having to independently solicit and award contracts. VA medical centers are required to use these programs whenever possible. However, the medical centers still annually purchase items costing millions of dollars from open market vendors. Opportunities for lower prices are being lost because of the VA failure to standardize common items used by medical centers, failure to maintain visibility over most supplies purchased by medical centers, uneconomical purchasing practices of the medical centers, and failure to consolidate purchases within and among medical centers. The Administrator of Veterans Affairs should direct the Assistant Administrator for Supply Services to: (1) establish a central standards committee to identify and evaluate common items presently used by VA medical centers; (2) develop an information system that provides greater visibility over all medical center purchases; (3) develop the controls needed to improve and monitor the purchasing practices of individual medical centers; (4) consolidate purchases within medical centers and among neighboring centers; and (5) implement the procedures necessary to assure that neighboring medical centers share product and vendor information so they can effectively take advantage of one anothers' purchasing and contracting experience.

**Geographic Relevance:** National

*Program Objectives:* Objectives are to provide educational assistance benefits to veterans and other eligible persons to meet, in part, the veteran or eligible person's educational costs. *Abstract:* GAO found that the Veterans Administration (VA) has had serious problems collecting educational assistance overpayments and other debts from veterans. The amount of educational assistance overpayments on which VA terminated collection action grew from about $10 million as of June 1975 to $198 million as of June 1980. Most veterans with delinquent overpayment accounts appear to be able to repay these debts. GAO reported that several problems which have hampered VA's collection efforts may be corrected by VA, but others will require legislative action. The most significant factor which limited the effectiveness of VA's collection efforts was that veterans could ignore repayment demands with little or no fear of adverse actions which would normally result from failure to pay private-sector debts. Legislation enacted on October 17, 1980, (P.L. 96-466) will help solve this problem by permitting VA to use certain private-sector debt collection techniques. GAO recommended that the Administrator of VA and the Congress take additional action to strengthen VA's debt collection efforts and that VA resume collection action on debts previously considered uncollectible.

**Availability:** GAO

*Program Objectives:* The Veterans Administration (VA) administers a hospital-based home care in which previously hospitalized veterans are returned to the home setting where a caretaker provides personal care under the supervision of a VA hospital-based multidisciplinary medical team. *Abstract:* GAO believes that the potential for program expansion exists. GAO found that many patients in VA medical centers could have used the home care program. However, VA has not attempted to identify and project the number of veterans suitable for home care or to expand the program since 1974. VA has allowed medical centers a great deal of flexibility in implementing their programs while providing little guidance and monitoring. VA has not established clearly defined objectives for the program conveying VA home care goals. This lack of guidance limits program effectiveness and has resulted in wide variations in the home care programs. GAO made several recommendations to the Administrator of Veterans' Affairs.

**Authority:** Act of September 2, 1958 (P.L. 85-857; 72 Stat. 1141, 1243; 38 U.S.C. 601 et seq.; 38 U.S.C. 4101 et seq.).
**Availability:** GAO

*Abstract:* The Veterans Administration (VA) plans to spend $1 billion to replace 10 of its medical centers. Each replacement center will have a surgical suite which is among the most costly of hospital departments to construct and operate. GAO found that on the average, the 74 operating rooms at VA centers were idle about 50% of the time. The current planning criterion used by VA calls for 1 operating room for every 28 surgical beds. The continued use of this criterion could result in overconstruction of operating rooms with resulting low utilization. Surgical procedures generally performed by medical school residents at affiliated centers took longer than similar procedures performed by VA staff at nonaffiliated centers. GAO developed a model for planning operating rooms which focused on the unique surgical workload characteristics of each VA centers. It showed that VA could handle the surgical workload with 22 fewer operating rooms than planned using the present criterion, a potential $3.5 million saving. VA assigned more operating room nurses than needed to handle the surgical workload due to this criterion, and savings could be realized if VA made use of less skilled personnel to do many of the nonprofessional tasks now handled by operating room nurses. Congress should not approve any funding requests for new or replacement surgical suites in VA centers, based solely on room-to-bed ratios, unless the planning is so far along that adjusting the surgical suites planned would not be economically feasible. Several recommendations were made to the Administrator of Veterans' Affairs.

**Congressional Relevance:** *House* Committee on Veterans' Affairs; *Senate* Committee on Veterans' Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Act of September 2, 1958 (P.L. 85-857; 72 Stat. 1115, 1141; 38 U.S.C. 213; 38 U.S.C. 601 et seq.).
**Availability:** GAO

*Program Objectives:* The Veterans Administration (VA) pays for beneficiary care in non-VA hospitals. The VA has an obligation to transfer patients from public and private hospitals to VA health care facilities. *Abstract:* GAO found that VA clinics of jurisdiction did not routinely know when veterans in non-VA hospitals had stabilized enough to be moved to a VA facility. Physician-to-physician contact is necessary to effectively monitor the medical condition of veterans in contract care hospitals. VA clinics of jurisdiction and other VA facilities did not effectively coordinate veterans' transfers to available VA beds once they learned that it was medically feasible to move them. VA clinics of jurisdiction did not always publicize the transfer policy of VA to promote its acceptance by the veteran population and contract health care providers. The Administrator of Veterans' Affairs should direct the Chief Medical Director to: (1) ensure timely transfers of veterans in non-VA medical facilities by establishing monitoring procedures which would include, as a minimum, requiring VA physicians to periodically contact the attending non-VA physician for each veteran hospitalization; and (2) periodically monitor VA clinics of jurisdiction to ensure compliance with VA transfer policies.

*Program Objectives:* The objective is to provide military personnel and veterans with life insurance. *Abstract:* The Veterans Administration performed well against most of the timeliness standards it established for both the internal processing steps and for the entire claims process. Avoidable delays occurred in the initial stages of claims processing at the regional office and at the Philadelphia insurance center. A new data processing system is changing workflow to improve the timeliness of claims processing at the regional office and steps are being taken at the Philadelphia insurance center to reduce delays. Corrective actions have been taken to improve the accuracy of management reports on the center's performance in meeting its overall timeliness standard.

*VA Needs Single System To Measure Hospital Productivity.* (AFMD-81-23).
3/24/81; 18 pp.
**OMB Funding Code/Title:** 36-0160-0-1-703 / Medical Care
**Program:** Maintenance and Operation of VA Facilities: VA Hospital Care
**Congressional Relevance:** *House* Committee on Veterans' Affairs; *Senate* Committee on Veterans' Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.
**Authority:** Act of September 2, 1958 (P.L. 85-857; 72 Stat. 1141, 1243; 38 U.S.C. 601 et seq.; 38 U.S.C. 4101 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO was unable to perform more than a limited comparison of Veterans Administration (VA) hospital productivity with that of non-VA hospitals or with other VA hospitals because of inadequate productivity measurement data. VA has a few partly developed productivity measures but they cannot easily be used to compare with non-VA hospitals because of the differences in the methods of measuring resources used and services provided. A similar lack of uniformity hampers comparisons among VA hospitals. Although efforts are underway to establish several management information systems which could provide productivity measures, these are not yet completed and, if installed as currently planned, will overlap each other. Measurement of productivity provides managers with information for controlling and budgeting functions, maintaining accountability, linking individual and organizational performance with aspects of personnel management, and improving productivity. One way these measures can be used to improve productivity is by comparing productivity levels of similar operations to determine the method of conducting the operations. GAO concluded that VA managers have little information to support their own efforts either to improve productivity or control resources through the budget process. The Administrator of Veterans Affairs should establish a schedule for developing an adequate, single, hospital productivity measurement system for the entire Department of Medicine and Surgery using one of the systems currently being developed as a basis. Further, the Administrator should assign a system guidance role to an agency-wide, user-oriented body which would have responsibility for ensuring that: (1) the measurement system is coordinated with other management information systems; (2) duplicate data collection is eliminated; (3) data collected and reports developed are uniform across appropriate units of the agency; and (4) an annual status report is provided to VA management, the Office of Management and Budget, and the appropriations committees of Congress.

**Program:** Veterans Benefits: Office Services
**CFDA NO.:** 64.115
**Congressional Relevance:** *House* Committee on Veterans' Affairs; *Senate* Committee on Veterans' Affairs. *House* Committee on Appropriations: HUD-Independent Agencies Subcommittee; *Senate* Committee on Appropriations: HUD-Independent Agencies Subcommittee.

**Authority:** Act of September 2, 1958, as amended (P.L. 85-857; 72 Stat. 1105; 38 U.S.C. 201 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purposes of this study are: (1) to determine if current directives (local and national) are effective in ensuring timely and proper processing of inquiries by each appropriate operational unit; (2) to identify where and why processing delays are occurring; (3) to determine what effect the recommendations of a recent Target Task Force report could have on reducing the number of inquiries and enhancing efficiency; and (4) to determine the best means for responding to inquiries which cannot be resolved via TARGET. The Analysis of the Veterans Assistance Inquiries will examine the procedures followed by field personnel to ensure timely and proper processing of general assistance inquiries or benefit payment inquiries. The findings and recommendations will be the basis for improving the Department of Veterans Benefits' procedures for resolving inquiries resulting from telephonic interviews requiring a claims folder review, adjudicative or finance action, or written documentation.

**Availability:** Agency

*Abstract:* The purpose of this study was to conduct a cost-benefit analysis of the Automated Hospital Information System (AHIS) conversion. The study compared the costs associated with the present AHIS system with those of the converted system. Based upon a benefit-cost ratio of 1.51 to 1 and a break-even point of 2.9 years after the converted system is operational, the plans of the Department of Medicine and Surgery and the Department of Management and Telecommunications to convert the AHIS operation to up-to-date hardware and software utilizing certain equipment and personnel associated with the pharmacy automation are sound. The study recommended the conversion be accomplished.

*Program Objectives:* The objectives of the Veteran Administration's (VA's) Mobile Home Loan Program are to assist eligible veterans in obtaining low cost housing and to provide the alternative of mobile home living to those who desire it. *Abstract:* The conclusion of the evaluation is that, overall, the VA Mobile Home Loan Program is functioning efficiently and effectively. During its 10 years of existence, the program has evolved into a permanent part of the VA Mortgage Credit Assistance Program for veterans. Based on past trends, the program promises to move closer in substance and procedure to the VA single-family home loan program. VA is encouraging lending institutions and mobile home dealers to participate in the program and is fully meeting its objective relating to the impact of the program on veterans. VA does, however, need to step up efforts to expand its base of active, capable lenders and to increase pressure to develop a strong, multifaceted secondary market for VA mobile home loans. Also, VA should encourage the development of financing for used VA guaranteed mobile home loans and should improve its market monitoring methods. Finally, VA should reconsider the feasibility of seeking legislation to discontinue onsite inspections of mobile homes.

*Abstract:* The purpose of this study was to conduct a cost-benefit analysis of the automation of 156 Veterans Administration (VA) outpatient pharmacy sites. It identified all tangible and intangible benefits associated with the automation of an outpatient pharmacy. This study listed costs, benefits, cost-benefit ratio, and break-even point of an automated pharmacy. The study determined that with a 20% duplication rate existing at VA outpatient pharmacies, the proposed system would be cost beneficial. A projected savings of $164,633,582 will be realized during the systems' life cycle. The cost-benefit ratio will be 1.45 to 1; the break-even point will occur in March 1987.

*Abstract:* The purposes of this study are to analyze and evaluate the effects of the reorganization of the recreation program in the Veterans Administration (VA) field facilities and to make appropriate recommendations for improvement. On October 1, 1978, the Chief Medical Director transferred Recreation Service responsibility to the Associate Chief Medical Director for Administration. Additionally, each medical center was instructed to transfer the recreation program to be under the supervision of the medical center's Assistant Director. At local option, recreation would become either a service or a section in Voluntary Service. The study team made seven recommendations; among these were recommendations for the Department of Medicine and Surgery to clarify and strengthen policy on Recreation's responsibility to the different categories of patients, to delegate both program and administrative responsibility to the Service Chief, and to conduct an administrative training program for Recreation Service Chiefs. Additionally, it was recommended the medical center directors be allowed to exert discretion over the organizational alignment of the recreation program, subject to approval.

*Program Objectives:* The purposes of the Ambulatory Care Program are: (1) to provide a uniform quality of care regardless of the delivery setting; (2) to provide high quality care in conformance with accepted medical practice; (3) to provide economical care; (4) to maintain facilities conducive to effective health care; (5) to give priority to veterans with service-connected disabilities; (6) to provide timely delivery of care; (7) to promote patient compliance; (8) to provide adequate guidance to field facilities; and (9) to insure satisfaction of patients and staff. *Abstract:* Considering the volume of demand being accommodated, the age and structural limitations of some facilities, and budgetary constraints, the Ambulatory Care Program is being operated fairly effectively, albeit hindered somewhat by inefficiency. The most significant conclusions are: that better data are needed to allow effective planning, that requirements for control procedures need to be more formally structured by Central Office, and that support services need to be strengthened.

*Program Objectives:* The purpose of the Veterans Administration's National Cemeteries Program is to inter eligible persons in national cemeteries and to maintain these cemeteries according to the highest possible standards. *Abstract:* The evaluation concluded that the National Cemeteries Program is achieving both of its goals and most of its objectives. The program is particularly strong in the areas of public relations and is having the intended impact on veterans, next-of-kin of deceased veterans, and other members of the public. Changes to the program are needed to improve the efficiency and economy of cemetery operations and cemetery construction, respectively.

*Program Objectives:* The purpose of the Veterans Administration's (VA's) Dialysis Program is to provide high quality dialysis treatment and comprehensive end-stage renal disease care in a cost-effective manner to eligible and medically suitable patients. *Abstract:* The 10 program objectives are being met efficiently and effectively at all units in the sample. The impact of the program is that it keeps alive patients who would die in a short while without their dialysis treatments unless they received successful transplants. Returning these people to productive lives is the implied mission of the program, but achievement of this end is not measurable. The evaluation indicated, however, that all units are encouraging patients to become self-reliant and to minimize the effect of dialysis on the rest of their lives. The VA provides dialysis therapy to patients with end-stage renal disease in a safe environment, with positive results, and with attention to the medical, social, and psychological problems created by the disease process.

*Program Objectives:* In order to ensure an adequate supply of health manpower, and for other purposes, the Manpower Grants Program authorizes grants to States for establishment of new medical schools and to existing medical and allied health schools which are affiliated with Veterans Administration medical facilities. *Abstract:* The study determined that the Manpower Grants Program is achieving its legislative purposes of increasing the Nation's supply of physicians and allied health care personnel. Program management has also successfully achieved administrative objectives except for a few isolated instances. Because spending authority expires in Fiscal Year 1984, there are no study recommendations or suggestions applicable to the current program.

*Program Objectives:* Regional Medical Education Centers provide in-residence continuing medical and related education programs for medical and health personnel eligible for such training, including: (1) the teaching of newly developed medical skills and the use of newly developed medical technologies and equipment; (2) advanced clinical instruction; (3) the opportunity for conducting clinical investigations; (4) clinical demonstrations in the utilization of new types of health personnel and in their better utilization; and (5) routine verification of basic medical skills. *Abstract:* This evaluation will examine the effectiveness of the Veterans Administration's Regional Medical Education Centers in meeting program goals and objectives.

**Authority:** Act of September 2, 1958, as amended (P.L. 85-857; 72 Stat. 1105; 38 U.S.C. 217, 1904, 4101). Veterans Omnibus Health Care Act of 1976 (P.L. 94-581; 90 Stat. 2842; 38 U.S.C. 4101).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The purposes of the Veterans Administration's (VA's) Rehabilitation Engineering Research and Development (RERD) Program are: (1) to conduct intramural and contract research; (2) to develop affiliations between VA medical centers and graduate schools of engineering; and (3) to establish Rehabilitative Engineering Research and Development Centers. *Abstract:* The RERD program is achieving its goals of research, development, and evaluation of new devices, techniques, and concepts of rehabilitation. The findings of the report, however, identify some instances where devices have been developed, but not put into general use by veteran patients. The presence of basic research opportunities was found to have a positive effect on recruitment and retention of highly qualified staff, thus indirectly improving the level of patient care. The continued growth of RERD (as opposed to investigator-initiated basic research) may have a negative impact on this effect.

*Program Objectives:* The purpose of the Veterans Administration's (VA's) Outpatient Dental Program is to provide dental services to veterans on an outpatient basis. *Abstract:* The outpatient dental program is successfully fulfilling its overall goal of providing outpatient dental care to eligible veterans in a timely and cost effective manner. Overall, veterans are highly satisfied with the access to care and the timeliness and quality of services provided to them. Fee dentists are satisfied with the general program administration and payment procedures. The program is not being effectively publicized. In addition, it is not making efficient use of ancillary dental personnel, resulting in lost economics in the operation of VA dental clinics.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Abstract:* The purpose of this study is to assess the effectiveness of the Veterans Administration's (VA's) Department of Medicine and Surgery (DMS) support to National Cemeteries. The study found that 89% of responding cemeteries believe that DMS support to National Cemeteries is good to excellent. Over 93% of the responding cemetery directors believe that the responsiveness between them and top Department management is good to excellent. The study concluded that Department of Memorial Affairs (DMA) cemetery directors view the VA memorial cemetery personnel as highly responsive to the cemeteries in terms of providing support. The report recommended that the DMA manuals for field operations be completed; that training opportunities for cemetery employees be improved; and that DMA develop, with cooperation with DMS and the Office of Supply Services, a sound basis for determining the amount of funds to be transferred from DMA to DMS and Supply Service.

**Geographic Relevance:** National

*Abstract:* The purposes of this study are to examine and quantify the accessibility by telephone of Veterans Administration (VA) hospitals and to analyze and determine the merits of different applications of expanded telephone service for hospitals. This study examined the accessibility by telephone of VA hospitals by making survey calls to a sample of the VA facilities. The results showed that

23% of 400 total calls received a busy signal at either the switchboard or an extension. Based on these findings, it was recommended that the VA accelerate acquisition of electronic switchboards, emphasize the use of direct-in-dial numbers, acquire additional telephone lines, and periodically survey the level of telephone service at each medical center. An additional recommendation was to limit the expansion of toll-free telephone service (including the use of 800 numbers) until potential applications have been more conclusively justified.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this study was to determine the level of accessibility by telephone to Veterans Administration (VA) regional offices and to propose recommendations, as necessary, for improving overall telephone service. In the nine regional office telephone systems surveyed, it was found that nearly 40% of the calls placed resulted in busy signals. Additionally, 30% of the calls were placed on hold for a median time of 2 minutes and 24 seconds. Problems in accessing the VA's information services were most severe for those veterans using WATS lines. FX service was also more difficult to access than local lines. It was suggested that telephone access could be significantly improved, particularly for WATS and FX lines, by using a different type of automatic answering equipment in relation to an altered staffing configuration. This also would result in cost savings. Another recommendation was to establish a "time on hold" standard as a basis for determining staffing levels.

**Geographic Relevance:** National

*Abstract:* The Veterans Administration (VA) has determined that AECGIS is an efficient and cost effective method of providing electrocardiographic services to veterans within VA HCFs and that it can be expanded to cover all VA HCFs by using 11 existing VA-owned computers in collaboration with available contractor services. AECGIS is consistent with the patient care, research, and educational missions of the VA. Services will use existing FTS. Sharing with the Department of Defense CAPOC system will be effected as needed. Sharing with other Federal agencies will be explored.

**Authority:** Act of September 2, 1958, as amended (P.L. 85-857; 72 Stat. 1243; 38 U.S.C. 4101 et seq.).
**Availability:** Federal Health Resources Sharing Committee Reports
**Geographic Relevance:** National

*Program Objectives:* Objectives are to: eliminate unnecessary duplication of Cardiac Catheterization Laboratories (CCL) services; provide better services to Federal beneficiaries; and standardize utilization, staffing, and policies for Federal CCLs. *Abstract:* The FHRSC Subcommittee on CCLs recommended uniform staffing and utilization standards for all Federal CCLs and suggested close collaboration and continued exploration of potential for local sharing of facilities and beneficiaries. Duplication of CCLs in the same Health Care Facility (HCF) should not occur as long as another capable Federal HCF has need for a CCL. CCLs of both the Department of Defense (DOD) and and the Veterans Administration (VA) should be continued in both Augusta and Washington, DC, but duplication of CCL at the Walter Reed Army Medical Center should not occur. CCLs of the Air Force in Malcolm Grow Air Force Medical Center, Washington, and the VA Medical Center, Dayton, should be closed. VA beneficiaries at El Paso should use the local DOD CCL. Military and U.S. Public Health Service and Indian Health Service beneficiaries in the Tucson-Phoenix area should use the CCL at the VA Medical Center, Tucson. Further potentials for sharing CCLs in New York, San Francisco, and Seattle should be explored.

*Program Objectives:* Objectives are to: (1) enhance and make more attractive service in Armed Forces of the United States, (2) extend the benefits of the higher education to qualified and deserving young persons who might not otherwise be able to afford such an education, and (3) provide vocational readjustment and restore lost educational opportunity to those service men and women whose careers have been interrupted or impeded by reason of active duty after January 31, 1955. *Abstract:* The purpose of this study was to provide a comprehensive analysis of educational entitlements by veterans who have begun or successfully completed programs of education under the provisions of Chapter 34 of Title 38, U.S.C. The analysis was made by State, type of program, and period of service and was to examine the extent to which eligible veterans had utilized their entitlements and the extent to which they had successfully completed their programs of education or attained their educational or vocational objectives. The data for the study were extracted by the Veterans Administration from the Education Master Record of over 8 million veterans and by the Census Bureau from the 1979 Survey of Veterans which consisted of personal interviews with 11,000 veterans. A series of critical variables was identified, analyzed, and cross-compared to generate the basic data. The results of the study will be used by the Veterans Administration and by Congress in future recommendations in support of educational entitlements for veterans.

**Authority:** Act of September 2, 1958, as amended (P.L. 85-857; 72 Stat. 1114; 38 U.S.C. 201 et seq.).
**Availability:** Agency
**Geographic Relevance:** National; DVB-wide

*Abstract:* Objectives of the study are to test the processing of burial awards at the Veterans Administration Records Processing Center (VARPC), evaluate the necessity of transferring deceased veterans' claims folders to regional office of jurisdiction, and evaluate the effectiveness of the experimental procedure. Burial awards are currently processed at VA regional offices. When applications are received from families of deceased veterans, the deceased claims folders are generally required and are transferred from remote locations when necessary. In many instances, these records are located at the VARPC. Due to the relative simplicity of burial award processing in most instances and in order to reduce mail and related records relocation costs, a test was established involving regional offices in which applications for burial benefits were to be processed at the VARPC if the veterans' records were located at that facility. The test has been successful and the decision has recently been made to implement the procedure nationwide.

**Availability:** Agency
**Geographic Relevance:** National; DVB-wide

*Abstract:* The Micrographics and Automated Retrieval Systems Study was established to evaluate the effectiveness and cost of continuing the present paper records system versus the costs and benefits of modern technology. Although the study is still being conducted at this time and a final study document has not been written, the preliminary findings have been that micrographics and other modern automated systems can be used cost-effectively in this agency's records management program. It is believed that use of these systems will be beneficial in terms of information retrieval improvements and significant office space cost savings.

**Availability:** Agency
**Geographic Relevance:** National; DVB-wide

*Abstract:* The purpose of the test is to survey mail volume and density of ZIP codes of outgoing mail and to determine if Presort is economically advantageous. A test of the U.S. Postal Service Presort Program is currently being conducted at the Veterans Administration Regional Office and Insurance Center, Philadelphia, PA. The test has proven Presort to be cost-effective and as a result a recommendation has been made to expand the test to VA Regional Office, Los Angeles, CA.

## NATIONAL PRODUCTIVITY COUNCIL

**E07100-001**

*Stronger Federal Effort Needed To Foster Private Sector Productivity.* (AFMD-81-29).
2/18/81; 46 pp.
**OMB Funding Code/Title:** 99-0000-9-9-000.
**Authority:** 15 U.S.C. 2401; Executive Order 12089.
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The objective was to assess the effectiveness at the National Productivity Council and to develop recommendations to make Federal efforts to improve national productivity more effective. Despite declining productivity, the National Productivity Council in over 2 years of existence has been inactive, has largely ignored the functions assigned to it, and has lacked support. A need exists for a productivity organization to effectively guide and coordinate Federal programs aimed at improving national productivity and to work with the private sector to develop a national productivity plan. This organization should be established by legislation, with a presidentially appointed chairman and its own budget authorization.

**Agency Contact:** General Accounting Office (202) 275-1584.

## NATIONAL RAILROAD PASSENGER CORPORATION (AMTRAK)

**E07600-001**

*Further Improvements Are Needed in Amtrak's Passenger Service Contracts, but They Won't Come Easily.* (CED081-35).
1/7/81; 32 pp. + 7 app. (24 pp.)
**OMB Funding Code/Title:** 69-0704-0-1-401 / Grants to the National Railroad Passenger Corporation
**Program:** Operating Grants and State Assisted Routes
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Rail Passenger Service Act of 1970, as amended (P.L. 91-518, title VI, § 601; 84 Stat. 1338; 45 U.S.C. 601).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to operate a nationwide system of rail passenger service. *Abstract:* Amtrak has now taken over direct operation of many of its functions, but it still must obtain many services from other railroads. The railroads provide train and engine crews for all Amtrak trains, provide and maintain tracks, do routine inspection and servicing of equipment, and provide other services and facilities. Amtrak has not been able to obtain railroad consent on revisions of existing agreements in order to better encourage on-time performance, including arrivals at intermediate points. Many railroads believe that they are held accountable for delays that are beyond their control, and do not want to accept additional risks unless they are well compensated. In addition to its contract revision efforts, Amtrak has sought relief in a few instances by going to courts and to the Interstate Commerce Commission (ICC) to settle disputes with the railroads. Amtrak should try to improve its passenger service contracts by revising its policy regarding flat rates to provide a mechanism for changing them during a contract period under certain circumstances. In addition, Amtrak should try resolving some of its current disputes with railroads by going to ICC for arbitration. If taking additional cases to ICC for resolution proves unsuccessful, Amtrak should seek congressional guidance and action regarding its dealings with other railroads.

**E07600-002**

*Amtrak's Productivity on Track Rehabilitation Is Lower than Other Railroads–Precise Comparison Not Feasible.* (CED-81-60).
3/13/81; 20 pp. + 5 app.
**OMB Funding Code/Title:** 69-0123-0-1-401 / Northeast Corridor Improvement Program; 69-0704-0-1-401 / Grants to the National Railroad Passenger Corporation
**Program:** Construction; Operating Grants and State Assisted Routes
**Congressional Relevance:** *House* Committee on Energy and Commerce; *Senate* Committee on Commerce, Science and Transportation. *House* Committee on Appropriations: Transportation Subcommittee; *Senate* Committee on Appropriations: Transportation Subcommittee.
**Authority:** Railroad Revitalization and Regulatory Reform Act of 1976, as amended (P.L. 94-210, title VII, § 703, as amended by; P.L. 95-254; 90 Stat. 121; 45 U.S.C. 853). Rail Passenger Service Act of 1970, as amended (P.L. 91-518, title VI, § 601; 84 Stat. 1338; 45 U.S.C. 601).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to upgrade track and other facilities to permit modern, high speed rail passenger service between Washington, D.C. and Boston, Massachusetts. *Abstract:* Even though the railroads in the comparison performed similar track-upgrading functions, there were different factors and conditions that directly affected their productivity rates. GAO tried to adjust its calculations for these variations; however, it was generally unable to do so within the parameters of the comparison. As a result, comparing the productivity rates of the track-upgrading functions was a complex task which could not be done with scientific precision. Nevertheless, GAO found that the difference between Amtrak's productivity and that of the other railroads was so great that it could conclude that Amtrak's productivity was not as high. Since no attempt was made to determine the reasons for the difference in the productivity rates, GAO could not predict Amtrak's potential for improvement.

## BOARD FOR INTERNATIONAL BROADCASTING

**E09100-001**

*Improvements Made, Some Still Needed in Management of Radio Free Europe/Radio Liberty.* (ID-81-16).
3/2/81; 55 pp.
**OMB Funding Code/Title:** 95-1145-0-1-154 / Grants and Expenses
**Program:** All Programs
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Board for International Broadcasting Act of 1973, as amended (P.L. 93-129, § 2; 87 Stat. 457; 22 U.S.C. 2871 et seq.).
**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The U.S. Government, through the Voice of America and Radio Free Europe/Radio Liberty (RFE/RL) is the largest Western International broadcaster to Eastern Europe and the Soviet Union. *Abstract:* The RFE/RL received appropriated funds from the Board of International Broadcasting, an independent Government agency. A review was made in evaluating RFE/FL effectiveness and economies in fulfilling its mission. In relation to 1976 GAO recommendations, nothing consequential has been done in programing and area and audience research. However, news operations have been consolidated and monitoring of foreign broadcasts has been removed from the news divisions and is now managed and financed by individual language services as suggested by GAO. Regulations governing the Board's relationship with RFE/FL have taken effect, but management still seems uncomfortable with the changes. The Board has recommended a modest relocation of Munich operations to the United States along with the consolidating of administrative activities, reducing the compensated programs, unifying personnel management policies and establishing uniform housing policies. GAO prefers eliminating company furnished housing and going to an all allowance system. GAO also found a need for a post allowance manual, uniform accounting procedures and an inventory control. Congress should have the executive branch conduct a review of U.S. broadcasting activities, including satellite broadcasting, sharing of technical facilities, and merging of separate U.S. international broadcast organizations. The Chairman of the Board for International Broadcasting should work with the top management of RFE/RL in a plan to: (1) complete the policy and procedures manual, including administrative and programing sections, translated in German, Russian, and English; (2) develop a new orientation program containing pertinent organization materials including copies of the mission statement and program policy guidelines in the native tongue of the employee;and (3) examine the current recruitment practices and projected staff needs over the next 10 years and develop a major staff rejuvenation and recruitment program plan identifying programing and management needs by service, linquistic and management skills required, project costs to the extent feasible, and possible alternatives for these needs. activities, reducing the compensated programs, unifying.

**Authority:** Domestic Volunteer Service Act of 1973, as amended (P.L. 93-113, title IV; 87 Stat. 405; 42 U.S.C. 5041-5062).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The management review of the Accounting Division examines the functions, processes, and activities performed in the Accounting Division. Information in this study was used to provide the Director of Administration and Finance with an analytical basis for making staffing or resource adjustments. The study focused on all functions, activities, and staff of the Accounting Division. In addition, the relationship between the Accounting Division and its various users was examined. The review provides criteria and guidelines to be used in near-term adjustments of manpower and other resources; provides a basis for developing a long-term staffing plan; provides a basis for justifying future requests for increases in staff resources; and identifies areas, processes, or activities which have potential for significant improvement or staffing resource economics.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** International/Foreign

*Abstract:* The reporting of Foreign Service National (FSN) personnel information had gradually become a process to which insufficient concern and efficiency were given, particularly in view of the transmission of inaccurate, untimely, and inconsistent 699 cable reports. In many cases, Country Directors for any given month would simply submit a copy of the previous month's cable, indicating no discernible differences and, in other instances, the 699 cable was not transmitted at all. The continuance of such practices gave way to the existing FSN data base being regarded as highly inaccurate and unreliable.

**Availability:** Not Publicly Available (Internal Use Only)
**Geographic Relevance:** National

*Program Objectives:* The Computer Services Division provides automated data processing services including systems analysis, design, documentation, and programing to the Peace Corps and ACTION. *Abstract:* Evaluation indicates that: workload has increased with major accession of computer terminals in user organization and regional offices; operational budgets and staffing have declined by nearly 30% below the Office of Management and Budget (OMB) approved level; workload backlog has developed; documentation is lacking on major programs; the career ladder stops inappropriately at one grade lower (GS 11) than in most Federal agencies; and shortage exists of junior staff and of fundings for training. Recommendations are to increase staff from 46 to 50, transfer production of reports to the user organization, increase training funds to $1500 per trainee, recruit staff at GS 5-7, and setup a career ladder through GS 12.

*Abstract:* A Peace Corps staging, which all prospective volunteers attend, is variously intended to provide country orientation, information about Peace Corps service, selection of individuals for service, some preliminary training, and medical and administrative processing. The three staging processes currently in use differ in format, objectives, and cost. All do not meet the intended purposes of a staging, and no formal criteria exists for determining which staging process a group of volunteers will undergo. Many individuals are sent to their assignment countries without having been assessed on their suitability and adaptability for the Peace Corps experience.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO surveyed accounting controls over expenditure and revenue transactions at Peace Corps activities in Guatemala, Ecuador, and Jamaica. Questionnaires designed to identify potential internal control problems were the basis of GAO interviews and discussions with responsible officials. When responses indicated potential weaknesses, GAO tested selected transactions to determine if the weaknesses existed. GAO only verified the existence of the weaknesses and did not attempt to establish their extent or the precise corrective actions needed. The survey disclosed weaknesses in controls over cash receipts, accounts receivable, and imprest funds at the Peace Corps in Jamaica; and weaknesses in controls over imprest funds at the Peace Corps in Guatemala and Ecuador. In Jamaica, control weaknesses included: (1) receipts were not being issued for each collection; (2) collections were not deposited promptly as required; (3) collection efforts on amounts due for personal for petty cash disbursements were sometimes not followed; and (4) imprest funds were not adequately safeguarded and controlled. The country director generally agreed with the GAO findings and indicated that he would take the corrective actions needed. Since the embassies in Guatemala and Ecuador perform most accounting functions in those countries, Peace Corps accounting operations are limited. The two posts do operate imprest funds, and GAO noted that they were not performing unannounced cash verifications as required. These weaknesses were discussed with the country directors and they promised to take corrective actions. The Director of ACTION should follow up on the adequacy of these corrections.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to educate mothers and children in proper nutritional practices. *Abstract:* The report evaluates two projects to educate Moroccan mothers in proper nutritional practices. It covers the period from April 1975 to December 1978 and is based on a study by Catholic Relief Services and program records, site visits, and interviews with beneficiaries. There was a significant correlation between education and improved nutrition in the children in the program. Mothers in the program showed greater knowledge of child-care practices. The report recommends that the donated food component be phased out without diminishing attendance in the program or the impact of the program's educational influence.

*Program Objectives:* The objective of the program is to provide better health care and to start to redress the imbalance in the allocation of health resources. *Abstract:* The evaluation covers the period from August 1977 to April 1980 of the project to provide an effective network of village-level health huts. Health huts were constructed and equipped in 200 target communities. Training materials and a record system were developed and the health staff were trained in their use. However, huts did not earn enough to cover operating costs; government supervision and support was poor; the medicine resupply system was inadequate; the project's scale was too large; and the Agency's monitorship was not satisfactory. Corrective measures were recommended, some of which have already been implemented.

*Program Objectives:* The objectives of the program are to make potable water available, to institutionalize a maintenance and disinfection system at the provincial level, and to increase health awareness among beneficiaries. *Abstract:* The report evaluates a series of projects conducted by the Cooperative For American Relief Everywhere (CARE) with partial funding by the Agency for International Development and assistance from the Peace Corps. No relationship between the CARE water projects and a change in the incidence of water-related disease could be determined. Recommendations for future water projects are included.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to improve low-volume feeder roads in Jamaica. *Abstract:* The evaluation covers the period from 1972 to 1976 and is based on site visits and interviews. The evaluation team reports that the Agency for International Development sabotaged its own political and development goals by misguided policy choices and that reliance on the feeder roads project to attain those goals was not logical. Jobs created by the project had no real impact on the country's unemployment situation. Budgetary support for maintenance was not adequate so that 75% of the roads are in a state of disrepair. The project had limited, and in some cases adverse social, environmental, and institutional effects. High political priority for the project led to hasty design process which was the ultimate cause of the project's failure.

*Program Objectives:* The objectives of the program are to assist Korea to become self-sufficient in rice and barley production and to raise farm incomes. *Abstract:* The evaluation covered the period from September 1975 to December 1980 and was based on on-site review of 55 small elements of a larger irrigation works system. Self-sufficiency in rice was achieved soon after the project began; barley production declined; farm incomes did increase, but increased unequally due to the relation between farm size and farm income. The success of the project was attributed to the high degree of engineering and administrative competence of the Korean government, effective delivery of agricultural inputs and extension services, and high rice support price. Several learned experiences are detailed.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to construct rural roads in formerly isolated areas of north and northeast Thailand. *Abstract:* The evaluation covers the period from 1964 to 1974. Nearly 30 million people benefited economically and socially from 800 miles of roads built. Wherever roads provided access to markets more land came under cultivation and a wider range of nutritious foods became available. Commercial activities in towns and villages led to increased production and distribution of varied goods. Children had more access to elementary schools and teachers could comute. A greater access to health care facilities and a greater awareness of family planning practices occurred. Negative impacts included deforestation, soil erosion, and spread of contagious diseases. The degree of decentralization has not been sustained, but local initiative in rural development has been encouraged.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to increase small farmer production in Central America by developing improved cropping practices. *Abstract:* The project evaluated research supported by the Center for Tropical Agricultural Research and Training in Costa Rica on the traditional multicropping systems used by over 4 million small farmers in Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua. Project progress was slow but succeeded in implementing on-farm research and developing area-specific recommendations. The project concentrated too much on research itself rather than on verifying and disseminating results. The research center's institutional capabilities were greatly improved, and national agricultural institutions involved had positive benefits. The evaluation team concluded that such a research center could significantly improve the lot of the small farmer. Several recommendations for future projects are listed and discussed.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to institute a rural electrification program in the Philippines in order to stimulate rural economic development. *Abstract:* This evaluation covers the period from January 1968 to January 1975 and was based on site visits and interviews with project and knowledgeable personnel. Rural electrification had an impact where there was a dense population, available technical skills and capital, and access to large and diverse markets. Economic growth requires the development of electrically oriented projects and programs. Electrification must be aimed at the poor if it is to provide employment opportunities, higher productivity levels, and better public and social services. Effective management of cooperatives is more important than beneficiary participation or democratization. Productive power use and slower expansion rates encourage an electrification system's viability. Energy demand is not greatly increased when fuels other than electricity are available.

*Program Objectives:* The objective of the program is to improve the social and economic conditions in the rural areas of Bolivia through the introduction of electrification. *Abstract:* The preponderant positive impact of the rural electrification projects in Bolivia was social. The physical quality of life was improved for 7% of the rural population by household lighting. Electric light was more convenient, less expensive, safer, and healthier than traditional lighting sources. Electric power, however, did not play a catalytic role in economic development of rural areas nor was it a pre-condition for economic imporvement. Five lessons learned are discussed.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objectives of the program are to provide small farmer access to marketplaces and to assist in agrarian reform. *Abstract:* The report contrasts projects on the construction of feeder roads in rural isolated areas of Honduras with the construction of access roads to all-weather highways for small farmers. The construction of access roads was complemented by credit, training, and technical assistance whereas the feeder roads project was not. The evaluation team concluded that access roads are more consistent with the Agency for International Development's new policy than feeder roads, since the former allow specific selection of small farmer beneficiaries and, due to the long-term impact of a road, it is difficult to make final assessment of its success or failure. Practically no large land-holders benefited from the project.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to improve economic and social conditions among the rural poor. *Abstract:* The social, educational, and recreational benefits of the rural roads projects in the Philippines were modest, in general. There was a significant increase in health services, and some rural residents perceived some increase in quality-of-life benefits such as reduction in travel time, more comfort, and yearround ability for mobility. But the institutional impact was disappointing: maintenance was inadequate and provincial planning, analysis, and engineering have been strengthened but have placed a heavy manpower burden on the country. The impact of rural roads program would have been greater had the construction or improvement of the provincial roads been better coordinated with township roads linking more isolated communities with those provincial roads.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The object of the program is to improve the educational system in Nepal. *Abstract:* The impact of the Agency for International Development support to education in Nepal from 1954 to 1974 has been highly positive, though results are mixed. Linked to the level of education are increased agricultural productivity and a lower fertility rate. Health practices and knowledge are still very poor; hygiene, however, is part of the elementary school curriculum, and sanitation seems to have been improved. Probably linked to the level of education are such behavioral aspects as receptivity to new ideas, willingness to take risks, higher aspirations for the future, less fatalism, and broadened participation in the affairs of the world. Severe problems still beset education in Nepal, but the Ministry of Education is aware of them and is addressing them.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to improve health conditions in towns of between 5,000 and 10,000 population. *Abstract:* The Korea project to establish potable water plants and distribution systems in towns of between 5,000 and 10,000 population was not a success. Even so, it produced both positive and negative impacts. Most users felt a piped water system saved time and made life easier. A few felt it improved family health even though no supportable evidence was found linking health with drinking water. The availability of fire hydrants was an obvious benefit to public safety. However, the system was too expensive for the poor and the runoff from flush toilets created a potential for disease. Further, the project's influence was limited to the six communities in which the systems were installed. The lessons learned from this failed project are discussed in terms of their potential for improving future rural potable water programs.

*Program Objectives:* The objective of the program is to improve the small farmers' welfare by introducing electricity into rural areas. *Abstract:* Electrification has played a substantial role in building market towns and regional service centers in Ecuador. Electric power contributed significantly to the growth of the four towns studied in this impact evaluation. Commercial and industrial users of electric power were people of relatively higher income, but their activities provided employment, markets for local agricultural products, supplies of needed inputs, and other important benefits for the poor. "Trickle-down" economics appears to have worked.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to understand both the progress and the problems related to current Agency for International Development (AID) programs in Senegal in order to define broad outlines for the planning of future U.S. economic and social development programs for Senegal. *Abstract:* This report on the assessment of the overall AID program in Senegal is based on two volumes of resource papers and an annex containing evaluations of USAID-financed projects for livestock, rain-fed cereals, irrigated perimeters, and rural health. The evaluation was undertaken by expert observers, and surveys of the beneficiaries were completed by the Ecole Nationale d'Economie Applique. An AID assessment of current practices in project management and implementation was also completed. The Joint Assessment Committee concluded that the USAID program in Senegal has been responsive to the needs of food self-sufficiency and self-sustained development. However, the program needs to concentrate its activities more sharply on building linkages between individual projects and on the macroeconomic and social needs of Senegal. USAID assistance should strive to increase productivity, especially in the rural sector. This implies stress on improving the organization and management of Senegal's physical, natural, and human resources and an emphasis on training rural residents in the construction and maintenance of rural infrastructure and new productive assets.

*Abstract:* The current status of irrigation in the developing countries is reviewed. In order to improve project management and design, greater use must be made of evaluative data. Evaluations should focus on donor, host government, and user needs. Certain analytic questions and criteria about irrigation need to be used consistently. Use of local, public, and private institutions in evaluation needs to be increased. Evaluations should stress management and environmental issues and farmer-risk responses. Five areas should be examined in evaluating irrigation projects: (1) economic viability; (2) use of land water, capital, and labor; (3) performance and management of the water system; (4) environmental effects, including health effects; and (5) social soundness, including effects on production and income distribution.

*Program Objectives:* The objective of the program is to reduce dependence on nitrogen fertilizers in less-developed countries through use of nitrogen fixation by tropical legumes. *Abstract:* Some 1,493 rhizobium isolates from 83 legume-innoculation trials have been collected for testing under various conditions. A system for processing data has not yet been developed. Training (including an intern and a graduate program) in rhizobium technology has been provided. Documents have been assembled for use by staff, trainees, and clients abroad, but the Biological Nitrogen Fixation Symbiotic Project's (NIFTAL's) outreach is hampered by lengthy operational procedures. Recommendations for the improvement of the program are included.

### E17701-018

*Aflatoxin Reduction in Maize: External Project Review.* (931-1181).
2/1/81; 32 pp.
Urbon L. Diever
**Contractor:** Auburn University; Auburn, AL
**OMB Funding Code/Title:** 11-1021-0-1-151 / Functional Development Assistance Program
**Program:** Agriculture, Rural Development and Nutrition
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 103; 75 Stat. 424; 22 U.S.C. 2151a). International Development and Food Assistance Act of 1978 (P.L. 95-424, title I, § 103; 92 Stat. 943; 22 U.S.C. 2151a).
**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to control or reduce aflatoxin production in maize. *Abstract:* The University of Missouri project team has been stymied by a lack of effective methods to identify resistant maize selections experimentally. A 2-year laboratory construction prevented the researchers from determining early in the project that their inoculation techniques were ineffective. A 2-year unfunded extension of the project was recommended together with several actions to refine and modify the project techniques.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to develop methods for control of vertebrate pests that destroy crops in less developed countries. *Abstract:* The evaluation covers the period from October 1, 1978, to September 30, 1979. The Denver Wildlife Research Center published over 200 technical reports as a result of this project. Many were co-authored by host country researchers. Results on the control of damage by rodents or birds are given for the Philippines, Sudan, Haiti, and Bangladesh, together with information on vertebrate pests and other agricultural problems. The report recommends that the Agency for International Development continue to assist the Denver field and laboratory research, evaluation, training, and information dissemination. Specific needs resulting from this project are identified in the toxicological, chemical, pest, and environmental analyses included in this paper.

**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 103; 75 Stat. 424; 22 U.S.C. 2151a). International Development and Food Assistance Act of 1978 (P.L. 95-424, title I, § 103; 92 Stat. 943; 22 U.S.C. 2151a).
**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to upgrade the planning and management capabilities of Liberia's Ministry of Agriculture. *Abstract:* Due to unfavorable political and organizational climate in the Ministry, the project failed to have a substantial impact on the planning capability of the Ministry of Agriculture. The project design overestimated Liberian resources, thus overloading the outputs and cutting short the project's time frame. A project-planning approach rather than a sectoral-planning approach was too ineffectual to influence national planning. While 32 ministry personnel were trained, they were either underutilized or used inappropriately. The marketing component failed because personnel were incompetent. This project was deemed to have failed because of U.S. unwillingness to allow adequate time for development.

**Availability:** Agency
**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to carry out basic research on the control of root-knot nematodes in developing countries. *Abstract:* The project, implemented by North Carolina State University, has produced excellent results. Satisfactory progress was made in identification of food crops, cultivars, and germ plasm resistant to meloidogyne, as well as in the evaluation of associated environmental factors. Progress was slower in evaluating responses to crop rotation and the implementation of plant protection schemes. The allocation of limited resources to local cooperators was productive. The use of regional coordinators, however, did not work well. The evaluation team recommended that the project be extended, and the report discusses several recommendations for the project's future.

*Program Objectives:* The objective of the program is to provide mineral intakes for grazing ruminants in tropical areas of Latin America, Asia, and Africa through the development of efficient mineral supplementation regimes. *Abstract:* Through the excellent work of the University of Florida, the project has been a success. Significant research has begun in 16 countries. Mineral deficiency and toxicity surveys are underway, and mineral supplementation efficiency is being explored in many locations. Preliminary cost-benefit data indicate returns of at least double the investment by correcting mineral deficiencies. Team recommendations include a 2-year extension of the project beyond the proposed November 1980 termination date in order to develop in-country research capabilities and joint consideration by the Agency for International Development and the University of Florida of a similar and expanded program in Africa and Asia.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective of the program is to increase resources and services to small farmers in English-speaking Caribbean countries. *Abstract:* The project's terminal disbursement date cannot be met, nor can the project be carried out as planned. Responsibility for this must be shared by the Agency for International Development (AID) and cooperating Caribbean entities, especially the Caribbean Development Bank. AID failed to identify or resolve basic issues in the integration of the four components (agricultural production credit, inputs, marketing, and feeder roads) on whose interdependence the project design was based. Numerous problems still exist. Evaluators recommend that the termination date be extended 2 or 3 years, with negotiation of a new and more detailed schedule and implementation plan with the Caribbean Development Bank. Such a plan would stress components in the few countries where spade work already done augurs well for speedy implementation.

*Program Objectives:* The objective of the program is to develop subtropical lands for colonization in Southern Bolivia. *Abstract:* Six evaluation reports, written by an anthropologist, an agricultural economist, a regional specialist, an ecologist, and a management specialist, contrast the efforts of two colonies in Bolivia. One colony (San Julian) is strictly controlled and very carefully prepared. The other (Chane Pirai) is a more spontaneously generated settlement. Numerous problems, such as cost and delays in securing credit, occur in both colonies. The orientation process, the major innovation in the San Julian Colony, led to a more accelerated rate of development, but the high per-capita cost of this colony raises questions about its replicability.

*Program Objectives:* The objective of the program is to improve the production and nutritional quality of wheat. *Abstract:* This final evaluation covers the period from July 1966 to December 1979. Analyses of 20,000 cultivars in the U.S. Department of Agriculture's world collection and in Nebraska provided the quantitative variations in the genetics of protein and lysine and the correlations among them. The major genes affecting protein and lysine were identified. Several high-yielding varieties were developed and their characteristics identified. An international wheat evaluation network involving 68 test sites in 38 countries has been established and has been effective in early identification of new stable and broadly adaptable high-yielding varieties of winter wheat.

*Program Objectives:* The objective of the program is to develop an International Center for Marine Resources Development to assist less-developed countries in improving the use of their fishery resources. *Abstract:* The report evaluates the grant from its inception in 1969 to its termination in December 1979. The evaluation team concluded that the information system fully met the project design requirements, but that numerous problems would confront the system after the termination of the Agency for International Development (AID) fiscal support. Since the university will shift the focus of the International Center for Marine Resources Development away from the problems of the poor countries and toward U.S. domestic problems, the evaluation team recommended that AID consider means of continuing support.

*Program Objectives:* The objective of the program is to assist the Government of Tanzania to establish integrated range and livestock management systems in the Masai district. *Abstract:* This final evaluation covers the period from 1969 to 1980 and is based on an intensive review of all project records, field trips, and numerous interviews with project personnel and beneficiaries. A precise listing of project successes and failures is not possible because many goals were only partially achieved and dependable baseline data and progress reports were not available. Additionally, the project was substantially revised in 1976 in purpose and in emphasis. Some 50 recommendations were made.

*Program Objectives:* The objective of the program is to rehabilitate agricultural areas damaged in Lebanon's civil war. *Abstract:* The evaluation covers the period from September 1977 to July 1980 and is based on a review of statistics and interviews with project staff and beneficiaries. Despite the security problem, most project objectives have been achieved; income potential has been increased; 19 community committees have been formed and 10 cooperatives strengthened; the organizational structure has provided loans on a timely basis to the poorest individuals; and almost 95% of the matured loans have been repaid. Evaluators recommend that project funding and scope should be increased to meet the enormous needs which still exist.

*Program Objectives:* The objective of the program is to provide village-level agricultural extension services in 33 provinces in Thailand. *Abstract:* Training programs were implemented in 25 of the 33 provinces in Thailand; recruitment and quality of extension personnel was only fair, however. Shortages of subject matter specialists and agents impeded the extension of services to farmers. Routine interaction among farmers, extension personnel, and research scientists did not occur as planned, although efforts were made in that direction. Final data concerning anticipated crop increase were not available, although spot readings showed that harvest and income in 1979 increased over 1977 and 1978. Recommendations to improve the project are included.

*Program Objectives:* The objective of the program is to upgrade the food and nutrition-planning capabilities of the six countries of Central America. *Abstract:* The basic program staff of the Institute of Nutrition of Central America and Panama is working well. However, the research-oriented staff is uncertain of its role. While the research being conducted is of high quality, it is not sufficiently responsive to the region's nutritional problems. Agency for International Development missions have not enthusiastically supported the Regional Nutrition project, thus limiting the project's resources. Evaluators make six recommendations for improvement, including one that the project be extended for 4 years.

*Program Objectives:* The objective of the program is to promote the efficient utilization of feedstuffs or feeding systems for various classes of animal species in less developed countries. *Abstract:* Excellent progress was made toward project goals. The international feed vocabulary supplied by the International Feedstuffs Institute was improved, augmented, and simplified. More than 1300 feed names with composition data were added from the Middle East and Southeast Asia, bringing the data bank total to over 13,480 entries. Feed information centers have been established in Syria, serving 21 Arab countries and in Costa Rica, serving 21 Latin American countries. Numerous dissemination avenues are listed, including meetings, training sessions, and publications. It is recommended that the project be extended for 3 - 5 years to complete work on the original objectives and to increase training opportunities.

*Program Objectives:* The objective of the program is to assist selected less-developed countries in evaluating family planning program effectiveness. *Abstract:* The Community and Family Study Center at the University of Chicago has met or exceeded planned targets within the period evaluated (July 1, 1976 to June 1, 1978). Evaluations of the family planning program impact were completed in Thailand, Indonesia, South Korea, and Colombia and are in progress in the Philippines and Colombia. Assistance to Thailand and Indonesia indicated organized family planning can help reduce fertility rates. A long list of achievements in various countries is discussed. Since questions remain regarding the validity of the assumptions, methodology, and data of the contractor's analysis techniques, the evaluators also recommended that future contracts be based on competitive bids to obtain alternative approaches to family planning analysis.

*Program Objectives:* The objective of the program is to institutionalize a management training capability in family planning institutions in less-developed countries. *Abstract:* The Center for Population Activities has met its contractual obligations. It has a strong board and a dedicated staff who have developed good relationships with their counterparts and with the U.S. Agency for International Development (USAID). Its organizational experience and flexibility should not be lost to AID. Upgrading the scheduling and staffing of training programs is recommended. Several actions are suggested as a way of pursuing institutionalization more vigorously.

*Program Objectives:* The objective of the program is to integrate family planning information and education in formal and nonformal home economics programs in less-developed countries. *Abstract:* The evaluation covers the period from January 1, 1978 to April 21, 1980, and is based on site visits in Jamaica, Panama, Sierra Leone, Thailand, and the Philippines and discussions with the contractor (American Home Economics Association). Each country made good progress in integrating family planning into home economics training in both formal school systems and rural outreach programs. Cooperation with international family planning agencies, U.S. Agency for International Development (USAID), and host-country missions was very good. A major problem, however, was the time-consuming procedure for approving project activities. Evaluators made several recommendations among which was that AID continue the project as a grant rather than a contract and reduce the number of reports required.

*Program Objectives:* The objective of the program is to establish population research, training, and graduate study to serve the Asia/-Pacific region. *Abstract:* The evaluation covers the period from June 1, 1968 to June 1, 1973. Contract objectives were achieved within the timeframe contemplated. The Population Institute, while unsystematic, did attempt to relate research to field problems. While 19 research studies were concerned with country-specific problems, only 8 were focusing on less-developed countries. Evaluators reported that the Institute staff was effective and well-trained and deserved high marks for its efficient and skillful administration. Coordination with the Agency for International Development, however, was less than satisfactory. The team recommended that procedures be established for review and evaluation of research project findings and for the population program at the University of Hawaii.

*Program Objectives:* The objective of the program is to test photovoltaic (PV) power systems for meeting energy requirements of basic rural health systems in Africa and Central America. *Abstract:* The evaluation covers the period from July 1979 to December 1980. Overall project design and usefulness are adequate, and project management (involving the Agency for International Development's Office of Energy, NASA, and Department of Energy) has been sound. The report relates program activities (e.g., catalogue of medical equipment for PV-powered rural clinics; surveying health organizations to assess adaptability to PV-power; communications and education programs, etc). The project is recommended for continuation with expansion beyond African and Latin-American countries.

*Program Objectives:* The objective of the program is to increase the impact of industrial research institutes on development. *Abstract:* This final evaluation covers the life of the LDC Industrial Research Institute project from 1973-1980. The Denver Research Institute established linkages with Industrial Research Institutes in Thailand, Colombia, and Pakistan. Those institutions were improved in: staff development; ability to provide assistance in coal research, mineral resources development, and food packaging; delivering technical information; and using women in technology transfer. It was generally concluded that when properly organized, equipped, and utilized, industrial research institutions can be an invaluable aid to development. Specific recommendations to improve the research grants program are provided.

*Program Objectives:* The objective of the program is to provide specialized training in the United States for Syrian technicians and government officials. *Abstract:* Of 270 questionnaires sent to Syrian participants who had returned from training programs in the United States only 145 responses were received (46.3%); this evaluation is based on an analysis of those responses. Of those responding, 70% reported their training in the United States had been "well-arranged"; another 45.5% said they used the training occasionally. Problems with English language had been a major obstacle. In addition, availability of housing and transportation and receipt of stipends had been a problem for some.

*Program Objectives:* The objective of the program is to provide participant training to meet the critical needs for technical and managerial manpower in Africa. *Abstract:* This evaluation, focusing on Sub-Saharan Africa, covers the period from July 1976 to July 1980 and is based on visits to four African countries, examination of projects, and a review of the project paper. Because of the high cost of U.S. training as opposed to training in Africa, the evaluators recommended that there be more training in Africa. In addition, it was suggested that the Agency for International Development (AID) should gather and disseminate information on available sources of training, develop working relations with African organizations for placing trainees, and continue to restrict training to development-related fields. A 50-item bibliography is included.

*Program Objectives:* The objective of the program is to improve the Caribbean Development Bank's ability to provide technical assistance to member nations. *Abstract:* The Technical Assistance Fund of the bank, established to provide advisory and managerial services in development, project preparation, and implementation, has had a slow start. The highly centralized procedural and administrative system for approving funds was a primary cause of the delay. Another cause was the lack of effort to market the resources available. However, 70% of the approved funds had been allocated to the poorer nations and assistance has been provided in agriculture, industry, infrastructure, finance, transportation, and communications. Numerous recommendations for improvement are included.

*Program Objectives:* The objective of the program is to develop partnerships between U.S. and Latin American cities or States. *Abstract:* The evaluation covers the period from January 1975 to June 1980. Citing examples from 11 representative partnerships, the evaluation examines the National Association of Partners of the Americas (NAPAs) in such areas as agriculture, rehabilitation and community education, health, sports, and journalism. The partnerships are very effective in promoting the Agency for International Development's development aims and in fostering people-to-people relationships. However, the partnerships need strengthening in terms of funding, membership, public recognition, and geographic scope.

*Program Objectives:* The objective of the program is to improve small farmer coffee production in Haiti. *Abstract:* This report is one of five special studies done on aspects of the small farmer development project (other studies previously reported) and covers the period from 1975 to November 1979. It is based on on-site interviews with project personnel. Seven coffee centers used for demonstration, trials, and fertilizer distribution have been built, and three more are to be completed. However, the centers have not been fully utilized for a number of reasons spelled out in the report. Prior to further assistance by the Agency for International Development, the evaluators recommend examining whether increasing coffee production is the best way to help Haiti economically and whether Haitian small farmers will respond to further U.S. assistance.

*Program Objectives:* The objective of the program is to develop indigenous university-based extension services to serve small industries in less-developed countries. *Abstract:* The final report covers the life of the project from January 1974 to January 1979. The project was carried out with five different universities in Korea, the Philippines, Brazil, Ghana, and Nigeria. Four of these efforts remain active today; the Nigerian program was dropped in 1978. A Project Evaluation Seminar dated June 9, 1980, by F. T. Maido and Russell Scarato specifically examined programs in Korea and the Philippines. The evaluation team thought the project achieved temporary success in focusing the counterpart universities on employment generation and small industry development. The Georgia Institute of Technology contractor staff learned about alternative approaches to institutional assistance but did not document this experience adequately.

*Program Objectives:* The objective of the program is to enhance the ability of the Agency for International Development missions and institutions in less-developed countries to develop and implement rural development programs. *Abstract:* Evaluators conclude that the project is achieving its purpose, especially through providing consultant services and diffusing knowledge on alternative rural development strategies. The project should be extended for 30 months, and analytic work should continue on the cost effectiveness of alternative data collection methods. Several issues and recommendations are discussed.

*Program Objectives:* The objective of the program is to study and test features of Siliana's production-related social and institutional environment. *Abstract:* Self-help strategy has generally been accepted with 17 subprojects involving 600 active participants and community contributions totaling 30% of direct subproject costs. Save the Children Foundation has developed strong working relations with local institutions; to date, however, only one partially successful subproject has been completed. Two weaknesses in project strategy are outlined, and recommendations are made to correct them. Over 60% of the budget has been spent on road construction and on potable water, and under 1% on data collection and analysis. Further investment in range management subprojects is not recommended. A number of technical problems related to wells, to road building, and to health services are discussed.

*Program Objectives:* The objective of the program is to provide humanitarian and service projects to the people of Northwest Haiti. *Abstract:* HACHO (the Harmonisation de L'Action des Communantes. Haitiennes Organisees) is evaluated from its inception in 1966 to September 30, 1979. Evaluators focused on HACHO's relationships with community development oroganizations in programs such as medicine, nutrition, water, and crafts. Residents favored local control and decentralization as opposed to HACHO's emphasis on larger councils, committees, and regional organizations. Evidence suggests that local officials found it easier to seek fiscal support for civic improvements through HACHO and the Councils HACHO established than through the national government.

*Program Objectives:* The objective of the program is to implement a multisectoral development program in the Luwu area of Indonesia. *Abstract:* The evaluation covers the period from January 1975 to February 1980. Because of problems in project design and contracting, the project will extend to 6 years rather than 4. Project outputs progressed well; however, the road improvement component and the Farmer Cooperative Centers have suffered from underplanning and underbudgeting. Additionally, some management difficulties were created for the Government, although an effective system for coordination among several government ministries has evolved. A series or recommendations for project management in the future is included.

*Program Objectives:* The objective of the program is to increase the availability of African personnel trained in rural development. *Abstract:* The levels and quality of personnel in the Pan African Institute for Development (PAID) are satisfactory and the Institute's financial situation appears sound. Support from African governments and external sources is increasing. Former trainees have done well in their careers; some occupy senior positions in national and international organizations such as the Africa Development Bank. PAID's record in assisting development agencies is impressive. The report outlines 33 recommendations. The Agency for International Development should continue this grant as planned and should consider some form of assistance after 1982. A 30-item bibliography is attached.

*Program Objectives:* The objective of the program is to integrate women into the economies of developing African countries. *Abstract:* The evaluation covers the period from June 1976 to September 1980. The project consists of seven subprojects (Tivaonane–698-038-801, Gara Cloth Industry–698-038-802, Ghana Day Care–698-038-803, Kassack Nord–698-038-804, Silkworm and Vegetal Taunin Study–698-038-805, Casamance Vegetable Growers–698-038-807, and Income Producing Feasibility Study–698-038-808). The subprojects are inherently replicable; however, the fact that most objectives were not stated quantifiably and baseline data were not furnished makes performance difficult to measure. The findings of the few feasibility studies that were conducted were either not used or were rendered irrelevant by the lapse of time between their completion and the project starting date. Most of the findings pointed to a low priority for projects focusing on women in development. Suggestions are made regarding factors which could make them more successful.

*Program Objectives:* The objective of the program is to develop the Gara Cloth Cooperative for Women in Sierra Leone. *Abstract:* Although quality marketable items are being produced, the system for ordering and distributing raw materials to cooperative members is disorganized and cash payment for women producing finished goods is slow. Confidence has been lost in the Gara Cloth Cooperative and numerous problems exist, not all of which had been solved by the time of this evaluation. The evaluation team recommended a redesign of the project to incorporate some 12 specific recommendations to resolve a number of the problems.

*Program Objectives:* The objective of the program is to provide women in 12 villages in Senegal with work alternatives of a socioeconomic nature. *Abstract:* Few planned objectives have been achieved. Both men and women have made substantial contributions to the project. As a result of the women having assisted in the project design and activities, their leadership and organizational skills have improved markedly. Women did not, however, demonstrate an understanding of financial management. Recommendations of the evaluators include: training for the women in recordkeeping and in debt amortization and depreciation; assessment of markets for project goods; assistance in sheep raising and tree cultivation and in preparation of waivers for purchase of less-costly medicines.

*Program Objectives:* The objective of the program is to study the feasibility of training Sahelian women for nonformal education in Upper Volta. *Abstract:* This feasibility study was submitted 1 1/2 years late due to budgetary constraints in the Sahel project concerning the Voltaic Scientific Research Center and to the necessity to travel great distances over poor roads. The study provides a comprehensive overview of Sahelian women's socioeconomic roles in different ethnic groups. Results of a questionnaire administered to village populations and an extensive bibliography are included. Various project activities for women are recommended, including agricultural training programs and health and nutrition education programs.

*Program Objectives:* The objective of the program is to assist women's vegetable cooperatives in 13 villages in the Casamance region of Senegal to increase their commerical vegetable production. *Abstract:* Vegetable gardens were reported planted by women in 7 of the 13 targeted villages, but only 2 of the 4 villages visited had producing gardens. Women reported that wrong planting time caused crop loss, income loss, and loss in the cooperative's membership. The 25 installed wells operate but often run dry. Only 2 of 26 pumps are working since spare parts are difficult to obtain. Project vehicles are broken, there is a shortage of maintenance personnel, and all but two donkeys have died from disease. The list of failures goes on. The report states that, in general, women did not evidence a desire for this project.

*Program Objectives:* The objective of the program is to study the feasibility of women in Upper Volta producing for marketing silkworms from mulberry trees and vegetal tannin from acacia trees. *Abstract:* The silkworm production pre-feasibility study provides background on silkworm and mulberry tree cultivation and concludes that silkworm production is viable in Upper Volta. The vegetal tannin production pre-feasibility study concludes that although vegetal tannin production is uneconomical due to insurmountable competition on the world market, it could be profitable if a global reforestation scheme were undertaken. The evaluators state that the study's suggestions should be disregarded until information concerning the relevance for women and the research methodology used is obtained and the Government of Upper Volta is consulted.

*Program Objectives:* The objective of the program is to implement an integrated rural development program in upper Lofa County, Liberia. *Abstract:* Project activities have generally been successful and the project has had a positive impact on rural development in the area. The project's most successful element has been the rapid adoption of swamp rice production. With the introduction of better seeds and cultivation methods, production is now at 258% of target, and nonproject farmers clamor for inclusion. The project's social impact has been positive because of farmer training by extension agents and the success of the town cooperatives, which now number 200.

*Program Objectives:* The objective of the program is to promote rural development through the provision of basic village infrastructure. *Abstract:* This project has funded between 500 and 600 activities in three governorates in Egypt (primarily potable water and feeder roads). Project progress has varied from one place to another. Completion of project activities has depended, to a large extent, on the degree of decentralization in project design and implementation. In one governorate, where local participation has been highest, nearly twice as many activities have been completed as in the other two governorates at approximately half the cost.

*Program Objectives:* The objective of the program is to establish a farmers' association capable of providing technical assistance and giving the farmer a voice in agriculture policy decisions. *Abstract:* Despite the steady improvement and progress made under this project, some of the target objectives have not been fulfilled as quickly as planned. The evaluators point to some of the causes of the delay, two of which were the lack of incentives on the part of the farmers and the fact that loans have been too small to meet the farmers' needs. In spite of the slow progress, external factors are contributing to achievement of project goals through the rapid adoption of vegetable cultivation using drip irrigation, plastic mulch, tunnels, and houses.

*Program Objectives:* The objective of the program is to increase productivity and farmers' incomes and standard of living. *Abstract:* The proposal recommends evaluation of seven projects comprising part of Stage I of the Jordan Valley Rehabilitation and Development Plan (East Ghor Main Canal; Larga Triangle Irrigation; Sprinkler Irrigation Equipment; Yarmouk Dead Sea Road; and Three Village Development projects). The last few years have seen rapid expansion of drip irrigation and the use of plastic mulch tunnels and houses; lack of water, however, has been the key constraint. New techniques can result in net returns as high as $50,000 compared to $2,500 for traditional techniques. The new schools have had measurable benefits, and the road completed returned far greater benefits than anticipated.

*Program Objectives:* The objective of the program is to institutionalize a program of supervised production credit for small- and medium-sized farmers in Northern Tunisia. *Abstract:* The project has generally progressed well. Nearly 2,000 farmers were reached with technical services and credit during the past crop year. More fertilizer is being used; wheat, barley, and vetch production have increased; and fallow land has decreased. Numerous problems are discussed, but each has a recommendation designed to alleviate it.

*Program Objectives:* The objective of the program is to extend Community Based Integrated Rural Development (CBIRD) programs in six developing nations. *Abstract:* The evaluation covers the period from May 1975 to December 1978 and examines in detail the impact of CBIRD programs in Honduras and Colombia. The Save the Children Foundation is commended for generating community commitment and for regularly applying concepts of "Women-in-Development" and "Appropriate Technology" in the field. Its strong self-help component in projects to build schools, clinics, roads, and other infrastructure made these the most successful programs.

*Program Objectives:* The objective of the program is to demonstrate that electricity can be provided to the rural areas of Indonesia at a price which the majority of the people can afford. *Abstract:* This study assesses the immediate effects of bringing electrification to rural areas of Indonesia. No baseline data were available regarding life in three villages prior to electrification; however, another village in the same area which had not been electrified was examined. The findings show some few differences between electrified and nonelectrified households, businesses, and homes with business in them some 16 months after electrification. The reasons for differences found are given in terms of income levels and prices of alternative energies such as charcoal, firewood, and kerosene.

*Program Objectives:* The objective of the program is to increase the capability of selected Caribbean Development Finance Corporations (DFCs). *Abstract:* The weakness of DFCs as loan generators and administrators is rooted in governments' perception of the role of DFCs and in the DFCs' perception of their clients. Most governments had no agricultural or industrial plans and expected the DFC to develop such plans. The ability of the DFCs to tap foreign sources of funds makes them potentially powerful forces in their respective states; governments then seek to maintain control of institutions so endowed. Control exercised without clear and precisely-defined policy facilitates the use of the DFCs for a variety of purposes. Lack of a local financial stake in the DFCs also facilitates inappropriate use of funds. Accountability to the public was not required. Policies and operational guidelines for DFCs are recommended.

*Program Objectives:* The objective of the program is to enhance the capabilities of 20 Central and West African countries to plan and manage health delivery systems. *Abstract:* This special evaluation covers the period from September 1977 through April 1980 and is based on a review of project files, interviews with project staff, and site visits by outside experts. The project consists of four sub-projects (Disease Surveillance, Research, Health Planning, and Management and Training) and is progressing satisfactorily. Major recommendations include integrating socioeconomic, demographic, and disease surveillance data to develop sound national and local health plans; increasing training center faculties to keep up with increasing enrollments; emphasizing regional measles, polio, and local yellow fever vaccination programs; and presenting research findings at annual conferences.

*Program Objectives:* The objective of the program is to assist the Government of Pakistan in reducing the incidence of malaria to a level where this disease is no longer a major problem. *Abstract:* The program made remarkable gains since 1976 in spite of such difficulties as increasing levels of insecticide resistance, procurement problems, and sharply increasing costs of insecticides. There was a dramatic reduction in disease incidence–from 10 million in 1974 to 12,304 in 1979. There was also a reduction in Slide Positive Rates–from 14.9% in 1973 to 9.45% in 1979. The goal of obtaining a case load of 500 cases of malaria per million population was fully achieved on a national basis during the life of the project.

*Program Objectives:* The objective of the program is to provide basic health management training and assistance to public health officials in nine Caribbean nations. *Abstract:* The project has two major elements. The first, training, includes four components: Basic Management, Team Building, Supervisory Management, and Program Design and Management. The second major element is technical assistance, which includes Health Planning, Organizational Assessment and Analysis, Model District Health Teams (MDHTs), and Health Management Information Systems (MIS). The evaluators found that, with the exception of Team Building training and MDHT technical assistance, inadequate attention was given to linkage of training to technical assistance. In Health Planning, Organizational Analysis, and MIS, the scope of work and anticipated outcomes were more ambitious than was reasonable within the stipulated timeframe. The evaluation team recommends continuation of the project with certain changes in emphasis and mode of operation. In particular, increased reliance on institutional resources in participating countries seems feasible and desirable.

*Program Objectives:* The program's objective is to distribute Public Law (P.L.) 480, Title II commodities to children in Costa Rica. *Abstract:* This report evaluates operations during the last 4 years of the 25-year program; this period coincides with the beginning of the Social Development Family Assistance (DESAF) health and nutrition program of which the Title II program formed an integral part. In general, the Cooperative for American Relief Everywhere (CARE) accounted properly for the arrival, storage, and internal distribution of P.L. 480 commodities. CARE's inspection and monitoring of Title II food redistribution at the feeding center level was inadequate during the last few years. Overall program planning was not adequate and inhibited adaptation to Costa Rican needs. The 0-3 year old child was not effectively reached despite being in the highest risk category nutrionally. In spite of this, the Title II program, as part of the larger DESAF program, contributed to combating hunger and malnutrition in Costa Rica, the overall purpose/goal. The program was successful in contributing to the establishment of child feeding, expecially school feeding, as a permanent institution to be supported by indigenous resources. Recommendations were made for the remaining period of commodity distribution.

**Geographic Relevance:** International/Foreign

*Program Objectives:* The objective is to provide assistance to developing countries. *Abstract:* The world's water resources should be sufficient to accommodate the needs of the projected doubling and trebling of population, but a fear is that growing mismanagement and abuse is reducing the availability of usable water. Because of the magnitude of this worldwide problem and the significant resources invested in water and water-related projects, GAO reviewed the direction of U.S. assistance programs. Most of the funds provided for water resources development by aid donors are channeled into projects for community water supply, irrigation and flood control, and hydroelectric power. Some funds are provided for other water-related activities, such as watershed management and development of institutional capability. Despite the fact that much of the billions of dollars in financial support for developing countries' water projects emanates either directly or indirectly from the United States, the United States has not developed water policies and strategies and does not possess an information base which would enable the formulation of comprehensive policies and strategies. GAO also believes that maintenance problems present a substantial obstacle to the success of water supply and sanitation projects. Inadequate maintenance and the need to rehabilitate community water supply systems are major obstacles to achieving the United Nations Water Decade goal of providing clean water and adequate sanitation for all by 1990. GAO recommends that the Director, International Development Cooperation Agency, develop comprehensive policies and strategies affecting U.S. bilateral and financial support for community water supply and sanitation activities in developing countries. GAO further recommends that the Director also acquire information on irrigation and hydroelectric power activities which would enable the Agency to determine whether it should develop comprehensive policies and strategies for these major segments of water resources assistance.

*Abstract:* Problems in planning procurements and monitoring project implementation still exist. Despite recommendations by GAO and others, including Agency for International Development (AID) management teams, to improve project monitoring effectiveness, project milestones are still not being met effectively and identified management problems are not being attended to properly. Delays in ordering and receiving project commodities occur because AID management has not adequately planned procurements, project officers are not adequately trained in procurement and supply management matters, and AID has not issued clear instructions on project implementation. The Administrator of AID should assure that the geographic bureaus increase efforts for finding solutions to problems that continue to inhibit the process of delivering economic assistance to developing countries and assure that studies undertaken for that purpose produce usable products.

*Abstract:* Survey results are presented of accounting controls over revenue and expenditure transactions at seven Agency for International Development (AID) missions in Latin America and the Caribbean. Where potential weaknesses were indicated, selected transactions were tested to determine if the weaknesses existed; no attempt was made to establish their extent or the precise corrective actions needed. The survey disclosed weaknesses in internal controls over accounts receivable, cash collections, and imprest funds. It was noted that a need exists for increased internal reviews. Since survey results were discussed with responsible accounting station officials who initiated or promised corrective action, formal recommendations were not made. However, it is suggested that the Director, AID, follow up on the adequacy of the corrections, and that he consider the deficiencies noted during any future accounting system design efforts.

*Abstract:* A review was undertaken of the insurance requirements of the Defense Base Act (DBA) as they relate to Agency for International Development (AID) contractors working overseas. DBA was enacted in order to extend workers' compensation protection to employees of Government contractors working at overseas defense bases. In its review, GAO found that: (1) substantial confusion and misunderstanding exist between AID and the Department of Labor concerning when DBA insurance requirements apply and when they do not; (2) the exemption of development loans from DBA requirements may have caused inequities in worker coverage overseas; and (3) to obtain the required coverage, some AID-financed contractors must pay DBA premiums which approach or exceed their salary costs. Moreover, at least $245,000 could have been saved over the last 3 years had the AID-blanket DBA contract been extended to these contractors.

## U.S. International Development Cooperation Agency: Agency for International Development

*Abstract:* Assistance from the Agency for International Development (AID) to Jamaica increased sharply in 1977 with balance-of-payment support and developmental aid of nearly $30 million. This increase reflected the United States interest in the Caribbean and a concern for the economic deterioration of a neighboring nation. Nearly all of the AID projects in Jamica have problems, which include inadequate project planning, poor commodity procurement, inability of the implementing agency to manage the project, or differences between AID and the Government of Jamaica concerning project goals and interest. AID projects must operate in a climate where local commodities are often in short supply, there are not enough managers and other skilled people, basic infrastructure is deteriorating, inflation is high, and the host government's budget is strained.

*U.S. Assistance to Egyptian Agriculture: Slow Progress After 5 Years.* (ID-81-19).
3/16/81; 53 pp. + 8 app. (50 pp.)
**OMB Funding Code/Title:** 11-1037-0-1-151 / Economic Support Fund
**Program:** Economic Support Fund
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 531, 532; 22 U.S.C. 2346, 2346(a)).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* Although AID has committed more than $357 million to projects aimed at increasing food and agricultural production in Egypt, only $61.8 million of these funds has been spent, and the impact of the projects on Egyptian agriculture has been negligible. Problems in project implementation which have caused slow progress include: contracting delays; insufficient Egyptian support; inadequate AID monitoring; and the lack of staff and expertise of some U.S. contractors, including universities. Even with speedy project implementation, the program's impact will be limited unless policy changes, which provide an environment of agricultural development, are undertaken and unless more attention is given to developing an extension service capable of delivering the technology now being developed.

**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 104, as amended by; P.L. 96-53; 22 U.S.C. 2151b).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* In its review, GAO found that many of the AID projects were successful in increasing access to health services, and most were successful in achieving their intermediate objectives such as training health workers, building facilities, administering immunizations, and providing initial stocks of medicine. However, problems were encountered during project implementation that involved logistic support, management oversight, and impact evaluation. These problems raise questions about the prospects of achieving the long-term health goals of the projects. Consequently, AID needs to become more involved in managing project implementation and lending more assistance to recipient countries in resolving the obstacles they frequently encounter.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* The Agency for International Development (AID) has undertaken a project to improve the supply and distribution of fertilizer in Bangladesh. The aim of the project is to help Bangladesh meet its goal of achieving foodgrain self sufficiency by 1985. GAO reviewed project planning and implementation. Some progress has been made to improve fertilizer distribution and use, but the project has not achieved its goal of an annual 15% increase in fertilizer sales.

**Program:** All Programs
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 101, as amended by; P.L. 96-53; 22 U.S.C. 2151).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* The Agency for International Development (AID) Excess Property Program was intended to use excess property instead of new property in AID-funded projects whenever possible. However, the program is not presently directed toward that end. Congress should terminate the authority of the Administrator of AID to operate the advance acquisition segment of the excess property program. This would include abolishing its revolving fund, liquidating the program's inventory, and returning all funds to the U.S. Treasury. The Administrator of AID should continue to use excess property otherwise available to AID by developing: (1) procedures to satisfy AID-assisted programs and project needs, where practicable, through the GSA allocation system and from holding agencies; and (2) an education program to encourage mission personnel to use excess property.

**Program:** Agriculture, Rural Development and Nutrition
**Congressional Relevance:** *House* Committee on Foreign Affairs; *Senate* Committee on Foreign Relations. *House* Committee on Appropriations: Foreign Operations Subcommittee; *Senate* Committee on Appropriations: Foreign Operations Subcommittee.
**Authority:** Foreign Assistance Act of 1961, as amended (P.L. 87-195, § 103, as amended by; P.L. 96-53; 22 U.S.C. 2151a).
**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* Cooperatives are seen as one way to improve the effectiveness of U.S. foreign assistance in developing countries by enabling the urban and rural poor to help themselves. The efforts by the Agency for International Development (AID) to foster cooperatives have not been uniformly successful. The primary reason is that AID has not adequately considered the complex political, cultural, and economic factors affecting the development of cooperatives at the basic levels. The Administrator, AID, should develop mechanisms to assure that farmers are benefiting from the assistance provided to regional and national organizations; devote more efforts to obtaining farmers' views on their problems, needs, and priorities in designing and developing cooperative systems and to promoting farmer participation in controlling cooperative activities; make sure that development funds are not dissipated because recipient countries cannot or do not provide the necessary financial, personnel, or logistic support; set realistic goals for cooperatives, particularly regarding intended beneficiaries; and improve the quality of cooperative project evaluations by focusing on actual benefits to the majority of participants.

# MERIT SYSTEMS PROTECTION BOARD

**E17800-001**
*Status Report on Performance Appraisal and Merit Pay among Mid-Level Employees.*
6/81; 27 pp.
**OMB Funding Code/Title:** 41-0100-0-1-805 / Salaries and Expenses
**Program:** Appeals
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Civil Service Reform Act of 1978 (P.L. 95-454, title II, § 202(a); 92 Stat. 1125; 5 U.S.C. 1205).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* This is the first in a series of reports drawing from the results of the U.S. Merit Systems Protection Board's first survey of a random sample of mid-level Federal employees in General Schedule grades 13 to 15 throughout the Executive Branch. The purpose of the survey was to discover the collective experiences and viewpoints of mid-level Federal employees concerning the functioning of the merit system in their organizations. The survey covered a wide range of issues including employees' observations of prohibited personnel practices and the extent to which employees see merit principles being applied in such areas as employee selection and placement, organizational climate, quality of supervision, performance appraisal, and Merit Pay.

*The Office of the Special Counsel Can Improve Its Management of Whistleblower Cases.* (FPCD-81-10).
12/30/80; 6 pp. + 2 app. (17 pp.)
**OMB Funding Code/Title:** 41-0101-0-1-805 / Office of Special Counsel: Salaries and Expenses
**Program:** Prohibited Practices and Whistleblowers
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Civil Service Reform Act of 1978 (P.L. 95-454, title II, § 202(a); 5 U.S.C. 1206-1209).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program aims to protect Federal employee whistleblowers from reprisals. *Abstract:* A review was undertaken of the Office of the Special Counsel, within the Merit Systems Protection Board, to determine how the Office is: (1) establishing procedures to insure that allegations of wrongdoings are properly investigated in the executive branch; and (2) protecting from reprisals those employees who disclose information about agency wrongdoings. There is no system in the Office of Special Counsel to insure that cases are processed in a timely manner and delays are common in every phase of case processing. A major cause of delay is the lack of an effective case-monitoring system. The Special Counsel did not monitor either the implementation, timeliness, or effectiveness of the action taken or proposed by the agencies and there was confusion about the role and responsibility of the special counsel. Further, the Special Counsel has not insured that a whistleblower's allegation is always understood and communicated to the agency involved. The Office of the Special Counsel should: (1) control its caseload by placing a high priority on improving its case tracking monitoring system to insure timely processing of whistleblower complaints; (2) improve communication with whistleblowers to assure that their allegations are clearly understood and that they are kept informed as to the progress of their cases; (3) follow up on agency reports responding to whistleblower allegations and actively encourage complainants' evaluations and comments on these reports; and (4) place greater emphasis on encouraging Federal employees to disclose wrongful activities by more clearly informing agencies and employees of its role in receiving whistleblower complaints.

**OMB Funding Code/Title:** 41-0100-0-1-805 / Salaries and Expenses
**Program:** Appeals
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Civil Service Reform Act of 1978 (P.L. 95-454, title II, § 202(a); 5 U.S.C. 1201-1205).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Senior Executive Service, established by the Civil Service Reform Act of 1978, went into effect in July 1979 and with it a system of performance awards (bonuses and ranks) to encourage excellence in performance among career appointees. *Abstract:* GAO reviewed the Senior Executive Service bonus payments at the Merit Systems Protection Board (MSPB). GAO concluded that the performance awards were within the requirements of the Civil Service Reform Act, as well as the Office of Personnel Management guidance. However, it was found that MSPB experienced some procedural difficulties in administering the awards. GAO noted that performance objectives for the MSPB executives were not formulated until November and December 1979 even though the the appraisal period for which bonuses were awarded was from March 1979 to March 1980. Thus, performance objectives were written nearly three-fourths of the way through the performance period. The Performance Review Board's action to review performance objectives at the beginning of the appraisal period will overcome the start-up difficulty.

**E17800-004**
*Federal Employees Excluded from Certain Provisions of Civil Service Reform Act of 1978.* (FPCD-81-28).
4/7/81; 4 pp.
**OMB Funding Code/Title:** 41-0100-0-1-805 / Salaries and Expenses
**Program:** Appeals
**Congressional Relevance:** *House* Committee on Post Office and Civil Service; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Treasury-Postal Service-General Government Subcommittee; *Senate* Committee on Appropriations: Treasury, Postal Service, General Government Subcommittee.
**Authority:** Civil Service Reform Act of 1978 (P.L. 95-454, title II, § 202(a); 5 U.S.C. 1201-1205).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The program aims to protect employees from prohibited personnel practices. *Abstract:* The Civil Service Reform Act protects most Government employees from specified prohibited personnel practices such as discrimination, political coercion, and reprisals; however, this protection does not apply to employees in Government corporations. According to the Merit Systems Protection Board's Office of the Special Counsel, there have been many complaints of personnel abuse within Government corporations. A review was performed to determine the justification for excluding all Government corporations from the provisions of the Act. According to the Office of the Special Counsel, it is not clear whether all corporations are excluded from the provisions of the Act. GAO contacted 13 Government corporations which have employees in competitive service positions and are required to follow other civil service laws and regulations but are excluded from the protections afforded by the Act. Eight of the corporations stated that they assumed that the provisions applied to them. All but one of the corporations believed that their employees should be entitled to the protections that other Federal employees have. GAO believes that there is no justification for excluding certain Government corporations from the prohibited personnel practices provisions. Congress should amend the Civil Service Reform Act to extend coverage to those corporations with employees in covered positions.

## NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

**E18700-001**

*Review of the Navajo and Hopi Indian Relocation Commission's Program.*
7/2/81; 10 pp.
**OMB Funding Code/Title:** 48-1100-0-1-806 / Salaries and Expenses
**Program:** Relocation Payments (Housing)
**Congressional Relevance:** *House* Committee on Interior and Insular Affairs; *Senate* Select Committee on Indian Affairs. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** Navajo-Hopi Land Settlement Act of 1974 (P.L. 93-531, § 15; 88 Stat. 1719; 25 U.S.C. 640d-14).
**Availability:** GAO
**Geographic Relevance:** Navajo Reservation

*Abstract:* The evaluation assesses the reasonableness of the Navajo and Hopi Indian Commission's relocation program's costs, including the specific areas of: (1) replacement home benefit costs, (2) off-reservation relocations, (3) temporarily-away benefits, and (4) appraisal and property acquisition. The Commission regularly compensates relocation households at the maximum benefit amounts authorized by law. The replacement home benefit has been adjusted on five separate occasions. Commission records show that 71% of reservation homesite relocations were moved off-reservation, thereby increasing total program costs. About 75% of benefit recipients were located off-reservation or temporarily-away, increasing estimated program costs from about $80 million to about $200 million.

## ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

**E20300-001**

*Congress Should Clarify the Speedy Trial Act To Resolve Differing Interpretations.* (GGD-81-1).
11/18/80; 21 pp. + app. (2 pp.)
**OMB Funding Code/Title:** 10-0927-0-1-752 / Salaries and Expenses
**Program:** General Administration
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 62 Stat. 902; 28 U.S.C. 332, 601-606); 2 D.C.C. 2226(b), 2227. Speedy Trial Act of 1974 (P.L. 93-619, title II, § 204; 88 Stat. 2089; 28 U.S.C. 604).
**Availability:** GAO
**Geographic Relevance:** National; State; Congressional District

*Program Objectives:* The intent of the Speedy Trial Act of 1974 is to speed the prosecution of accused persons in order to isolate those found guilty and to prevent additional crimes by setting uniform time limits within which U.S. district courts process criminal cases. *Abstract:* GAO found that compliance with the Speedy Trial Act's requirements has increased steadily over the past 4 years. However, because the executive and judicial branches interpret some provisions of the act differently, future criminal cases might be inappropriately dismissed. Congress should amend the Speedy Trial Act to clarify: (1) how and under what circumstances pre-indictment dismissals followed by an indictment affect the Interval I time limit; (2) the starting date for Interval II; (3) the 30-day minimum period before trial; and (4) whether dismissal waivers in advance of expiration of the time limits are allowable and, if not, their effect on other provisions.

**Program:** General Administration
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 62 Stat. 902; 28 U.S.C. 332, 601-606); 2 D.C.C. 2226(b), 2227. Act of December 20, 1967 (P.L. 90-219, title I, § 101; 81 Stat. 666; 28 U.S.C. 625(a), 626, 627(a), 628).
**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Through Fiscal Year 1981, the Federal Judicial Center will spend about $24 million to develop new computer-based systems, evaluate and acquire ready-made systems, and operate such systems in support of the U.S. Courts. These systems will not reach their full potential until systems development and implementation problems and management planning, coordination, and control problems are resolved. The Center has not always fully identified and analyzed users' needs, alternatives, benefits, and costs before undertaking software development work. Conversion to automated systems has not been as smooth as it should have been. Systems have been tested and operated in parallel at great length, but progress toward moving systems out of the developmental stage and into full operation remains negligible. Because little coordination has occurred, neither the Center nor the Administrative Office is prepared for the transfer of operational and maintenance responsibilities for Courtran systems.

**Availability:** GAO
**Geographic Relevance:** National; State; Congressional District

*Abstract:* The importance of optimizing juror utilization is evidenced by the considerable amount of funds that is expended for unused jurors. GAO has previously reported that district court juror-utilization practices could be improved. A study was performed to assess the progress made in improving juror-usage efficiency. There has not been much improvement in juror utilization over the past 5 years. GAO believes that this lack of improvement is a result of: (1) many district courts not using efficient utilization practices; (2) judicial councils not assuming an active role over the district jury use practices; and (3) the judiciary not having adequate information on jury practices so as to assist the judicial councils and courts in identifying specific areas where cost savings could be achieved. The judicial councils should insure that district courts are using their jurors in the most efficient manner through such means as the pooling of jurors and the selection of more juries for use in separate trials before the same judge.

**Agency Contact:** General Accounting Office (202) 724-7421.

## JUDICIAL CONFERENCE OF THE UNITED STATES

**E20301-001**
*Better Management Can Ease Federal Civil Case Backlog.* (GGD-81-2).
2/24/81; 37 pp. + 10 app. (22 pp.)
**OMB Funding Code/Title:** 10-0927-0-1-752 / Salaries and Expenses
**Program:** General Administration
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 62 Stat. 902; 28 U.S.C. 332, 601-606); 2 D.C.C. 2226(b), 2227.
**Availability:** GAO
**Geographic Relevance:** National; State; Congressional District

*Abstract:* Actions necessary to deal with the civil case backlog in Federal district courts were discussed in this GAO evaluation. Processing a large volume of cases required the development and enforcement of a case-management system, the use of magistrates and clerks' offices, and an adeqate number of judges. GAO found that the degree to which the courts experienced a backlog problem correlated with the extent to which these key requirements were satisfied. Improved court administration would minimize this problem. It was found that courts were not taking full advantage of magistrates or personnel from the clerks' offices to assist in processing civil cases. Courts and judges that used the clerks' offices for administering case-management and docket-control systems had fewer backlog cases. The Judicial Conference of the United States should: (1) develop a proposed amendment to the Federal Rules of Civil Procedure to include maximum time limits for the various steps in the civil process and require each court to establish timeframes within these limits; and (2) encourage the district courts to better utilize their clerks' offices in the administration of the courts.

**Agency Contact:** General Accounting Office (202) 724-7421.

**E20301-002**
*More Guidance and Supervision Needed over Federal Grand Jury Proceedings.* (GGD-81-18).
10/16/80; 49 pp. + 5 app. (19 pp.)

**Program:** General Administration
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Act of June 25, 1948 (P.L. 80-772; 62 Stat. 902; 28 U.S.C. 332, 601-606; 28 U.S.C. 1863). Jencks Act (P.L. 85-269; 71 Stat. 595; 18 U.S.C. 3500).
**Availability:** GAO
**Geographic Relevance:** National; State; Congressional District

*Abstract:* GAO reviewed the procedural and secrecy rules related to grand jury matters and the supervision of grand jury proceedings to determine how well the criminal justice system was accomplishing the purposes of grand jury secrecy and to identify areas needing improvement. By improving the security of grand jury proceedings, the effectiveness of one of the Government's more important tools to combat organized crime, drug trafficking, and white-collar crime will be improved. The Judicial Conference of the United States should give District courts more definitive guidance and direction on what specific information and documents must be kept secret and on procedures for secrecy protection. The Attorney General should improve the security practices of U.S. attorneys, organized crime strike forces, U.S. marshals, and court reporter personnel by developing and issuing interim security guidelines to be used until the Federal judiciary establishes security requirements. Grand jurors should be routinely screened for possible conflicts of interest with cases to be presented to the grand jury.

## CONGRESS

**E30000-001**
*The Financial Disclosure Process of the Legislative Branch Can Be Improved.* (FPCD-81-20).
3/4/81; 48 pp. + 5 app. (97 pp.)
**OMB Funding Code/Title:** 00-0128-0-1-801 / Inquiries and Investigations; 00-0416-0-1-801 / Committee Employees
**Program:** All Programs
**Congressional Relevance:** *House* Committee on the Judiciary; *House* Committee on Standards of Official Conduct; *Senate* Committee on the Judiciary; *Senate* Committee on Rules and Administration. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Ethics in Government Act of 1978 (P.L. 95-521, title I, § 101; 92 Stat. 1824; 2 U.S.C. 701-709).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to make public financial disclosure of members of Congress and other high-level Federal officials. *Abstract:* In accordance with the Ethics in Government Act of 1978, GAO reviewed the House and Senate financial disclosure activities for the 1979 and 1980 calendar year filing requirements. The Chairmen of the House and Senate Ethics Committees should: develop criteria to assist Members in designating principal assistants subject to potential conflicts of interest, periodically evaluate legislative branch agencies' identification of filers, inform the House and Senate support organizations of the information needed to monitor filing compliance, regularly monitor all nonfilers, develop detailed guidelines to assist committee staff when reviewing reports, require all candidates to promptly file disclosure reports, follow up to insure that individuals requested to amend their reports comply develop procedures and requirements for approval of a proposed trust, and establish procedures for monitoring and enforcing the qualified blind trust requirements. The Chairman of the Senate Committee should: monitor the appointment of new employees required to file, notify Senators who must designate a principal assistant when they do not have an employee equivalent to a GS-16 or above, and assume the enforcement initiative by referring to the Attorney General those who have failed to file disclosure reports. The Chairman of the House Committee should: establish a system that will monitor requests for and receipts of amended reports, establish time frames for when an amended report should be filed, and refer nonfilers to the House Members for possible referral to the Attorney General. Congress should institute the requirement for random audits of financial disclosure reports.

*Productivity Sharing Programs: Can They Contribute to Productivity Improvement?* (AFMD-81-22).
3/3/81; 33 pp.
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency; GPO
**Geographic Relevance:** National

*Abstract:* The objectives of the study were to determine: (1) how productivity sharing programs operate and what benefits result from them; and(2) whether long term increases in productivity can be realized through productivity sharing. GAO studied productivity sharing programs as part of a broader review of the Council on Wage and Price Stability. The performance of the productivity sharing programs studied suggests that they offer a viable method of enhancing productivity if properly implemented and used.

**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41). Nuclear Non-Proliferation Act of 1978 (P.L. 95-242, § 2; 92 Stat. 120; 22 U.S.C. 3201).
**Availability:** Agency
**Geographic Relevance:** International/Foreign; National

*Program Objectives:* The Nuclear Non-Proliferation Act of 1978 aims to reduce the risks associated with the further spread or proliferation of nuclear weapons capabilities and to enhance the ability of the United States to be a reliable supplier of nuclear exports for peaceful purposes. *Abstract:* There is little evidence that the Nuclear Non-Proliferation Act actually caused lost export sales. However, nuclear industry officials and foreign customers have complained about the Act's export restrictions and the resulting export license delays. In addition, U.S. non-proliferation policies, preceding the Act, played a part in the failure of U.S. companies to win reactor orders in Brazil and Iran during 1975-1977. During that period, U.S. nonproliferation policies were evolving and included certain provisions, such as restrictions on enrichment technology exports and control over reprocessing of U.S.-origin fuel, that became law in the Act. GAO could not determine the impact of the Nuclear Non-Proliferation Act on the competitiveness of U.S. nuclear exports. However, other factors could affect U.S. nuclear exports.

**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO believes that more appropriate mechanisms are needed to ensure that all students who attend foreign medical schools demonstrate that their medical knowledge and skills are comparable to their U.S.-trained counterparts before they are allowed to enter the mainstream of American medicine. The foreign medical schools which GAO visited did not offer a medical education comparable to that available in the United States because of deficiencies in admission requirements, facilities and equipment, faculty, curriculum, and clinical training. A serious shortage was the lack of adequate clinical training facilities. Congress should direct the Secretary of Health and Human Services (HHS) to work with State licensing authorities and representatives of the medical profession to develop and implement appropriate mechanisms that would ensure that all students who attend foreign medical schools demonstrate that their medical knowledge and skills are comparable to those of the U.S.-trained counterparts before they are allowed to enter the U.S. health care delivery system for either graduate medical education or medical practice. GAO also made recommendations to the Secretaries of HHS and Education.

**Geographic Relevance:** National; State; City; County; Congressional District

*Abstract:* State legislative involvement in the Federal grant process is discouraged by the restrictive nature of the system itself, and by specific provisions in Federal grant programs which assign legislative responsibilities to the State executive branch. The absence of State legislative involvement adversely affects Federal interests since neutrality may be impaired when explicit functions are assigned to only one branch of State government without adequate recognition of the other branch. In addition, Federal constraints on legislative responsibility work to diminish the most basic form of accountability in State government, the legislative oversight of executive actions. Prospects for full State support and implementation of grant programs also suffer when legislatures are not involved in the programs. Despite Federal discouragement, some legislatures have involved themselves in various Federal grant programs. Contrary to expectations, legislative involvement has produced generally beneficial results without causing delays or the loss of available grant funds. Congress should amend the Intergovernmental Cooperation Act of 1968 to ensure that, on a cross-cutting basis applicable to all Federal grant programs, grant provisions assigning responsibilities to State executive officials are not construed as limiting or negating the powers of State legislatures under State law to appropriate Federal funds, to designate State agencies, and to review State plans and grant applications. The Director of the Office of Management and Budget (OMB) should issue a new directive to Federal agencies reaffirming the eligibility of legislatures for Federal capacity building and information assistance. OMB should also provide greater opportunities for legislative involvement in the grant application review process established by OMB Circular A-95 and in evaluations of grant programs.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective is to base Federal compensation on comparable non-Federal pay and benefits. *Abstract:* GAO reviewed the Administration's proposed total compensation comparability plan for civilian employees in the Federal Government. Some benefits received by many private sector employees were not included in the formal benefit models of the Office of Personnel Management (OPM). The failure to consider these benefits in determining total compensation comparability could result in an understatement of the value of private sector compensation. GAO also found that many benefits are complex and difficult to measure. The Congressional Budget Office estimates that Federal fringe benefits may range anywhere from the equivalent of 2.8% of pay behind private sector programs to 7.4% of pay ahead of the private sector, depending on what benefits are included and how they are measured. OPM has many decisions to make in implementing its pension model. On a few of these decisions, GAO favors choices other than the ones made by OPM in its full-scale test. Inequities will result unless differences in benefits between white- and blue-collar workers are recognized. GAO found that the benefits differ on a locality basis. Surveys in five localities showed that benefits varied by almost 10 percentage points of pay. A plan being considered by OPM would utilize locality pay and national benefits to adjust compensation in a specific locality. This could create serious inequities.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* Objectives are effective and efficient organization of Federal agencies. *Abstract:* At a time when the Federal Government is looking for ways to cut Federal spending and achieve a balanced budget, every reasonable cost-cutting opportunity must be explored. GAO sees the Federal Government's "field structure" as a prime area for exploring ways of cutting costs and raising Government productivity. Agencies can reduce unnecessary and duplicative overhead and support costs by: (1) consolidating field offices; (2) collocating offices; (3) establishing common administrative support service arrangements for field activities; and (4) eliminating unnecessary management levels. However, employee resistance, management resistance, and external opposition can present very real barriers to effective streamlining and reflect valid concerns which need to be faced aggressively, openly, and objectively. The lack of government-owned space can also a sizeable constraint where large amounts of space would be needed. To fully identify and take advantage of streamlining opportunities will require a committed and coordinated effort on the part of the executive branch and Congress. If successful, it could reduce Government costs and improve Federal work force productivity and delivery of services to the public.

*How To Make Special Emphasis Programs an Effective Part of Agencies' EEO Activities.* (FPCD-80-55).
8/27/80; 22 pp. + 3 app. (4 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41). Equal Employment Opportunity Act of 1972 (P.L. 92-261; 86 Stat. 103; 42 U.S.C. 2000e). Civil Service Reform Act of 1978 (P.L. 95-454, title II, § 201(a); 92 Stat. 1119; 5 U.S.C. 1101 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* Special emphasis programs were established in Federal agencies because women and minorities perceived that their needs were not being adequately considered or met in existing Equal Employment Opportunity (EEO) programs. There are five Government-wide programs: the Federal Women's Program, the Hispanic Employment Program, the Selective Placement Program for the Handicapped, the Minority Outreach and Upward Mobility Program, and the Veterans Employment Program. Other special emphasis programs have been established within individual agencies. *Abstract:* Special emphasis programs are loosely operated and do not set out specific goals, resource requirements, timetables, program costs, and activities. There is no accountability for resources invested compared to achievements obtained. Top management's participation in and commitment to special emphasis programs vary greatly. Definition of the expected role of coordinators is not clear. There is confusion over the coordinator roles and program goals, and evaluations of special emphasis programs are seldom made. Consequently, some coordinators are inactive, there is no feedback on problems, and progress toward achieving program goals is not reported. The Director, Office of Personnel Management, should: review the range of roles and activities that special emphasis program coordinators are now performing; determine the appropriate role and activities; publish Government-wide guidelines on their roles and activities which can apply to all special emphasis program coordinators; provide additional technical assistance and quidance to agencies in setting up special emphasis programs; publish and disseminate model agency program plans and activities; and establish and publish criteria in the Federal Personnel Manual for appointing and selecting coordinators. The Director should also prepare criteria to help agencies establish a management system applicable to all special emphasis programs. Once agencies have established management systems for special emphasis programs, the Office of Personnel Management should include in its annual report to the Congress the cost of operating these programs and their accomplishments.

*Supervisor to Nonsupervisor Ratios in the Federal Government and the Private Sector.* (FPCD-80-65).
9/30/80; 6 pp. + 2 app. (7 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* In response to a request to compare supervisor to nonsupervisor ratios between the the Federal Government and private industry, GAO obtained available statistical data from the Office of Personnel Management and the Bureau of Labor Statistics. The usefulness of aggregate data such as supervisor to nonsupervisor ratios is very limited. GAO had strong reservations about the data collected and the comparability of functions between the Federal Government and the private sector. There are many legitimate factors which determine what an appropriate level of supervision should be for an organization or function. Comparing aggregate ratios such as supervisor to nonsupervisor ratios serves only to identify what needs to be looked at in more detail. More effective workforce planning should be aggressively pursued to more accurately determine the proper size, composition, and appropriate placement of the workforce. The disincentives to effective planning must be removed. The imposition of personnel ceilings has been one of the principal disincentives. Such use tends to severely limit the managers' flexibility to use the most cost-effective mix of people to accomplish the work needed. It also encourages managers to use consultants to do work that should be done in house, and to obtain higher-graded professionals to do work that could be done by lower-graded personnel. In five agencies, the Office of Management and Budget has tested the substitution of work-year controls for yearend personnel ceilings. Beginning in 1982, the entire executive branch will be shifted to a system of work-year controls.

### E30400-009

*Agencies Should Disclose Consultant's Roles in Preparing Congressionally Mandated Reports.* (FPCD-80-76).
8/19/80; 11 pp.
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Appropriate use of consultants by the Federal Government was studied. In a GAO study of seven agencies, outside consulting services were used to meet over 40% of the agencies' congressionally mandated reporting requirements. The use of consultants in preparing congressionally mandated reports is justified in instances calling for unique skills or expertise required on a temporary basis. However, the Environmental Protection Agency (EPA) and the Department of Housing and Urban Development (HUD) repeatedly use consultants in responding to recurring requirements, which seems improper. Action is needed to assure that EPA and HUD officials adhere to the Office of Management and Budget (OMB) definition of consulting services and be completely disclosed in reports mandated by the Congress because these reports have the potential to influence the congressional oversight process and future direction of Government programs. The Administrator of EPA and the Secretary of HUD should develop in-house capabilities, when economically feasible, to respond to long-term recurring congressional reporting requirements; and disseminate information to program and procurement officials emphasizing the basic policy and definition of consulting services in OMB Circular A-120 and the importance of complying with its provisions. The Director of OMB should revise Circular A-120 to require Federal agencies to fully disclose consulting services used in preparing congressionally mandated reports, briefly describing tasks performed and assessing their significance in completing the final product.

### E30400-010

*Follow-Up Review of Federal Overtime Practices.* (FPCD-80-88).
9/19/80; 4 pp.
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41). Accounting and Auditing Act of 1950 (P.L. 81-784; 64 Stat. 834; 32 U.S.C. 65 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* GAO made a followup review of Federal agency and Office of Management and Budget (OMB) actions to detect and prevent overtime abuses. Federal managers are now placing more emphasis on preventing overtime abuses and focusing more attention on the need for adequate controls in authorizing, approving, and monitoring overtime use. Inspector General offices and fraud hotlines were established which serve as instruments for detecting overtime fraud. GAO approval of an agency's accounting system is one of the best indicators that a system has been designed to minimize the opportunity for fraud and abuse. OMB issued a memorandum instructing the agency heads to: (1) analyze the use of funds for premium pay, including overtime, to be certain the use is justified; (2) be certain that all reasonable alternatives are explored before resorting to the use of overtime; (3) make sure that the agency has adequate procedures for the approval, monitoring, and auditing of overtime use to avoid abuses; (4) devise stronger controls if current systems are inadequate; and (5) test controls periodically to ensure that they are working properly. OMB has also instructed its staff to monitor the steps taken by agencies to control the use of overtime. Overtime usage has continued to increase, and a marked increase in overtime costs is expected because of hiring freezes and personnel ceilings. Management is responsible for correcting situations which consistently required overtime by maximizing effectiveness of the work flow and systematically and objectively determining workforce requirements. They must consider alternatives to overtime which are within the constraints of personnel ceilings.

**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* A review was made of the management of small arms (handguns, rifles, and shotguns) by civilian agencies throughout the Federal Government. GAO found that approximately 50,000 employees in more than 40 Federal civil agencies are assigned to carry small arms and ammunition. GAO reviewed how these agencies manage their small arms resources and capability and found that there was no central management guidance for civilian small arms. Also, management decisions were made independently by the agencies. Therefore, the management practices regarding small arms differ widely among agencies with similar missions. The Director of the Office of Management and Budget should establish an interagency committee composed of experts from the key affected agencies. This committee should examine the various options available to improve the management of small arms.

*Transfers of Excess and Surplus Federal Personal Property: Impact of Public Law 94-519.* (LCD-80-101).
9/30/80; 90 pp. + 23 app. (99 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41). Act of October 17, 1976 (P.L. 94-519; 90 Stat. 2451; 40 U.S.C. 484).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Public Law 94-519 significantly changed various Government policies and procedures on the transfer of excess and surplus Federal personal property to non-Federal organizations. GAO found that generally the objectives of the Law were being met. However, improvements are needed to ensure that the donated surplus is managed and used as required by implementing regulations. The Law's provision concerning the return of excess property located overseas may restrict the Agency for International Development's access to domestic property and property in Europe. Congress should clarify what Federal costs relating to donated property it wants recovered so that the costs will be handled consistently for Department of Defense and civil agency property. The Administrator of General Services should require General Services Administration (GSA) personnel to review without approval, those which do not appear proper. He should improve GSA procedures for allocating donable property among the States by requiring the GSA allocating regional offices to accumulate and use information on past allocation of highly desirable reportable items of property. He should take the necessary actions, including establishment of timetables and penalties, to require all States to comply with the provisions of the Law. The heads of all Federal agencies which transfer excess personal property to their grantees should review their plans policies, and procedures on such transfers and ensure that they fully comply with the applicable provisions of the law and the implementing Federal Procurement Manual Regulations.

*Federal Records Management: A History of Neglect.* (PLRD-81-2).
2/24/81; 35 pp. + 3 app. (3 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41). Federal Records Act, as amended (P.L. 91-754; 90 Stat. 2727; 44 U.S.C. 2103). Federal Records Management Amendments of 1976 (P.L. 94-575; 44 U.S.C. 2901 et seq.; 44 U.S.C. 3301 et seq.). Paperwork Reduction Act of 1980 (P.L. 96-511; 94 Stat. 2812; 44 U.S.C. 3501 et seq.).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* Records management includes various managerial activities related to the creation, maintenance and use, and disposition of records. In 1977 the Commission on Federal Paperwork estimated the Federal Government's annual records cost at $43 billion. The Federal Records Act gives the Administrator of General Services overall records management oversight responsibility which is exercised through the National Archives and Records Service (NARS). The Act also assigns records management responsibility to the head of each Federal agency. *Abstract:* The agency with Government-wide records management responsibilities, NARS, found that many agency programs needed improvements. Weaknesses in agency programs exist years after NARS first reports them. Agencies have made many suggestions for saving money through better records management. Persistent records management shortcomings have been attributed to: poor promotion of program improvements, lack of commitment by management, emphasis on agency missions, and low priority. The ineffectiveness and poor image of NARS raise questions as to how successful its proposed program changes will be. Records management has been afforded limited resources and inadequate management attention. The Paperwork Reduction Act includes a requirement that the Office of Management and Budget (OMB) send Congress copies of its reports on agencies' information management activities and an annual report listing violations of information laws and regulations. Congress will also receive agency responses to the reports. These provisions should improve agencies' accountability to Congress and focus attention on records management problems. OMB can oversee improvements in NARS programs, direct agencies' attention to analyzing their records management systems, require and collect agency self-evaluation recommendations, and monitor agency weaknesses identified by NARS.

**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Objectives were to: (1) examine the need for higher and more uniform threshold levels, (2) determine what corrective action is being taken by the Office of Federal Procurement Policy (OFPP), and (3) identify any impediments to raising program thresholds. Agency procurement officials felt that small dollar value Government contracts should be exempt from social and economic requirements, that the small purchase threshold should be selected as the minimum threshold for application of these requirements, and would favor a raise in the small purchase threshold and an escalator clause to keep the thresholds current. They would endorse any effort to make simplified small purchase procedures truly simplified. GAO agreed. The OFPP should submit legislation to Congress to establish the small purchase threshold, currently $10,000, as the minimum threshold for all, not just selected, social and economic programs applied to the procurement process to a level consistent with the inflationary trend that has occurred since it was established in 1974. An escalator clause should be included and a procedure for monitoring future legislation to assure that no conflicts exist with the small purchase threshold.

*Government Agencies Need Effective Planning To Curb Unnecessary Year-End Spending.* (PSAD-80-67).
7/28/80; 64 pp.
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Among the reasons given by agencies for year-end spending surges that may adversely affect procurement effectiveness were: the lack of an effective advance procurement system; the philosophy that all available funds must be spent before the end of the fiscal year; concern that a manager's performance is evaluated partly on spending ability; and appropriation, budgeting, and program planning delays. Techniques and procurement processing shortcuts to spend excess funds at year end included: noncompetitive or sole source contract awards, contract modifications, incremental funding of existing contracts beyond current needs, and prime contract awards to the Small Business Administration long before the agency was prepared to award the subcontract to the minority firm. Waste is likely to result when the main objective is to spend all available excess funds at the end of the fiscal year. The review disclosed: (1) noncompliance with laws and regulations, including recording obligations lacking legal sufficiency; (2) obligating expired appropriations; (3) awarding of contracts by a top agency official over the objections of contracting personnel; and (4) possible procurements exceeding current bona fide needs. It was noted that the most advantageous costs or services may not result under year-end procurement surges because of premature contract award, delayed price negotiations, and inadequate work statements or specifications. Agency officials expressed concern about the adverse impact of year-end spending on the personnel and operation of the program and contracting offices.

*Disappointing Progress in Improving Systems for Resolving Billions in Audit Findings.* (AFMD-81-27).
1/23/81; 30 pp. + 3 app. (16 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-802 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41). OMB Circular A-73.
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Federal agencies are required to have audit resolution systems which comply with OMB Circular A-73 guidelines and GAO and House Committee recommendations. Although Government agencies spend hundreds of millions annually to audit Federal programs and operations, most of them still lack effective systems for resolving audit findings. In 1978, GAO reported $4.3 billion in unresolved findings at 34 agencies. This report shows that the problem is worsening. OMB needs to clarify its policy guidance on audit resolution and extend its oversight to make sure agencies are in compliance with its requirements. Agency management must be made accountable for taking appropriate actions to resolve audit findings.

**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The purpose of this evaluation was to determine the extent and characteristics of identified fraud found at 21 Federal agencies. Volume I of the report summarizes the results of statistical analysis of over 77,000 cases of fraud and other illegal activities reported in 21 Federal agencies during the period from October 1, 1976, through March 31, 1979. Losses due to fraud and related illegal activities are seldom recovered. Fraud erodes public confidence in the Government, undermines program effectiveness, and in some cases affects public health and safety. Four areas were especially prone to fraud: financial assistance to individuals, inventory control and property management, mail service, and personal property management. For a variety of reasons, the Justice Department declined to prosecute 61% of almost 13,000 cases referred by Federal agencies. Although Justice got a conviction or guilty plea in the majority of cases it did prosecute, the courts often suspended large portions of the sentences or granted probation. Agencies did not always take administrative action against individuals who committed fraud or took action which was ineffective. Since 1978, progress has been made in combating fraud by establishing Offices of Inspectors General and through Justice Department reorganizations. GAO recommended that Congress enact the Federal Managers' Accountability Act of 1981 to encourage agencies to establish and enforce the control systems needed to prevent fraud. GAO also recommended that the Department of Justice expedite completion of legislation it is drafting to give agencies the authority to levy civil monetary penalties and submit the legislation to Congress for its consideration.

**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National; Commonwealth of Puerto Rico

*Abstract:* Any decision on Puerto Rico's future political status rests with the Puerto Rican people and the U.S. Government and holds significant repercussions, because the longstanding Puerto Rico-Federal Relationship has fostered a web of legal, fiscal, and human ties. Consequently, deciding what the Island's status should be, and planning for any change, will involve assessing an intricate array of concerns. Compounding ideological and political divisions, the status debate also presents numerous financial and other considerations and encompasses added dimensions such as cultural convictions and international issues. To assist evolving deliberations over alternative future statuses, this report describes Puerto Rico's development and intricate relationship with the Federal Government and explodes issues and potential impacts likely to confront Puerto Rico and Federal decisionmakers.

*Using Congressional Reporting Requirements in the Budget Process.* (PAD-81-24).
12/18/80
**OMB Funding Code/Title:** 05-0107-0-1-801 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency

*Abstract:* Reporting requirements, as they relate to the budget process, were reviewed to determine if they are in synchronization with the budget process and whether executive agencies chronically miss statutory reporting deadlines. If either or both of these conditions are true, then Congress is being deprived of the full use of many of the reports it receives from the executive branch. In general, the review shows that: (1) report due dates were, for the most part, synchronized with the budget process; (2) a significant number of reports transmitted by the executive branch were late; and (3) no single organization systematically monitored and recorded the actual receipt dates of reports submitted to Congress by the executive branch.

**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* Problems relating to computer use on procured architect-engineer services were reviewed. The use of computer-aided methods on Federal design projects is often limited or hampered by agency officials and agency procedures and practices. While significant benefits and savings are possible through computer aids, this capability is not always used. Changes in some procurement procedures should create an environment more conducive to greater, more efficient use of computer-aided methods. These changes should include: (1) educating agency personnel about the capabilities and uses of computers in design, (2) requiring that computers be used for those analyses and design functions which can be done efficiently only with computers, (3) evaluating computer expertise when selecting architects and engineers for Federal projects, (4) discussing planned computer use during negotiations, and (5) revising fee proposal formats to recognize the role of computers in design and to clearly identify the services which will be provided under the contract.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to improve Federal productivity. *Abstract:* Selected Federal experiments with joint labor-management committees were reviewed to ascertain their impact on Federal work-force productivity. Available data did not show significant productivity improvements resulting from the committees' activities. Limited data were available with which to evaluate the committees' impact on productivity and it was difficult to attribute productivity change directly to committee activities. In addition, the committees tended to focus on noncontroversial issues which had little measurable effect on productivity. They were not able to sustain themselves or progress to the point where they could openly address and resolve significant productivity issues. A long-term growth period is required to develop mature labor-management committees capable of addressing significant productivity issues. These committees do represent a relatively low-cost attempt to get union and management to jointly address common concerns. Some of the changes suggested by the committees have probably had some positive effects on organizational effectiveness, even though they were not directly measurable. Further experimentation with, and evaluation of, Federal labor-management committees should be encouraged.

**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to make the best use of Federal professional staff. *Abstract:* A survey was conducted of staffing problems which affect the use of skilled professionals in the Federal Government. About 57% of the professionals interviewed spent from 10 to 25% of their time on tasks which should be delegated. The time spent on such tasks was attributed to a nonavailability of paraprofessionals and other support staff. Responses indicated that job satisfaction was significantly lower among professionals who spent more time on work that should be delegated, were given fewer opportunities to continue their professional development, did not do the kind of work they liked to do, and had fewer opportunities to use their skills and abilities. Other adverse effects included work backlogs, lower quality work, and hindrances to agency mission accomplishment. The basic reasons for the imbalance between the number of professionals and the number of support staff employed were poor agency workforce planning and overly restrictive and arbitrary personnel constraints. Related studies confirmed that employment constraints, such as personnel ceilings, have discouraged agency managers from developing better workforce planning capability. More study must be done on workforce planning, employment constraints, and agency organization.

*Proposals for Improving the Management of Federal Travel.* (FPCD-81-13).
12/24/81; 42 pp. + 4 app. (11 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-801 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to reimburse Federal employees for reasonable and necessary travel expenses while they are on official duty. *Abstract:* GAO reviewed current policies and procedures to budget, monitor, and authorize travel in the Federal Government and evaluated the equity of different military and civilian travel reimbursement practices. Travel budgets are essentially based on past levels of travel expenditures. The lack of accurate data on the cost and purposes of travel can make budgets unreliable and travel unmanageable. Loose authorization procedures and lax management attitudes have resulted in unjustified use of first-class accommodations, frequent use of personal leave in conjunction with official travel, retreats held for top managers attended largely by headquarters personnel, and questionable need for travel by secretaries. Different statutes, written by different authorities, established travel entitlements for civilian and uniformed personnel and, as a result, they receive different entitlements for similar travel. Differences also occur when Congress does not simultaneously raise the per diem ceilings for the two groups. The Director, Office of Management and Budget, should revise budget guidelines to focus more specifically on the purpose of each kind of travel and require heads of departments and agencies to revise their reporting and budgeting systems accordingly. The Director should also bring to the attention of top agency officials the lack of compliance by agency managers with Federal travel policies and direct the top officials to make sure managers follow these policies. The Secretary of Defense should propose a legislative package to make military travel entitlements similar to those for civilian employees.

*Federal Work Force Planning: Time for Renewed Emphasis.* (FPCD-81-4).
12/30/80; 45 pp. + 4 app. (8 pp.)
**OMB Funding Code/Title:** 05-0107-0-1-801 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Abstract:* The objective of the evaluation was to determine appropriate staffing needs in Federal agencies. One of the strongest and most consistent reasons agencies do not use workforce planning procedures is that the budget development and review process does not give appropriate consideration to the nature and extent of justification used in the personnel portions of agency budgets. Additionally, the absence of comprehensive policy, regulations, and standards governing or guiding agencies on workforce planning contributes to management's limited commitment. Other factors inhibiting the development and use of comprehensive workforce planning include: (1) the apparent confusion regarding the definition, scope, and components of workforce planning and the sequence and cycle of planning tasks; (2) personnel constraints, such as personnel ceilings, average grade controls, and hiring and promotion freezes; (3) the slow progress in developing work and productivity measurement systems; (4) the unclear cost-benefit relationship with the development and use of a total workforce planning capability; and (5) the limited extent to which most agencies have developed integrated management information systems and close operating relationships between principal management groups.

*Use of Quality Control Circles in the Federal Government.* (FPCD-81-31).
1/7/81; 4 pp. + app.
**OMB Funding Code/Title:** 05-0107-0-1-801 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to improve Federal sector productivity. *Abstract:* Quality Control (QC) circles are small groups of employees, led by their first-level supervisor, who meet on a volunteer basis to identify, analyze, and resolve job-related problems. A survey was performed on the use of QC circles in the Federal Government. The use QC circles is growing rapidly throughout the Federal sector. However, participating agencies are not routinely establishing systematic methods to evaluate their programs. QC program coordinators have only a limited knowledge of other Federal QC circle programs and cannot benefit from lessons learned elsewhere. In addition, existing training materials on QC circles are structured to private enterprise and are not well suited to the aspects of Federal agency activities. GAO believes that the implementation and expansion of any major productivity initiative should be part of a Government-wide strategy to guide its development. Therefore, there is a need for greater involvement by the Office of Personnel Management (OPM) in assuring that there is a guiding strategy behind this program expansion. OPM should consider speeding the completion of an existing research contract on Federal QC circles. It should also consider developing training materials that will fit Government operations and improving the dissemination of the lessons learned in the private and Federal sectors to potential QC circles.

*Personnel Conversions during Presidential Transition: Improved Monitoring Needed.* (FPCD-81-51).
5/27/81; 8 pp.
**OMB Funding Code/Title:** 05-0107-0-1-801 / Salaries and Expenses.
**Congressional Relevance:** *House* Committee on Government Operations; *Senate* Committee on Governmental Affairs. *House* Committee on Appropriations: Legislative Subcommittee; *Senate* Committee on Appropriations: Legislative Branch Subcommittee.
**Authority:** Budget and Accounting Act of 1921, as amended (P.L. 77-13, title III, § 31; 31 U.S.C. 41).
**Availability:** Agency
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to adhere to merit principles in Federal employment. *Abstract:* Conversion refers to the process in which an employee is converted from a position in the excepted service to a position in the competitive service. Excepted employees may be removed at the discretion of the Administration because they are not covered by the regulations governing the competitive service. Employees in the competitive service are protected by laws and regulations which prohibit any personnel action based on factors other than job performance. The Office of Personnel Management (OPM) investigated 43 personnel conversions processed during the recently completed Presidential transition period. OPM reviewed conversions at three agencies, and GAO reviewed conversions at four other agencies. OPM did not know the total number of conversions from excepted to competitive positions during the transition period, because many personnel actions were approved at the agency level without OPM review. The OPM and GAO investigations indicated that the transition period triggered a number of attempts to improperly convert excepted service employees. The OPM, finding that 30% of the 43 conversion cases it reviewed were improper, suggested that during transition other agencies may be improperly converting employees. The Director of OPM should: (1) require agencies to report to OPM the total number of conversions from excepted to competitive positions made during the 1980 transition period; (2) review these conversions, as appropriate, to insure that the actions were proper; and (3) provide, during future transition periods, more comprehensive monitoring of the conversions of excepted employees to competitive positions.

Executive Order 10246; OMB Circular A-71; OMB Circular 108.
**Availability:** Agency
**Geographic Relevance:** International/Foreign; National; State; City; County

*Program Objectives:* The objectives of the program are to reduce the proliferation of dedicated and single-purpose data telecommunications networks in the Federal Government and to establish a common-user telecommunications network with proper controls to serve multiple agencies. *Abstract:* Protection of data telecommunication against unauthorized wiretapping and improved privacy of personal records can be strengthened by amending telecommunications laws, improving executive level guidance, and establishing telecommunications protection standards. The Congress should revise the Communications Act of 1934, or the 1968 Crime Control Act, to provide protective provisions against unauthorized interceptions of all forms of telecommunications. The Director of the Office of Management and Budget should direct the development of clear telecommunications policy guidelines and standards for Government data transmission protection.

*Review of Legal Services Corporation's Activities concerning Program Evaluation and Expansion.* (HRD-80-103).
8/28/80; 2 pp. + app. (17 pp.)
**OMB Funding Code/Title:** 20-0501-0-1-752 / Payment to the Legal Services Corporation
**Program:** Treasury Payment to the Legal Services Corporation
**Congressional Relevance:** *House* Committee on the Judiciary; *Senate* Committee on Labor and Human Resources. *House* Committee on Appropriations: Commerce, Justice, State, the Judiciary and Related Agencies Subcommittee; *Senate* Committee on Appropriations: State, Justice, Commerce, the Judiciary Subcommittee.
**Authority:** Legal Services Corporation Act (P.L. 88-452, title X, § 1001, as amended by; P.L. 93-355; 42 U.S.C. 2996).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to provide financial support for legal assistance in noncriminal proceedings to persons financially unabl to afford legal services. *Abstract:* The Legal Services Corporation's evaluations of grantees' activities could be improved if such evaluations were made on a regular basis, were prepared in a more timely manner, and included more extensive contacts with the community serviced. The Corporation could better assure the best use of grantee resources if grantees established and implemented priorities and verified client eligibility. The Corporation should closely monitor grantees' use of funds and require that its recently established policy, which provides for limiting funds initially released to new grantees and to grantees who are expanding services until they can show a need for the total amount of the grant, be followed unless there is a demonstrated need for not so doing. The Legal Services Corporation should implement procedures to gain greater assurance that legislative representation activities are in compliance with the letter and spirit of congressionally-imposed restrictions. The Legal Services Corporation should also revise its regulations to more specifically define the legislative restrictions on grantees' lobbying activities and the types of lobbying activities that are not permissible.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives of the programs are to develop new types of mortgage instruments that will provide persons a more viable means of purchasing a home despite the increasing costs of homes and the restricted availability of mortgage credit, and to provide lenders a balance between their assets and liabilities in view of the volatile movement in interest rates. *Abstract:* New mortgage instruments being authorized have inconsistent consumer safeguards. Consumers are not assured of receiving adequate information for making decisions in selecting the mortgage which best meets their needs. Also, mortgage lenders are deprived of funds since they are unable to sell such mortgages to investors. A need exists for closer cooperation among the regulators to develop and administer uniform safeguards for the various alternative mortgages. Specifically, regulators should offer the choice of a standard mortgage, provide adequate disclosure information to the homebuyer as to monthly payments and estimated total mortgage costs, study interest rate adjustment provisions, and determine the feasibility of allowing buyers more options in selecting the best mortgage maturity date terms for their needs.

Federal Management Circular 73-5.
**Availability:** GAO
**Geographic Relevance:** State

*Program Objectives:* Excess Federal real property must be protected while it is awaiting transfer to another Federal agency or until it is otherwise disposed of. Prompt disposal is important because delay increases holding costs and can reduce the value of the property. *Abstract:* Department of Defense and Department of Transportation agencies in Alaska have not properly protected and maintained real property awaiting disposal. Extensive delay has occurred when real property improvements are on land that was formerly in the public domain. The Department of the Interior's Bureau of Land Management must determine if this land should be returned to the public domain or transferred to the General Services Administration (GSA) for disposal. The Secretaries of Defense and Transportation should require their agencies in Alaska to determine the condition of current and future excess properties under their jurisdiction and comply with the Federal Property Management Regulations by protecting and maintaining properties pending transfer to another agency or disposal. They should destroy properties having no commercial value and properties where the estimated cost of continuing protection and maintenance will exceed the estimated proceeds from their sale. They should not abandon the properties. The Secretaries should promptly notify the Bureau when property is going to be excess, and when they will excess the property. The Secretary of the Interior should require the Bureau of Land Management to establish and follow a specified time schedule for determining whether excess property should be returned to the public domain or transferred to GSA for disposal.

*Abstract:* GAO found that agency control over contract actions under the labor-hour contracts was very weak. GAO estimated that almost $150,000 in possible discounts was lost at three agencies. GAO found that fixed-price contracts showed the greatest savings potential for specific office relocations. The manner in which agencies used moving and labor service contracts suggested the existence of improper personal service contracts. Contractors furnished laborers daily to agencies and Government personnel provided direction and supervision of the laborers. The consistent and extensive use of contract laborers by some agencies indicates that these agencies may have used the moving and labor service contracts to circumvent personnel ceilings. Improvements in control and management over labor-hour contracts are needed to assure that only needed services are procured; contract provisions are enforced; and the potential for misuse, fraud, and abuse is eliminated.

*Abstract:* GAO reviewed the record in seven agencies for travel performed by Schedule C employees and executive level and noncareer Senior Executive Service employees during the post-election transition period. The objectives were to determine how many of the specified employees traveled during that time period, their destination, the cost of the trips, and the purpose of the trips. Three hundred thirty-three noncareer officials took 798 trips which cost about $454,000 during the transition period. About 94% were domestic trips lasting an average of 4 days and costing an average of $474. The remaining trips were to foreign countries and lasted an average of 9 days and cost an average of $2,089. About 70% of the trips began during the 5-week period immediately following the November election. GAO could not determine the purpose of 23% of the trips because the purposes were not documented. The rest of the trips were classified as representational travel and training travel. On the basis of the documents available, GAO had no reason to question the justification for these trips. GAO will review further those trips that involved the use of a foreign carrier to determine whether they violated the Fly American Act. If it finds that the use of a foreign carrier was not justified, GAO will disallow appropriated funds for the transportation and ask the agency that paid for the ticket to collect the cost from the traveler. GAO will bring to the attention of the affected departments the lack of justification for first-class accommodations and ask them to recover the additional costs as required by the Federal travel regulations. GAO has long been

concerned that agencies have not focused enough management attention on the purpose of trips.

*Program Objectives:* Under Executive Order 12065, the Archives is required to review all classified records considered to be of permanent value as they become 20 years old to determine if they can be declassified. All classified records over 20 years old are to be reviewed by the Archives and Federal agencies before December 1988. *Abstract:* GAO found that: (1) the National Archives and Records Service (NARS), the Central Intelligence Agency, and the Departments of Defense, Energy, and State anticipate spending $88 million in salaries and benefits during fiscal years 1981 through 1988 to systematically review information for declassification; (2) there is little chance that all 20-year-old classified records will be reviewed by the required December 1988 date; (3) NARS inaccurately reported the results of its declassification reviews for several years; (4) a review of only those records requested by the public and those expected to be requested would improve responsiveness to public requests and would reduce costs; and (5) the General Services Administration's Inspector General has never reviewed the NARS declassification program. To ensure that the President, Congress, and the public are better informed about the results of the declassification program the Administrator of General Services should revise the form 7096 to show the number of pages reviewed, classified pages reviewed, classified pages declassified, and classified pages exempt from declassification. The Administrator should also direct the Inspector General to periodically conduct comprehensive reviews of th NARS declassification program. Further, the Chairman of the National Security Council should draft, and submit to the President for approval, a revision to Executive Order 12065 that would modify the requirement for the systematic review of information to limit the review to records requested by the public and those which the Archivist of the United States anticipates will be requested.

*Program Objectives:* Accounting information for track structures is used by the Congress, Federal agencies, shippers, and railroads to evaluate the costs of transportation, for economic regulation, to assess the reasonableness of rates, and to determine the need for subsidies. *Abstract:* Betterment accounting is the method that railroads are required to use to account for the track structure in reports to the Interstate Commerce Commission (ICC), and is generally used in reports to the Securities and Exchange Commission (SEC) and stockholders. Under betterment accounting, the original cost of the track structure is added to the asset account and no systematic depreciation is taken. The use of a depreciation accounting system by the railroad industry would improve expense recognition and net income determinations, improve balance sheet presentations, and enhance comparability of financial information among railroads. Since the industry's net income will probably be greater if it uses depreciation accounting, concern has been expressed over the resulting increase in Federal income taxes. However, legislation has been enacted which mitigates the impact of higher taxes on railroads. ICC should: (1) complete the October 1978 Advance Notice of Proposed Rulemaking, and adopt depreciation accounting for the track structure; and (2) coordinate future changes in deferred maintenance reporting requirements with SEC to guard against conflicting requirements being placed on the railroad industry. SEC should: (1) complete the April 1977 Advance Notice of Proposed Rulemaking on railroad accounting by adopting depreciation accounting for the track structure; and (2) complete the study of deferred maintenance reporting covered by the April 1977 Advance Notice of Proposed Rulemaking, and require railroads to report deferred maintenance information which fulfills SEC needs yet does not conflict with ICC requirements.

**Geographic Relevance:** National

*Program Objectives:* The objective of the Space Transportation System is to develop a partially reuseable system as a national means of transporting payloads to and from space to meet civil and defense needs. *Abstract:* The operational date of launch and landing facilities has been delayed 1.5 years. For classified missions, the Department of Defense (DOD) needs secure communication lines. Full use of the Space Shuttle's capabilities is dependent on the availability of the National Aeronautics and Space Administration's (NASA's) Tracking and Data Relay Satellite System which may not be available until April 1983. If it is not available by that date, then alternate secure command, control, and communications routes must be developed to support the first classified launch. The inertial upper stage development program has experienced difficulty achieving its required capabilities. Major factors contributing to delays and cost growths were the main contractor's underestimating the technical complexity of the program and inadequate management attention by the contractor and the Air Force. Motor development efforts are experiencing difficulties and software will not be completely checked out until early 1982. The airborne support equipment may have to be redesigned, and continued use of expendable launch vehicles and/or more orbiters may be required. The Secretary of Defense should provide Congress with information on the cost of DOD participation in the program. The Secretary of Defense and the NASA administrator should provide Congress with comprehensive information on options being considered and key assumptions, costs, and risks. The study should identify known and projected missions and advantages and disadvantages of continuing use of expendable launch vehicles and/or increasing the number of orbiters. Information should also be provided on probable effects of delaying or canceling some noncritical flights until operational experience is obtained.

*Abstract:* Federal personnel costs continue to rise, and the need for more efficient and effective management of people becomes more pressing. A study was conducted to identify current and emerging issues related to managing and compensating the Federal workforce. Military personnel issues which need attention in the next few years include: (1) military manpower mobilization policies, procedures, and practices; (2) armed forces training, assignment, and utilization policies; (3) recruitment policies; (4) military compensation systems improvement; and (5) management of military support activities. Civilian areas that need attention include: (1) the effective use of workforce planning; (2) how staffing systems can be made more responsive, efficient, and cost effective; (3) how training and development programs can be improved and used more effectively; (4) whether performance appraisal systems can be used to make equitable personnel decisions; (5) what impact labor relations programs have on performance; (6) whether the Government's programs to insure ethical conduct of its employees are adequate; (7) comparison of civilian employee compensation to the private and non-Federal public sectors; (8) whether the new Federal personnel management agencies are successfully carrying out their missions; and (9) how the Government's systems for performing personnel management research can be improved.

*Program Objectives:* The Contract Disputes Act of 1978 was designed to provide a fair, balanced, and comprehensive statutory system of legal and administrative remedies to resolve government contract claims. *Abstract:* Overall, Federal policy at the date of the report was still being developed, and relatively few contract claims cases had been processed under the then newly adopted procedures. Thus, a full assessment of the effect of the Contract Disputes Act on the appeals board system was not possible. However, GAO found that the Office of Federal Procurement Policy and the Office of Personnel Management have acted slowly in implementing the requirements of the Act due to uncertainty and controversy over the Act's provisions and the intent of the Congress.

*Program Objectives:* There is a 10-year effort to accelerate the development of various aeronautical technologies which would make future transport aircraft up to 50% more fuel efficient than today's aircraft. *Abstract:* The National Aeronautics and Space Administration (NASA) and the Department of Defense (DOD) have established formal and informal means of coordinating their materials and propulsion research activities. To ensure its continuity and future benefits, program coordination should be formalized. NASA reports to congressional committees on program status are voluminous, only generally explaining the significance of program changes. A standard reporting format would provide Congress with meaningful, consistent, and concise information which would avoid misunderstandings and improve committee preparation for annual hearings. NASA has been encouraged to emphasize efforts that have nearer-term payoff and has also been encouraged to increase long-term, basic research work. Without a significant increase in resources, NASA cannot satisfy both of these demands. A need exists for the development of policy guidance and direction to maintain a balanced aeronautical research and technology program responsive to national needs. A policy statement would provide NASA management with improved guidance for more effective application of its resources and national needs. NASA should prepare semiannual project status reports for the Aircraft Energy Efficiency program and similar large future aeronautical programs showing original and current estimated costs, schedule, technical characteristics with reasons for these elements and for any variances experienced. The Director of the Office of Science and Technology Policy and the NASA Administrator should renew their effort and propose an aeronautics policy statement to the President and Congress, giving special attention to the conflicting pressures on NASA to do more basic, long-term work and more focused, near-term work at the same time. It should draw the distinction between the NASA role and industry's role in developing aeronautical technology. The NASA Administrator and the Secretary of Defense should formalize the organization and responsibilities of the two agencies.

*Program Objectives:* The programs seek to improve the job performance of Federal employees. *Abstract:* GAO reported the results of its evaluation of selected Federal agencies' stress management training programs. The report related specifically to internal training on the subject and how agencies provided training for their employees. Legislative authority, program cost, course content and objectives, employee participation, and the role of the Office of Personnel Management (OPM) were discussed. Stress management training was discussed with officials of three agencies. The training programs are a small, low-cost segment of the total training provided by three of the agencies. One of the agencies interviewed did not provide any training in this area. When offered, stress management training was provided either under agency training or health services programs. The head of the agency had the necessary legislative authority to provide these services. OPM insures that the Federal Government provides an array of personnel management responsibilities. OPM supports educating employees about stress problems and a paper is being developed on stress management. OPM offers a stress management training course and is collecting information on sources of expertise on the subject. OPM states that stress management training has the potential for increasing job performance and productivity. Among the agencies, a variety of methods is used to educate their staff members on stress management. These methods include distribution of printed material, noontime lectures, training modules, and seminars to teach the indentification of positive and negative stressors and techniques for constructively revising stress management styles by minimizing the negative effects of stress. Employee participation is voluntary. Contract costs for the seminars range from $300 to $3,000. The cost for other program elements could not be estimated.

*Program Objectives:* The objective is improvement of employer-/employee relations in the Federal sector through an effective arbitration of grievances. *Abstract:* The agencies and activities reviewed have not developed formal, systematic methods for monitoring and evaluating their grievance arbitration systems. As a result, labor-management representatives do not know the number of formal grievances that have been filed and cannot effectively determine which activities are having problems. The agencies need to account for their grievance arbitration costs to help prevent wasteful expenditures and to better manage their grievance arbitration processes. A number of grievance arbitration procedures currently used in the private sector, which can help reduce costs and timeframes, could be used more often in the Federal sector. The Director, Office of Personnel Management (OPM), should require agencies to account for the total costs associated with the grievance arbitration process and to report annually to OPM on these costs. The Director should provide guidance and technical assistance to agencies and management personnel on cost-effective grievance arbitration procedures. He should require agencies to assess their current labor relations training program, and to determine their training needs, especially in areas of cost-effective grievance arbitration practices. OPM should periodically follow up with agencies to insure compliance. Finally, the Director should emphasize to agencies the importance that they should give labor relations training under the Civil Service Reform Act of 1978; work with the Director of Federal Mediation and Conciliation Service (FMCS) to expand the FMCS roster of qualified Federal sector arbitrators; and encourage agencies to routinely request Federal sector arbitrator panels from the FMCS Federal arbitrator roster.

*Program Objectives:* The objective is the proper representation of women and minorities in the Federal work force. *Abstract:* Several policy issues need to be resolved which will affect the direction of the Government's efforts to recruit, hire, and promote minorities and women in sufficient numbers to achieve a representative work force. The Office of Personnel Management (OPM) and the Equal Employment Opportunity Commission (EEOC) need to work together to successfully resolve these issues. The Director, OPM, and the Chairman, EEOC, should: (1) clarify their respective responsibilities for managing the Federal Equal Opportunity Recruitment Program; (2) clarify common evaluation responsibilities and how they will be coordinated to elimate duplication and inconsistency; (3) identify and eliminate inconsistencies between the recruitment program and the Affirmative Action Program so that the recruitment program becomes an effective element of affirmative action; (4) examine the data requirements for recruitment plans and determine what data can be used from the Office's Central Personnel Data File to minimize agencies' data burden and allow them more time to develop and implement the plans; and (5) work with Federal agencies to gather appropriate occupational data on relevant labor markets for various Federal occupations. The Chairman, EEOC, should amend affirmative action guidelines to include appropriate occupational data and timeframes as the baseline for establishing short-term and intermediate-range goals. Congress should consider the practical difficulties agencies face in trying to achieve a representative work force based on the definition of the EEOC. Congress may wish to clarify its intent on how representation should be defined and achieved.

*Program Objectives:* The Senior Executive Service (SES), established by the Civil Service Reform Act of 1978, went into effect in July 1979 and with it a system of performance awards (bonuses and ranks). *Abstract:* The GAO study found that the first three agencies that made awards conducted the processes and related awards within the parameters of the Reform Act and Office of Personnel Management (OPM) guidance in effect when the awards were made. However, there were a few initial policies and procedures in each agency that need improvement. The National Aeronautics and Space Administration performace award decisions lack the appearance of objectivity due to the composition of its Performance Review Board (PRB) and Senior Executive Committee. The Small Business Administration performance award policy is inconsistent with that of other agencies regarding its payment schedule. The Merit Systems Protection Board establishment of performance criteria is questionable because it is scheduled near the end of the performance rating period. OPM should take a strong role in monitoring agency bonus programs and review agency bonus award plans and policies prior to awards for the first few years or until such time OPM is assured that agencies are routinely following prudent procedures that are within the intent of the Reform Act. After it is assured that agencies are using prudent procedures, OPM should continue to monitor awards on a postaward basis through its data collection system and compliance visits to agencies. Congress should allow the SES bonus and rank provisions to take effect with one exception. The one exception is that, for equity purposes among agencies, Congress should change the basis for the percent limit on number of bonuses paid from percent of positions to percent of eligible career executives.

*Program Objectives:* The Nuclear Non-Proliferation Act of 1978 aims to reduce the risks associated with the further spread or proliferation of nuclear weapons capabilities and to enhance the ability of the United States to be a reliable supplier of nuclear exports for peaceful purposes. *Abstract:* The short term impact of the Nuclear Non-Proliferation Act of 1978 in establishing an effective international framework for controlling the proliferation of nuclear explosive capabilities has been limited. However, it represents a long-term agenda requiring ambitious international initiatives which often take a long time to conclude. Although GAO does not believe that major changes should be made, it believes that the Act should be selectively modified to: (1) conform with political and economic realities; (2) obtain wider international acceptance; (3) preserve the framework for curbing the inherent risks of weapons proliferation associated with peaceful nuclear cooperation; and (4) improve executive branch implementation. This report fulfills GAO's reporting mandate contained in the 1978 Act and contains 14 recommendations to the Congress and 8 to the involved Federal Agencies.

**Geographic Relevance:** International/Foreign

*Abstract:* Because a large number of United States military personnel are located in other countries, the conduct of military activities in these countries inevitably causes damages and injuries to foreign property and citizens. Most damage claims are paid to the Federal Republic of Germany (FRG). These reimbursements have been steadily increasing in recent years. The review focused on FRG because most of the claims resulted from damages caused by military training maneuvers there. The increasing cost of damage claims in FRG has been partly caused by factors such as larger exercises and the dollar devaluation. .Claims reimbursements to FRG in recent years have been somewhat chaotic because of the inability of USACSEUR to accurately forecast its requirements. While USACSEUR believes an indefinite appropriation would solve its funding problems, GAO is not convinced that such a funding mechanism would provide the necessary discipline and control needed. Moreover, the almost total lack of United States involvement in verifying even the very large dollar amount claims is questionable. Because claims have greatly increased in cost, it is reasonable to expect increased surveillance and monitoring of the claims payments. With the cost of damage claims rising and just two countries bearing the bulk of these costs, it may be time to consider an alternative funding method. The Secretary of Defense should strengthen the USACSEUR capability to verify high-cost damage claims in FRG. He should expedite ongoing actions to improve the data collection and analysis system for improving budgetary judgments and other overall management needs of USACSEUR. The Secretaries of State and Defense should take appropriate action to obtain FRG cooperation in jointly projecting more accurate annual funding requirements and in establishing a mutually acceptable monthly reimbursement level. Further, the Secretaries should develop a cost sharing strategy for damage claims which considers including claims in bilateral cost sharing negotiations with FRG and approaching the North Atlantic Council under the provisions of paragraph 5(f) of the NATO SOFA seeking relief from the increasing damage claims burden.

*Program Objectives:* The Department of the Treasury, through the Office of Foreign Assets Control (OFAC), regulates commercial and financial transactions with countries hostile to the United States by: (1) restricting trade with such countries and their nationals, and (2) blocking their assets which are located in the United States or under U.S. jurisdiction. The restrictions seek to prevent designated hostile countries from acquiring dollar foreign exchange and to deny them the free use of their assets until political differences are resolved and American claims are satisfied. *Abstract:* GAO's major concerns in making the study were whether hostile countries were denied the use of their dollar assets and earnings to the maximum practicable extent and whether blocked assets were properly accounted for and their value preserved. Treasury administrators have not required asset-holders to systematically report the assets they block or receive custody of, nor have they regularly inventoried the assets or monitored the holders to determine how the assets are identified and kept. As a result, the administrators frequently did not know what assets were blocked, who owned them, where they were located, or what they were worth. This lack of asset knowledge and virtually complete dependence on asset-holders made the Treasury unable to fully assess the program's effectiveness, give information on the assets' worth, and provide assurances that they were properly accounted for and managed. GAO made inventoried the assets or monitored the holders to determine Treasury, State, and Agriculture to correct existing problems.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Abstract:* GAO reviewed how four developing countries use trade in their economic development and how bilateral and multilateral donors assist developing countries in the area of trade. The countries reveiwed were selected on the basis of: (1) the stake the industrialized world has in their stable economic development; (2) the impact international trade has on their economies; and (3) need for trade assistance. In reviewing how developed countries assist developing country trade efforts, the focus was on identifying United States and other Organization for Economic Cooperation and Development member-country trade assistance techniques. Developing countries

increasingly depend on expanding trade–particularly with developed countries–to assist in their economic growth. GAO found that in the four countries it reviewed–Malaysia, Thailand, Indonesia, and the Philippines–similar internal and external obstacles to increasing trade exist. Although the responsibility for trade development rests primarily with the developing countries, developed-country governments assist developing countries bilaterally and multilaterally in their efforts to increase exports. During its review, GAO noted several bilateral and multilateral mechanisms for furnishing trade assistance to developing countries. GAO's report is intended to help the U.S. development assistance community in its search for new mechanisms to furnish such assistance.

**Geographic Relevance:** International/Foreign

*Abstract:* The United States has a conflict between its desire for increased North Atlantic Treaty Organization (NATO) collaboration to standardize weapons and the need to maintain control over weapons systems made from U.S. technology. The administration has been willing to compromise to some extent on third country sales to achieve cooperation. These compromises may allow foreign producers using U.S. technology to sell to countries the United States opposes for political and foreign policy reasons or may prohibit the United States from selling to its usual customers. GAO analyzed the trading patterns of the major producers and did case studies of ongoing collaborative weapons projects at both the production and development stages. GAO assessed the competitiveness of European producers who get a license to produce U.S. systems to determine if they would be willing to accept restrictive U.S. export controls. GAO also reviewed the handling of third country sales in new codevelopment programs. GAO found major differences in the customers considered acceptable by the different producers, particularly between the United States and France, which explains French reluctance to accept U.S. restrictions in collaborative projects. Because of smaller quantitative requirements and less efficient production practices, the United Kingdom, France, and the Federal Republic of Germany generally cannot compete with the United States in markets. Thus, they are reluctant to adopt U.S. systems. This limits the potential for NATO collaboration using dual production. GAO found that diminishing U.S. controls for the sake of cooperation with the largest concessions reduced U.S. control where the potential standardization benefits and European contributions are the greatest. The United States has modified U.S. sales policy for the sake of collaboration. Congressional participation is limited in these policy decisions because authorization legislation covering arms exports is not designed to deal with the new forms of collaboration. Congress may want to expand its prerogatives in establishing where the line should be drawn on making concessions.

*Program Objectives:* The Nuclear Non-Proliferation Act of 1978 states that the policy of the United States is to strongly encourage nations which have not ratified the Non-Proliferation Treaty to do so at the earliest possible date. *Abstract:* The Nuclear Non-Proliferation Treaty is the world's principal political instrument for controlling the spread of nuclear weapons. However, more than 50 countries, some with nuclear programs, are not party to the Treaty. The United States is using diplomatic initiatives and incentives such as technical assistance to encourage more nations to become Treaty parties. Principal objections of key nations include claims that the Treaty discriminates against non-nuclear weapon states and could adversely affect their peaceful nuclear programs and endanger their national security and that nuclear weapons states have have not agressively pursued disarmament. This report discusses the efforts of the United States to encourage nations to become party to the Nuclear Non-Proliferation Treaty. It concludes that the overall approach followed by the administration in these efforts appears reasonable in light of inhibiting factors. The report also contains a recommendation to the Secretary of State. In August 1980, the second conference of party nations was held to review the operation of the Treaty. This report discusses some of the issues that were expected to be raised.

*Abstract:* A review was made of the implementation of sections 201-203 of the Trade Act of 1974 to determine whether the legislation was being administered effectively to enable U.S. industry to become more competitive with imports. The Trade Act of 1974 contains an "escape clause" which allows industries adversely affected by overseas competition an opportunity to become more competitive. If the International Trade Commission determines that an industry is or may be injured from increased imports, it recommends an appropriate remedy to the President, who takes the U.S. national economic interest into consideration in deciding whether or not to provide relief. GAO recommends a number of steps the International Trade Commission and the Office of the U.S. Trade Representative should take to improve administration of this program.

*Abstract:* Earlier assignments involving the Security Assistance Program indicated that the Security Assistance Officers (SAOs) Overseas were doing more than just program management functions provided for in the Foreign Assistance Act. Also, the Unified Commands' involvement in the direct management of security assistance programs had been reduced in recent years without significant reduction in personnel. The objectives of the review were to: ascertain exactly what functions the various types of SAOs were performing and examine the role and function the Unified Commands performed in managing security assistance programs. The report contains findings and recommendations regarding adequacy of Sec. 515 of Foreign Assistance Act in prescribing functions of SAOs; the role of Unified Commands in security assistance management; and weighs reasons for and against consolidating security assistance function with defense attache function in overseas missions. The study found that three types of offices authorized by the Act to function overseas perform basically the same type activities but involvement varies in degree and scope. Some of the activities performed may not be recognized by the Act. They also are providing advisory assistance on a routine basis. Some offices devote considerable staff resources performing activities which are defense related. GAO recommended that the Secretaries of State and Defense identify for Congress what the role and functions of overseas security assistance offices should be and recommended to Congress changes to the Foreign Assistance Act necessary to recognize those functions. Unified Commands have a limited role managing the security assistance programs. Prior to 1975 the Comamnd had a major role in planning for and implementing programs but, in recent years, that role has been reduced. As a result, the commands have made some reductions in their staff levels. GAO believes further staff reduction may be possible. GAO recommended Department of Defense independently examine the Command's current security assistance organization and staff level to determine if reductions are possible. The Office of Management and Budget and State Department support consolidating the security assistance and defense attache functions in certain countries because it will reduce personnel overseas, provide ambassadors with one senior defense advisor, and not detract from the attache's primary mission. The Department of Defense disagrees. GAO recommended that the Secretaries of State and Defense provide details on both the advantages and disadvantages of consolidating to the Senate Foreign Relations and House Foreign Affairs Committees prior to any consolidations.

*Abstract:* A Presidential study commission recently reported a serious deterioration in this country's capacity to use foreign languages and conduct research in international affairs. GAO examined the Government's capacity to analyze (through research) the behavior of potential adversaries and outlined a possible approach to the problem of assessing national needs in this field. GAO reported on the kinds of in-house and external research sponsored by those agencies, what problems exist, how the research is coordinated within the Government and between the Government and the private sector, and the language capabilities that the agencies currently apply to Soviet/East European research. Research on Soviet affairs done by the Government relates mainly to national diplomatic and defense policy current issues. Government agencies were found to rely for much of their source material on reports and translations obtained from the intelligence community and the private sector. The majority of the 13 agencies GAO queried felt their present Soviet research and language capacity was adequate to serve their specialized purposes. These agencies however, reported a limited capacity to study Soviet affairs, focusing on the specialized issue areas falling into their responsibiltities. GAO confirmed the President's Commission's findings of the decline of language and area studies in American education and gaps in language and research capability. Perceptions

of the need for Soviet research vary widely among experts and practitioners. An update of information about existing research resources is presently being created, but a quantitative study of how much research is necessary will be hard to develop. The President's commission recommended the establishment of a Federal Council on International Research and Training comprising representatives of Government and the private sector to set policies for external Government funded foreign affairs research awards, assess the needs and improve the effectiveness of international training and research, and help obtain the necessary funds. GAO believes that the principle underlying the proposal is sound but could be narrowed initially.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* GAO was asked to: (1) examine the assumptions upon which the Department of Defense (DOD) bases its requirements of 650,000 inductees within 180 days; (2) examine the conclusions of the Director of the Selective Service System (SSS) that it can deliver 100,000 inductees by Mobilization (M)+35 days and 650,000 by M+125 days; and (3) determine whether DOD, specifically the Department of the Army, has the training capacity to absorb 100,000 inductees by M+28 days or by M+35 days, and 650,000 inductees by M+125 days. GAO found that: (1) DOD has no documentation or calculations to support the requirement of 650,000 inductees within 180 days of mobilization; (2) the conclusion of the Director of SSS concerning postmobilization registration is optimistic and questionable; and (3) DOD does not have the capability to train the 650,000 people who will be moved into the services after mobilization. GAO believed the capacity of the training base is at least 360,000 new soldiers by M+180 days. The Army must continue to work on improving the capacity of the training bases, the ability to expand the training force structure, the capability of the training personnel, and the availability of equipment on which to train. The Army also must continue to determine and validate its requirements for trained manpower so that demands levied on SSS can be based on needs and not constrained by limits in the training base capacity.

*Program Objectives:* The programs are designed to provide Federal employees with group life and health insurance benefits similar to private industry. In this review, GAO looked at the timing and method of payment used in paying premiums to the insurance carriers of these programs. *Abstract:* GAO reported on the cash management problems in the handling of funds for the Federal employees' life insurance and health benefits programs. Funds held by the Treasury and insurance carriers for the programs are invested, and the income earned is used to reduce costs to Federal employees and the Government. GAO found serious weaknesses in the procedures used by the Office of Personnel Management (OPM) and the Treasury to remit premiums to insurance carriers. The payments to the insurer for the life insurance program were being made prematurely. Not only did the life insurance program not gain any additional income by being paid early, it actually lost income from Treasury special issues each month. GAO estimated this loss of investment income at about $3.5 million during 1979. OPM and the Treasury did not follow prudent cash management practices in paying insurance carriers under the health insurance program. GAO found that payments were being made by check instead of the more efficient method of bank wire transfer. Because payments made by check are often delayed, at least $550,000 of investment income has been lost since 1976. The Secretary of the Treasury and the Director of OPM should make sure that: (1) payments under the health benefits program to Blue Cross and Blue Shield and Aetna be made by bank wire rather than by check; and (2) using bank wire to pay other health insurance carriers be studied and that this payment method be adopted whenever it would increase interest income.

*Program Objectives:* The Foreign Agents Registration Act requires persons and organizations acting on behalf of foreign principals to register as foreign agents and provides for public disclosure of the information. *Abstract:* Since 1974 the Department of Justice has made some improvements in its administration of the Foreign Agents Registration Act. Civil actions have been taken to register additional agents and to have their activities reported. However, the administration of the Act requires more attention to improve agent registration and disclosure of agent activities. The Attorney General should seek additional enforcement authority, such as subpoena powers, civil fines for minor violations, and increases in existing fines; and require written notification of all exemption claims prior to any agent activity. He should also provide specific guidance to agents and agency personnel on their responsibilities under the Act and establish a more permanent inspection capability. The Secretary of State should resolve with the Attorney General who qualifies for diplomatic exemptions and provide whatever assistance he requests to administer the act.

*Abstract:* GAO made this review to determine how U.S. international energy policies are formulated and coordinated within the executive branch. GAO looked specifically at the: (1) key departments, agencies, and offices involved; (2) level of officials involved; (3) coordination within and across agencies; and (4) process for resolving differences and making policy decisions. The Department of Energy is not the focal point for establishing major U.S. international energy policies. That central role is exercised by the Executive Office of the President, especially the National Security Council. As a result, in examining the adequacy of such policies, for the Congress to focus on the activities of the Department of Energy alone, or even Energy and other key departments, such as State, Treasury, and Defense, is not sufficient.

*Program Objectives:* The Supplemental Security Income (SSI) program is a cash assistance program for the needy aged, blind, and disabled. It is financed through general funds and about 4.1 million recipients receive about $8 billion in cash benefits. Veterans Administration (VA) pensions assist wartime veterans in need whose non-service-connected disabilities are permanent and total and prevent them from following a substantially gainful occupation. *Abstract:* Some couples who receive SSI and VA pensions receive more in benefits from these two programs than do other couples with similar or smaller incomes from other sources. The principal coordination of benefit information between VA and the Social Security Administration (SSA) occurs through automated data exchanges. Some changes are needed in this coordination to improve the accuracy of benefit payments by VA and to eliminate the exchange of unnecessary records. GAO estimated $14.5 million inaccurate pension payments were made. VA and SSA coordinate the delivery of VA pension, social security, Federal Black Lung, and SSI benefits to needy veterans with non-service-connected disabilities.

*Abstract:* Several Federal programs are directed toward increasing the numbers of disadvantaged and minority students in the health professions. While most Department of Education programs were general and not designed to point students toward specific careers, they can make students more competitive for various careers. Programs such as the Biomedical Sciences Program provide outreach and assistance specifically to students interested in the health fields. Changes by the new Administration could affect the many separate programs that influence the numbers of disadvantaged and minority individuals pursuing health careers. However, until these changes occur, there is a need to coordinate the Department of Health and Human Services (HHS) programs and to link HHS and the Department of Education programs at the lower or secondary level to those at the higher education levels. The Secretary of HHS should: (1) direct that the draft plan for coordinating HHS efforts be finalized and implemented; and (2) designate an official to work with the Department of Education in developing a plan to coordinate and link Education programs with those of HHS.

**Authority:** National Swine Flu Immunization Program of 1976 (P.L. 94-380, § 2; 90 Stat. 1113; 42 U.S.C. 247b). Public Health Service Act, as amended (P.L. 78-410, title III, § 301; 58 Stat. 691; 42 U.S.C. 241). Act of June 25, 1948 (P.L. 87-697; 62 Stat. 982; 28 U.S.C. 1346; 28 U.S.C. 2671 et seq.).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Department of Justice processes claims made against the Government resulting from the Swine Flu Program.
*Abstract:* GAO found that no criteria existed to objectively assess the timeliness of swine flu claims processing. GAO was unable to determine the average time it took to process lawsuits and whether they were being handled in a timely manner. Almost 4000 claims and 1000 lawsuits have been filed against the Government alleging injury, death, or other damage resulting from the 45 million swine flu immunizations given under the program. Justice performed all the necessary factfinding and legal analyses pursuant to claims processing and made recommendations to the Department of Health and Human Services (HHS) on the action to take on claims, while HHS retained authority for determining final action to be taken on claims. It took, on the average, about 403 calendar days from the date that a claim was received by HHS to the date Justice made a recommendation on the action to take on the claim. Factors which slowed processing time were the failure or tardiness of claimants to respond to Justice's requests for information, the lack of an adequate system to follow up on requests for information, and the lack of adequate staffing arrangements for performing medical review. Justice's efforts to develop procedures to process the claims were reasonable. If a Federal mass immunization program is repeated, sufficient staff and timeframes should be established for followup activities.

**Authority:** Federal Deposit Insurance Act of 1950, as amended (P.L. 81-797, § 10; 64 Stat. 882; 12 U.S.C. 1820). Federal Reserve Act, as amended (P.L. 63-43, § 11; 38 Stat. 261; 12 U.S.C. 248). Act of February 19, 1875 (18 Stat. 329; 12 U.S.C. 481); Revised Statute 5240. National Bank Act (12 U.S.C. 21 et seq.); Revised Statute 5133.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The three bank regulatory agencies are responsible for regulating, examining, and supervising the commercial banks which have Federal deposit insurance. The Federal Financial Institutions Examination Council is to coordinate the examination activities of the five Federal financial institution regulatory agencies.
*Abstract:* GAO identified problems with the present field office structure which include: (1) there are no field offices in some cities and separate field offices in other cities because the agencies do not share their examining capabilities or collocate their field offices; (2) high costs are incurred in examining some banks because of the scattered distribution of financial institutions which each agency examines; (3) the agencies have experienced some difficulties in managing their examination workload; and (3) many examiners have to travel quite extensively. GAO believes that consolidation of the Federal regulatory agencies' examiner forces is a reasonable solution to overcome the inherent problems of each agency maintaining separate networks of examiners. The Federal Financial Institutions Examination Council should prepare a plan, including proposed legislation, whereby bank examinations would be conducted, to the extent feasible, by the closest Federal regulatory agency. In developing the plan, the Council should: (1) determine solutions to the problems identified by the work and by the agencies in commenting on the draft report; (2) develop a system for prioritizing and scheduling examinations; (3) develop a mechanism for reimbursing agencies for the cost incurred by their examiners in examining banks under the jurisdiction of another agency; and (4) assure the plan's adaptability to any potential consolidated examination force. In addition, the Council should establish a task force to determine the feasibility of consolidating the examination forces of the Federal regulatory agencies. Until a policy of sharing or exchanging examiners becomes a reality, the Board of Directors of the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, and the Comptroller of the Currency should establish procedures for making the periodic evaluations of their internal organizational structure and take actions to realign their field structures whenever opportunities exist to improve the dispersal of their examiner forces.

*Program Objectives:* The objectives are to identify all prison inmates in need of mental health care and to provide it properly. *Abstract:* Studies indicate that from 20% to 60% of the prison population on any given day have mental health problems, but most jails do not identify all inmates in need of help or provide for their proper care. The National Advisory Commission on Criminal Justice Standards and Goals was established to formulate national criminal justice standards and goals at the State and local levels. The Commission found a general lack of funding and program innovation at the local level and recommended that States assume the responsibility for operating and controlling local jails by 1982. It also made recommendations for those States which did not assume control. This report is a comprehensive look at States' progress in implementing the recommendations made by the Commission. This study has found that States have made limited progress in forwarding the Commission's goals. States generally have not assumed responsibility for operating and controlling local jails. Little has been done to overcome inadequacies in the training of local jail personnel. The study determined that correction of management shortfalls would improve services and facilitate the better use of resources. Recommendations included ensuring that appropriate ongoing psychological reinforcement training is provided to those identifying mental health problems and requiring that a psychological file be established for each inmate identified as mentally ill.

*Program Objectives:* The Government provides free crime laboratory services to State and local law enforcement agencies, a practice which is in direct conflict with the Federal policy of encouraging States and localities to develop their own capabilities and decrease their reliance on Federal laboratories. *Abstract:* GAO reviewed the Federal Bureau of Investigation, the Drug Enforcement Administration, and the Bureau of Alcohol, Tobacco, and Firearms crime laboratories. Restricted budgets have forced two of the agencies to curtail some services previously provided, and reductions in services of all three laboratories are likely. A clear, coordinated strategy is needed to properly focus and balance Federal efforts to reduce Federal outlays and to encourage development of independent State and local laboratories. More often than not, inadequate resources have detrimentally affected State and local laboratories. Continued availability of free Federal laboratory services will only serve to postpone actions needed at the State and local level to improve the quality and quantity of laboratory services. A clear Federal policy and a plan for achieving a phased reduction is needed to allow State and local jurisdictions time to prepare for the increased workload that the reduction of Federal services will cause. GAO recommends that the Attorney General and the Secretary of the Treasury require the Federal Bureau of Investigation, Drug Enforcement Administration, and Bureau of Alcohol, Tobacco, and Firearms crime laboratory directors to develop a coordinated plan providing for a phased reduction in Federal crime laboratory assistance to State and local law enforcement agencies.

*Abstract:* The Information Security Oversight Office (ISOO) had improved program oversight pursuant to recommendations in GAO's March 1979 report. For example, the staff had almost doubled, more comprehensive inspections were being made, and improvement had been made in the reporting of program activity. However, because some deficiencies were still noted, GAO made the following recommendations. The Administrator of General Services, in consultation with the National Security Council, should direct ISOO to: (1) work with agencies to develop cost-effective methods of accumulating and reporting program activity so that agency reports contain complete information on all classification actions, the declassification categories assigned to classification actions, mandatory review requests and appeals, the number of individuals who classify information, and classification infractions; (2) revise its instructions to require that personnel who apply derivative classification markings be identified on documents; (3) rescind the waiver to the Departments of Defense and Energy concerning portions marking national security information contained in documents that also contain restricted data; and (4) revise section IV D of its implementing directive to clarify that the only records that can be denied to ISOO in carrying out its oversight function are those whose disclosure would pose an exceptional national security risk. Such a revision, however, should also include special arrangements for ISOO to obtain access to those documents containing intelligence data or references to sources and methods that are needed to review derivative classifications.

*Program Objectives:* Objectives are to safeguard individual privacy from the misuse of Federal records and to provide that individuals be granted access to records concerning them which are maintained by Federal agencies. *Abstract:* GAO noted a difference in the organization of the Department of Housing and Urban Development (HUD) accounting records system compared with similar systems at the other agencies reviewed. HUD had one system consisting of 29 different categories of records while the Small Business Administration (SBA) and the Veterans Administration (VA) had multiple separate records systems covering those same categories. Excluding the accounting records system, HUD has organized its records in the same manner as SBA and VA. HUD reported fewer systems of records than any other cabinet level department. This reflects the types of records maintained on specific individuals by SBA and VA, while HUD deals primarily with organizations. HUD reported 29 recordkeeping systems which were not subject to the Privacy Act or had records that were covered by another HUD system. The remaining two systems were transferred to the Office of Personnel Management. HUD, like the other agencies, identified the systems eliminated and created as deemed necessary.

*Program Objectives:* The five financial institution regulatory agencies are responsible for examining and supervising all depository institutions which have Federal deposit or share insurance. *Abstract:* GAO surveyed the practices followed by the agencies in examining the commercial activities of financial institutions and found that: (1) there are differing practices among and even within agencies regarding acceptance of examinations made by State regulatory agencies in lieu of their own; (2) the agencies have different criteria for scheduling examinations which generally do not adequately weigh the risks of institutional failure or problems against the cost and burden of examinations, with the result that some institutions may be examined

more frequently or less frequently than necessary; (3) the use of timesaving techniques varies among the agencies; (4) the agencies have different policies regarding reliance on institutions' internal review groups, with the result that some work that is competently performed by these groups is duplicated; (5) the amount of data included in the examination reports varied among the agencies, and some data included in the reports did not appear to be useful to either the regulator or the financial institution; (6) the agencies place varying emphasis on examining management activities in the institutions even though there appears to be little difference in examination objectives among the five Federal agencies; and (7) the agencies have different policies regarding specific guidelines for conducting and documenting examinations.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Federal Property Management Regulations require agencies to establish retention periods for their personnel records, as part of the Archives' responsibility to ensure that records of continuing value are preserved and that those of no further value are systematically destroyed. *Abstract:* GAO reviewed the official personnel records of the Army, Air Force, Navy, and Marine Corps to evaluate the manner in which records were being maintained. GAO found that, although records generally were being maintained in a competent manner, there were areas where improvements could result in substantial savings. The four services do not have approved retention periods for military personnel records as required by Federal regulations. GAO believes that savings could be realized if a 75-year retention period for the records is established. In addition, the services' microfilm should either be of such a high quality that it will last indefinitely or should be inspected at regular intervals. Of the four services, only the Army has prepared a formal economic analysis to determine the optimal time for microfilming personnel records. Although the services believe that their microfilming is being done at the proper time, GAO believes that formal cost analyses should be performed to substantiate that belief. The Secretary of Defense should require: (1) the Army and Navy to determine and propose retention periods to the National Archives and Records Service; and (2) the Air Force, Navy, and Marine Corps to develop formal cost analyses to determine the optimal time for microfilming records.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives are to enhance traffic safety and to update the trucking industry. *Abstract:* The Department of Transportation's Federal Highway Administration (FHWA) imposes a heavy paperwork burden on the trucking industry. It requires duplicate information and is not using collected data efficiently. In selecting companies for safety inspection, the FHWA Bureau of Motor Carrier Safety investigators generally rely on their own knowledge of motor carrier activities rather than requesting and using available summarized information to identify those companies most needing safety inspections. The Interstate Commerce Commission (ICC) does not have the controls necessary to ensure that its paperwork requirements are properly prepared and cleared before they are imposed on the public. The Secretary of Transportation should require the Administrator, FWHA, to: (1) routinely provide Bureau field investigators with appropriate summarized data to assist them in identifying, investigating, and following up on carriers most in need of safety surveys; (2) evaluate the usefulness of the Driver's Daily Log in enhancing highway safety to provide a basis for continuing or eliminating the requirement; and (3) eliminate the Accident Register requirement. The Chairman, ICC, should: strengthen the ICC paperwork management process by establishing controls to ensure that clearance submissions are accurately prepared, justifications for paperwork requirements are properly documented, and requirements are cleared before they are imposed on the public. The Chairman, ICC, should also direct the ICC Managing Director to initiate action to revise or eliminate reporting requirements immediately after all or part of them have been determined to be unnecessary.

**Availability:** GAO
**Geographic Relevance:** International/Foreign

*Program Objectives:* Federal and State banking regulators generally regulate and supervise foreign and foreign-controlled banks the same as their domestic counterparts. *Abstract:* Although foreign-acquired banks generally showed some improvement after acquisition, they may not have improved as much as similar domestic-controlled banks. The Federal agencies' application review processes and procedures do not seem to favor either foreign or domestic buyers. The differences result from a recognition of the unique information problems posed by many foreign buyers. The merger process provides the regulators with an opportunity to strengthen the resulting bank by requiring additional capital. This was not done in the mergers GAO reviewed, resulting in a continuance of many problems in some surviving banks. In many bank purchase circumstances, foreign banks have an advantage over domestic banks, which is unfair. Large foreign banking institutions have been able to establish multistate operations in the United States, which large domestic banks have not been able to do. Congress should enact a limited moratorium on acquisitions of domestic banks with total assets of $100 million or more by foreign banks or bank holding companies, unless such acquisitions are necessary to prevent bankruptcy or insolvency. This moratorium should not continue indefinitely. It should remain in effect until the basic policy conflicts regarding interstate banking, antitrust considerations, and foreign acquisitions of U.S. banks are fully addressed. Congress should set an expiration date for the moratorium and a specific timetable for the actions it will take to address the policy issues.

**Availability:** GAO
**Geographic Relevance:** National; State

*Abstract:* The Bureau of Land Management does not have, nor is it legislatively required to have, long-range programs and quantified production goals for renewable resources such as timber, grazing forage, minerals, and energy. As a result, it has no realistic basis for determining the production levels necessary to meet its share of the Nation's needs. The Forest Service is required to assess renewable resources, both public and private, and to develop a long-range program and goals for its lands. Production goals must account for limitations such as scenic river designations, law suits, and administrative appeals. It is important for the agencies to set annual goals which reflect such events as they occur. Meeting these goals will require comprehensive forest and rangeland management plans. Congress should, in consultation with the Bureau, amend the Land Policy and Management Act to require a long-range renewable resource program development process for the Bureau. Congress should also: revise the 1872 Mining Law; grant discretionary authority to the Secretaries of the Interior and Agriculture to either permit or prevent development of mineral resources on public lands; consider modifying the Land Policy and Management Act to authorize Bureau employees to ticket persons violating Federal resource protection loans; enact legislation which authorized the Forest Service to sell or, in some instances give away, small scattered land holdings which are too costly or unpractical to administer properly; and review Bureau and Service staffing and funding levels and provide for a more realistic balance between the agencies' responsibilities and capabilities.

*Abstract:* The Park and Forest Services have not protected the health and safety of their visitors and employees. Substandard water and sewer systems and hazardous lodges, dormitories, bridges, and tunnels need to be repaired, upgraded, or limited in their use. Health and safety inspectors found some facilities to be so hazardous that they recommended immediate closure until the facilities could be repaired or upgraded. The costs of bringing facilities up to standard range from $5,000 to $3,200,000. The Park and Forest Services took a broad range of actions once they became aware that a facility did not meet health and safety standards. The actions ranged from immediate closure of facilities to doing little. GAO was told of numerous actions taken to improve deficient facilities, but the improvements were often not sufficient to meet safety and health standards. During Fiscal Years (FY) 1979 through 1981, 50% of the construction funds that the Park Service recommended, and 69% of the recreation construction funds that the Forest Service requested were for projects other than health and safety. To correct identified

health and safety deficiencies, the Park Service will have to spend about $1.6 billion, and the Forest Service needs about $109 million. There would have to be a five-fold increase in appropriations over the construction funds requested for FY 1981. Two alternative funding methods are: charging higher entrance and camping fees at parks and forests, and negotiation with concessioners on a case-by-case basis to make health and safety improvements on facilities they own or manage. Congress should: (1) give priority to funding projects for repairing and upgrading facilities with the most serious health and safety hazards at the National parks and forests; (2) repeal section 402 of Public Law 96-87 (93 Stat. 666) to permit the Park Service to increase entrance fees and direct that the Park and Forest Services use funds resulting from increased entrance and camping fees for health and safety projects in the parks and forests where they are collected; and (3) require the Secretaries of Agriculture and the Interior to periodically report on the condition of the facilities until they are improved to meet all health and safety standards.

*Program Objectives:* The objective is to maintain contingency measures for severe energy supply disruptions. *Abstract:* Some broad conclusions were reached regarding problems with the current Department of Energy (DOE) draft contingency plan and its organizational structure which include that: (1) preparation of adequate oil import contingency plans is so important to the Nation's security that it should be a top priority item on the DOE agenda; (2) the Nation cannot cope with substantial oil import disruptions at present, largely because U.S. contingency plans are not well developed; (3) while some progress has been made in contingency planning, substantial organizational deficiencies have held back more rapid progress; and (4) contingency planning has had low priority, been decentralized, been directed by a person without the authority to command adequate support from other DOE offices, and has not been sufficiently staffed. The current DOE reorganization only partly addresses these problems. Furthermore, it is questionable whether an adequate organizational structure exists which could effectively manage a crisis. In the event of an actual energy supply disruption, it is necessary that an organization exist for crisis management which: (1) brings key officials of both the public and private sectors together to make important decisions in a timely, efficient, and effective manner; and (2) provides these officials with the necessary support staff and physical facilities. The fact that no comprehensive or individual action plans are finished and that many areas are not covered indicates that the subject has not been given sufficiently high DOE priority.

Act of March 3, 1879 (20 Stat. 394; 43 U.S.C. 31 et seq.). Federal Non-Nuclear Energy Research and Development Act of 1974 (P.L. 93-577, § 6; 88 Stat. 1881; 42 U.S.C. 5905). Coastal Zone Management Act of 1972, as amended (P.L. 89-454, title III, § 302; 16 U.S.C. 1451 et seq.). Act of August 1, 1956. 22 U.S.C. 2656. 22 U.S.C. 2656. Revised Statute 202.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives are to encourage and accelerate the leasing of offshore lands. *Abstract:* Environmental concern and limited industry interest in the areas proposed for leasing Outer Continental Shelf (OCS) lands appear to be the two major factors that have affected achievement of the leasing goals of the 1970s. Public concern and the need to develop more information about the environmental aspects of offshore development have led to an extension in the time needed to plan for lease sales, resulting in numerous lease sales being delayed or canceled. Concern as to whether the Government is receiving a fair monetary return on OCS resources, the restriction of OCS leasing in offshore national defense areas, and boundary disputes have also had an impact on the leasing goals. Because of these, about 25 million acres of the OCS are not currently available for leasing. The majority of this acreage is thought to have good resource potential. Legislation enacted in 1978 seems to be working toward expediting the leasing and developing of OCS lands, but it is not leading to a timely resolution of the problems. There is considerable disagreement between Federal and State Governments on how State and local governments are to participate in the OCS

decisions. The Secretary of the Interior should: (1) take appropriate steps to ensure that sales scheduled under the present program are held as planned, (2) continue to seek ways to streamline the leasing process, (3) identify and examine alternatives for leasing more of the tracts offered in lease sales, (4) reexamine the justification and rationale for the withdrawal of the 25 million acres not currently available for lease, and (5) direct the Geological Survey to intensify its effort to define more precisely the portions of the OCS that are potentially attractive for leasing. This action should lead to increased leasing emphasis in those specific areas within OCS regions where oil and gas resources are thought to be located.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* Objectives are to lease, regulate, and supervise prospecting on Outer Continental Shelf (OCS) lands. *Abstract:* GAO questions whether Interior's report on shut-in or flared wells fulfills the intent of Congress and whether continuing to require it serves a useful purpose. Interior believes the report does not satisfy the congressional intent and favors its abolishment. Abolishing the report would not affect Interior's continuing responsibility for overseeing OCS activities. The following problems were found: (1) reporting on shut-in wells without adequately explaining the nature of and reasons for their being shut-in; (2) monitoring shut-in wells based primarily on data reported by OCS operators without reasonable support; and (3) allowing the flaring of natural gas without adequate monitoring. The Secretary of the Interior should seek legislative relief from Congress on Section 601(a) of the Outer Continental Shelf Lands Act Amendments of 1978. The Secretary should include in future reports: (1) a listing of all wells and the status of completions; (2) a statement by the Department concerning the most common causes for a well being shut-in, the basis for the information contained in the report, and the procedures used to verify OCS operator-reported information; (3) summaries of report appendices; and (4) definitions of report terminology. The Secretary should direct the Geological Survey to: (1) selectively review supporting data used by OCS operators; (2) obtain justification for planned restoration extensions; (3) require operators desiring approval of long-term gas flaring to submit justification; (4) establish a more systematic and documented approach to monitoring long-term approvals; (5) follow up on operators suspected of excessive flaring; and (6) continue to follow up on "no future utility" wells and, when appropriate, require plugging and abandonment of such wells as soon as circumstances allow.

*Program Objectives:* The objective of the program is to provide technical and management assistance to the business community. The Economic Development Administration (EDA) emphasizes economically distressed areas and regions while the Small Business Administration (SBA) assists the business community as a whole. *Abstract:* The problem-solving or counseling assistance provided by the university-based management and technical assistance program of the SBA and the EDA is alike in many respects. The EDA program emphasizes businesses located in economically distressed areas, while the SBA program helps the small business community in general. The limited number of SBA centers precludes its program from serving many of the States and areas now served by the EDA program. However, should either program expand in scope, duplication could become a problem. Congress should reevaluate the need for both agencies to provide management and technical assistance using university-based centers. The Secretary of Commerce and the Administrator of SBA should modify their systems for evaluating the effectiveness of their university-based, management assistance programs and should consider such factors as the need for uniform and consistent data at centers and the use of evaluation teams to evaluate the qualifications of the principal center counselors for the areas they counsel by monitoring select cases and assigning values based on the performance observed.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to reduce or eliminate public health hazards associated with the presence of toxic contaminants in food. *Abstract:* In GAO's opinion, the Food Safety and Quality Service (FSQS) and Food and Drug Administration (FDA) took too long to identify and control an incident in 1979 involving the contamination of chickens and other food items in several Western States by polycholorinated biphenyls (PCB). The unnecessary delay was due primarily to the agencies' handling the incident as a routine matter. At least $3.5 million in costs as well as the risk to human health could have been avoided if the contamination had been identified and controlled earlier. FSQS and FDA, with help from the Environmental Protection Agency, had taken actions to try to prevent similar incidents or to deal more effectively with any future occurrences. They had also taken a number of actions in response to some of GAO's previous recommendations that had resulted in: (1) improvements in the marketing of raw meat and poultry, (2) better regulation of pesticide exports and pesticide residues in imported food, (3) better coordination of pesticide residue testing and of contamination investigations, and (4) better control of hazardous wastes. For various reasons, however, actions had not yet been taken or completed on some previous GAO recommendations to strengthen chemical residue detection and control programs. The Office of Technology Assessment had identified several ways to improve the Federal response to contamination problems. GAO recommended that the agencies clearly define which agency will assume the leadership role in various contamination situations in the future.

**Authority:** Energy Reorganization Act of 1974 (P.L. 93-438, title I, § 103, 104; 88 Stat. 1235; 42 U.S.C. 5813, 5814(i)). Act of March 3, 1879 (P.L. 45-82, § 1; 20 Stat. 394; 43 U.S.C. 31). Coastal Zone Management Act of 1972, as amended (P.L. 89-454, title III, § 308(b); 16 U.S.C. 1456(a)(b)). River and Harbor Act of 1970 (P.L. 91-611, title I, § 108). Outer Continental Shelf Lands Act of 1953, as amended. P.L. 83-212, § 2, as amended by. P.L. 95-372. 67 Stat. 462. 43 U.S.C. 1331 et seq.
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives of the program are to increase production of domestic energy resources and to regulate and supervise oil and gas development. *Abstract:* Revised regulations implemented to meet the mandated timeframes for leasing Outer Continental Shelf (OCS) lands specified in the amendments have improved the Geological Survey's responsiveness, but processing times will probably never return to pre-1978 lengths. Four Federal agencies are primarily involved in issuing permits before exploration or development activities can proceed. A delay by one can hold up the entire process. The Environmental Protection Agency (EPA) drilling-discharge permits are the most time-consuming and have had perhaps the greatest effect on OCS operations. GAO found a credible record by industry in pursuing offshore oil and gas. Congress should enact legislation to establish a time (generally 90 days) within which all Federal agencies are required to complete approvals and issue permits. A steering committee, comprised of the Secretaries of the Interior and Commerce, the Administrator of EPA, and the Chief of the Corps of Engineers, should be formed with particular emphasis on: (1) assuring the appropriate balance between oil and gas development and protection of the environment; and (2) finding ways to streamline the process. The Secretary of the Interior should also establish within the Department a permit assistance office to: (1) help applicants, (2) work with other permitting agencies, (3) mediate disputes, (4) coordinate joint programs, (5) consolidate public hearings, (6) monitor decision time limits, and (7) feed back information to the newly created steering committee. The Secretary of Commerce should encourage and assist other coastal States in developing legislation and administrative procedures similar to California's for making local permitting and review processes more uniform, timely, and coordinated. The Secretary of the Interior should encourage the States in developing cooperative programs.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to maintain contingency measures in the event of a severe energy supply disruption. *Abstract:* Federal leadership for electrical emergency planning and preparation is unorganized and ineffective. GAO found that: (1) the Department of Energy (DOE) has an inadequate program for dealing with major electrical disruptions; (2) DOE Emergency Electric Power Administration representatives are unsure of their status, roles, authority, and responsibility and are doubtful that the organization could operate during an emergency; (3) DOE does not have adequate plans to manage and mitigate electric power disruptions; (4) emergency plans to manage such disruptions and restore the power system are needed; and (5) problems exist in Federal coordination with respect to electrical emergency preparedness. Congress should enact legislation requiring that appropriate plans be developed by a specified date. The Secretary of Energy should carry out his responsibility for electrical emergency preparedness by: (1) preparing adequate resources to DOE; (2) acting as leader and working with the utility industry, other Federal agencies, and States to develop and maintain detailed electrical emergency plans; and (3) developing national/regional plans for electrical emergencies which will enable power disruptions to be managed through established priorities for curtailing power by use and type of customer and assist the utility industry in restoring power in the event of severe damage to the power system. The Director of the Federal Emergency Management Agency should: (1) actively monitor the efforts of DOE to vitalize its emergency electric power program and develop associated plans; (2) require progress reports from DOE; and (3) actively assist, support, and coordinate the efforts of DOE especially with respect to other Federal agencies.

Federal Property and Administrative Services Act of 1949, as amended (P.L. 81-152, title II, § 201, 211; 63 Stat. 383; 40 U.S.C. 481, 491).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objectives of the program are to improve energy efficiency and reduce dependence on petroleum. *Abstract:* Major governmental departments should identify opportunities for using and encourage greater use of bicycles or mopeds within their departments. However, fears for personal safety, lack of facilities, unresolved legal issues, and poor attitudes restrict bicycle usage. Decreasing the fear of riding in traffic will necessitate effective education, training, and enforcement of cyclist traffic laws. Facilities for bikeways, secure parking, showers, and lockers for cyclists could be provided and information on successful bicycle and moped programs could be published. Federal employees should be reimbursed for official travel by bicylce or moped. The cost of owning and operating a bicycle falls between 3 and 5 cents per mile. The reimbursement rate presently proposed to Congress is reasonable. The cost of owning and operating a moped ranges from 8.2 to 16.3 cents per mile. An 8-cent reimbursement rate for moped use by Federal employees seems to be reasonable until additional cost data are obtained. The Department of Transportation (DOT) should take the lead in the effort to encourage greater use of two-wheeled vehicles and should closely coordinate its work with other Federal agencies. DOT should give specific attention to two major barriers: lack of secure parking and shower facilities, which appear to be precluding widespread use of these vehicles by Federal employees. Congress should amend the U.S. Code to provide for a maximum allowance of 4 cents per mile to Federal employees using their privately owned bicycles while on official business. An 8-cent per mile maximum allowance should also be provided for the use of privately owned mopeds.

*Program Objectives:* The objective of the program is to improve administration of mineral leasing on Federal lands. *Abstract:* GAO found that Federal mineral leasing practices differ considerably from one mineral to the next with respect to such provisions as diligence, rents, and royalties. Some minerals, such as coal and offshore oil and gas, have specific legislative provisions dictating how leasing will be handled. At the other extreme, such as for oil shale and tar sands, most leasing provisions are left entirely to the discretion of the Department of the Interior. It is understandable that some leasing provisions, such as lease size and acreage limitations, might differ among minerals, since the size of desired exploratory units and economies

of scale vary. For others, however, the reasons for differences are not so clear, and there may be opportunities to apply desirable provisions in one mineral leasing program to another. GAO also believes that regulatory reduction could be enhanced by a clearer statement by policymakers of what objectives will be sought through Federal leasing in the years ahead and by guidance on how often inconsistent and competing policies and objectives will be balanced. This should be a priority area of study leading to clarified objectives of what is being sought through Federal leasing.

**Availability:** GAO

*Program Objectives:* The Reorganization Act of 1977 provided the President with the authority to propose the reorganization of Executive agencies. This is accomplished by submitting a reorganization plan to each House of Congress simultaneously. A proposal is approved after 60 days of continuous session without both Houses voting or if within the 60-day period, neither House votes affirmatively on a resolution of disapproval. The Act does not permit the change or elimination of existing authorities or legislation. *Abstract:* The agencies that were subject to reorganization under the 1977 Act experienced start-up problems as a result of efforts to implement the reorganizations. These agencies: the Equal Employment Opportunity Commission, the Federal Emergency Management Agency, the U.S. International Development Cooperation Agency, the Merit Systems Protection Board, the Office of the Special Counsel, and the Federal Labor Relations Authority experienced delays in obtaining key agency officials, adequate staffing, sufficient funding, adequate office space, and establishing adequate administrative functions and systems. Subsequently, these agencies were deterred from addressing their primary missions in an effective manner. The source of the problem is attributable to insufficient planning and preparation of the implementation of each reorganization. GAO has recommended to the Chairman of the Senate Government Affairs Committee that future reorganizations require evidence by the Administration that planning has been done to avoid these and other start-up problems.
**Agencies Evaluated:** Equal Employment Opportunity Commission; Executive Office of the President; Federal Emergency Management Agency; Federal Labor Relations Authority; International Development Cooperation Agency; Merit Systems Protection Board: Office of the Special Counsel

**Congressional Relevance:** *House* Committee on the Judiciary; *House* Committee on Education and Labor; *Senate* Committee on the Judiciary. *House* Committee on Appropriations: Interior Subcommittee; *Senate* Committee on Appropriations: Interior Subcommittee.
**Authority:** National Foundation on the Arts and the Humanities Act of 1965, as amended (P.L. 89-209, § 5; 79 Stat. 846; 20 U.S.C. 959). Civil Rights Act of 1964, as amended (P.L. 88-352, title VI, § 601; 42 U.S.C. 2000d). Federal Advisory Committee Act, as amended (P.L. 94-409, § 5; 90 Stat. 1247; 5 U.S.C. 551). Freedom of Information Act, as amended (P.L. 89-554; 80 Stat. 383; 5 U.S.C. 552).
**Availability:** GAO

*Program Objectives:* The Freedom of Information Act (FOIA) gives the public certain access rights to Govermnment records and requires agencies which deny such access to advise requestors of the legal basis for the denial and the appeal procedures available. Among other things, the Federal Advisory Committee Act (FACA) sets forth procedures for announcing scheduled meetings, meeting attendance, and compiling and certifying minutes of meetings. *Abstract:* GAO found that, in most instances, the National Endowment for the Arts has provided the information requested under FOIA. However, administrative control of FOIA requests was not adequate. Responses were not always sent in accordance with FOIA timeliness requirements. In most instances when requested information was denied, the requestor was usually not advised of the appeal procedures available. Most of the panel meeting minutes did not meet FACA requirements for completeness and certification. In a number of instances, the National Endowment for the Humanities withheld information from requestors based on FOIA disclosure exemptions. Often, the requestor was not advised of the basis for the denial or the appeal procedures available in accordance with FOIA procedural requirements. FOIA records were inadequate to determine if timely responses were made. Most of the council and panel meeting minutes did not meet FACA requirements and certification. The General Services Administration has issued proposed procedures for implementing FACA. The procedures include: (1) public notice requirements; (2) public participation requirements; (3) requirements for closing meetings; and (4) requirements for minutes of meetings, including what information the minutes should contain.
**Agencies Evaluated:** National Endowment for the Arts; National Endowment for the Humanities

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* Consumer credit protection laws set forth basic principles to protect and inform consumers seeking credit. Financial institutions are responsible for complying with these laws. Federal financial institution regulatory agencies supervise institutions that extend credit and have responsibilities for ensuring that financial institutions comply with the laws. GAO found that the agencies' programs for identifying violations and enforcing compliance with the laws were inconsistent and, for the substantive aspects of some laws, inadequate. As a result, consumers have not been assured consistent protection, and financial institutions have not been treated equally. For the most part, agencies identified violations of technical requirements involving forms and disclosures, whereas violations of the substantive principles of some laws were seldom cited. Examiners performed few specific analyses to test institutions' practices and generally only reviewed institutions' forms and talked to institutions' management. Weaknesses in agencies' methods of examining for compliance prevent the agencies from identifying violations which should be corrected. Agencies need uniform compliance enforcement standards. Since 1977, the agencies have made substantial progress in correcting these shortcomings. However, more changes are needed. The Chairmen of the Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, Federal Reserve Board, National Credit Union Administration, and the Comptroller of the Currency should work together, under the direction of the Federal Financial Institutions Examination Council, to develop and administer consistent, effective consumer law compliance examination programs that adequately address the substantive principles of the laws.

**Congressional Relevance:** *House* Committee on Agriculture; *House* Committee on Public Works and Transportation; *Senate* Committee on Agriculture, Nutrition, and Forestry; *Senate* Committee on Energy and Natural Resources; *Senate* Committee on Environment and Public Works. *House* Committee on Appropriations: Agriculture, Rural Development and Related Agencies Subcommittee; *Senate* Committee on Appropriations: Agriculture and Related Agencies Subcommittee.
**Authority:** Rural Electrification Act of 1936, as amended (P.L. 74-605, title I, § 1-3; 49 Stat. 1363; 7 U.S.C. 901-903). Small Reclamation Projects Act, as amended (P.L. 84-984; 70 Stat. 1044; 43 U.S.C. 422). River and Harbor Act of 1970 (P.L. 91-611, title I, § 108). Federal Water Power Act (P.L. 66-280, § 4; 41 Stat. 1065; 16 U.S.C. 797).
**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to accelerate introduction of new energy (hydroelectric) resources. *Abstract:* There is no consistent Federal policy to foster non-Federal development of hydropower at Federal dam sites. The Corps of Engineers and the Water and Power Resources Service both believe they should first study the feasibility and then make recommendations to Congress. The Federal Energy Regulatory Commission (FERC) will grant a preliminary permit to a non-Federal developer to study the feasibility of installing power at a Federal site unless: (1) hydropower is an authorized project purpose, or (2) a Federal study on a dam is nearly completed. The Department of Energy and the Rural Electrification Administration will also provide grants and loans to non-Federal developers when they secure a FERC permit or license. There was agreement among the public and non-Federal parties that the non-Federal sector can get hydropower on line faster than the public sector and without major outlays by the Federal Government. Presently, there are unresolved legal questions which can potentially become serious barriers to non-Federal development of power at Federal sites. If an aggreement cannot be reached by the Secretary of the Interior and the Chairman, FERC, as to who has final authority, Congress should clarify its legislative intent. The Secretaries of the Army and of the Interior should encourage non-Federal development of hydropower at their facilities. Preliminary permits should be issued to non-Federal developers interested in Federal dams in all cases where power is not an authorized project purpose. For those dams where power is an authorized purpose, the Secretaries of the Army and of the Interior should conduct design studies and recommend to Congress whether power should be installed. In cases where Congress decides against Federal development, the non-Federal sector should be given the opportunity to develop the sites. The Secretary of the Interior and the Chairman, FERC, should develop a memorandum of understanding on who has final authority to: (1) grant a right-of-way permit to develop hydropower on public lands, (2) approve engineering plans, and (3) assess a water fee and a fee for the use of Federal facilities.

Outer Continental Shelf Lands Act of 1953, as amended (P.L. 83-212; 43 U.S.C. 1331-1343). Federal Energy Administration Act of 1974 (P.L. 93-275, § 5; 15 U.S.C. 764).
**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to manage onshore and offshore oil resources, including the National Petroleum Reserve in Alaska (NPRA), in response to national demand. *Abstract:* Early action and early leasing could save Federal money and, possibly could make more domestic oil and gas available sooner, helping to reduce the Nation's dependence on imports. Delay in authorizing leasing may spur action to continue a costly and marginally effective Federal exploration program at costs up to, or exceeding, $150 million a year, as an alternative to leaving NPRA in an unexplored and undeveloped state. The House Committee on Interior and Insular Affairs should act favorably on legislation to authorize the leasing of NPRA to private industry for exploration and development.

**Availability:** GAO
**Geographic Relevance:** National; State

*Program Objectives:* The objective of the program is to accelerate coal resource appraisal programs to meet Bureau of Land Management land-use planning needs for federal coal lease sales. *Abstract:* Immediate action is necessary for the 1981 Green River-Hams Fork lease sale to assure that enough coal is made available to meet the region's projected coal demand. Exclusion of formal expressions of leasing interest during land-use planning may unnecessarily restrict coal development. A request for and use of industry input would give better focus on where land-use planning should be done. The Geological Survey does not have sufficient information to identify and evaluate tracts. A decision by the Department of the Interior at the time licenses are granted would give industry added incentive to invest in exploration activity. The Secretary of the Interior should: initiate immediate plans for a follow-on sale to meet the region's projected coal demand; exclude production from the Cherokee mine; allow for a more realistic lead time for leases to reach full production; require estimates for coal recovery, mine life, and Federal coal ownership; and include a margin of error for the Geological Survey's coal reserve estimates. The Departments of Energy and the Interior should jointly review leasing targets. The Secretary of the Interior should request expressions of interest in possible lease tracts; insure that land-use planning for coal is not limited to known recoverable coal resource areas; decide whether or how threshold development levels will be used; develop long-range plans for coal exploration activities in direct support of tract delineation; appoint permanent tract delineation team leaders; clarify procedures for making reserve estimates; and establish formal procedures for quality controls in the reserve estimate computation process. The Secretary should develop procedures under which land exchange applicants could drill candidate exchange tracts and should inform those who obtain an exploration license if they will be allowed to bid on the tract. The Secretaries of the Interior and of Agriculture should coordinate activities with the Geological Survey.

*Program Objectives:* The objectives of the program are to determine interstate electric rates and oversee electric transactions and directorates. *Abstract:* The financial stability of the General Public Utilities system has been seriously affected by the results of the accident at Three Mile Island. Removal of the Three Mile Island units from the companies' rate base considerations has an adverse impact on earnings needed to assure the system's future financial viability and the continuation of reliable power supplies. The Three Mile Island-2 accident has severely limited the system companies' ability to obtain funds from the capital market. The loss of earnings capability raises questions as to the system's ability to fund Three Mile Island-2 clean-up costs and needed generating capacity. Federal regulatory agencies have done little to expedite the system's recovery from the accident. The Secretary of Energy should undertake a detailed study of the General Public Utilities system regarding its future

role as a provider of electric power, the financial considerations involved in ensuring that the system can fill such a role, the ways in which finances best can be obtained, and the relationships of the various State and Federal regulatory agencies with respect to the system's current problems. The Nuclear Regulatory Commission should move as quickly as possible, while taking all necessary steps to protect the public health and safety, to consider and act on the question of restarting Three Mile Island Unit 1. The Chairman should cooperate fully with the Secretary of Energy in the study of the assistance in fully developing the regulatory responsibilities of the Commission as they relate to the restart, clean-up, and recommissioning of the nuclear units.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective of the program is to govern offsite nuclear accident liability. *Abstract:* Although acceptance by the Federal Government of some offsite liability for nuclear accidents represents a subsidy to the nuclear power industry, without this protection, commercial nuclear power development would not have made the progress it has. The Price Anderson Act is fulfilling its intended purpose of providing financial protection to the public and to the nuclear industry in the event of a nuclear accident. The act should be retained in its basic form, but certain provisions should be revised. The limit on liability should be realistically defined, and the layers of financial coverage that compose the limit on liability should be reassessed. The premiums charged utilities in the event of a nuclear accident and the Federal Government indemnity could be revised upward. The Chairman of the Nuclear Regulatory Commission should use the Three Mile Island accident, plus various scenarios similar to that accident, to define a more realistic limit on public liability, reassess the premium charged utilities in the event of a nuclear accident, and reassess the Federal Government indemnity. If it is determined that some revisions to the Act are in order, the Chairman should also submit a legislative proposal to Congress outlining these revisions.

*Program Objectives:* The objective of the program is to implement the national high energy physics programs. *Abstract:* Department of Energy funding is based on an agreement with the Office of Management and Budget (OMB) to annually fund high energy physics at a constant level–the minimum amount the physics community believes is needed to maintain a viable program with adequate diversity. The funding has not been based on a comprehensive plan for maintaining a leadership position nor is it consistent with an agreed upon funding level. The program has been emphasizing the development and construction of accelerators. Key program elements have been inadequately funded; this may have detrimental effects on long-term accelerator technology and the participation of the brightest and most talented U.S. scientists, on determination of what the overall objectives of the program should be, and on the appropriate strategies and necessary funding levels. The director of the Office of Science and Technology Policy should assemble a work group to conduct a study to determine the appropriate level for funding the U.S. high energy physics program. Based on the results of such a study, the Director should prepare a policy paper setting forth the objectives of the U.S. program, a strategy for achieving such objectives, and the appropriate annual funding levels for carrying out the strategy. Such funding levels should consider projected amounts for major functions such as construction, accelerator operations, accelerator research and development, equipment, equipment research and development, and physics research. The Director should consult with the appropriate oversight committees of Congress for their views and input in helping to formulate the policy. The Directors of OMB and the National Science Foundation and the Secretary of Energy should fully cooperate in the study. The Secretary of Energy should formally institute the development of near-, mid-, and long-range plans on a periodic basis. These plans should be submitted to Congress for its information and use in carrying out its budgetary and oversight responsibilities.

*Abstract:* Water quality can change dramatically during 1 day, and within a short distance. Complex interactions among biological, chemical, and physical processes complicate the difficulties of water quality sampling. Infrequent measurements cannot accurately describe water quality, because rivers can change rapidly and extensively. Infrequent sampling also misses important events. Cost was a major consideration in decisions on sampling frequencies. Each sampling site is affected by unique conditions, and water quality measurements taken at one site cannot normally be applied to other locations. The Geological Survey focused primarily on riverflow, not water quality. Stations are located toward the downstream end of drainage basins. The Survey did not intend to detect any particular category of water quality, water use, or related land use. The Survey, the Environmental Protection Agency (EPA), and the Council of Environmental Quality (CEQ) have used network data in statistical comparisons of water quality, but these comparisons are highly questionable. The variability of water quality, the limited frequency and locations of samples, and the inconsistency in field work and laboratory performance make it virtually impossible to compare the data meaningfully from month to month, season to season, and year to year. Special studies of water quality designed for individual river areas could overcome many weaknesses. The Secretary of the Interior and the Administrator of EPA should discontinue the three national water quality networks and shift to a program of special studies of water quality. The Administrator of EPA and the Chairman of CEQ should promote the use of other available indicators of progress toward cleaner water, such as biological monitoring and reductions in waste discharges.

*Abstract:* Many water resource projects provide benefits to large segments of the country; however, the Corps of Engineers (CE) and the Soil Conservation Service (SCS) have built some projects that primarily benefit only a few landowners or businesses. GAO found that for CE and SCS projects, the non-Federal entity was seldom required to share a larger portion of project cost to compensate for the special benefits, such as land enhancement or increased local taxes. Local sponsors provide land easements, rights-of-way, and utility relocations for most projects. In feasibility studies, the estimated costs of the items are shown as the non-Federal cost share. However, GAO found that the estimated non-Federal cost share in the studies by SCS usually contains extraneous cost items which were not genuine project costs. This inflated the total project cost and also made the non-Federal share appear much higher than it actually was. Land treatment represents 55% of the total non-Federal share for all the projects approved by SCS through September 1979. GAO believes land treatment is important and should be strongly encouraged. However, it is misleading to include the estimated cost along with other cost items because: (1) land treatment is the individual landowner's responsibility; (2) land treatment is strictly voluntary and SCS has little or no control over implementing recommended treatment; (3) SCS does not effectively monitor or follow up on whether the measures are applied, and if so, at what cost; and (4) SCS does not include land treatment measures when estimating each project's benefit/cost ratio.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The demand for water in many areas of the Nation is being met by overdrafting ground water, extracting more ground water than will be replenished over a long period of time. Overdrafting is not necessarily bad; however, if it is continued indefinitely, the resulting problems may ultimately affect the Nation's ability to meet ever-increasing demands for food and other agricultural products. In its review, GAO found that overdrafting is most serious in the arid and semiarid Western States where irrigation of crops accounts for over half of all ground water use. GAO found that several problems can result from overdrafting, such as: (1) land subsidence; (2) saltwater intrusion into freshwater aquifers; (3) reduced surface water flows; (4) increased energy consumption; and (5) disruption of social and economic activities. Some States, such as Colorado, New Mexico, and Florida, have generally succeeded in controlling overdraft of their underground aquifers. However, other States, such as California and Arizona, currently impose little if any control on the use

of ground water, and both States suffer serious overdraft problems. Although the Federal Government manages only water resources on Federal lands, it has assisted States with overdraft problems by constructing multipurpose water development projects to replace or supplement ground water. Congress should direct the Departments of the Interior, Agriculture and the Army to require, before start of construction on any water resources or ground water depletion mitigation project, that the affected State or community implement or have specific plans to implement a program or some means for controlling ground water pumping and a water conservation program.

**Geographic Relevance:** National

*Abstract:* Many Federal, State, and local officials are proposing to modify Federal policy to provide more Federal aid to help large cities rehabilitate and improve their water supply and distribution systems. The programs, if enacted, could add billions of dollars to the Federal budget and may not be warranted for urban water distribution systems. GAO looked at water distribution systems in Boston, New Orleans, and Washington, DC. The review focused on the areas of major concern to water distribution system operators: (1) water mains, (2) metering and water inventory management, and (3) financing. Contrary to the popular impression that older water distribution systems are already past the point of no return, the systems in Boston, New Orleans, and Washington, DC, are providing enough water for all uses. Boston experiences a relatively small number of main failures annually, but a large percentage of the system is old. To protect the system, Boston plans to rehabilitate by the year 2000 all mains that will be 100 years or older by then. New Orleans experiences a large number of main failures each year due largely to soil subsidence. In Washington, DC, main failures are moderate compared to other cities. However, the distribution system suffers from a lack of maintenance and capital improvements due to budgetary and staffing restrictions. Controlling unaccounted-for water can help large cities conserve water and keep water rates reasonable. Metering and surveying intended to detect leakage and unauthorized uses, are major aids in controlling unaccounted-for water. Systems such as New Orleans' and Boston's, which are required to be financially self-sufficient or to operate at a profit, place more emphasis on controlling unaccounted-for water. Conversely, water management received less attention in Washington, DC, where no attempt was made to achieve financial self-sufficiency.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The rapid growth of Government regulations, coupled with recent economic difficulties facing the Nation, has heightened public concern over regulatory costs and burdens. The President has ordered agencies which write regulations to evaluate their economic impact. Many social and environmental regulations have a major impact on the costs, competition, and the administration of Federal water resources projects. Agencies and contractors have major compliance responsibilities during construction, and both are concerned with the cost and burden of regulations, especially the cumulative impact. GAO's case studies showed that when agencies planned projects, they did not develop enough information on costs, burdens, and benefits to evaluate alternatives. Contractors had insufficient knowledge and advice in the area of regulation compliance. Time factors prevented agencies from developing more information on alternatives. The Secretary of the Army should direct the Chief of Engineers, and the Secretary of the Interior should direct the Commissioner, Water and Power Resource Service, to evaluate alternative methods of compliance with social and environmental regulations in the construction of their projects and initiate action for doing so. The Director of the Water Resources Council should develop methods and techniques which construction agencies can use in evaluating alternative methods of compliance with social and environmental regulations and consider sharing them with other agencies.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* River basin planning should match the needs of water users with the amount of water available irrespective of State boundaries or Federal agency responsibilities. The river basin commissions, as they are now operating, do not accomplish optimum planning. Legislative changes are needed to ensure continued State participation and regional water resources planning input into Federal agencies' budget submissions. Commissions have not become the principal coordinators of water resource projects as intended, and Federal and State members who make up the six river basin commissions do not use their collective authority to carry out commission objectives. Commissions agree that authority is lacking, and Federal and State water plans and programs continue to be prepared independently of commission influence. GAO believes that river basin commissions have the opportunity to be more successful in planning and coordinating water development. However, changes are needed to: (1) provide broad water resource planning input and ensure continued State participation; and (2) encourage more participation in resolving regional and national water resource problems. Congress should amend the Water Resources Planning Act to require: (1) State membership in river basin commissions or other regional arrangements prior to granting the States Federal water planning assistance funds; and (2) that information regarding priorities established by the river basin commissions or other regional planning arrangements be included in the appropriate Federal agencies' annual budget submissions to Congress.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The Delaware and Susquehanna River Basins Commissions reflect a significant departure from traditional compacts in that: (1) the United States is a signatory party with the States, and (2) extremely broad powers are granted to the compact commissions. The Commissions are responsible for multipurpose planning, management, and development of the river basins' resources. GAO found that, although the commissions are currently encountering problems, including internal disagreements over their roles and funding, they contribute to consistency in water resources management throughout their respective basins and provide each basin State with a voice on interstate matters. The Commissions can act in some cases when a member party cannot. The Commissions are attempting to solve complex, controversial issues such as water allocation and adequate water supplies. Such issues affect a vital need of member parties. While no easy solutions exist to these problems, the Commissions are working toward meeting the basins' water needs. Their progress has been slow, but GAO believes that the States rate high marks for initiating the compact arrangement and committing themselves to working through a regional river basin commission. Additionally, GAO believes that the future effectiveness of the intergovernmental commissions depends on all parties' commitment to support and fully participate even at the cost of occasionally sacrificing their individual prerogatives.

*Abstract:* The report focused on three main issues: (1) Were people who used wheelchairs occupying the specially designed accessible units constructed? (2) Were Department of Housing and Urban Development (HUD) and Farmers Home Administration (FmHA) administrative requirements to construct 5% of the units in family projects and 10% of the units in elderly projects for people in wheelchairs reasonable and being complied with? and (3) Did HUD and FmHA have effective management information systems covering the development and occupancy of accessible units? Rental housing designed for the special needs of people who use wheelchairs is scarce. To help alleviate the shortage, HUD and FmHA established goals for building wheelchair accessible units under some of their rental housing programs. However, only a small portion of the accessible units were occupied by persons in wheelchairs. Also, the goals for building accessible units in effect since about 1970 were set without information about the number of people using wheelchairs in the United States or the demand for such units in areas served by the projects. HUD and FmHA need to take steps to ensure that: (1) housing units designed for people in wheelchairs are occupied by such persons, (2) valid goals for producing wheelchair-accessible units are set and met, and (3) information is accumulated to determine whether production and occupancy objectives are being achieved for accessible units.

*Program Objectives:* The program objective is to manage and accelerate use of public lands for exploration and development of oil and gas resources. *Abstract:* The use of Federal lands for fossil fuels exploration and development is hampered by: (1) unavailability of leases, (2) restrictive stipulations, and (3) lengthy delays of leases and permits. Congress should: (1) consider amending section 202(e) of the Act to require that decisions to close lands to mineral leasing be reported to Congress. Section 202(e) should also require that Interior submit with each closure report any other desired information required in section 204(c)(2); (2) amend section 3 of the Engle Act concerning withdrawal information for military applications; (3) amend section 6 of the Engle Act regarding oil and gas development being consistent with an installation's military use; (4) allow leasing in any future wilderness legislation for periods beyond 1983; and (5) consider when sufficient minerals information has been developed. The Secretaries of Agriculture and the Interior should establish standards and criteria for the use of restrictive stipulations. The Secretary of Defense should formulate a minerals policy for making installations available to leasing. The report contains 14 additional recommendations to the Secretary of the Interior on the use of Federal lands.

*Program Objectives:* The program objective is to be responsible for regulation of rates, sales, corporate transactions, and directorates for 211 electric utilities. *Abstract:* The review led to the following overall observations: (1) electric power projects and operations have been more costly as a result of changing regulatory requirements and delays and uncertainties associated with the regulatory process; (2) the utility companies' ability to provide adequate supplies of power to their service areas has not been adversely affected; (3) tangible benefits to ratepayers have not always been visible, although some social benefits may have been realized; (4) regulators often did not know how best to achieve their objectives or assess the results of a requirement; (5) it is imperative that Government provide a balanced approach in regulating the industry so that the cost and reliability of future power services are considered along with the environmental, health, and safety concerns of the public; and (6) the Carter administration and Congress appeared to be more concerned with the economic effects of regulatory actions and with evaluating the costs and benefits of achieving a desired goal. However, few of these efforts are directed toward alleviating the more routine regulatory problems, and the problems will continue unless cognizant regulatory agencies recognize them and become more aggressive in redirecting their regulatory emphasis and incorporating greater precision in their efforts.

*Program Objectives:* The purpose of the program is to provide a line of information on production and consumption of minerals for policy makers. *Abstract:* Federal foreign mineral information capabilities fall short of public policy, decisionmaking, and overall resource management objectives because: (1) the Department of the Interior's foreign mineral data collection, analysis, and dissemination activities are principally responsible to individual office mandates rather than to the entire executive branch; (2) responsible policy planning, decisionmaking, and resource managers in the Federal Government have minimal contact with the various Government collection, analysis, and dissemination processes; (3) the wide selection of data available does not become part of a data pool, reducing its availability and effectiveness; (4) the use of foreign mineral data has been severely restricted due to the absence of a usable data management capability; and (5) commodity policy analysts throughout the executive branch contract for data bases from a wide variety of sources outside the Federal establishment, creating a lack of communication between data collection and policy planning. The Secretary of the Interior should have lead responsibility for collection and analysis of foreign mineral data and should consider an automated data base management system approach as the most efficient means of assuring that the best attainable information is available.

*Program Objectives:* The program objective is to conduct a coal resource appraisal program to meet Bureau of Land Management (BLM) needs for land use planning, including mapping critical areas. *Abstract:* Federal coal resource planning and management decisions rely on maps that are often inaccurate, unreliable, and inappropriate either to define broad planning boundaries or to support the kinds of economic, energy, and environmental trade-off decisions called for by the new Federal leasing program. Recent actions by the Geological Survey to correct the mapping problems and provide the needed data may not fill the gap. Unless a major change is made in the way basic coal data are obtained, the leasing program may not be able to make available sufficient quantities of economically minable Federal coal to meet the Nation's demands. The Secretary of the Interior should better link Interior's land use planning and coal mapping/drilling programs and more efficiently use its in-house capability to concentrate on areas of highest interest and potential for coal leasing. To accomplish this, the Secretary should publish in the Federal Register a notice of the Geological Survey's mapping and drilling plans at the same time the Bureau of Land Management gives public notice and requests comments on its schedule for land use planning, thus providing an appropriate time for coal companies, State governments, and the public to submit comments for use by the Survey in refining its exploration and mapping priorities.

*Program Objectives:* The objective of the program is to develop use of coal resources. *Abstract:* The enactment of strict State reclamation laws is largely responsible for the decline in productivity in surface mining. Although coal mining technology has not caused productivity to decline, mechanization and technological innovation slowed in both underground and surface mines in the late 1960s and has not advanced sufficiently to offset the loss due to other causes. Since 1969, underground mines have experienced worsening labor-management relations as reflected in the increase in the number of strikes. Legislation, which authorized more stringent health and safety standards, vastly increased Federal enforcement powers and resources. Increased enforcement activity resulted in lower productivity during the peak of inspections in 1973. While Mine Safety and Health Administration (MSHA) regulation reduced fatalities in coal mines dramatically, nonfatal injuries have stayed high. Congress should authorize the Department of Labor to fund coal industry programs to train coal management and labor in effective communication and grievance handling. It should also increase the required minimum amount of on-the-job safety training for supervisors and miners. The Bureau of Mines should ensure that its products are adequately tested. MSHA should devise ways to minimize the regulatory lag. The Secretary of Labor should direct MSHA to analyze the impact on industry of increasing training requirements. The Secretary of Energy should direct the Office of Coal Mining to increase efforts in those areas which have high potential for productivity gains.

*Program Objectives:* The program objective is to enforce laws and regulations governing the management, use, and protection of public lands. *Abstract:* An operating company for transporting Alaskan oil has deviated from various technical requirements to prevent or detect oil leaks. It was also found that: (1) the company is not complying with the stimpulation for a system that would detect pipeline settling; (2) it has not run internal corrosion pitting surveys; (3) the line volume balance leak detection method is not operating at the sensitivity specified in the approved design; (4) the effectiveness of the earthquake-monitoring system has not been thoroughly evaluated by the agency; and (5) the monitoring office of the agency is experiencing difficulty in staffing because of executive branch hiring limitations imposed to cut costs and the agency's deemphasis on the use of consultants. However, in order to fully adjudge the company's compliance with the stipulations, long-term environmental impact research is necessary. The research which has been done has been uncoordinated and inadequate. The problem is exacerbated by the fact that other agencies, including the U.S. Fish and Wildlife Service and the U.S. Geological Survey, cannot charge the cost of pipeline-related environmental studies to the operating company. The report contains specific recommendations to the Secretary of the Interior, and the Director of the Office of Management and Budget to correct deficiencies.

*Program Objectives:* In February, 1978, the President declared eight Massachusetts counties a major disaster area. Federal assistance totaled about $180 million. GAO was asked to review: (1) the adequacy of coordination among the Federal agencies to prevent duplicative and other erroneous payments, and (2) delays in the processing of some Small Business Administration (SBA) loans. GAO reviewed disaster benefits provided to victims by SBA, Federal Emergency Management Agency (FEMA), the Department of Housing and Urban Development, the Department of Agriculture, and the Commonwealth of Massachusetts. This assistance included loans, grants, and issuance of food stamps. *Abstract:* GAO disclosed that: (1) as a result of inadequate coordination and other management weaknesses, duplicative and questionable benefits occurred in an estimated 26% of the cases sampled; (2) grants were awarded without adequate determination of financial eligibility or in a manner that was not consistent with other disaster programs; and (3) emergency food stamps were issued without evidence of need or sufficient controls. GAO doubts that reasonable safeguards were employed to ensure that only proper disaster benefits were provided and that there was a lack of necessary documentation to follow up on certain cases of suspected fraud and abuse. GAO recommended that the Director, FEMA collaborate with the Administrator, SBA, and: (1) review the benefits provided to all individuals and identify those who received improper payments or submitted fraudulent claims; (2) ensure that benefits are provided and spent only for verified losses or needs; and (3) eliminate the use of oral declarations that a loan cannot be repaid as a basis for denying loans which established grant eligibility. Additional recommendations were made to the Director, FEMA.

**Availability:** GAO
**Geographic Relevance:** International/Foreign; National

*Abstract:* With the emergence of foreign enrichment capabilities, U.S. reliance on its uranium enrichment capability as a nonproliferation tool has become an outdated idea. The United States is committed to being a reliable supplier of enrichment services to nations adhering to effective nonproliferation policies. There is substantial opposition to requirements of the nonproliferation law which would extend U.S. rights to approve foreign processing of U.S.-supplied nuclear fuel. U.S. reprocessing approval rights have been a factor in influencing countries not to purchase U.S. supplies and services. It is not apparent that the construction of a new enrichment plant is justified at this time. The Department of Energy has not fully and objectively considered options that would allow it to meet demand and delay the current construction program until more is known about advanced enrichment technologies under development. Congress should look closely at executive branch requests for the construction funding of a new enrichment plant. The Secretary of Energy, in future budget requests for the construction of uncommitted increments of enrichment capacity, should demonstrate that the need for the new capacity is based on realistic demand forecasts or that the new capacity is economically justified. The Secretary should seek the necessary policy approvals to allow the executive branch to consider and act on foreign processing requests without the trading partners having to demonstrate an imminent physical need. He should coordinate a comprehensive interagency reassessment of the controls over foreign nuclear activities of U.S. firms and individuals and the way they are administered. The Secretary of State should announce the U.S. position on when the United States will claim reprocessing approval rights. He should also improve the predictability of the export licensing process for highly enriched uranium. He should expedite the executive branch processing of export requests for Presidential review.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The two referenced programs established by Congress to encourage recycling through Federal procurement guidelines and industrial targets are not succeeding. Both of the programs, like other resource recovery efforts, are lacking in direction, coordination, needed resources, and desired impact. For example, under the Federal procurement program the Office of Federal Procurement Policy (OFPP) has not pursued its leadership responsibilities, the Environmental Protection Agency (EPA) has yet to issue any recycling guidelines, and Federal agencies are reduced to waiting for policy directives before encouraging the purchase of recycled products. The program for setting voluntary industrial recycling targets administered by the Department of Energy (DOE) will not promote recycling because economic factors determine such industry activities. The review by GAO of the use of contractors on both programs supports the need for an overall Federal conflict-of-interest contract policy. Congress should: (1) consider enacting legislation establishing a preference program for recycled products in Federal agency procurements; (2) direct the Administrator of OFPP to take a more active role with EPA to implement the objectives of the Resource Conservation and Recovery Act; (3) require evidence that any new programs will increase recycling before funds are appropriated for industrial target programs; (4) enact legislation establishing a Federal conflict-of-interest contracting policy; and (5) review ongoing Office of Management and Budget efforts to develop directives on the use of contractors especially to prevent conflicts of interest. OFPP should develop a preference purchasing program and actively address the policy issues raised by introducing recycling considerations into the procurement process. EPA should develop a preference program for the procurement of recycled products and identify uses for recycled materials. DOE should: (1) work with EPA to identify recycled products and programs having the most positive impact on the Nation's energy supplies; (2) discontinue redefining industrial targets; (3) amend all current open master contracts to ensure that new tasks or assignments are governed by the new conflict-of-interest regulations; and (4) assure that long-term task order or quick-response contracts state that competition is required when appropriate.

*Abstract:* The Interagency Radiation Research Committee, recently formed by Presidential memorandum, is such an important area that GAO believes a Federal interagency research review group should be created by legislation. Epidemiologists have used estimates of the number of cancers induced by high-level exposures to radiation to predict the numbers that may be induced by lower exposures. An intensive effort to synthesize the results of radiation research might be accomplished by developing quantitative theories of radiation carcinogenesis and critically testing their predictions with cellular and animal experiments. Congress should enact legislation giving statutory authority to an interagency committee to coordinate Federal research on the health effects of ionizing radiation exposure. The Interagency Radiation Research Committee should ensure, in research on ionizing radiation exposure, that increased priority and emphasis are given to studying the mechanisms of cancer induction through cellular and molecular studies and other fundamental research; ensure that the cognizant Federal agencies continue to conduct epidemiological studies of groups that offer large numbers of people and a range of radiation exposure doses; ensure that epidemiological studies involving primarily low levels of ionizing radiation exposure are of sufficient scientific merit to justify the costs of long-term follow-up efforts; ensure that the cognizant Federal agencies continue to conduct a limited number of high quality animal experiments, particularly with dogs and primates; and consider carefully and initiate actions to implement recommendations in the June 1979 report of the Federal Interagency Task Force. The Secretary of Health and Human Services should discontinue distribution of a publication of the National Institute for Occupational Safety and Health that GAO found to contain certain erroneous and potentially misleading information.

*Abstract:* GAO was requested to review the activities and effectiveness of the Marine Mammal Commission (MMC) and the Departments of Commerce and the Interior in fulfilling the Marine Mammal Protection Act (MMPA) requirements. GAO found that the regulatory agencies have not provided priority attention to fulfilling the provisions of the MMPA. It is apparent that there are significant differences of opinion as to the type of action that needs to be taken. Congress should amend MMPA to allow the Secretaries of Commerce and the Interior to exercise managerial controls over Native American existence harvesting of the species when it appears such steps will help prevent the species' depletion or assist in protecting the marine environment. The Secretaries of Commerce and the Interior should establish, as a high priority, procedures to ensure that the process required to make such determinations is accomplished in an expeditious and responsive manner.

*Abstract:* Vegetation management programs and practices on forest lands managed by the Department of Agriculture's Forest Service and the Department of the Interior's Bureau of Land Management were reviewed. The main areas of discussion were the use of herbicides, the controversy over herbicides, the controversy's effect on forest land managers, and the need for both agencies to take actions that would provide better information for making vegetation management decisions. Although it has been shown that nonherbicide methods can be used to control unwanted vegetation in national forests, the extent to which these methods can replace herbicides is not known. Serious information gaps exist relating to the costs of vegetation management methods and their relative effectiveness. Most forests GAO visited had some success with alternatives to herbicides. However, site-specific data were not available to identify why methods had succeeded in one area but not in another. To make sure that options available to carry out site preparation and release work are thoroughly evaluated, the Chief of the Forest Service and the Director of the Bureau of Land Management should: (1) ensure that those forests and districts relying heavily on herbicides increase the use of nonherbicide methods; (2) ensure that adequate site-specific post- and pre-treatment information is gathered and evaluated; (3) develop more objective criteria for determining the need for release; and (4) gather more comprehensive and complete cost data on site preparation and release projects.

*Abstract:* A review was made of the technical evaluations of 18 noncompetitive contract proposals. The objective of the review was to determine if technical evaluations were adequately performed and reported to the contracting officers for use in negotiating the noncompetitive contract prices. GAO found that, contrary to Federal Procurement Regulations (FPR), technical evaluations were not performed for 7 proposals and were not adequately performed for 10 proposals. Of the 10 inadequate evaluations, 5 did not address critical components, such as labor hours, type of labor, and quantity of material, and 5 relied on insufficient data. Generally, the technical evaluators tended to concentrate solely on whether contractors could meet the contract requirements and did not assess whether the number of hours, type of labor, or quantity of materials proposed were reasonable and properly supported. Agencies' officials gave various reasons for not performing technical evaluations, such as inadequate cost of pricing data and confusion on technical evaluations performance responsibility. GAO did not consider the reasons valid since FPR requires the contracting officer to obtain and evaluate cost and pricing data used to support noncompetitive price proposals. Notwithstanding the reasons, the contracts, the value of which totals about $12.4 million, were negotiated without the benefit of technical evaluations needed to assure that the proposed prices were fair and reasonable. The Secretaries of Health and Human Services, Commerce, and Energy, and the Administrator of Veterans Affairs should periodically determine compliance with the requirement to perform technical evaluations and evaluate the adequacy of the evaluations.

*Abstract:* GAO investigated the claim that those cutting and selling timber from public forests may be realizing capital gains benefits without contributing to long-term investments in the land or replacement stands. No source contacted by GAO could provide firm evidence to support this claim. Congress needs much better information to evaluate the effectiveness of existing tax policy. Significant tax expenditures are being made in conjunction with Federal timber sales with no real understanding as to their distributive effect. Significantly different analytical techniques, including a private sector forestry policy model or analytical framework, must be adopted to resolve these issues. There is no adequate estimate of potential timber production on privately owned land. Future assessments should take into account the identification of economically and biologically productive acreage, production of timber within a reasonable distance of existing or potential markets, and whether the owner's objectives support increased timber production. The Secretary of Agriculture should expand the Forest Service's analytical capability to deal with tax policy, financial and technical assistance, and related considerations as they affect the performance of the timber industry in the private sector. The Forest Service should call on the expertise of the Department of the Treasury in analyzing tax policy options and should elicit active collaboration of the forest industry. The Forest Service should refine its data and analysis on the production potential of nonindustrial, privately owned forest lands with the goals of identifying nonindustrial private supplies and analyzing comparative costs and benefits of alternative forms of tax incentives or financial assistance for private, nonindustrial landowners.

**Availability:** GAO
**Geographic Relevance:** National

*Abstract:* The development of building energy performance standards has not been smooth, and problems have surfaced with respect to completeness and ease of implementation. The original legislative deadline for final issuance of standards has not been met. Areas which require more work before a sound energy conservation standard is possible include: (1) basing the methodology used to develop the commercial and multifamily building standards on minimum life-cycle costs; (2) expanding the data base used for the single-family standards to include more cities; (3) basing weighted factors used to account for energy consumed in the refining of fuel and generation of power on local data, not on national averages; (4) developing standards for mobile homes, restaurants, and industrial buildings; (5) developing means for designers, builders, and local code officials to determine if a building complies with the standards; and (6) considering recent improvements in building design practices when updating the estimate of expected energy savings from the standards. GAO believes that the Department of Energy (DOE) should consider whether a voluntary program would be a suitable alternative to the sanctions for noncompliance with the standards which the act contains and which, if imposed, would in effect make them mandatory. Congress should transfer implementation and enforcement responsibility from the Department of Housing and Urban Development to DOE. The Secretary of Energy should: (1) continue to work on improving the standards for the commercial sector so that the basis of the standards is the minimum life-cycle cost to the building owner, as is true for the residential sector; (2) base estimates of energy savings on current construction practices and also, in computing the savings, include the expected amount of noncompliance with the standards; and (3) develop procedures and cost estimates for implementing voluntary building energy performance standards and also estimate the energy savings that could be expected from such a voluntary program.

**Geographic Relevance:** National

*Abstract:* A large segment of the U.S. steel industry has become unable to compete with efficient foreign producers due to high labor costs, inefficiently sized plants, low utilization capacity, and restrictive Government policies. Unfair pricing of steel products in the United States by foreign producers has been alleged to harm U.S. competition in the steel market. If American steel producers are to regain lost domestic consumers, they will need newer and more productive facilities and a more customer-oriented approach to their marketing. An effective policy toward steel ought to represent the Nation's overall objective for the domestic industry's performance and include means for stimulation of competition, assistance in capital formation, and administration of environmental regulations. In establishing a performance goal, factors to be considered are: the point beyond which national security will be compromised if capacity drops; a target market-share for domestic firms; a target ratio of capacity to peak domestic needs; and the extent to which the industry's modernization and expansion needs can be met without depending on Government assistance. Congress should enact legislation requiring the Executive Office of the President to undertake a bi-annual assessment of international steel capacity conditions for the coming 5 to 10 years. These assessments should provide the basis for judging the capability of the domestic steel industry and for identifying policy initiatives to avoid undue risk from foreign supply sources. Congress should enact legislation to define a performance objective for the domestic steel industry, which should serve as a benchmark against which the realism of industry revitalization activity and related Government policy can be assessed. The objective should also be sufficiently stable to give confidence to investors and policy administrators.

**Geographic Relevance:** International/Foreign; National

*Abstract:* GAO found that the foreign tax credit benefits the oil industry by lowering its U.S. tax burden as against the alternative of claiming foreign taxes as a deduction. Eliminating or further restricting the credit could result in a significant financial loss to the industry and could possibly have an adverse impact on the industry's ability to invest. Elimination of the credit would increase these companies' U.S. tax liability. However, this might be offset by other industry actions, such as passing the cost of additional taxes through to consumers or altering the corporate form of exploration and development activity. However, the credit has had little impact on exploration and development activities to date, since taxes are rarely

a deciding factor in foreign investment decisions. It was also concluded that the foreign tax credit does not subsidize overseas activity at the expense of domestic activities. The relatively high tax rates in most countries on oil production and the limitations on the credit make foreign activity more expensive than domestic activity from a tax standpoint. Most evidence on the impact of altering the credit points to a negative but marginal effect on such factors as industry profits, competitive standing, and foreign exploration and development activity. It is doubtful that U.S. energy policy would be either enhanced or hindered in any fundamental way by changes to the foreign tax credit. The merits of the foreign tax credit should be considered primarily on the basis of achieving tax policy objectives. Since the energy impact of changing the credit is small, the credit should not be manipulated for energy policy reasons only. The credit was neither intended to be used for such purposes, nor is it evident that it is an effective energy policy instrument. If tax policy objectives warrant retaining the credit for the oil industry, Congress should consider selective application of the credit to encourage exploration and production activities in non-OPEC areas.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The objective is to provide protection and maintenance of National Forest System. *Abstract:* Numerous factors standing in the way of greater use of wood residues for energy and products include inadequate data, lack of economical and effective equipment, lack of investment capital, and limited awareness and acceptance of wood energy and product technology. The Forest Service and the Department of Energy have made little progress in developing a national wood residue plan. Congress should consider any needed amendments to the Clean Air Act to allow consideration of trade-offs which would reduce technology requirements and improve the economic feasibility of some wood energy facilities. The Secretary of Agriculture and the Secretary of Energy should assess at least six locations around the country, then present to Congress within 2 years a national wood residues plan. The Secretaries should jointly develop methods for evaluating the costs and benefits of using wood fuels in Federal facilities and submit them to the Office of Management and Budget within six months for dissemination to the executive branch. The Secretaries should also encourage the use of wood fuels and the development of residue-handling equipment. Within their respective Departments, the Secretaries should convert all Department facilities to wood fuels where cost effective and evaluate additional opportunities to demonstrate wood-energy technologies at department facilities. The Secretary of Agriculture should: (1) request legislation which would authorize granting private firms either title or licenses to technologies developed wholly or partly with Federal funds; (2) allow the use of long-term contracts to assure that residues from national forests will be available on a continuous basis; (3) demonstrate Forest Service ability to conduct tree measurement sales; and (4) preserve piled logging residues. The Administrator of the Environmental Protection Agency should request legislation to amend the Clean Air Act to allow full recognition of emission trade-offs for wood energy facilities. The Administrator should also encourage the States to modify their policies where needed to recognize such trade-offs. The Secretary of Defense and the Administrator of General Services should provide a major stimulus for wider wood residue use through both facilities conversion and procurement policies.

**Availability:** GAO
**Geographic Relevance:** National

*Program Objectives:* The Interstate Commerce Commission (ICC) has limited authority in freight car service: the use, supply, movement, distribution, exchange, and interchange of equipment. The Federal Railroad Administration also participates in developing Federal policy in such areas as freight car utilization, rail service reliability, and railroad economics. *Abstract:* GAO found that, because the ICC authority is limited and other Federal agencies lack authority over car availability, Federal efforts to improve freight car utilization have not been too successful. As an aid to the industry, the recently approved Staggers Rail Act of 1980 authorizes that Federal funds available to assist railroads can be used for car management systems to improve car utilization. However, the Act will not necessarily make funds available to all railroads that might be interested in such a system. Although shippers have persistently complained of their inability to obtain freight cars on demand, unfilled orders never exceeded 4% of the serviceable fleet from 1973 through 1978. Moreover, data on unfilled car orders are of questionable accuracy, because shippers are thought to inflate their orders during peak demand periods. The railroads could improve utilization and balance distribution by developing and using a computerized, nationwide system of car management. The Federal Railroad Administration (FRA) has

sponsored studies which are informative and appear to offer solutions. The Chairman of ICC should: (1) prescribe specific criteria for issuing emergency car service orders and establish a system to control and evaluate the effects of these orders; (2) study whether penalties induce shippers to release cars faster and whether prompt release results in more efficient use of the cars; and (3) work with the rail industry and FRA to develop the technology and cooperation needed to implement a compatible management information system. The Secretary of the Department of Transportation should direct the Administrator of FRA to continue to develop and demonstrate improved railroad car management and control methods that could be used in a compatible nationwide system and to use available assistance programs to encourage railroads to install and use the systems.

**Nuclear Piles SEE Nuclear Reactors**

**Nuclear Power SEE Nuclear Energy**

**Nuclear Power Plants**
DOE Light Water Reactor Fuel Utilization Improvement Program E01300-009
Economic Impact of Closing the Indian Point Nuclear Facility E01303-001
Followup Review of Health Physics Function E05700-008
Nuclear Plants Maintenance and Fabrication Shops E05700-003
Short-Interval Scheduling E05700-004
Three Mile Island: The Financial Fallout E99900-058
Three Mile Island: The Most Studied Nuclear Accident in History E06200-001
U.S. Fast Breeder Reactor Program Needs Direction E01300-005

**Nuclear Proliferation**
Evaluation of Selected Features of U.S. Nuclear Non-Proliferation Law and Policy E99900-076
Evaluation of U.S. Efforts To Promote Nuclear Non-Proliferation Treaty E99900-021
The Nuclear Non-Proliferation Act of 1978 Should Be Selectivity Modified E99900-016
U.S. Nuclear Non-Proliferation Policy: Impact on Exports and Nuclear Industry Could Not Be Determined E30400-002

**Nuclear Reactors**
Three Mile Island: The Most Studied Nuclear Accident in History E06200-001

**Nuclear Reactor Safety**
Three Mile Island: The Most Studied Nuclear Accident in History E06200-001

**Nuclear Wastes SEE Radioactive Wastes**

**Nuclear Weapons**
Evaluation of U.S. Efforts To Promote Nuclear Non-Proliferation Treaty E99900-021
Most Critical Testing Still Lies Ahead for Missiles in Theater Nuclear Modernization E00400-044
The Nuclear Non-Proliferation Act of 1978 Should Be Selectivity Modified E99900-016

**Numismatics**
Evaluation of the 1980 Gold Medallion Program E01207-002
Study, United States Bullion Depository West Point, New York E01207-004
Use of SCM Electron Microscope and EDAX 9100 Energy Dispersion System for Coin Examinations E01209-002

**Nurses**
Evaluation of HRA Supported Nurse Training and Evaluation Programs in Meeting Needs for Nurses in Hospitals, Nursing Homes and Ambulatory Care Facilities E00506-024
Evaluation of Regional and State Educational Systems Funded under Section 796 of P.L. 94-484 E00506-017
Functioning and Utilization of Nurse Practitioners and Their Impact on Delivery of Health Care E00506-016
A Study for Nurse Practitioner Programs, Students, Graduates and Employers of Nurse Practitioners E00506-014

**Nursing Homes**
Analysis of Proposed New Standards for Nursing Homes Participating in Medicare and Medicaid E00524-023
Evaluation of the 3-Day Waivered Skilled Nursing Facility Demonstration E00524-018
Study of Wisconsin Nursing Home Quality Assurance Project E00524-010

**Nutrition**
- African Women in Development: Ghana Day Care Evaluation Report E17701-066
- Areas Needing Improvement in the Adult Expanded Food and Nutrition Education Program E00224-003
- Comparative Study of Five USDA Food and Nutrition Programs E00224-006
- Evaluation of Expanded Food and Nutrition Education Project E00207-005
- Evaluation of Hyperlipoproteinemia Dietary Manual and Physician's Handbook E00508-053
- Evaluation of the Commodity Supplemental Food Program (Proposed Title) E00207-006
- Evaluation of the Expanded Food Education Program E00224-008
- Evaluation of the Impact of Nutrition Education Programs on Consumer Food Purchases E00508-052
- Evaluation of the Regional Training Workshops for Nutrition Counseling in Hyperlipidemia E00508-016
- Genetic Improvement of Productivity and Nutritional Quality of Wheat E17701-025
- Increasing Livestock Production through Improved Nutrition Information E17701-035
- Morocco: Food Aid and Nutrition Education. AID Project Impact Evaluation Report No. 8 E17701-001
- PL 480 Title II Program: Final Project Evaluation Summary E17701-062
- Report on the Caribbean Regional Food and Nutrition Project E17701-034
- Summary of the Consultants' Report on the Second External Evaluation of the Incap/Rocap Regional Nutrition Project E17701-033

**Nutritional Deficiency SEE Malnutrition**

**Nutrition Surveys**
- Evaluation of Head Start Medical, Dental, and Nutritional Services E00523-005

**Occupational Courses SEE Vocational Education**

**Occupational Diseases**
- Energy Health and Safety Issues Need a Coordinated Approach E01300-004
- Followup Review of Health Physics Function E05700-006
- Occupational Health Inspections and Consultations Generally Appear Adequate E00905-004
- Occupational Safety and Health Program Evaluation(s) E01100-009
- Problems in Assessing the Cancer Risks of Low-Level Ionizing Radiation Exposure E99900-078
- Safety Program Evaluation Report E00200-010

**Occupational Health SEE Occupational Diseases**

**Occupational Safety**
- Data Needs for Evaluation of the OSHA Safety Program E00905-001
- Department of Energy's Safety and Health Program for Enrichment Plant Workers Is Not Adequately Implemented E01306-002
- The Effects of Mine Safety and Health Administration (MSHA) Safety Enforcement on the Cost of Underground Coal Mining E00907-001
- Energy Health and Safety Issues Need a Coordinated Approach E01300-004
- Evaluation Report, Occupational Safety and Health Program Established and Operated by The Alaska Railroad, Anchorage, AK, September 15-26, 1980 E01104-004
- Occupational Health Inspections and Consultations Generally Appear Adequate E00905-004
- Occupational Safety and Health Program Evaluation(s) E01100-009
- Review of FRA Contractors' Conformance to Occupational Safety and Health Administration Standards E01104-005
- Safety Program Evaluation Report E00200-010

**Occupational Satisfaction SEE Job Satisfaction**

**Occupational Training SEE Vocational Education**

**Oceanography**
- Full Development of the Potential of the Ocean Thermal Energy Conversion Program May Be Impeded E01306-004

**Ocean Resources SEE Marine Resources**

**Ocean Transportation SEE Marine Transportation**

**OCR SEE Optical Character Recognition**
